**PINOLE CITY COUNCIL
MEETING AGENDA**

TUESDAY

March 16, 2021

VIA ZOOM TELECONFERENCE

5:00 P.M.

Please note the early start time.

**DUE TO THE STATE OF CALIFORNIA'S DECLARATION OF EMERGENCY – THIS
MEETING IS BEING HELD PURSUANT TO AUTHORIZATION FROM GOVERNOR
NEWSOM'S EXECUTIVE ORDERS – CITY COUNCIL AND COMMISSION MEETINGS ARE
NO LONGER OPEN TO IN-PERSON ATTENDANCE.**

SUBMIT PUBLIC COMMENTS TO CITY BEFORE OR DURING THE MEETING VIA EMAIL

comment@ci.pinole.ca.us

Comments received before the close of the public comment period for that item will be read into the record and limited to 3 minutes. Please include your full name, city of residence and agenda item you are commenting on. Any comments received after the close of the public comment period will be distributed to Council and relevant staff after the meeting and filed with the agenda packet.

WAYS TO WATCH THE MEETING

LIVE ON CHANNEL 26. They are retelecast the following Thursday at 6:00 p.m. The Community TV Channel 26 schedule is published on the city's website at www.ci.pinole.ca.us.

VIDEO-STREAMED LIVE ON THE CITY'S WEBSITE, www.ci.pinole.ca.us, and remain archived on the site for five (5) years.

If none of these options are available to you, or you need assistance with public comment, please contact the City Clerk, Heather Iopu at (510) 724-8928 or hiopu@ci.pinole.ca.us.

Americans With Disabilities Act: In compliance with the Americans With Disabilities Act of 1990, if you need special assistance to participate in a City Meeting or you need a copy of the agenda, or the agenda packet in an appropriate alternative format, please contact the City Clerk's Office at (510) 724-8928. Notification at least 48 hours prior to the meeting or time when services are needed will assist the City staff in assuring that reasonable arrangements can be made to provide accessibility to the meeting or service.

Note: Staff reports are available for inspection on the City Website at www.ci.pinole.ca.us. You may also contact the City Clerk via e-mail at hiopu@ci.pinole.ca.us.

Ralph M. Brown Act. Gov. Code § 54950. *In enacting this chapter, the Legislature finds and declares that the public commissions, boards and councils and the other public agencies in this State exist to aid in the conduct of the people's business. It is the intent of the law that their actions be taken openly and that their deliberations be conducted openly. The people of this State do not yield their sovereignty to the agencies, which serve them. The people, in delegating authority, do not give their public servants the right to decide what is good for the people to know and what is not good for them to know. The people insist on remaining informed so that they may retain control over the instruments they have created.*

1. CALL TO ORDER & PLEDGE OF ALLEGIANCE IN HONOR OF THE US MILITARY TROOPS

2. ROLL CALL, CITY CLERK'S REPORT & STATEMENT OF CONFLICT

An official who has a conflict must, prior to consideration of the decision: (1) publicly identify in detail the financial interest that causes the conflict; (2) recuse himself /herself from discussing and voting on the matter; and (3) leave the room until after the decision has been made, Cal. Gov't Code § 87105.

11. REPORTS & COMMUNICATIONS

- A. Mayor Report
1. Announcements

Mayor Martinez-Rubin thanked department heads and city staff for their hard work. Wished the public a happy and safe holiday season.

Public comment taken out of order for Item 7D: The following speakers submitted written comments that were read aloud and will be filed with the agenda packet for this meeting: **Janice Wall**

B. Mayoral & Council Appointments

C. City Council Committee Reports & Communications

Council member Murphy thanked the city staff for all their support during the onboarding process. Announced upcoming MCE board meetings. Announced that he welcomes and is available for public engagement and wished everyone happy holidays.

City Council member Toms announced current Covid-19 case statistics. Encouraged the community to support restaurants by ordering food for take-out.

Council member Salimi announced his attendance at the WCCTAC meeting; announced that they are going to redefine the “community of concern” in the next study to include Pinole. Announced upcoming meeting with the Contra Costa Water District and attendance at the meeting of the Contra Costa 350.

D. Council Requests for Future Agenda Items

Council member Tave requested an update regarding property negotiations for surplus properties. City Manager Murray announced upcoming closed session planned to discuss these on February 9, 2021.

Council member Salimi requested an item to discuss hiring a full-time economic development position. Mayor Martinez-Rubin and City Manager Murray provided the update that this request will be addressed as part of the organizational assessment which is in progress.

Council member Murphy requested a future agenda item to discuss the City’s public restroom policy. City Manager Murray and Director Miller advised that this would be referred to the Community Services Commission for a recommendation that could then come back to Council for review.

Council member Murphy requested a future agenda item to have an update regarding the progress of the Beautification Ad Hoc Committee workplan that was presented in October 2020. City Manager Murray announced that this would be addressed in the upcoming budget process.

E. City Manager Report / Department Staff

City Manager announced upcoming city-sponsored virtual and distanced holiday events coming up. More information can be found on the City’s website and Facebook page.

F. City Attorney Report

City Attorney Casher expressed gratitude to the staff and wished all happy holidays.

12. ADJOURNMENT to the Regular City Council Meeting of January 19, 2021 In Remembrance of Amber Swartz.

Return to Agenda

At 9:71 p.m. Mayor Martinez-Rubin adjourned the meeting to the Regular City Council Meeting of January 19, 2021 In Remembrance of Amber Swartz.

Submitted by:

Heather Iopu, CMC
City Clerk

Approved by City Council:

SPECIAL CITY COUNCIL MEETING
MINUTES

CITY COUNCIL REPORT

7C

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCIL MEMBERS

FROM: HEATHER IOPU, CITY CLERK

SUBJECT: PLACEMENT OF LIENS FOR DELINQUENT UNPAID WASTE COLLECTION CHARGES FALLING DELINQUENT BETWEEN AUGUST 2020 AND DECEMBER 2020, CONSIDERED AT AN ADMINISTRATIVE HEARING ON FEBRUARY 4, 2021

RECOMMENDATION

It is recommended that the City Council adopt a resolution authorizing the placement of liens for the purpose of collecting outstanding payments for garbage collection services pursuant to PMC Section 8.08.110 (b) and (c).

BACKGROUND

Pursuant to Section 8.08 of the Pinole Municipal Code, an administrative hearing was held on February 4, 2021 regarding unpaid garbage collection services that fell delinquent between August 2020 and December 2020. No parties attended the hearing to protest the charges. The administrative hearing was the final step in the process to collect the delinquencies, prior to Council approval to place liens on the subject properties to recover the full amount owed, including delinquent charges and administrative fees.

FISCAL IMPACT

The City of Pinole receives an administrative recovery charge for each lien at the time of tax settlement or payment of the lien. There are 110 properties on which liens are being imposed, representing a total of \$39,988.74 in delinquent service charges. The total administrative recovery fee is \$60 per lien; a portion of which is remitted to Contra Costa County. The administrative recovery fees are \$6,600.00; the total lien amount including recovery fees are \$46,588.74.

Following approval by Council, a revised list will be provided to the City Clerk for recording, removing properties where accounts have been brought current since the publication of this report.

A. Resolution

RESOLUTION NO. 2021-XX

**RESOLUTION OF THE CITY COUNCIL OF PINOLE, CALIFORNIA, PLACING LIENS
ON PROPERTIES SITUATED IN THE CITY OF PINOLE, COUNTY OF CONTRA
COSTA, STATE OF CALIFORNIA, MORE PARTICULARLY DESCRIBED AS
UNPAID WASTE COLLECTION CHARGES FROM AN ADMINISTRATIVE HEARING
CONDUCTED FEBRUARY 4, 2021**

WHEREAS, pursuant to the Municipal Code of the City of Pinole, Chapter 8.08, Section 8.08.090, subscription to garbage collection service is required for all premises in the City of Pinole, and the premises described in Exhibit "A" located in the City of Pinole, County of Contra Costa, State of California, were provided with garbage collection services as required by PMC, Chapter 8.08; and

WHEREAS, pursuant to the provisions of Section 8.08.110, the owners of said premises were notified in writing of their requirement to subscribe to and make payment for garbage collection services as provided in said Code Section; and

WHEREAS, the owners of the premises failed to make payment for garbage collection services as required (collection charges fell delinquent between August 2020 and December 2020); and

WHEREAS, pursuant to the provisions of Section 8.08.110, a hearing was held on February 4, 2021; and

WHEREAS, as a result thereof, the City of Pinole has incurred expenses for delinquent collection charges and administrative costs as enumerated in Exhibit "A"*, which amounts remain unpaid.

NOW THEREFORE BE IT RESOLVED that pursuant to Section 8.08.110 of the Municipal Code of the City of Pinole, the City Council of the City of Pinole does hereby place a lien against said premises for the amounts as described above and as applicable to each specific premise identified as Exhibit "A" attached hereto and, by this reference, incorporated herein; and

BE IT FURTHER RESOLVED that the City Clerk is hereby directed to record this resolution with the Office of the Recorder of Contra Costa County, California.

PASSED AND ADOPTED this 16th day of **March 2021**, by the following vote:

AYES: COUNCILMEMBERS:
NOES: COUNCILMEMBERS:
ABSENT: COUNCILMEMBERS:
ABSTAIN: COUNCILMEMBERS:

I, hereby certify that the foregoing resolution was regularly introduced, passed, and adopted on this 16th day of March 2021..

Heather Iopu, CMC
City Clerk

* Exhibit A is not included as an attachment to this resolution that is posted on the City website or disseminated as part of the City Council Agenda Packet. The names of the individuals are confidential until the liens are recorded and become public record.

**CITY COUNCIL
REPORT****7D****DATE: MARCH 16, 2021****TO: HONORABLE MAYOR AND COUNCIL MEMBERS****FROM: ERIC CASHER, CITY ATTORNEY****BY: ALEX MOG, ASSISTANT CITY ATTORNEY****SUBJECT: RESOLUTION CONFIRMING CONTINUED EXISTENCE OF LOCAL
EMERGENCY**

RECOMMENDATION

Staff recommends that the City Council adopt a resolution confirming the continued existence of a local emergency.

BACKGROUND & DISCUSSION

On March 18, 2020, the City Manager, acting as Director of Emergency Services, proclaimed a local emergency pursuant to California Government Code Section 8630 and Pinole Municipal Code Chapter 2.32. The emergency declaration was based on public health and safety concerns for persons and property within the City as a consequence of the global spread of novel coronavirus 2019 ("COVID-19"), including confirmed cases in Contra Costa County, as well as, the Contra Costa County Department of Health's shelter in place order dated March 16, 2020. The City Council subsequently adopted a resolution affirming the City Manager's emergency declaration.

The California Emergency Services Act requires the City Council to review the need for continuing the local emergency at least once every 60 days. Although the local emergency does not end until terminated by the City Council, the Pinole Municipal Code requires the City Council to review the need for continuing the local emergency every 14 days. The City Council has confirmed the continued existence of the local emergency multiple times since the emergency was first declared, most recently on March 2, 2021.

The trends regarding the spread of COVID-19 have been positive in recent weeks, and virus is spreading slower than at any point since late October. There have now been over 64,000 cases of COVID-19 within the County and approximately 710 deaths. This is an increase in new cases of approximately 3.5% in the last two weeks. In Pinole, the rate of new cases over the last 14 days is approximately 160 new cases per 100,000 people. That rate is approximately 50% lower than the rate

that existed two weeks ago, and 25% lower than the rate that existed six weeks ago. This rate is in the middle third of cities in Contra Costa County.

There has also been progress on the administration of the COVID-19 vaccine, with the rate of inoculation increasing. The County estimates that approximately 28% of residents over the age of 16 have now received the first dose of the vaccine. However, it will likely be months before most of the population has receives a vaccine. The County has a current goal of vaccinating 1 million people by July 4, and approximately 400,000 people in the County have already been vaccinated. Although vaccine supply is still limited, the vaccine administration rate is increasing. Over 100,000 people have been vaccinated in the last 2 weeks.

Additional statistical information regarding COVID-19 within the County is available on the County's website at <https://www.coronavirus.cchealth.org/overview>. Additional health information regarding COVID-19, including vaccines, is available from the County's COVID-19 website at <https://www.coronavirus.cchealth.org/>. Information specific to the City of Pinole is available on the City's website at https://www.ci.pinole.ca.us/city_government/coronavirus_covid_19.

As of the time of publication of the agenda for this meeting, Contra Costa County remains within the "widespread" tier in the State's four tier blueprint for a safer economy due to the significant prevalence of COVID-19. The "widespread" tier, also known as the purple tier, is the strictest tier. This means that the State considers COVID-19 to be a serious risk to public safety. Many activities remain prohibited or subject to strict restrictions. Even if the County moves out of the "widespread" tier, it will still be within the next most strict tier, the "substantial" tier.

Public health and safety concerns for persons and property within the City as a consequence of the global spread of novel coronavirus 2019 continue to exist.

If the proposed resolution is adopted, the City Council will confirm the continued existence of the local emergency. In accordance with state law and the Municipal Code, the City Council will review the emergency declaration periodically until the conditions warrant a termination of the emergency declaration.

FISCAL IMPACT

There is no direct fiscal impact from the adoption of the resolution ratifying a local emergency. However, the City will consider all options available to seek reimbursement for indirect expenses and fiscal impacts through the appropriate authorities.

A. Resolution Confirming Continued Existence of Local Emergency

3708931.1

RESOLUTION NO. 2021-XX

**RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PINOLE
CONFIRMING THE CONTINUED EXISTENCE OF A LOCAL EMERGENCY DUE
TO COVID-19**

WHEREAS, Government Code Section 8630 and Pinole Municipal Code Section 2.32.060 authorize the Director of Emergency Service to proclaim a local emergency when conditions of disaster or extreme peril to the safety of persons and property within the territorial limits of a city exist if the City Council is not in session and provides that the City Council shall ratify the proclamation within seven days thereafter; and

WHEREAS, in accordance with Government Code Section 8630 and Pinole Code Section 2.32.060, the Director of Emergency Services proclaimed the existence of a local emergency caused by the Novel Coronavirus (COVID-19), a respiratory disease first identified in China that may result in serious illness or death that is easily transmissible from person to person, on March 18; and

WHEREAS, on March 24, the City Council ratified and confirmed the proclamation of the existence of a local emergency issued by the Director of Emergency Services; and

WHEREAS, pursuant to Government Code Section 8630 and Pinole Municipal Code Section 2.32.060, the City Council must periodically review the need for continuing the local emergency; and

WHEREAS, the conditions that prompted the original declaration of a local emergency continue to exist; and

WHEREAS, the recitals contained in Resolution No. 2020-13, adopted by the City Council on March 24, are incorporated into this Resolution as if stated herein; and

WHEREAS, while the rate of new cases of COVID-19 is decreasing throughout California, including within Contra Costa County, the rate remains high; and

WHEREAS, there have now been over 64,000 cases of COVID-19 and approximately 660 deaths within the County, an increase of approximately 3.5% in the last 2 weeks; and

WHEREAS, the rate of new cases in Pinole over the last 14 days is approximately 160 per 100,000 people, which is 50% of the rate as two weeks ago, but still significantly higher than over the summer; and

WHEREAS, although the Governor recently lifted his Regional Shelter In Place Order, Contra Costa County remains within the “widespread” tier in the State’s four tier blueprint for a safer economy due to the significant prevalence of COVID-19; and

WHEREAS, although administration of the COVID-19 vaccine has begun, less than 30% of the adult population has been vaccinated and it will be months before most of the population has receives a vaccine; and

WHEREAS, the public health and safety concerns for persons and property within the City as a consequence of the global spread of COVID-19 continue to exist; and

WHEREAS, in order to prevent the spread of COVID-19, the City and its residents must continue to take serious precautions; and

WHEREAS, the health, safety, and welfare of Pinole residents, businesses, visitors, and staff is of utmost importance to the City and additional future measures may be needed to protect the community; and

WHEREAS, the City may require additional assistance in the future, and a formal declaration of emergency allows the City to access resources in a timely manner in a timely fashion; and

WHEREAS, the City Council finds that conditions of extreme peril to the safety of persons and property within the territorial limits of the City related to COVID-19 pandemic continue in existence; and

WHEREAS, the City Council finds that extraordinary measures are required to protect the public health, safety, and of persons and property within the City that are or are likely to be beyond the control or capability of the services, personnel, equipment, and facilities of the City; and

WHEREAS, the City Council have continued existence of a local emergency periodically since it was first declared on March 18, 2020; and

WHEREAS, the City Council desires to confirm the continued existence of a local emergency within Pinole due to COVID-19.

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Pinole hereby declares as follows:

1. The local emergency declared by Resolution No. 2020-13 due to the COVID-19 Pandemic continues to exist within the City of Pinole.
2. During the existence of the declared local emergency, the powers, functions, and duties of the City Manager, acting as Director of Emergency Services, and the emergency organization of this City shall be those prescribed by State law and by ordinances and resolutions of the City of Pinole.
3. The declaration of local emergency shall remain in effect until such time that the Council determines that the emergency conditions have been abated.

PASSED AND ADOPTED at a regular meeting of the Pinole City Council held on the 16th day of March, 2021, by the following vote:

AYES: COUNCILMEMBERS:

NOES: COUNCILMEMBERS:

ABSENT: COUNCILMEMBERS:

ABSTAIN: COUNCILMEMBERS:

I hereby certify that the foregoing resolution was introduced, passed, and adopted on the 16th day of March, 2021.

Heather Iopu, CMC
City Clerk

3708936.1

CITY COUNCIL REPORT

7E

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCILMEMBERS

FROM: HECTOR DE LA ROSA, ASSISTANT CITY MANAGER

SUBJECT: HOUSING SUCCESSOR ANNUAL REPORT FOR FISCAL YEAR 2019-20

RECOMMENDATION

Staff recommends that the City Council receive the Housing Successor Agency Annual Report for Fiscal Year ("FY") 2019-20 to be submitted to the California Department of Housing and Community Development ("HCD").

BACKGROUND

The City of Pinole ("City") is the Housing Successor Agency ("Housing Successor") to the former Redevelopment Agency of the City of Pinole ("Agency"), which was dissolved on February 1, 2012. State law requires that the City prepare an annual report on Housing Successor finances and activities as set forth in Health and Safety Code Section 34176.1.

The annual report is required to contain: (1) a summary of Housing Successor activities; (2) the balance of the Low- and Moderate-Income Housing Asset Fund ("Housing Asset Fund"); (3) an inventory of properties held in the Housing Asset Fund; and (4) reports on the City's performance thus far in meeting requirements of Health and Safety Code Section 34176.1.

The report is due to HCD by April 1st each year and must be posted on the City's website and distributed to the City Council.

REVIEW AND ANALYSIS

The City is meeting all requirements imposed by Health and Safety Code Section 34176.1. The City's progress on major requirements is summarized below.

Housing Asset Fund Activity

As of June 30, 2020, the Housing Asset Fund had a balance of approximately \$7.8 million, of which \$2.3 million is cash and the remainder is non-cash assets. Annual revenues totaled \$107,993, primarily from investment income and the repayment of first-time homebuyer and residential rehabilitation loans issued by the former Agency.

There were \$101,149 in Housing Asset Fund expenditures in FY 2019-20 for administrative items, such as legal and professional services, building maintenance and utilities, housing compliance monitoring, and staff costs for time related to Housing Successor administration.

Real Property Assets and Loans Receivables

As of June 30, 2020, the City owned four Housing Successor properties with a value of \$1.2 million:

- 811 San Pablo Avenue - The Housing Successor has entered into an Exclusive Negotiation Agreement (ENA) with Satellite Affordable Housing Associates ("SAHA") to develop this property with 33 units of housing affordable to extremely low to low-income households. The majority of the units will be restricted for veterans by State and federal funding sources. Negotiations to enter into a Disposition and Development Agreement ("DDA") should be complete by the end of FY 2020-21. Construction is estimated to be complete by January 2024. The Housing Successor plans to commit \$2 million in Housing Asset Funds plus land toward this development. The Housing Asset Fund and land contribution will be structured as a residual receipts loan.
- Collins House at 612 Tennent Avenue - The Housing Successor listed this property for sale in September 2020 and is currently negotiating with a prospective buyer. Staff expects the property to be sold by the end of FY 2020-21. All sales proceeds will be deposited into the Housing Asset Fund as required by law.
- Two properties (Grove Vacant Land and Faria House Vacant Land) are restricted as open space and cannot be developed.

The Housing Asset Fund has approximately \$4.3 million in loans receivable. The most significant is a \$4,291,575 loan that was provided from the former Agency's affordable housing fund to the Agency general fund, then subsequently provided to the State to pay amounts due to the Supplemental Educational Revenue Augmentation Fund ("SERAF"). Staff expects that the Housing Asset Fund will begin receiving repayments of this loan through the Recognized Obligation Payment Schedule in FY 2020-21 and anticipates complete repayment within three years.

Additionally, the City has approximately \$357,108 in outstanding First-Time Homebuyer Loans and Housing Rehabilitation Loans. The First-Time Homebuyer and Housing Rehabilitation Loans have different maturity dates ranging from 2022 through 2099.

Expenditure Proportionality Requirements

Expenditures from the Housing Asset Fund must meet specific proportionality requirements by income level and age:

- Administrative and monitoring expenses have an annual maximum limit, which was \$275,682 in FY 2019-20. Pinole spent \$101,149 on administration and monitoring in FY 2019-20, which is well below the limit. The annual administrative limit is calculated based on 5% of the Housing Successor's real property and loans receivable portfolio (\$5,513,645 in FY 2019-20); the limit changes each year based on the portfolio value.
- Up to \$250,000 may be spent annually on homeless prevention and rapid rehousing solutions for homelessness. No Housing Asset Funds have been spent on this category to date in order to prioritize funding for affordable housing development. Pinole had a homeless population of 7 based on the 2020 point-in-time homeless count.
- If Housing Asset Funds are spent on housing development projects or programs, specific income levels must be assisted within a five-year compliance period (see Appendix 1 of report for more details). FY 2019-20 marks the beginning of the second five-year compliance period of January 1, 2019 through June 30, 2024. Pinole did not spend any Housing Asset Funds on housing development projects or programs in FY 2019-20. Staff will ensure income targets are met with any future expenditures, including any expenditures toward the development of affordable housing at 811 San Pablo Avenue.
- Housing Asset Funds may not assist senior rental housing units if more than 50% of rental housing units assisted by the City or the former Agency in the prior 10 years were restricted to seniors. In the prior ten years, the City and former Agency assisted one affordable housing development with 70 units, all of which are restricted to seniors. The property was assisted in FY 2011-12 before the Housing Successor limits were enacted into law. The City may not use Housing Asset Funds to assist additional senior rental units until FY 2021-22.

The City is meeting all Housing Asset Fund requirements and will continue to ensure compliance with future expenditures, particularly with the future development of 811 San Pablo Avenue.

Excess Surplus

Housing successors are subject to the same excess surplus requirement as former redevelopment agencies. Excess surplus is a cash balance that is equal to the greater of \$1 million or the sum of all cash deposits to the Housing Asset Fund in the prior four years. Housing successors must spend or encumber any excess surplus within three fiscal years or transfer its excess surplus to HCD to spend on statewide housing programs. The intent of the law is to encourage housing successors to spend available affordable housing funds on a timely basis.

At the end of FY 2019-20 the Housing Successor accrued an excess surplus of \$536,520. This amount will need to be expended or encumbered by June 30, 2023 to avoid forfeiting funds to HCD. The Housing Successor did not accrue an excess surplus in prior years. The Housing Successor expects the excess surplus will be eliminated by the end of FY 2020-21 after entering into a DDA encumbering \$2 million in Housing Asset Funds toward affordable housing development at 811 San Pablo Avenue.

FISCAL IMPACT

There are no implications of receiving and filing this annual report on the City's activities as the Housing Successor Agency.

INTRODUCTION

This Housing Successor Agency Annual Report (“Annual Report”) presents information on Fiscal Year (“FY”) 2019-20 expenditures and activities as required by Health and Safety Code (“HSC”) Section 34176.1(f), including but not limited to a housing successor’s compliance with certain expenditure activities over the year as well as a five-year planning period. This Annual Report is required of any housing successor to a former redevelopment agency.

CITY OF PINOLE AS HOUSING SUCCESSOR

The City of Pinole (“City”) is the housing successor (the “Housing Successor”) to the former Redevelopment Agency of the City of Pinole (the “Agency”), which was dissolved statewide in 2012. At the time of dissolution, a housing successor was to be selected to transfer and be responsible for the remaining assets and liabilities of a former redevelopment agency.

This Annual Report is an addendum to the City’s Housing Element Annual Progress Report. Both are due to the California Department of Housing and Community Development (“HCD”) by April 1 annually. The Housing Successor’s FY 2019-20 audited financial statements have been posted on the City website and are incorporated herein by reference.

SCOPE OF THIS HOUSING SUCCESSOR ANNUAL REPORT

This Annual Report is limited to the City’s activities as it relates to its role as a housing successor. This may include, but is not limited to, financial activities, property disposition, loan administration, monitoring of covenants, and affordable housing development. This Annual Report describes compliance with various annual, five-year, and ten-year housing expenditure and production requirements. FY 2019-20 is the first year of the current five-year compliance period for income proportionality, which begins July 1, 2019 and ends June 30, 2024.

ASSETS TRANSFERRED TO THE HOUSING SUCCESSOR

Upon the statewide dissolution of redevelopment in 2012, all rights, powers, committed assets, liabilities, duties, and obligations associated with the affordable housing activities of the former Agency were transferred to the Housing Successor. As one of its first duties as a housing successor, the Housing Successor prepared and submitted to the California Department of Finance (“DOF”) an inventory of

housing assets to be transferred from the former Agency. The inventory was enumerated on a Housing Asset Transfer Form (“HAT”) which included:

1. Real properties;
2. Personal property;
3. Low and Moderate Income Housing Fund encumbrances;
4. Loans/Grants Receivable;
5. Rents/Operations; and
6. Deferrals.

All items on the HAT were reviewed and ultimately approved by DOF on February 15, 2013. A copy of the HAT is provided as Appendix 1. The City, acting as Housing Successor, transferred these assets to the Low and Moderate Income Housing Asset Fund (“Housing Asset Fund”, Fund 285). Approval of the HAT set in motion a series of obligations by the City as a housing successor, as described in the following section.

BACKGROUND

This Section summarizes the legal requirements for use of housing successor assets that are addressed in this Annual Report.

LEGAL REQUIREMENTS PERTAINING TO HOUSING SUCCESSORS

A year after dissolution of redevelopment began, the California State Legislature recognized the need to regulate and provide transparency on the use of the housing activities transferred from a former redevelopment agency. Senate Bill 341 (DeSaulnier, 2013) and subsequent legislation enacted several requirements for housing successor agencies contained in HSC Sections 34176-34176.1.

In general, housing successors must comply with three major requirements pursuant to HSC Section 34176.1:

1. Housing Successor expenditures and housing production are subject to income and age targets.
2. Housing successors may not accumulate an “excess surplus,” or a high balance based on certain thresholds.

3. Properties must be developed with affordable housing or sold within five to ten years of being approved for transfer from the former redevelopment agency to the housing successor.

Appendix 2 provides a detailed summary of the reporting requirements that are addressed in this Annual Report.

PERMITTED USES OF HOUSING ASSET FUNDS

Pursuant to HSC Section 34176.1, Housing Asset Funds may be spent on:

- **Administrative costs** for operation of the housing successor agency. The law allows a housing successor to spend the greater of:
 - o \$200,000 per year adjusted for inflation (\$229,400 for FY 2019-20), or
 - o 5% of the statutory value of real property owned by that housing successor and the value of loans and grants receivable from the HAT (“Portfolio”).

Pinole’s administrative cost limit for FY 2019-20 is \$275,682, which is 5% of the Portfolio balance of \$5,513,645.

- **Homeless prevention and rapid rehousing services** up to \$250,000 per year if the former redevelopment agency did not have any outstanding inclusionary housing or replacement housing production requirements as of 2012. Pinole is eligible for this expense because the former Agency did not have any outstanding inclusionary or replacement housing requirements upon dissolution.
- **Affordable housing development** assisting households earning up to 80 percent of the Area Median Income (“AMI”), subject to specific income and age targets over a five-year period.

Five-Year Income Proportionality on Development Expenditures: Housing Asset Funds may be spent on development of housing projects affordable to low, very low, and extremely low income households. “Development” is defined as “new construction, acquisition and rehabilitation, substantial rehabilitation as defined in HSC Section 33413, the acquisition of long-term affordability covenants on multifamily units as described in HSC Section 33413, or the preservation of an assisted housing development that is eligible for prepayment or termination or for which within the expiration of rental restrictions is scheduled to occur within five years.”

Over each five-year compliance period, at least 30 percent of such development expenditures must assist extremely low income households (30% AMI), while no more than 20 percent may assist low income households (between 60-80%). The balance of the funds may be used on households earning between 30% and 60% of AMI.

The first five-year compliance period was January 1, 2014 through June 30, 2019. The Housing Successor was compliant with Housing Asset Fund income proportionality expenditure requirements during the first five-year compliance period. The second, and current, five-year compliance period is July 1, 2019 to June 30, 2024.

Note that housing successors must report expenditures by category each year, but compliance with income proportionality limits is measured every five years. For example, a housing successor could spend all its funds in a single year on households earning between 60-80% AMI, as long as it was 20 percent or less of the total expenditures during the five-year compliance period.

Should a housing successor not spend at least 30% of its development expenditures assisting extremely low income households, or exceed the amount spent on low income households, future expenditures are subject to greater restriction until these proportionality targets are met. Specifically, if a housing successor is unable to spend at least 30% of its development expenditures on extremely low units, it is required to increase this spending to 50% until compliant with the 30% threshold; a housing successor that spends more than 20% of its development expenditures on low income units cannot spend any further funds on low income developments until it is at or below the 20% threshold.

As such, tracking these expenditures and their progress over the corresponding five-year period is an important function of this Annual Report.

Ten-Year Age Proportionality on Units Assisted: If more than 50% of the total aggregate number of rental units produced by the city, housing successor, or former redevelopment agency during the past 10 years are restricted to seniors, the housing successor may not spend more Housing Asset Funds on senior rental housing. The Housing Successor is currently over the 50% limit and may not spend Housing Asset Funds on senior housing until after FY 2021-22 or when 70 non-senior rental units are assisted, whichever comes first (see Table 3).

Appendix 3 describes Housing Asset Fund Expenditure requirements in more detail including the types of costs eligible in each category.

LIMITS ON THE ACCUMULATION OF HOUSING FUNDS (EXCESS SURPLUS)

State law limits how much cash a housing successor may retain and, if it fails to commit and spend these dollars in a reasonable timeframe, ultimately penalizes the housing successor by requiring unspent funds to be transferred to HCD for use on State housing programs.

HSC Section 34176.1(d) establishes a limit, known as an “excess surplus” on the amount of unencumbered Housing Asset Funds based on the greater of the following:

- \$1,000,000, or
- The total amount of deposits made into the Housing Asset Fund over the preceding four years.

Only amounts in excess of this threshold are considered an excess surplus. Once an excess surplus is determined, a housing successor must account for these funds separately and encumber said monies within three years. If after the third year the excess surplus has not been fully encumbered, the remaining balance of the excess surplus is to be transferred to HCD within 90 days. HCD is permitted to use these transferred excess surplus funds anywhere in the State under its Multifamily Housing Program or the Joe Serna, Jr. Farmworker Housing Grant Program.

The concept of excess surpluses carries over from the era prior to dissolution of redevelopment, when redevelopment agencies often were receiving substantial amounts of deposits from the mandatory housing set-aside of 20% of tax increment revenues.

As part of the Annual Report, a housing successor must disclose any excess surplus and describe the housing successor’s plan for eliminating this excess surplus.

HOUSING ASSET FUND ACTIVITY

The following section describes the Housing Asset Fund activities in FY 2019-20.

DEPOSITS AND FUND BALANCE

The Housing Successor deposited \$107,933 into the Housing Asset Fund in FY 2019-20, as shown in Figure 1. Revenue sources consist of investment earnings from interest allocations, loan repayments from first-time homebuyer and residential rehabilitation loans issued by the former Agency, and miscellaneous revenues.

EXPENDITURES

The Housing Successor expended a total of \$101,149 during FY 2019-20. All of these expenditures were for Housing Successor administration including professional services and utilities. The total administrative costs of \$101,149 are within the FY 2019-20 limit of \$275,682. The Successor Agency will continue to keep its administrative costs within the limit pursuant to HSC Section 34176.1.

ENDING CASH AND FUND BALANCE

The Housing Asset Fund balance as of June 30, 2020 was \$7,819,765, as summarized in Table 1. Of this amount, \$2,305,697 was cash.

Table 1
Housing Asset Fund Ending Balance FY 2019-20

Balance Type	Gross Balance
Cash	2,305,697
Miscellaneous Receivable	423
Notes Receivable	3,815,955
Allowance for Uncollectable Notes	(3,815,955)
Loans Receivable	357,108
Allowance for Uncollectable Loans	(357,108)
Land Held for Resale	1,222,070
Due from RDA Successor Agency	4,291,575
Ending Balance	\$ 7,819,765

HOUSING SUCCESSOR PORTFOLIO

The Housing Successor Portfolio includes real properties and notes and loans receivable transferred from the former Agency. The Portfolio had a value of \$5,513,645 as of FY 2019-20, as detailed in Table 2.

Table 2 Portfolio Value of Real Properties and Loans Receivable	
Asset	Amount
Land Held for Resale	
Grove Land (Samuel Street)	62
Faria House Land (2100 San Pablo Ave)	355,000
Collins Housing (612 Tennent Ave)	625,000
Vacant Land (811 San Pablo Ave)	242,008
<i>Subtotal</i>	<i>\$1,222,070</i>
Notes Receivable	
Bridge Housing Note	1,010,763
Alvarez Court Note	1,733,457
East Bluff Note	1,071,735
Allowance for uncollectable notes	(3,815,955)
<i>Subtotal</i>	<i>\$0</i>
Loans Receivable	
First-Time Homebuyer Loans	297,205
Housing Rehab Loans	59,903
SERAF Loan	4,291,575
Allowance for uncollectable loans	(357,108)
<i>Subtotal</i>	<i>\$4,291,575</i>
Total Portfolio Value	\$5,513,645

Source: City of Pinole

Note: Allowance for uncollectable notes to account for residual receipt loans that are only payable if there is enough net cash flow after paying other expenses and debts for each property.

REAL PROPERTIES AND DISPOSITION STATUS

The former Agency transferred five properties to the Housing Successor as approved on the HAT:

- Grove Vacant Land (Samuel Street) – Pursuant to a Development and Disposition Agreement, this property is required to remain vacant as open space for an adjacent property. The property has a steep slope and cannot be developed, therefore there are no plans for its disposition.
- Faria House Vacant Land (2100 San Pablo Avenue) – This 2.3-acre parcel of vacant land is park land in which the Faria House resides. There are no plans for the property's disposition due to its park land restrictions.

- Collins House (612 Tennent Avenue) – The Housing Successor listed this property for sale in September 2020 and is currently negotiating its sale. The Housing Successor expects the property will be sold by the end of FY 2020-21. All sales proceeds will be deposited into the Housing Asset Fund as required by law.
- Vacant Land (811 San Pablo Avenue) – The Housing Successor has entered into an Exclusive Negotiation Agreement with Satellite Affordable Housing Associates (“SAHA”) to develop this property with 33 units of housing affordable to extremely low income to low income households. The City is negotiating a Disposition and Development Agreement (“DDA”) to provide \$2 million in Housing Asset Fund assistance and sell the property to SAHA at its appraised value. City Council previously identified a preference for the development to assist veterans. The majority of units will be restricted for veterans by State and Federal funding sources proposed to finance the project. A DDA will be brought to City Council for its consideration before the end of FY 2020-21. Construction is estimated to be completed in January 2024.

HSC Section 34176.1(e) requires all real properties acquired by a redevelopment agency prior to February 1, 2012 and transferred to the housing successor to be developed with affordable housing or sold within five to ten years of DOF’s approval of the HAT, or February 15, 2023. The City extended the deadline from February 15, 2018 to February 15, 2023, by action of the City Council on November 21, 2017 as permitted by law. The City expects to comply with this disposition timeline for 612 Tennent Avenue and 811 San Pablo Avenue. The Grove Vacant Land and Faria House vacant land are exempt from this requirement due to their contractual land use restrictions.

LOANS RECEIVABLE

The Housing Asset Fund has approximately \$4.3 million in loans receivable as described below.

- The Supplemental Educational Revenue Augmentation Fund (“SERAF”) loan receivable of \$4,291,575 is for an amount due to the Housing Successor payable from Redevelopment Property Tax Trust Funds (“RPTTF”) due from the Successor Agency to the Redevelopment Agency to the City of Pinole (“Successor Agency”). Staff expects the Successor Agency will begin repaying this loan with a \$1.75 million payment in FY 2021-22. Staff estimates the total outstanding balance will be repaid within three years based on legal restrictions on the maximum annual repayment amount.

Outstanding First-Time Homebuyer Loans and Housing Rehabilitation Loans in the amount of \$357,108. These loans have different maturity dates ranging from 2022 through 2099. Appendix 4 provides an inventory of outstanding loans.

COMPLIANCE WITH EXPENDITURE & PRODUCTION LIMITS

During FY 2019-20, the City was in compliance with all annual and five- to ten-year planning period requirements as described in this section.

PROPORTIONALITY REQUIREMENTS

As summarized in Figure 2, the Housing Successor fully complied with all Housing Asset Fund spending restrictions in FY 2019-20:

- The Housing Successor expended \$101,149 on administrative expenses which is under the maximum annual limit of \$275,682 for FY 2019-20.
- The Housing Successor did not use any Housing Asset Funds for homeless prevention or rapid rehousing expenses, and was therefore in compliance with the \$250,000 spending limit.
- The Housing Successor did not spend any Housing Asset Funds for affordable housing development-related expenditures in FY 2019-20, which is the first year of the current five-year compliance period for income proportionality. The Housing Successor will ensure future development-related expenditures comply with income proportionality requirements.

SENIOR RENTAL HOUSING LIMIT COMPLIANCE

Pursuant to HSC Section 34176 (b), Housing Asset Funds may not assist senior rental housing if more than 50% of deed-restricted rental housing units assisted by the former Agency, Housing Successor, or City in the previous 10 years are restricted to seniors. In the prior ten years, the Housing Successor, former Agency, and City assisted 70 deed-restricted rental units, all located in the 800 John Street development. All 70 units are restricted to seniors. The former Agency assisted the project in FY 2011-12 before the 50% limit was enacted. The Housing Successor may not assist any more deed-restricted senior rental units until FY 2021-22. The Housing Successor will ensure that it complies with this requirement moving forward. The 33 units proposed at 811 San Pablo Avenue will not be age restricted.

Table 3
Deed-Restricted Senior Rental Units Assisted Prior Ten Years

Property	Date Assisted	Senior Units	%	Non-Senior Units	%	Total Units
800 John Street	9/30/11	70	100%	0	0%	70
Total		70		0		70

Total Deed-Restricted Senior Units: 100%

Source: City of Pinole

Table 3 is limited to deed-restricted rental units assisted in the prior ten years. Appendix 5 presents a complete inventory of affordable housing in Pinole that is monitored by the City. Most projects were funded by the former Agency over ten years ago or developed to comply with the City's inclusionary housing requirements.

EXCESS SURPLUS

The Housing Asset Fund may not accumulate an "excess surplus," or an unencumbered amount that exceeds the greater of \$1 million or the sum of deposits in the prior four fiscal years. This requirement ensures that housing successors are actively spending available Housing Asset Funds on affordable housing.

At the end of FY 2019-20 the Housing Successor accrued an excess surplus of \$536,520, as shown in Table 4. The FY 2019-20 excess surplus amount will need to be expended or encumbered by June 30, 2023 to avoid having to transfer funds to HCD. The Housing Successor did not accrue an excess surplus in prior years.

Table 4 Excess Surplus Calculation					
Fiscal Year	2015-16	2016-17	2017-18	2018-19	Prior 4 Year Deposits
Deposits ¹	\$ 243,527	\$ 236,396	\$ 1,098,878	\$ 162,440	\$ 1,741,241
FY 2019-20 Beginning Cash Balance					\$ 2,277,761
Less: Encumbered Funds					\$ -
Unencumbered Amount					\$ 2,277,761
Step 1					
\$1 Million, or					\$ 1,000,000
Last 4 Deposits					\$ 1,741,241
Result: Larger Number					\$ 1,741,241
Step 2					
Unencumbered Cash Balance					\$ 2,277,761
Less: Larger Number From Step 1					\$ (1,741,241)
Excess Surplus (Unencumbered Cash Balance less Step 1)					\$ 536,520

¹ In FY 2018-19, \$1.5 million was deposited into the Housing Asset Fund in error from a loan repayment due to the General Fund. The deposit will be reversed in FY 2019-20. The FY 2018-19 deposits and beginning 2019-20 cash balance are net of the \$1.5 million deposit reversal.

The Housing Successor plans to eliminate the excess surplus by the end of FY 2020-21 by encumbering \$2 million in Housing Asset Funds for the 811 San Pablo Avenue development.

OTHER INFORMATION

HOMEOWNERSHIP UNIT INVENTORY

Table 5 presents an inventory of homeownership units assisted by the Housing Successor that require restrictions, covenants, or an adopted program that protects Housing Asset Fund monies.

TRANSFERS TO OTHER HOUSING SUCCESSORS

There were no transfers to another housing successor entity for a joint project pursuant to HSC 34176.1(c)(2).

APPENDIX 1 – HOUSING ASSET TRANSFER FORM

The Housing Asset Transfer Form is attached as a separate document.

APPENDIX 2 - HOUSING SUCCESSOR ANNUAL REPORT REQUIREMENTS

Housing Successor Reporting Requirements <i>Health and Safety Code Section 34176.1(f)</i>		
Housing Asset Fund Revenues & Expenditures	Other Assets and Active Projects	Obligations & Proportionality
Total amount deposited in the Housing Asset Fund for the fiscal year Amount of deposits funded by a Recognized Obligation Payment Schedule ("ROPS")	Description of any project(s) funded through the ROPS	Description of any outstanding production obligations of the former Agency that were inherited by the Housing Successor
Statement of balance at the close of the fiscal year	Update on property disposition efforts (note that housing successors may only hold property for up to five years, unless it is already developed with affordable housing)	Compliance with proportionality requirements (income group targets), which must be upheld on a five-year cycle
Description of Expenditures for the fiscal year, broken out as follows: • Homeless prevention and rapid rehousing • Administrative and monitoring • Housing development expenses by income level assisted	Other "portfolio" balances, including: • Statutory value of any real property either transferred from the former Agency or purchased by the Housing Asset Fund • Value of loans and grants receivable	Percentage of deed-restricted rental housing restricted to seniors and assisted by the former Agency, the Housing Successor, or the City within the past ten years compared to the total number of units assisted by any of those three agencies
Description of any transfers to another housing successor for a joint project	Inventory of homeownership units assisted by the former Agency or the housing successor that are subject to covenants or restrictions or to an adopted program that protects the former Agency's investment of monies from the Low and Moderate Income Housing Fund	Amount of any excess surplus, and, if any, the plan for eliminating it

APPENDIX 3 – HOUSING ASSET FUND EXPENDITURE REQUIREMENTS

Housing Asset Fund Expenditure Requirements <i>Health and Safety Code Section 34176.1</i>		
Expense Category	Limits	Allowable Uses
Administration and Compliance Monitoring	\$275,682 maximum for FY 2019-20 (limit varies each year)	Administrative activities such as: - Professional services (consultant fees, auditor fees, etc.) - Staff salaries, benefits, and overhead for time spent on Housing Successor administration - Compliance monitoring to ensure compliance with affordable housing and loan agreements - Property maintenance at Housing Successor-owned properties Capped at \$200,000 adjusted annually for inflation or 5% of the statutory value of real property owned by the housing successor and the value of loans and grants receivable from the HAT ("Portfolio"), whichever is greater.
Homeless Prevention and Rapid Rehousing Solutions	\$250,000 maximum per fiscal year	Services for individuals and families who are homeless or would be homeless but for this assistance, including: - Contributions toward the construction of local or regional homeless shelters - Housing relocation and stabilization services including housing search, mediation, or outreach to property owners - Short-term or medium-term rental assistance - Security or utility deposits - Utility payments - Moving cost assistance - Credit repair - Case management - Other appropriate activities for homelessness prevention and rapid rehousing of persons who have become homeless.
Affordable Housing Development	No spending limit, but must comply with income and age targets	"Development" includes: - New construction - Acquisition and rehabilitation - Substantial rehabilitation - Acquisition of long-term affordability covenants on multifamily units - Preservation of at-risk units whose affordable rent restrictions would otherwise expire over the next five years

Housing Asset Fund Expenditure Requirements <i>Health and Safety Code Section 34176.1</i>		
Expense Category	Limits	Allowable Uses
	<i>Income Targets</i>	Every five years (currently FYE 2020-2024), Housing Asset Funds must meet income targets: • At least 30% on extremely low income rental households (up to 30% AMI or "Area Median Income") • No more than 20% on low income households (60-80% AMI) Moderate and above moderate income households may not be assisted (above 80% AMI). Failure to comply with the extremely low income requirement in any five-year compliance period will result in having to ensure that 50 percent of remaining funds be spent on extremely low income rental units until in compliance. Exceeding the expenditure limit for low households earning between 60-80% AMI in any five-year reporting period will result in not being able to expend any funds on these income categories until in compliance.
	<i>Age Targets</i>	For the prior ten years (resets every year), a maximum of 50% of deed-restricted rental housing units assisted by the Housing Successor or its host jurisdiction may be restricted to seniors. If a housing successor fails to comply, Housing Asset Funds may not be spent on deed-restricted rental housing restricted to seniors until in compliance.

CITY COUNCIL REPORT

7F

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCIL MEMBERS

FROM: HECTOR DE LA ROSA, ASSISTANT CITY MANAGER

SUBJECT: ADOPT A RESOLUTION APPROVING A FOURTH AMENDMENT TO THE EXCLUSIVE NEGOTIATION AGREEMENT BETWEEN THE CITY OF PINOLE AND GENERAL REALTY CE, LLC FOR THE SALE AND PURCHASE OF THE PINOLE SHORES II PROPERTIES

RECOMMENDATION

Staff recommends that the City Council adopt a resolution approving a Fourth Amendment to the Exclusive Negotiating Agreement (ENA) between the City of Pinole and General Realty CE, LLC for the sale and purchase of the Pinole Shores II property.

BACKGROUND

The City has been in discussions with General Realty CE, LLC for the sale of the property known as Pinole Shores II. The property consists of 7.848 acres (total of 341,859 square feet) of vacant site located on the north side of San Pablo Avenue between Sunnyview Drive and Pinole Shores Drive. The property consists of six parcels (402-230-015, 402-230-016, 402-230-017, 402-230-018, 402-230-020 and 402-230-022), of which only four are developable.

On May 28, 2019, the terms and conditions of the ENA were negotiated and approved by all the parties and the ENA was executed. The ENA allowed for a period of one hundred and twenty days plus an additional ninety days to negotiate the Agreements (a Purchase and Sale Agreement and a Development Agreement). On September 26, 2019, October 15, 2019, and October 6, 2020 (First Amendment, Second Amendment & Third Amendment, respectively), the parties agreed to extend the ENA for an additional one hundred and eight (180) days through March 31, 2021.

The purpose of the third extension was to allow the City to complete negotiations with the owners of the Pinole Shores I property for an access easement from San Pablo Avenue to the Pinole Shores II property and for the Developer to perform its remaining necessary due diligence on the property.

REVIEW AND ANALYSIS

Staff has continued to make progress on the purchase of the access easement through Pinole Shores I. The boundary area and legal description for the access easement along with plats have been developed and approved by Pinole Shores I and General Realty LLC. On March 9, 2022, the City obtained the appraised value for the access easement. Staff will present the appraisal to Pinole Shores I and General Realty LLC for review and approval.

While both the general form and terms of the Purchase and Sale Agreement (PSA) and Development Agreement (DA) for the Pinole Shores II development have been negotiated there will be changes required after review of the access easement agreement.

Due to delays caused by access limitations to the Pinole Shores II site, and the negotiations of and unknown value of the access easement, General Realty has not been able to perform their due diligence inspection and/or move forward with CEQA review. With the pending review and approval of an access easement through Pinole Shores I, General Realty is poised to submit a development application and commence the CEQA analysis process. Commencement, review and final approval of CEQA by the Planning Commission and City Council is estimated to take four to five months. Concurrent, with the CEQA review, General Realty will commence their due diligence review.

Once the Developer has completed their inspections and the CEQA analysis is approved, the PSA and DA can be presented to the Council for consideration and approval.

Therefore, staff is recommending that the City Council approve a Fourth Amendment to the ENA through December 31, 2021 which would allow the City time to acquire the access easement, the Developer to complete their inspections and CEQA analysis.

FISCAL IMPACT

There is no fiscal impact to the City of executing a Fourth Amendment.

RESOLUTION NO 2021-**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PINOLE APPROVING A FOURTH AMENDMENT TO THE EXCLUSIVE NEGOTIATING AGREEMENT BETWEEN THE CITY OF PINOLE AND GENERAL REALTY CE, LLC FOR THE SALE AND PURCHASE OF THE PINOLE SHORES II PROPERTIES**

WHEREAS, the City is the owner of certain properties located at 830-850 San Pablo Avenue in the City of Pinole, California, County Assessor's Parcel Numbers 402-230-015, 402-230-016, 402-230-017, 402-230-018, 402-230-020 and 402-230-022 (the "Properties"); and

WHEREAS, on May 28, 2019, the Parties executed an Exclusive Negotiating Agreement (the "ENA") to negotiate the terms and conditions of a development agreement and a purchase and sale agreement, for the Properties; and

WHEREAS, the ENA provides for a period of one hundred and twenty (120) days, plus an additional ninety (90) days subject to mutual extension, to agree to a Development Agreement and Purchase and Sale Agreement; and

WHEREAS, on September 30, 2019, the parties agreed to extend the ENA for an additional ninety (90) days through March 31, 2020 due to hiring of a new interim planner who required time to get up to speed on the project; and

WHEREAS, in December 2019, following a request from General Realty to access the Properties to begin soils and compact testing, it was discovered that the City did not have a public access easement to the Properties and that the City would need to obtain an easement prior to the sale of the Properties; and

WHEREAS, since October 2020, the City has been in negotiations to acquire an easement for access to the Properties; and

WHEREAS, due to the delays caused by the need to acquire an easement, General Realty has not been able to access the Properties to perform its due diligence inspections and has requested an extension of the ENA; and

WHEREAS, the March 31, 2021 extension period for the ENA is imminent and the easement for access had not yet been finalized; and

WHEREAS, prior to approval of the Purchase and Sale and Development Agreement, CEQA must be completed and approved; and

WHEREAS, the timeframe for completion and approval of CEQA is estimated to take five months once a development application is submitted; and

WHEREAS, the Parties mutually desire to extend the Agreement, to allow the City to finalize the negotiation of the public access easement and for the Developer to submit a Development application, perform its necessary due diligence inspections, and commence the CEQA review, for an additional two hundred and seventy (270) days or through December 31, 2021.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Pinole hereby:

Section 1. Declares the above recitals are true and correct and incorporated by this reference.

Section 2: Approves the Fourth Amendment to the Exclusive Negotiating Agreement between the City of Pinole and General Realty CE, LLC extending the Term of the Agreement to December 31, 2021.

Section 3. Authorizes the City Manager, or his designee, to execute the Fourth Amendment to the Exclusive Negotiating Agreement and to take all actions and execute all documents necessary to carry out the intent of this Resolution.

PASSED AND ADOPTED at a regular meeting of the City Council of the City of Pinole held on the 16th day of March 2021 by the following vote:

AYES:	COUNCILMEMBERS:
NOES:	COUNCILMEMBERS:
ABSENT:	COUNCILMEMBERS:
ABSTAIN:	COUNCILMEMBERS:

I hereby certify that the foregoing resolution was introduced, passed, and adopted on this 16th day of March, 2021.

Heather Iopu, CMC
City Clerk

**FOURTH AMENDMENT TO EXCLUSIVE NEGOTIATING RIGHTS
AGREEMENT BY AND AMONG GENERAL REALTY CE, LLC AND
THE CITY OF PINOLE, CALIFORNIA**

THIS FOURTH AMENDMENT TO EXCLUSIVE NEGOTIATING RIGHTS AGREEMENT (this “**Amendment**”), dated as of March 16, 2021, amending that certain Exclusive Negotiating Rights Agreement dated May 28, 2019 (as amended by the First, Second, and Third Amendments to the Exclusive Negotiating Rights Agreement, the “**Agreement**”), is entered into by and between the City of Pinole, a California municipal corporation (the “**City**”) and General Realty CE, a California limited liability company (the “**Developer**”). The City and the Developer are each referred to herein as a “**Party**” and collectively referred to as the “**Parties**.”

WHEREAS, the City is the owner of certain properties located at 830-850 San Pablo Avenue in the City of Pinole, California, County Assessor’s Parcel Numbers 402-230-015, 402-230-016, 402-230-017, 402-230-018, 402-230-020 and 402-230-022 (the “**Properties**”), as more particularly described in Exhibit A attached hereto and incorporated herein by this reference; and

WHEREAS, on May 28, 2019, the Parties executed the Agreement for the negotiation of the terms and conditions of a development agreement and a purchase and sale agreement for the Properties; and

WHEREAS, on September 26, 2019, October 15, 2019, and October 6, 2020, the parties agreed to extensions of the Agreement, with the last extension the Agreement ending on March 31, 2021; and

WHEREAS, the City has been negotiating an easement for access to the Properties; and

WHEREAS, due to the delays caused by the need to acquire an easement, General Realty has not been able to access the Properties to perform its due diligence inspections, commence CEQA review, and has requested an extension of the Agreement; and

WHEREAS, the March 31, 2021 extension period is approaching and the easement for access had not yet been finalized; and

WHEREAS, prior to approval of the Purchase and Sale and Development Agreement, the CEQA review must be completed; and

WHEREAS, the timeframe for completion and approval of CEQA is estimated to be five months once a development application is submitted; and

WHEREAS, the Parties mutually desire to extend the Agreement, to allow the City to finalize the negotiation of the public access easement and for the Developer to perform its necessary due diligence inspections, including CEQA, for an additional two hundred and seventy (270) days or through December 31, 2021.

NOW THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows.

1. Extension of Negotiating Period

The Parties hereby agree to extend the Term of the Agreement to December 31, 2021.

2. Effect

Except as otherwise expressly set forth in this Amendment, all other terms and conditions of the Agreement remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the Parties have executed this Amendment as of the date first written above.

**THIRD AMENDMENT TO EXCLUSIVE NEGOTIATING RIGHTS
AGREEMENT BY AND AMONG GENERAL REALTY CE, LLC AND
THE CITY OF PINOLE, CALIFORNIA**

THIS THIRD AMENDMENT TO EXCLUSIVE NEGOTIATING RIGHTS AGREEMENT (this “**Amendment**”), dated as of October 6, 2020, amending that certain Exclusive Negotiating Rights Agreement dated May 28, 2019 (as amended by the First and Second Amendments to the Exclusive Negotiating Rights Agreement, the “**Agreement**”), is entered into by and between the City of Pinole, a California municipal corporation (the “**City**”) and General Realty CE, a California limited liability company (the “**Developer**”). The City and the Developer are each referred to herein as a “**Party**” and collectively referred to as the “**Parties**.”

WHEREAS, the City is the owner of certain properties located at 830-850 San Pablo Avenue in the City of Pinole, California, County Assessor’s Parcel Numbers 402-230-015, 402-230-016, 402-230-017, 402-230-018, 402-230-020 and 402-230-022 (the “**Properties**”), as more particularly described in Exhibit A attached hereto and incorporated herein by this reference; and

WHEREAS, on May 28, 2019, the Parties executed the Agreement for the negotiation of the terms and conditions of a development agreement and a purchase and sale agreement for the Properties; and

WHEREAS, on September 30, 2019, the parties agreed to extend the Agreement for an additional ninety (90) days through March 31, 2020 due to the hiring of a new interim planner who required time to get up to speed on the project; and

WHEREAS, in December 2019, following a request from General Realty to access the Properties to begin soils and compact testing, it was discovered that the City did not have a public access easement to the Properties and that the City would need to obtain an easement prior to the sale of the Properties; and

WHEREAS, the City has been negotiating an easement for access to the Properties; and

WHEREAS, due to the delays caused by the need to acquire an easement, General Realty has not been able to access the Properties to perform its due diligence inspections and has requested an extension of the Agreement; and

WHEREAS, the Parties mutually desire to extend the Agreement to March 31, 2021 to allow the City to finalize the negotiation of the public access easement and for the Developer to perform its necessary due diligence inspections.

NOW THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows.

Return to Agenda

1. Extension of Negotiating Period

The Parties hereby agree to extend the Term of the Agreement to March 31, 2021.

2. Effect

Except as otherwise expressly set forth in this Amendment, all other terms and conditions of the Agreement remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the Parties have executed this Amendment as of the date first written above.

**SECOND AMENDMENT TO EXCLUSIVE NEGOTIATING RIGHTS
AGREEMENT BY AND AMONG GENERAL REALTY CE, LLC AND
THE CITY OF PINOLE, CALIFORNIA**

THIS SECOND AMENDMENT TO EXCLUSIVE NEGOTIATING RIGHTS AGREEMENT (this “**Amendment**”), dated as of October 22, 2019, amending that certain Exclusive Negotiating Rights Agreement dated May 28, 2019 (as amended by the First Amendment to Exclusive Negotiating Rights Agreement dated September 26, 2019, the “**Agreement**”), is entered into by and between the City of Pinole, a California municipal corporation (the “**City**”) and General Realty CE, a California limited liability company (the “**Developer**”). The City and the Developer are each referred to herein as a “**Party**” or collectively referred to as the “**Parties**.”

WHEREAS, the City is the owner of certain properties located at 830-850 San Pablo Avenue in the City of Pinole, California, County Assessor’s Parcel Numbers 402-230-015, 402-230-016, 402-230-017, 402-230-018, 402-230-020 and 402-230-022 (the “**Properties**”), as more particularly described in Exhibit A attached hereto and incorporated herein by this reference; and

WHEREAS, on May 28, 2019, the Parties executed an Exclusive Negotiating Agreement (the “**ENA**”) to agree to negotiate the terms and conditions of a Development Agreement, which will include a purchase and sale agreement, for the Properties; and

WHEREAS, the ENA provides for a period of one hundred and twenty (120) days, plus an additional ninety (90) days subject to mutual extension, to agree to a Development Agreement; and

WHEREAS, the City and Developer have been using their best efforts to successfully negotiate the Development Agreement and a Purchase and Sale Agreement but due to vacancies in the Planning Division, Developer’s due diligence has been delayed; and

WHEREAS, the Developer has requested an additional 90 day extension, beyond the 210 days set forth in the ENA, and the City agrees that it is appropriate to extend the time due to delays caused by unforeseen City vacancy circumstances.

WHEREAS, the Parties mutually desire to extend the Agreement by and additional ninety (90) days to three hundred (300) days from the Effective Date of the Agreement.

NOW THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows.

1. Extension of Negotiating Period

The Parties hereby agree to extend the Term of the exclusive negotiating period by an additional ninety (90) days to three hundred (300) days from the Effective Date of the Agreement.

2. Effect

Except as otherwise expressly set forth in this Amendment, all other terms and conditions of the Agreement remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the Parties have executed this Amendment as of the date first written above.

FIRST AMENDMENT TO EXCLUSIVE NEGOTIATING RIGHTS AGREEMENT BY AND AMONG GENERAL REALTY CE, LLC AND THE CITY OF PINOLE, CALIFORNIA

THIS FIRST EXCLUSIVE NEGOTIATING RIGHTS AGREEMENT (this “**Amendment**”), dated as of September 26, 2019, amending that certain Exclusive Negotiating Rights Agreement dated May 28, 2019 (the “**Agreement**”), is entered into by and between the City of Pinole, a California municipal corporation (the “**City**”) and General Realty CD, a California limited liability company (the “**Developer**”). The City and the Developer are each referred to herein as a “**Party**” or collectively referred to as the “**Parties**.”

WHEREAS, the City is the owner of certain properties located at 830-850 San Pablo Avenue in the City of Pinole, California, County Assessor’s Parcel Numbers 402-230-015, 402-230-016, 402-230-017, 402-230-018, 402-230-020 and 402-230-022 (the “**Properties**”), as more particularly described in Exhibit A attached hereto and incorporated herein by this reference; and

WHEREAS, the Properties were purchased by the Redevelopment Agency of the City of Pinole (the “**Agency**”) with Redevelopment funds; and

WHEREAS, on June 29, 2011 the legislature of the State of California adopted Assembly Bill x1 26 (as amended by AB 1484 and SB 107, the “**Dissolution Law**”), which amended provisions of the Redevelopment Law; and

WHEREAS, pursuant to the Dissolution Law the Agency was dissolved on February 1, 2012 and the Properties were transferred to the City pursuant to a long range property management plan prepared by the City and approved by the California State Department of Finance in accordance with the Dissolution Law; and

WHEREAS, Developer anticipates expending funds to prepare architectural and design drawings and conduct certain studies that are needed to assess the feasibility of the development and construction of a commercial project on the Properties consisting of distribution and warehouse uses (the “**Project**”) and Developer requires a grant of exclusive negotiating rights in order to be willing to make such expenditures; and

WHEREAS, the City desires to negotiate a development Agreement (the “**Development Agreement**”), which will include a purchase and sale agreement, for the Properties, with Developer; and

WHEREAS, the City and Developer have been using their best efforts to successfully negotiate the Development Agreement and a Purchase and Sale Agreement for the Property and proposed Project, subject to certain terms and conditions; and

WHEREAS, pursuant to the Agreement the Parties agreed to exclusively negotiate with each other for a period of one hundred and twenty (120) days, subject to mutual extension of an additional ninety (90) days; and

WHEREAS, the Parties mutually desire to extend the Agreement by ninety (90) days.

NOW THEREFORE, in consideration of the mutual covenants and agreements hereinafter set forth and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows.

1. Extension of Negotiating Period

Pursuant to Section 3.b of the Agreement, the Parties mutually agree to extend the Term of the Agreement by ninety (90) days. The Term of the Agreement shall expire two hundred ten (210) days from the Effective Date of the Agreement. The Parties may agree to additional extension of the Term with the approval of the City Council.

2. Effect

Except as otherwise expressly set forth herein, all other terms and conditions of the Agreement remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date first written above.

CITY COUNCIL REPORT

7G

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCIL MEMBERS

FROM: DAVID HANHAM, PLANNING MANAGER

**SUBJECT: RECEIVE THE 2020 ANNUAL GENERAL PLAN HOUSING
ELEMENT PROGRESS REPORT AS REQUIRED BY THE STATE
OF CALIFORNIA**

RECOMMENDATION

Receive the 2020 Annual General Plan Housing Element Progress Report as required by the State of California.

BACKGROUND

Section 65400 of the State of California Government Code requires cities to provide an annual report to their legislative body (City Council), the Governor's Office of Planning and Research (OPR), and the State Department of Housing and Community Development (HCD) on the status of their General Plan Housing Element and progress in its implementation. The General Plan Housing Element Annual Report includes information about the City's progress on meeting identified housing needs and efforts to encourage the maintenance, improvement, and development of new housing opportunities.

The City's current Housing Element was adopted on May 19, 2015 and subsequently certified by HCD later the same month. The Housing Element covers an eight-year period, from 2015 through 2023, and includes information about how the City has planned for a Regional Housing Needs Allocation (RHNA) of 297 units. The Element focuses on the City's ability to provide quality, safe, and affordable housing, as well as aims to achieve a balance between maintaining the existing character of Pinole and providing housing for all economic segments of the community and those with special needs.

REVIEW & ANALYSIS

The City of Pinole Annual General Plan Housing Element Progress Report for 2020 is included as Attachment A. The report includes statistics about annual building activity for affordable housing projects, annual building activity for rehabilitated housing units, updated information about the City's RHNA progress, and implementation status of the programs included in the adopted Housing Element.

With residential land values within Pinole in 2020 continuing to rise and job growth in the region increasing, the City received additional residential development inquiries and applications. During 2020, The City approved development applications for seven (7) new housing units (6 single family and 1 accessory dwelling) that have obtained design review approval. The City anticipates further new housing development progress towards the 8-year RHNA in 2021.

2020 New Housing Request Status

Location	Housing Type	Current Status
1479 San Pablo	Triplex	Building Permit has been obtained
980 2 nd Ave	Single Family Dwelling	Building Permit has been obtained
1169 Pinole Valley Road	Single Family Dwelling & Accessory Dwelling Unit	Building Permit has been obtained
814 E Meadow Ave	Accessory Dwelling Unit	Building Permit has been obtained

1409 Nob Hill	Single Family Dwellings	Building Permit has been obtained.
1431 Nob Hill	Single Family Dwelling	Building Permit has been obtained
2520 Pfeiffer Lane	Accessory Dwelling Unit	Building Permit has been obtained
2256 Orleans Drive	Accessory Dwelling Unit	Building Permit has been obtained
472 Limmerick	Single Family Dwelling & Accessory Dwelling Unit	Design Review complete. Building Permit Application submitted. Awaiting building plan check re-submittal
209 N. Rancho Place	Single Family Dwelling	Design Review complete. Building Permit Application Submitted. Awaiting building plan check re-submittal.
2698 Silverado Drive	Accessory Dwelling Unit	Building Permit has been obtained
759 Pine Ave	Accessory Dwelling Unit	Building Permit has been obtained
204 Pinion Ave	Accessory Dwelling Unit	Building Permit has been obtained
Hazel Street Subdivision	4 Single Family Dwellings	Design Review has completed.

City staff continues to assist homeowners and provide information at City Hall on rehabilitation assistance resources. In 2020, the City issued and conducted final building inspections for 512 permits to rehabilitate housing units. Improvements include roofing projects, water heater replacement projects, furnace replacement

projects, solar projects, window/patio door replacement projects, and home remodel/addition projects.

These privately initiated residential improvement projects helped to improve the quality and efficiency of the existing housing stock and implement the Housing Element Goal H.5 and Policy H.5.1 below.

Goal H.5 Energy-Efficiency, Conservation, and Sustainable Residential Development.

Support energy-efficient design and building practices in order to reduce housing utility expenses, minimize adverse environmental impacts, and provide for sustainability.

Policy H.5.1

1. **Reduce Energy Consumption.** Reduce energy and water consumption in residential buildings by balancing energy-efficient design and water conservation features with cost-effective construction.

Staff will forward this 2020 Annual General Plan Housing Element Progress Report to HCD prior to the April 1st deadline in accordance with State law.

FISCAL IMPACT

There is no fiscal impact from receiving the annual report. Individual programs and projects designed to implement the Housing Element goals and objectives are funded through individual program and project accounts in the City's budget and Capital Improvement Plan.

Reporting Year	2020	(Jan. 1 - Dec. 31)	
Table D			
Program Implementation Status pursuant to GC Section 65583			
Housing Programs Progress Report			
Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element			
1	2	3	4
Name of Program	Objective	Timeframe in H.E	Status of Program Implementation
Conduct An Annual Housing Element Review (H.1.1)	Annual Review of Housing Element per Government Code Section 65583(3).	Annually	Complete for 2020. This report fulfills the requirement for 2020. The City will continue to conduct annual reviews of the Housing Element in subsequent years.
Explore Housing Development Partnerships (H.1.2)	Seek opportunities to work with public agencies and developers.	Ongoing	The City has been meeting with developers on potential plans to redevelop and include affordable housing units at Pinole Vista Plaza's vacant K-Mart site, the vacant Doctor's Hospital site, 811 San Pablo Ave, and 2801 Pinole Valley Rd.
Periodically Review Residential Development Requirements (H.1.3)	Monitor effectiveness of established regulations needed to streamline housing development.	Ongoing (as necessary)	New ADU regulations have been adopted based on updates to State law, allowing ADUs to be approved through the ministerial building permit process.
Apply Design Review Guidelines (H.2.1)	Apply to new residential development and residential additions to ensure compatibility with surrounding areas.	Ongoing	The City continues to implement the Residential Design Guidelines for residential projects. The City received nine residential design review applications in 2020.
Adequate Sites to Meet Regional Fair Share of Housing Growth (H.2.2)	Ensure adequate sites are available to developers and provide an inventory of available sites to developers.	Ongoing	Complete. Three Corridors Specific Plan for San Pablo Avenue, Pinole Valley Road, and Apian Way includes adequate sites available to developers to meet Regional Fair Share of Housing Growth. A detailed inventory of potential residential development sites is included within Table 6.43 and 6.44 of the adopted Housing Element.
Rehabilitation Assistance (H.2.3)	Continue to share information and explore funding sources for rehabilitation of existing housing	Ongoing (annually)	City staff continues to assist homeowners and provide information at City Hall on rehabilitation assistance resources. In 2020, the City issued 530 permits to rehabilitate housing units, including roofing projects, water heater replacement projects, furnace replacement projects, solar projects, window/patio door replacement projects, and home remodel/addition projects.
Acquisition/Rehabilitation of Blighted or Distressed Properties (H.2.4)	Pursue opportunities to partner with nonprofit housing developers to acquire and rehabilitate blighted or distress properties	Ongoing	The City had been negotiating the development of an affordable housing project at 811 San Pablo Ave.
Fee Structure Evaluation (H.3.1)	Review current fees to ensure new development contributes its share of costs	Ongoing	Development fees were paid for two residential projects in 2020.
General Plan Land Uses (H.4.1)	Evaluate land use designations and programs to ensure consistency with overall goals	Annually	The City's GP land use designations are applied to provide direction and flexibility to help meet evolving overall land use goals and policy objectives.
Housing Construction (H.4.2)	Encourage housing construction through a variety of incentives and programs	Ongoing	City staff meets regularly with property owners and developers to encourage additional housing construction at all affordability levels on available housing opportunity sites.
Parcel Consolidation (H.4.4.3)	Facilitate lot consolidation as it relates to housing opportunity sites	Ongoing	City staff meets with property owners and developers to encourage parcel consolidation for housing development.
Second Unit Ordinance (H.4.4.4)	Provide information to the public and review the ordinance to encourage second unit development	Ongoing	The City adopted an updated second unit/ADU ordinance in 2020 to reflect changes in State law. Staff regular receives and responds to questions from the public regarding ADU standards and the permit process.
Homebuyer Programs (H.4.4.5)	Share information about homebuyer programs from County and State	Annually	Inadequate financial resources available in 2020 to directly assist first-time homebuyers and re-establish the City's homebuyer program. The City refers interested individuals to available County and State programs.
Below Market Rate (BMR) Regulations (H.4.4.6)	Implement and monitor rental and resale affordability controls for units assisted by form RDA	Ongoing	The City continues to use a third-party contractor to monitor affordability control compliance for former City Redevelopment Agency (RDA) assisted housing units.
Technical Assistance to Housing Developers (H.4.4.7)	Exchange information to encourage provision of affordable housing	Ongoing	City staff continued to meet with prospective housing developers in 2020.
Accessible Units for the Physically Disabled (H.4.4.8)	Facilitate programs and projects to meet Federal, State, and local requirements to provide accessible housing for the physically disabled	5% of units built or approved between 2014 and 2023	The City is committed to assisting in the development of new projects that provide accessible housing for the disabled or issuing building permits for projects that improve the accessibility of existing housing. In 2020, the City did not receive any new development requests for housing for the physically disabled or accessibility modifications to existing residential units.
Housing for the Homeless (H.4.4.9)	Amend the Zoning Ordinance to provide emergency shelters and supportive and transitional housing	By May 2016	Text amendments were approved in 2016.
Employee Housing (H.4.4.10)	Amend the Zoning Ordinance to identify employee housing as a residential use	By May 2016	Text amendments were approved in 2016.
Prevention of Housing Discrimination (H.4.4.11)	Exchange information to prevent Housing Discrimination	Ongoing	No housing discrimination disputes were brought to the City's attention in 2020.
Conservation of Affordable Housing Units (H.4.4.12)	Work to help preserve existing affordable housing supply	Through 2017	Former RDA assets, and revenues generated from those assets, are maintained in a Low- and Moderate-Income Housing Asset Fund that continues to be used to administer and monitor compliance with affordable housing and loan agreements and provide for affordable housing development.
Explore Options for Senior Assistance Programs (H.4.4.13)	Explore program revisions/new programs to provide assistance to help seniors live independently	2015-2016	Insufficient financial resources were available to establish a City program.

Return to Agenda

Energy and Water Conservation (H.5.1.1)	Support and publicize energy and water conservation programs; promote awareness in conjunction with rehabilitation programs; implement water efficient landscape requirements	Ongoing	The City continued to provide information on available energy and water conservation programs. The City adopted updates to the water efficient landscaping ordinance in the municipal code to reflect the current State ordinance.
Water and Sewer Service Priority Allocation for Affordable Housing (H.5.1.2)	Adopt a policy for water and sewer services to provide priority allocation to affordable housing in event a rationing system is implemented	By May 2016	Completed in 2016.

CITY COUNCIL REPORT

7H

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCIL MEMBERS

FROM: TAMARA MILLER, DEVELOPMENT SERVICES DIRECTOR / CITY ENGINEER

SUBJECT: STATE OF CALIFORNIA DEPARTMENT OF JUSTICE TOBACCO LAW ENFORCEMENT GRANT PROGRAM

RECOMMENDATION

Staff recommends that the City Council accept a grant from the State of California Department of Justice, in the amount of \$54,223, to participate in the Tobacco Law Enforcement Grant Program and authorize the City Manager to negotiate and execute any agreements and amendments thereto with the State of California Department of Justice.

BACKGROUND

The State of California Department of Justice administers the Tobacco Law Enforcement Grant Program, which is made available through the California Healthcare Research and Prevention Tobacco Tax Act of 2016 (Prop 56). The State released a call for grant proposals to be submitted August 2020.

The City of Pinole is committed to the youth of the City. This grant opportunity could assist the City of Pinole in the prevention of tobacco use by the youth. The City of Pinole has the ability to provide enhanced tobacco use prevention programs funded by this grant through its Code Enforcement Division of the Development Serviced Department.

Staff prepared a grant proposal with the following three goals.

1. Inspect all tobacco retailers for compliance with existing codes that ban the sale of tobacco and vaping products to youth.
2. Educate all tobacco retailers of the existing codes.
3. Educate underage youth of Pinole of the risks of using tobacco products.

The City submitted its grant proposal on August 6, 2020 for \$65,059. On December 31, 2020, the California Department of Justice notified the City that it would be awarded \$54,223. The California Department of Justice requires a resolution from the City's governing body (City Council) to authorize the City to enter into an agreement with the

State and to designate an agent to execute the agreement and any other required grant documents.

REVIEW AND ANALYSIS

This grant would fund nearly 7.5% of the annual cost of the Code Enforcement Officer starting July 1, 2021 and ending June 30, 2024. Thus, this program allows for the Code Enforcement Officer to dedicate 7.5% of their time to the prevention of tobacco use by the youth of Pinole.

Staff will need to coordinate the tobacco prevention program with their existing workload and special programs to spread the workload throughout the fiscal year.

Code Enforcement staff will confer with the Police Department for assistance with the review of education materials and on an as needed basis for seller education interactions.

FISCAL IMPACT

The recommended actions will have a positive fiscal impact for the City. The grant will bring in \$54,223 to fund local code enforcement activities focused on reducing the sale of tobacco to youth by educating the sellers and by education youth.

RESOLUTION NO. 2021-XX

**RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PINOLE,
COUNTY OF CONTRA COSTA, STATE OF CALIFORNIA,
ACCEPTING A GRANT AWARD FROM
THE STATE OF CALIFORNIA DEPARTMENT OF JUSTICE
TOBACCO LAW ENFORCEMENT GRANT PROGRAM AND
AUTHORIZING THE CITY MANAGER TO EXECUTE ALL GRANT DOCUMENTS**

WHEREAS, the State of California Department of Justice administers the Tobacco Law Enforcement Grant Program which is made available through the California Healthcare Research and Prevention Tobacco Tax Act of 2016 (Prop 56); and

WHEREAS, the City of Pinole desires to assist in the prevention of tobacco use by the youth of Pinole through its participation in the State of California Department of Justice Tobacco Law Enforcement Grant Program; and

WHEREAS, the City of Pinole has the ability to provide enhanced prevention programs funded by this program through its Code Enforcement Division of the Development Service Department; and

WHEREAS, on August 6, 2020, the City of Pinole submitted a proposal to the State of California Department of Justice; and

WHEREAS, on December 31, 2020, the California Department of Justice notified the City that it will be awarded \$54,223 in grant funds for its participation in the Program for three years; and

WHEREAS, the State of California Department of Justice requires a resolution from the governing body to authorize the City to enter into an agreement with the State and to designate an agent to execute the agreement and any other required grant documents.

NOW, THEREFORE BE IT RESOLVED, that the City Council of the City of Pinole to accept a grant from the California Department of Justice, in the amount of \$54,223 to participate in the Tobacco Law Enforcement Grant Program and authorize the City Manager to negotiate and execute any agreements and amendments thereto with the State of California.

CITY COUNCIL REPORT

71

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCIL MEMBERS

FROM: TAMARA MILLER, DEVELOPMENT SERVICES DIRECTOR / CITY ENGINEER
MISHA KAUR, SR. PROJECT MANAGER

SUBJECT: ADOPT A RESOLUTION DECLARING INTENT FOR THE LEVY AND COLLECTION OF ANNUAL ASSESSMENTS FOR THE PINOLE VALLEY ROAD LANDSCAPE AND LIGHTING ASSESSMENT DISTRICT FOR FY 2021/2022, SETTING THE DATE OF THE PUBLIC HEARING, APPROVING THE ANNUAL ENGINEER'S REPORT

RECOMMENDATION

Staff recommends the City Council adopt a resolution declaring an intent to levy and collect assessments for the Pinole Valley Road Landscape and Lighting Assessment District, setting a public hearing for April 6, 2021, and approving the annual Engineer's Report.

BACKGROUND

The City Council adopted Resolution 2008-91 forming the Pinole Valley Road Landscape and Lighting Assessment District (the "District"), ordering maintenance work therein, confirming the diagram and assessment, and providing for the levy of annual assessments therein. Since the inception of the District, the City has installed improvements on Pinole Valley Road between Henry Avenue and Ramona Street. The purpose of the District is to provide a stable funding source for the ongoing maintenance and operation of the traffic signals, streetlights, and median landscaping.

On February 2, 2021, the City Council adopted a resolution initiating proceedings for the annual levy of assessments and ordering the preparation of the annual engineer's report for the District for Fiscal Year 2021/2022. This was step one of the process.

REVIEW & ANALYSIS

The City Council must take the actions listed below each year to levy and collect the assessments for the District.

1. Order the preparation and filing of an annual assessment report.

2. Determine if there are any changes in the existing improvements or addition of new improvements.
3. Approve the annual Engineer's Assessment Report.
4. Declare your intention to levy and collect assessments.
5. Declare your intention to conduct a Public Hearing concerning the levy of assessments.
6. Announce any increase in the maximum assessment.
7. Conduct a Public Hearing.
8. Approve assessment amounts for the current fiscal year.
9. Order the assessment amounts to be submitted to the Contra Costa County Assessor for placement on the secured property tax roll.

Based upon the District budget and reserves the assessment rates for Fiscal Year 2021/2022 are proposed to increase from last year due to additional costs to maintain the District. The proposed rates for 2021/2022 are \$474.90 per assessment unit ("AU") for Zone A and \$494.89 per AU for Zone B. This represents a \$89.21 per AU increase for Zone A and a \$52.86 per AU increase for Zone B. An AU is equivalent to an acre of developable property. When the District was originally approved in 2008, the approved assessment rate authorized future increases to account for inflation. The proposed rates for Fiscal Year 2021/2022 do not exceed the amount authorized by the original approval.

CALIFORNIA ENVIRONMENTAL QUALITY ACT

The proposed actions of the City Council are not a project as defined by the CEQA Guidelines and have no impact on the environment.

FISCAL IMPACT

The proposed assessments will be collected for the City by the Contra Costa County Tax Collector via the secured property tax bills for the assessable parcels within the District. As stated above, the Fiscal Year 2021/2022 assessment rates will increase for Zone A and B. The total District budget is \$49,768.03.

ATTACHMENTS

Attachment A - Resolution approving annual report for the Pinole Valley Road Landscape and Lighting Assessment District and declaring intention to levy and collect assessments in the Pinole Valley Road Landscape and Lighting Assessment District.

Attachment B – Draft Engineer's Report for the Pinole Valley Road Landscape and Lighting Assessment District for FY 2021-22

RESOLUTION NO. _____

**RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PINOLE DECLARING ITS
INTENT FOR THE LEVY AND COLLECTION OF ANNUAL ASSESSMENTS FOR
THE PINOLE VALLEY ROAD LANDSCAPE AND LIGHTING ASSESSMENT
DISTRICT FOR FISCAL YEAR 2021/2022, APPROVING THE ENGINEER'S REPORT,
AND SETTING THE DATE OF THE PUBLIC HEARING**

WHEREAS, the City Council has by previous Resolutions formed said special maintenance district and has initiated proceedings for Fiscal Year 2021/2022, pursuant to the provisions of the "Landscape and Lighting Act of 1972" (the "1972 Act"), being Part 2, Division 15 of the California Streets and Highways Code (commencing with Section 22500) that provides for the levy and collection of assessments by Contra Costa County to pay for the annual maintenance and servicing costs of all improvements and facilities related thereto. Said special maintenance district is known and identified as the Pinole Valley Road Landscape and Lighting Assessment District (hereafter referred to as the "District"). The District is comprised of two Zones (Zone A and Zone B) which are located on Pinole Valley Road between Henry Avenue and Ramona Street; and,

WHEREAS, the City Council has directed the preparation of the Annual Engineer's Report (the "Report") for the District, in accordance with the 1972 Act; and,

NOW, THEREFORE BE IT RESOLVED, DETERMINED AND ORDERED BY THE CITY COUNCIL, FOR THE DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE 1972 ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the annual levy of the District pursuant to the 1972 Act, over and including the land within the District boundaries and to levy and collect assessments on all benefitting land to pay the annual costs of the maintenance and servicing of the improvements located within the District. The City Council finds that the public's best interest requires such levy and collection.

Section 2 District Boundaries: The boundaries of the District are described in the Report. Please refer to the Report for a full and complete description of the specific boundaries and diagram.

Section 3 Description of Improvements: The improvements within the District may include, but are not limited to: turf, shrubs, plants and trees, landscaping, street lighting, traffic signals, irrigation and drainage systems, graffiti removal, litter abatement, sidewalks, landscape lighting, masonry walls, and associated appurtenances within the public right-of-ways or specific easements. Services provided include all necessary service, operations, administration and maintenance required to keep the improvements in a healthy, vigorous and satisfactory condition and in proper working order. The specific improvements within the District are detailed in the Report.

Section 4 Proposed Assessment Amounts: The proposed rates for 2021/2022 are \$ xxxx per assessment unit ("AU") for Zone A and \$xxxx per AU for Zone B. This represents a xxx% increase for Zone A and a xxx% increase for Zone B. For Fiscal Year 2021/2022, the proposed assessments for each parcel within the District are shown in the Report. Said Report also details any changes or increases in the annual assessments.

Section 5 Public Hearing: The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with Chapter 3, Section 22626 of the 1972 Act.

Section 6 Notice: The City Council shall give notice of the time and place of the Public Hearing to all property owners within the District by causing the publishing of this Resolution once in the local newspaper not less than ten (10) days before the date of the Public Hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City for the posting of notices. All interested persons shall be afforded the opportunity to hear and be heard.

Section 7 Notice of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Tuesday April 6, 2021 at or after 7:00 p.m.** at Pinole City Hall, located at 2131 Pear Street, Pinole.

Section 8 Report Approval: The City Council approves the FY 2021/2022 Pinole Valley Road Landscape and Lighting Assessment District Annual Engineer's Report, a copy of which may be requested from the City Clerk.

PASSED AND ADOPTED at a regular meeting of the City Council of the City of Pinole held on this 16th day of March, 2021, by the following vote:

AYES: COUNCILMEMBERS:

NOES: COUNCILMEMBERS:

INTRODUCTION

The City of Pinole (the “City”), under the provisions of the Landscape and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “1972 Act”) and the provisions of the California Constitution Article XIII D (the “Constitution”), annually levies and collects special assessments from the City’s maintenance assessment district designated as:

Pinole Valley Road Landscape and Lighting Assessment District

(the “District”) to provide and maintain various landscaping and lighting improvements throughout the City that provide special benefits to properties within the City.

The City Council formed the District and provided for the levy and collection of annual assessments on the County tax rolls to provide ongoing funding for costs and expenses required to service and maintain the landscaping and lighting improvements within the boundaries of the District. The improvements to be provided by the District and assessments described herein are made pursuant to the 1972 Act and the substantive and procedural provision of the Constitution.

As part of the District formation, the City of Pinole conducted a Property Owner Protest Ballot proceeding for the proposed levy of a new assessment pursuant to the provisions of the Constitution. In conjunction with this ballot proceeding, the City council conducted a noticed public hearing to consider public testimonies, comments, and written protests regarding the formation of the District and levy of assessments. Upon conclusion of the public hearing, property owner assessment ballots received were opened and tabulated. The property owner assessment ballot tabulation resulted in a majority approval of the District and assessments of the property owners within the District. The District was formed on July 1, 2008 by Resolution no. 2008-91. The District is located on Pinole Valley Road and consists of two separate zones: Zone A and Zone B.

This Engineer’s Report (the “Report”) has been prepared pursuant to Chapter 1, Article 4 and Chapter 3 of the 1972 Act, and outlines the improvements, and proposed assessments to be levied in connection with the benefits the properties will receive from maintenance and servicing of landscaping improvements within the District for fiscal year 2021-22.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Contra Costa County Assessor’s Office. The Contra County Auditor/Controller APN and specific fund numbers to identify properties to be assessed on the tax roll for the District assessments.

This Report consists of five sections and identifies the following items:

- **Plans and Specifications** – The location of the District and the specific improvements to be maintained.
- **Method of Apportionment** – How the District costs are allocated and apportioned to the assessable parcels.
- **Zone Budgets** – The District costs and proposed assessments to be levied for 2021/22 for each Zone based upon the special benefit received.
- **District Diagram** – A diagram showing the District and Zone boundaries.
- **Assessment Roll** – A listing of properties to be assessed by APN, Zone, and corresponding assessment amounts.

ASSESSMENT SUMMARY FY 2021-22

	Total Assessable Costs	Total Assessable Units	Proposed Assessment Rate per AU	Maximum Assessment Rate per AU
Zone A	\$25,068.04	52.796	\$474.90	\$582.14
Zone B	\$24,694.99	49.900	\$494.89	\$549.56

Actual assessments are rounded down to the nearest even penny for county tax roll purposes.

SECTION I – PLANS AND SPECIFICATIONS

DESCRIPTION OF THE DISTRICT AND BOUNDARIES

The District consists of two separate zones and is located on Pinole Valley Road, between Henry Avenue and Ramona Street. Zone A is to the north of Interstate I-80 and Zone B is to the south of Interstate I-80. Currently, there are a total of 18 commercial parcels within the District, 8 in Zone A and 10 in Zone B. The number of parcels in Zone A was reduced from 8 to 6 and Zone B was reduced from 16 to 15 parcels, due to parcel mergers effective for the 2011/2012 tax year. An annexation also occurred in Zone A for tax year, 2013/2014, increasing the parcel count for that Zone to 7 and the AU to 52.972. For tax year 2018/2019, one parcel was split into two with a slight size reduction, decreasing the AU to 52.796. The number of parcels in Zone B was reduced from 15 to 10 due to parcel mergers/changes effective for the 2013/2014 and 2014/2015 tax years. A clerical error was brought to the City's attention in December 2019 which has been transcribed over time and resulted in a higher AU in Zone B. In FY 2020-21, the clerical error was corrected resulting in a lower AU in Zone B.

Please refer to the Section V of this Report, Assessment Roll, for details.

IMPROVEMENTS AND SERVICES PROVIDED

Improvements within the District which are maintained and serviced may include but are not limited to: turf, shrubs, plants and trees, landscaping, street lighting, traffic signals, irrigation and drainage systems, graffiti removal, litter abatement, sidewalks, landscape lighting, masonry walls and associated appurtenances within the public right-of-way or specific easements.

The maintenance of District improvements generally include, but are not limited to, all materials, equipment, utilities, labor and incidental expenses, including administrative expenses, for the annual operation of the District and maintenance of the improvements. Also included is the performance of occasional repairs and the removal or replacement of improvements, as needed.

The specific improvements being maintained and serviced within each Zone of the District are defined on the following page:

Zone A Improvements (Northerly of I-80 Freeway)

- Landscaping totaling 16,920 square feet.
- Irrigation system for landscaping and two irrigation controllers.
- Maintenance of seven street light poles and fourteen street lights.
- Maintenance of two and a half traffic signals.
- Electrical power for street lights, traffic signals and irrigation system.
- Weed control and abatement.
- Graffiti abatement.
- Median repairs and contingency for damage.
- Litter abatement and collection (2,102 linear feet).

Zone B Improvements (Southerly of I-80 Freeway)

- Landscaping totaling 18,486 square feet.
- Irrigation system for landscaping and two irrigation controllers.
- Maintenance of ten street light poles and twenty street lights.
- Maintenance of one and a half traffic signals.
- Electrical power for street lights, traffic signals and irrigation system.
- Weed control and abatement.
- Graffiti abatement.
- Median repairs and contingency for damage.
- Litter abatement and collection (2,859.58 linear feet).

Reference is made to the plans and specifications for the improvements which are on file with the City and are incorporated herein by reference.

SECTION II – METHOD OF APPORTIONMENT

The 1972 Act allows for the establishment of assessment districts by public agencies for the purpose of providing certain public improvements as detailed in Section I of this Report. The 1972 Act also requires that the cost of these improvements and services be assessed based on benefit received rather than by assessed value of the properties being assessed. In accordance with the 1972 Act, Section 22573:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among assessable lots or parcels in proportion to the estimated benefits received by each such lot or parcel from the improvements”

The method of apportionment described in this Report, and confirmed by the City Council, utilizes commonly accepted engineering practices which have been established pursuant to the 1972 Act and the California Constitution for the allocation of special benefit assessments. The calculation of assessments is based upon the parcel type and the services and improvements provided. The special benefit received by each lot or parcel is over and above any general benefit conferred upon said lots or parcels or to the public at large.

DESCRIPTION OF BENEFIT

Special Benefit

The improvements and associated costs have been allocated to the assessable properties within the District based upon the special benefit received by those properties, pursuant to the provisions of the 1972 Act. The improvements for which the properties will be assessed have been identified as necessary, were approved by the property owners within the District through a Proposition 218 assessment ballot procedure and are in compliance with the development plans and General Plan of the City. As such, the improvements and continuing maintenance and servicing are strictly the obligation of the properties within the District.

General Benefit

Although the improvements may be visible to passersby or to the public at large, the improvements were installed after approval from the property owners and are for the benefit of properties within the District. It has been determined therefore, any access to or use by properties or individuals outside the District is completely incidental and the costs of operating, maintaining and servicing said improvements provides no measurable benefit to said outside properties or individuals.

Definition of Special Benefit

The method of apportionment described in this Report is based on the premise that each assessable parcel or unit receives distinct and special benefits from the improvements

and services provided, including the visual desirability provided by well maintained landscaping. In accordance with Article XIII D, Section 4 of the California Constitution:

“Special benefit means a particular and distinct benefit over and above general benefits conferred on real property located in the District or the public at large”

The special benefits associated with local landscape and lighting improvements are specifically:

- Enhanced desirability of properties due to proximity of the improvements.
- Improved aesthetic appeal provided by a positive representation of the community.
- Improved ingress and egress to property resulting in enhanced traffic flow, reduced traffic accidents and consequent reduction in possible property damage.
- Improved traffic visibility and circulation.
- Improved accessibility for emergency vehicles.
- Reduced vandalism and other criminal activity.
- Enhanced environmental quality provided by adequate green space and other landscaping which helps moderate temperatures, reduce noise pollution and control dust and debris.

ASSESSMENT RANGE FORMULA

It is generally recognized that most budgetary items will be impacted by inflation in future years. In accordance with the California Constitution, and Government Section 53739 (b) (1), assessments ***“may be adjusted for inflation pursuant to a clearly defined formula...”*** A formula for an inflationary adjustment is therefore included as part of the maximum assessment for this District and was approved by the property owner(s) at the time of formation. The formula, as described below, allows for annual adjustments to the budget and the assessments.

Generally, any new or increased assessment requires certain noticing and meeting requirements by law, the Government Code excludes certain conditions of a new or increased assessment. These conditions include:

“An assessment that does not exceed an assessment formula or range of assessments previously specified in the notice given to the public...and that was previously adopted by the agency...”

The initial maximum assessment for the District was established at the time of formation and was assessed for the first time during the 2008/2009 fiscal year. The initial maximum assessment for Zone A was \$415.52 per Assessment Unit (“AU”). The initial maximum assessment for Zone B was \$390.80 per AU. The initial maximum assessment for each Zone has been adjusted each subsequent fiscal year by the following Assessment Range Formula:

- The Maximum Assessment Rate allowed each fiscal year (the “Adjusted Maximum Assessment Rate”) shall be based on the initial maximum assessment established in fiscal year 2008/2009, adjusted annually by the Bureau of Labor Statistics, Consumer Price Index for the month of April, All Urban Consumers, (“CPI”) for the San Francisco/Oakland/San Jose area or two percent (2%), whichever is greater. Should the Bureau of Labor Statistics revise or discontinue the preparation of such index, the City reserves the right to use such revised index or a comparable system to determine fluctuations in the annual cost of living.
- Each fiscal year, the greater of CPI or 2% shall be applied to the Maximum Assessment Rate established the previous fiscal year to calculate the appropriate Adjusted Maximum Assessment Rate for the then current fiscal year.
- If the proposed annual assessment rate (assessment per AU) for the upcoming fiscal year is less than or equal to the Adjusted Maximum Assessment Rate established for that fiscal year then the proposed annual assessment is not considered an increased assessment.

Beginning in the second fiscal year after the formation of the District (2009/2010) and each fiscal year since, the Maximum Assessment Rate has been recalculated and a new Adjusted Maximum Assessment Rate has been established for each fiscal year using the Assessment Range Formula described above. Each fiscal year, the greater of CPI or 2% is applied to the Maximum Assessment Rate from last year. The April 2021 CPI is not available therefore a 2% will be applied to the Maximum Assessment Rate from the last year. The Zone A Maximum Assessment Rate for the upcoming fiscal year (2021/2022) therefore, shall be **\$582.14** per AU. The Zone B Maximum Assessment Rate for the upcoming fiscal year shall be **\$549.56** per AU. The table below shows the Adjusted Maximum Assessment Rate for each Zone, for each fiscal year since the formation of the District. The Adjusted Maximum Assessment Rates have been calculated independently of the annual budget and proposed assessment rate for the given fiscal year. As stated above, if the proposed annual assessment for any fiscal year does not exceed the Adjusted Maximum Assessment Rate for that year, it is not considered to be an increased assessment under the terms of Proposition 218 or the Government Code.

Zone A LLAD Assessment/CPI History

Fiscal Year	April CPI	Allowable Increase	Actual April CPI Calculation	Adjusted Max. Assessment per AU	Actual Assessment per AU
2008/2009	N/A	N/A	N/A	\$415.52	\$415.82
2009/2010	0.80%	2.00%	1.020000000	\$423.83	\$415.82
2010/2011	1.71%	2.00%	1.020000000	\$432.31	\$415.82
2011/2012	2.82%	2.82%	1.028212932	\$444.51	\$394.80

2012/2013	2.07%	2.07%	1.020775582	\$453.74	\$394.80
2013/2014	2.38%	2.38%	1.023809026	\$464.54	\$377.74
2014/2015	2.78%	2.78%	1.027873710	\$477.49	\$377.74

2016/2017	2.70%	2.70%	1.026950338	\$502.30	\$377.74
2017/2018	3.78%	3.78%	1.037888610	\$521.34	\$377.74
2018/2019	3.20%	3.20%	1.032	\$538.02	\$396.32
2019/2020	4.0%	4.0%	1.040	\$559.54	\$409.69
2020/2021	1.1%	2.0%	1.020	\$570.73	\$422.04
2021/2022*	-	2.0%	1.020	\$582.14	\$474.90

*The April 2020 CPI is not available at the time this report was prepared, therefore a 2% was applied to the Maximum Assessment Rate.

Zone B LLAD Assessment/CPI History

Fiscal Year	April CPI	Allowable Increase	Actual April CPI Calculation	Adjusted Max. Assessment per AU	Actual Assessment per AU
2008/2009	N/A	N/A	N/A	\$390.80	\$390.80
2009/2010	0.80%	2.00%	1.020000000	\$398.62	\$390.80
2010/2011	1.71%	2.00%	1.020000000	\$406.59	\$390.80
2011/2012	2.82%	2.82%	1.028212932	\$418.06	\$342.04
2012/2013	2.07%	2.07%	1.020775582	\$426.75	\$342.04
2013/2014	2.38%	2.38%	1.023809026	\$436.91	\$342.04
2014/2015	2.78%	2.78%	1.027873710	\$449.09	\$342.04
2015/2016	2.43%	2.43%	1.024362313	\$460.03	\$342.04
2016/2017	2.70%	2.70%	1.026950338	\$472.43	\$342.04
2017/2018	3.78%	3.78%	1.037888610	\$490.32	\$348.06
2018/2019	3.20%	3.20%	1.032	\$506.01	\$359.06
2019/2020	4.0%	4.0%	1.040	\$526.25	\$392.64
2020/2021	1.1%	2.0%	1.020	\$538.78	\$405.68
2021/2022*	-	2.0%	1.020	\$549.56	\$494.89

*The April 2020 CPI is not available at the time this report was prepared, therefore a 2% was applied to the Maximum Assessment Rate.

To impose a new assessment or an increased assessment in excess of the Maximum Assessment Rate for the current fiscal year, as provided by the preceding Assessment Range Formula, the City must comply with the provisions of the California Constitution, Article XIII D, Section 4c that requires a public hearing and certain protest procedures including mailed notice of a public hearing and property owner protest balloting. Property owners must approve the proposed new or increased assessment via a property owner protest ballot process before any such new or increased assessment can be imposed.

The definition of new or increased assessments includes any assessment which, 1) did not previously exist or, 2) exceeds a previously approved assessment amount or assessment range formula. Any assessment range formula must have been previously adopted by the agency and approved by the property owners.

ASSESSMENT METHODOLOGY

The benefit formula used to determine the financial obligation for each parcel is based on the improvements benefitting the parcels, as well as the use, or type, of each parcel as compared to other parcels that benefit from said improvements. One of the more common approaches to fairly distributing District costs to the benefitting parcels in maintenance districts such as this utilizes a methodology referred to as the Assessment Unit (“AU”) method of apportionment. This methodology utilizes various property characteristics such as development status, type of development (land-use) and size (units or acreage) to compare the proportional benefit of each property compared to similar properties benefitting from the improvements.

The District is comprised of one parcel type; commercial. Each commercial parcel receives similar benefit from the improvements due to the relative size of the properties, the specific improvements and proximity of the improvements to the properties. It has been determined that the buildable acreage of each parcel is an appropriate basis in calculating the total AU for that parcel. The individual commercial parcel, acreage is multiplied by a factor of 4.00 to determine the total AU for that parcel. The total Zone AU is then divided into the “Total Balance to Assessment” (as shown in Section III of this Report) to determine the annual assessment rate. The AU for each parcel is then multiplied by the annual assessment rate to determine the annual assessment for each parcel.

SECTION III – ZONE BUDGETS

The estimated budget for the annual maintenance and servicing of the improvements and the proportionate share of administration costs for each Zone have been prepared based on the estimated and recent historical costs of providing said maintenance and servicing.

Zone A – Pinole Valley Road North FY 2021-22 Budget

DIRECT COSTS		
ACCOUNT	NAME	BUDGET
310-347-42108	Building-Structure Maintenance	\$10,020.00
	Contra Costa County Public Works Traffic Signal Maintenance	\$6,500
	Caltrans Traffic Signal Maintenance	\$2,150
	Pacific Site Management	\$720
	Labor, material, and equipment required to properly maintain the landscaping improvements, traffic signals, streetlights, poles, and irrigation system	\$650
310-347-43102	Water	\$3,800.00
	EBMUD	\$3,800

310-347-43103	Electricity and Power	\$4,765.00
	Pinole Valley Rd. Traffic Control – PG&E	\$1,125

	Capital Replacement Account¹	\$3,226.24
	Direct Costs Sub-Total	\$21,811.24
	INDIRECT COSTS	
310-347-42126	Legal Charges	\$1,050.00
310-347-42102	County Administration Fees	\$131.80
310-347-46122	Admin Debits	\$2,080.00
	City Administration	\$1,000.00
	Engineer's Report	\$1,080.00
	Indirect Costs Sub-Total	\$3,261.80
	TOTAL COSTS	\$25,073.04
TOTAL BALANCE TO ASSESSMENT		\$25,073.04
Total Assessable AU (8 parcels)		52.796
2021/2022 PROPOSED ASSESSMENT PER AU		\$474.90
2021/2022 MAXIMUM ASSESSMENT PER AU		\$582.14

Zone B – Pinole Valley Road South FY 2021-22 Budget

DIRECT COSTS		
ACCOUNT	NAME	BUDGET
310-348-42108	Building-Structure Maintenance	\$9,430.00
	Contra Costa County Public Works Traffic Signal Maintenance	\$5,000.00
	Caltrans Traffic Signal Maintenance	\$3,000.00
	Pacific Site Management	\$780.00
	Labor, material, and equipment required to properly maintain the landscaping improvements, traffic signals, streetlights, poles, and irrigation system	\$650
310-348-43102	Water	\$2,800.00
	EBMUD	\$2,800.00
310-348-43103	Electricity and Power	\$5,330.00
	Pinole Valley Road Median Irrigation – PG&E	\$130.00
	Street and Highway Lighting – PG&E	\$5,200.00
	Capital Replacement Account¹	\$3,871.49
	Direct Costs Sub-Total	\$21,431.49
	INDIRECT COSTS	
310-348-42126	Legal Charges	\$1,050.00
310-348-42102	County Administration Fees	\$133.50
310-348-46122	Admin Debits	\$2,080.00
	City Administration	\$1,000.00

Engineer's Report	\$1,080.00
Indirect Costs Sub-Total	\$3,263.50
TOTAL COSTS	\$24,694.99
TOTAL BALANCE TO ASSESSMENT	\$24,964.99
Total Assessable AU (10 parcels)	49.900
2021/2022 PROPOSED ASSESSMENT PER AU	\$494.89
2021/2022 MAXIMUM ASSESSMENT PER AU	\$549.56

¹ **Capital Replacement Account (CRA)** – This line item, shown on the budget page for each Zone, is specifically intended for the use in replacing the lighting poles for streetlights and traffic signals within the District. There are two reasons to consider the replacement of lighting poles. First, there is a finite life span of a standard lighting pole, which is approximately 50 years. Secondly, there must be a contingency plan in place for the possibility that a lighting pole gets damaged or knocked down, either by way of accident or by natural disaster. The current replacement cost of a lighting pole is approximately \$10,531.20 for materials and \$3100.00 for installation.

The estimated cost to replace all streetlight poles after 50 years, as well as a contingency to account for the possibility of a knockdown, accident, or natural disaster is shown below:

Zone	Cost per Pole	Number of Poles	Estimated Life Span (Years)	Knockdown Contingency (\$50 per pole)	Estimated Annual Cost
A	\$13,631.20	10	50	\$500	\$3,226.24
B	\$13,631.20	12	50	\$600	\$3,871.49

\$13,631.20 per light pole * 22 poles = \$299,886.40 / 50 years = \$5,997.73 + \$1,100 for Contingency = \$7,097.73 annually.

The replacement cost of a lighting pole was increased from \$10,500 to \$13,631.20. This estimate is based on the amount paid for the most recent streetlight pole replacement in FY 2020-21. The costs will continue to be collected through the assessment amounts as part of the Capital Replacement Fund, as shown in the District Budgets.

DESCRIPTION OF BUDGET ITEMS

- **Building-Structure-Maintenance** – Includes all regularly scheduled labor, material, and equipment required to properly maintain the landscaping improvements, traffic signals, streetlights, poles, and irrigation system. Also includes the cost of:
 - Traffic signal maintenance which is provided by California Department of Transportation (Caltrans) and Contra Costa County Public Works.
 - Landscaping maintenance services provided by Pacific Site Management.
 - Replacement bulbs for traffic signals and streetlights.

- Weed control and graffiti abatement within the District.
- **Water** – Includes the cost of furnishing water required for the proper maintenance of the landscaping.
- **Electricity and Power** – Includes the cost of furnishing electrical energy required for the proper operation of traffic signals, streetlights, and irrigation system.
- **Legal Charges** – Includes the cost of legal services to review reports, resolutions, and public hearing requirements for imposing the LLAD Assessment.
- **County Administration Fees** – Includes the County costs related to placement of the annual assessment charges onto the tax roll and the generation of the annual tax bills related thereto. Contra Costa County charges a Levy Code Fee of \$250 per district, \$0.76 Collection Fee per parcel, and \$0.09 Assessor User Code Fee per parcel. Each Zone is charged \$125 plus \$0.85 per parcel.
- **Admin Debits** – Includes the cost of all particular departments and staff of the City for providing coordination of annual District administration process, operation, and maintenance of the improvements and responding to public concerns. This line item also includes the cost of preparing the Engineer's report for the administration of the District and transmitting assessment amounts to the County for the inclusion on the tax roll.

ACCOUNT BALANCES

DISTRICT	FY 2015-16	FY 2016-17	FY 2017-18	FY 2018-19	FY 2019-20
Fund balance on July 1 st	\$12,499.44	\$28,636.16	\$15,027.87	\$24,203.51	\$30,613.24
Revenue	\$44,437.02	\$39,221.92	\$39,797.64	\$41,854.22	\$39,746.28
Expenditures	\$28,300.30	\$52,830.21	\$30,622.00	\$35,444.29	\$38,171.74
Revenue over/under expenses	\$16,136.72	-13,608.29	\$9,175.64	\$6,409.73	\$1,574.54
Fund balance on June 30 th	\$28,636.16	\$15,027.87	\$24,203.51	\$30,613.24	\$32,187.78

Based on the historical data in the table above, the average expenditures for the District are \$37,073.71. The 1972 Act allows the District assessments to "...include a reserve which shall not exceed the estimated costs of maintenance and servicing to December 10 of the fiscal year, or whenever the city expects to receive its apportionment of special assessments and tax collections from the county, whichever is later." The Reserve Fund will be considered fully funded when the account balance reaches an amount equal to approximately 50% of the annual District costs.

Therefore, the Reserve Fund is fully funded when the account balance reaches \$18,536.86. The beginning fund balance on July 1, 2020 was \$32,187.78 and

\$18,536.86 of the funds were allocated to the Reserve Fund. The remainder \$13,650.92 was placed in two separate CRA for Zone A and Zone B. The beginning CRA balance as of July 1, 2020 for Zone A and Zone B was \$6,211.17 and \$7,439.75, respectively. These allocations were based on the percentage of poles in each Zone; approximately 45.5% of the poles in the District are in Zone A, and approximately 54.5% are in Zone B. The methodology noted above will be applied each fiscal year to allocate appropriate amounts to the Reserve Fund and CRA.

If a lighting pole is damaged or knocked down by an accident, attempts are made to recover the replacement cost through the responsible party. The recovered funds are placed in the CRA for the Zone where the knockdown reoccurred. A summary of the Capital Replacement Reserve account for each Zone is shown in the table below.

Zone	Capital Replacement account balance as of 07/01/2020	FY 2020-21 Contribution to Capital Replacement account	Estimated lighting pole recovery costs for FY 2020-21	Estimated lighting pole repair and replacement costs in FY 2020-21	Estimated ending Capital Replacement account balance on 06/30/2021.
A	\$6,211.17	\$6,000	-	-	\$12,211.17
B	\$7,439.75	\$4,500	\$14,491.20	\$28,122.40*	-\$1,691.45

*Includes the purchase of a surplus pole for future knockdowns

SECTION IV – DISTRICT DIAGRAM

The following page(s) show the Assessment Diagrams for The Pinole Valley Road Landscape and Lighting Assessment District. The lines and dimensions shown on maps of the Contra Costa County Assessor for the current year are incorporated by reference herein and made part of this Report.

SECTION V – ASSESSMENT ROLL

Parcel Identification for each lot or parcel within the District shall be based on available parcel maps and other property data from the Contra Costa County Assessor's office as they existed at the time this Report was prepared and adopted by the City Council.

A listing of parcels assessed within the District for Fiscal Year 2021/2022, along with the corresponding assessment amounts, is included on the following pages. If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel(s) shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amounts applied to each of the new parcels shall be recalculated and applied according to the

approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

Non-assessable lots or parcels include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-way, including public greenbelts and parkways; utility rights-of-way; common areas; landlocked parcels; small parcels vacated by the County, bifurcated lots and any other property that cannot be developed or has specific development restrictions. These types of parcels are considered to receive little or no benefit from the improvements and are therefore, exempted from assessment.

Zone	APN	Parcel Acreage	Parcel Type	Parcel AU	2021/2022 Assessment per AU	2021/2022 Assessment	Applied Assessment

Parcel Type: "COM" is a developed commercial property
 "CMV" is an undeveloped commercial property

Zone A – APN 401-410-017 was merged from three former parcels (APN's 401-410-014,

401- 410-015 & 401-410-016), and became active and assessable for Fiscal Year 2011/2012. APN 401-211-34 was annexed into the District for the 2013/2014 year. APN 401-410-017 was split into 401-410-019 and 020 for Fiscal Year 2018/2019.

Zone B – APN's 401-310-010 and 401-310-013 were merged into APN 401-310-019. This parcel became active and assessable for Fiscal Year 2011/2012. APN's 401-310-002; 003; 012; 017; 018 & 019 were merged into APN 401-310-021 for Fiscal Year 2013/2014. APN 401-310-018 became parcel 022 for Fiscal Year 2013/2014. APN 430-330-022 merged into APN 401-310-021 for Fiscal Year 2014/2015.

CITY COUNCIL REPORT

7J

DATE: MARCH 16, 2021

TO: MAYOR AND CITY COUNCIL

FROM: HECTOR DE LA ROSA, ASSISTANT CITY MANAGER

SUBJECT: APPROVING A PURCHASE AND SALE AGREEMENT BY AND BETWEEN THE CITY OF PINOLE AND PASQUALE AND MARISA D'ONOFRIO FOR THE SALE OF PROPERTY LOCATED IN THE CITY OF PINOLE AT 2361 SAN PABLO AVENUE (APN: 401-162-003)

RECOMMENDATION

Staff recommends that the City Council approve a Purchase and Sale Agreement (PSA, attached) by and between the City of Pinole and Pasquale and Marisa D'Onofrio, for the sale of property located in the City of Pinole at 2361 San Pablo Avenue (APN: 401-162-003).

BACKGROUND

In 1992, the former Redevelopment Agency of the City of Pinole purchased 2361 San Pablo Avenue from the City, commonly known as the old Pinole Bank Building. Over the years, the building had been used as the site for the City's Recreation Program, a brewery, and a flower shop. The building has been vacant since 2010.

In 2012, the California State Legislature passed AB 26 and AB 1484 dissolving redevelopment agencies statewide. The City elected to serve as the Successor Agency to the Redevelopment Agency and is responsible for winding down the Redevelopment Agency's affairs. In accordance with AB 26 and AB 1484, the Successor Agency prepared a list and plan to dispose of all properties owned by the Redevelopment Agency at the time it was dissolved. The California Department of Finance approved the resulting Long Range Property Management Plan (LRPMP). The LRPMP obligated the Successor Agency to dispose of the Redevelopment Agency's real property assets, of which 10 properties were approved to be transferred to the City as a governmental use and 9 properties were approved to be transferred to the City for future development. The City is required to transfer any sales proceeds to the County for distribution to various taxing agencies.

Four former Redevelopment Agency properties remain to be sold:

- 2361 San Pablo Avenue (Pinole Bank Building),
- 2301 San Pablo Avenue (corner lot),

- 600 Tennent Street/2279 Park Street (former restaurant), and
- 612 Tennent Avenue (Collins House).

612 Tennent Avenue was not part of the LRPMP; however, it is a former Redevelopment Agency housing asset that is also required to be sold.

On May 19, 2020, the City entered into an agreement with RSG, Inc. to market the properties after previous marketing attempts did not result in viable offers. The City first issued a Surplus Lands Act notice for the properties, which gives priority to offers proposing affordable housing and open space uses. No surplus lands offers were received. The City then listed the properties for sale in September 2021 with an offer deadline of January 4, 2021.

On February 16, 2021, RSG presented multiple offers to City Council on each of the four properties. The City Council reviewed the proposals and directed staff to negotiate purchase and sale agreements with selected parties.

REVIEW AND ANALYSIS

On February 17, 2021, the City entered negotiations with Pasquale and Marisa D'Onofrio for the sale of the Pinole Bank Building located at 2361 San Pablo Avenue. The parties have agreed to the terms and conditions for the Purchase and Sale of the property.

The City has determined that by entering into this Purchase and Sale Agreement, the City will comply with the Long-Range Property Management Plan approved by the Department of Finance on November 20, 2015, and that the Compensation Agreement that the City executed with other taxing agencies requires the City to remit the sale proceeds to the County for distribution to all affected taxing agencies.

Below are the key negotiated deal points of the Purchase and Sale Agreement, which is now in a form for City Council consideration and approval.

- Recital J: The Pinole Bank Building exterior will be subject to the requirements of the State Historic Preservation and the City's Historic Overlay Ordinance.
- Section 2.2: Purchase Price – the purchase price is \$525,000.
- Section 3.3 Buyer's Deposit – requires Buyer to deposit \$15,750 or 3% of the purchase price into the escrow account. The Deposit is applicable to the Purchase Price at closing. The Deposit is non-refundable after the Due Diligence Contingency Period has expired.

- Section 4.2 Due Diligence Contingency Period – provides that the Buyer has sixty (60) days from the contract effective date to complete physical inspection of the property and due diligence related to the purchase.
- Section 4.3 Satisfaction of Due Diligence Contingency – provides that the Buyer has the ability to terminate the Purchase Agreement prior to the sixty (60) days for any reason with a full refund of their Deposit.
- Section 5.1 Closing – Buyer agrees to close escrow no later than ninety (90) days from the expiration of the Due Diligence Contingency Period (150 days from Effective date of Agreement) unless the parties agree to any extension.
- Section 5.3 City's Conditions to Closing – established obligations which Buyer must complete prior to closing escrow, including obtaining City approval of all entitlements (building permit for Tenant and Americans with Disability Act improvements) needed to construct the project.
- Section 5.5(d) Closing Costs – Each party agrees to pay one-half of escrow fees and recording fees. Buyer will pay title insurance and title report costs. Buyer will pay all governmental conveyance fees and all transfer taxes and pro-rated property taxes. Buyer will pay all Broker Fees.

There are other sections within the Purchase and Sale Agreement which are not listed above, which reflect standard language on warranties and covenants, insurance, indemnification, breach, or default by Buyer.

Staff recommends that City Council approve the Purchase and Sale Agreement for the sale of the building located at 2361 San Pablo Avenue and authorize the City Manager to execute the Purchase and Agreement and associated documents.

FISCAL IMPACT

Sale proceeds and expenditures associated with the sale of former RDA properties will be reflected in Fund 750. The City is allowed to recoup its expenses from the sale proceeds, such as appraisal, staff, attorney, and consultant costs, prior to remitting net sale proceeds to the County for distribution to all affected taxing agencies. As one of the taxing entities, the City will receive a share (18.75%) of the net sale proceeds.

RESOLUTION NO. 2021-

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PINOLE
APPROVING A PURCHASE AND SALE AGREEMENT BY AND BETWEEN THE
CITY OF PINOLE AND PASQUALE AND MARISA D'ONOFRIO FOR THE SALE
OF PROPERTY LOCATED AT 2361 SAN PABLO AVENUE (APN: 401-162-003)**

WHEREAS, the City of Pinole (the “City”) is the owner of certain property located at 2361 San Pablo Avenue in the City, known as County Assessor’s Parcel Number 401-162-003-8 (the “Property”); and

WHEREAS, the Property was purchased by the former Redevelopment Agency of the City of Pinole (the “Redevelopment Agency”) in accordance with the Community Redevelopment Law (Health and Safety Code Sections 33000 et seq.) for future development; and

WHEREAS, on June 29, 2011 the legislature of the State of California adopted Assembly Bill x1 26 (“AB 26”), which amended provisions of the Redevelopment Law and pursuant to AB 26 and the California Supreme Court decision in *California Redevelopment Association, et al. v. Ana Matosantos, et al.*, which upheld AB 26, the Agency was dissolved on February 1, 2012; and

WHEREAS, in June 2012, the legislature enacted Assembly Bill 1484 (together with AB 26 and SB 107, the “Dissolution Law”), requiring the Successor Agency to the Redevelopment Agency (the “Successor Agency”) prepare a long range property management plan (the “LRPMP”); and

WHEREAS, the Property was transferred to the City pursuant to the LRPMP, which was approved by the California Department of Finance on November 20, 2015; and

WHEREAS, the City put out a request for proposals for the sale the Property and desires to convey the Property to Pasquale and Marisa D’Onofrio (“Buyer”) for use as a coffee shop, event space, catering site, and outdoor dining patio; and

WHEREAS, City and Buyer have negotiated a Purchase and Sale Agreement and Joint Escrow Instructions (the “Purchase Agreement”), substantially in the form attached as Exhibit A, setting forth the terms and conditions under which City will sell the Property to Buyer; and

WHEREAS, there is a building located on the Property, which was constructed in 1915 to be used as a bank, and is known as the “Pinole Bank Building”; and

WHEREAS, on October 24, 1996 The United States Department of the Interior, National Park Service entered the Pinole Bank Building into the National Register of Historic Places (the “National Register Covenant”); and

WHEREAS, the Pinole Bank Building will continue to be subject to the National Register Covenant upon the sale of the Property; and

WHEREAS, the City Council has duly considered all of the terms and conditions of the proposed Purchase Agreement and believes that the sale of the Property pursuant to the Purchase Agreement is in the best interests of the City of Pinole and the health, safety, and welfare of its residents, and in accord with the public purposes and provisions of applicable state and local laws and requirements.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF PINOLE DOES RESOLVE AS FOLLOWS:

SECTION 1. The City Council finds and determines that the recitals are true and correct and incorporated herein by this reference.

SECTION 2. The City Council hereby approves the Purchase and Sale Agreement, substantially in the form on file with the City Clerk and attached hereto as Exhibit A.

SECTION 3. The City Manager (or his designee) is hereby authorized to make revisions to the Purchase Agreement, in consultation with the City Attorney, that do not materially or substantially increase the City obligations thereunder, to execute the Purchase Agreement, to make all approvals and take all actions necessary or appropriate to carry out the Purchase Agreement, and to administer the City's obligations, responsibilities and duties to be performed under the Purchase Agreement and any related documents.

PASSED AND ADOPTED at a regular meeting of the Pinole City Council held on the 16th day of March, 2021, by the following vote:

AYES: COUNCILMEMBERS:

NOES: COUNCILMEMBERS:

ABSENT: COUNCILMEMBERS:

ABSTAIN: COUNCILMEMBERS:

I hereby certify that the foregoing resolution was introduced, passed, and adopted on the 16th day of March, 2021.

Heather Iopu, CMC
City Clerk

PURCHASE AND SALE AGREEMENT AND JOINT ESCROW INSTRUCTIONS

THIS PURCHASE AND SALE AGREEMENT AND JOINT ESCROW INSTRUCTIONS (this “**Agreement**”) is entered into as of March __, 2021 (the “**Effective Date**”) by and between the City of Pinole, a California municipal corporation (“**City**”) and Pasquale and Marisa D’Onofrio, husband and wife as individuals (“**Buyer**”). City and Buyer are each referred to as a “**Party**” and collectively referred to herein as the “**Parties**.”

RECITALS

A. City is the owner of certain property located at 2361 San Pablo Avenue in the City, known as County Assessor’s Parcel Number 401-162-003-8 (the “**Property**”), as more particularly described in Exhibit A attached hereto and incorporated herein by this reference.

B. The Property was purchased by the former Redevelopment Agency of the City of Pinole (the “**Agency**”) in accordance with Community Redevelopment Law (Health and Safety Code Sections 33000 et seq.) for future development.

C. On June 29, 2011 the legislature of the State of California (the “**State**”) adopted Assembly Bill x1 26 (“**AB 26**”), which amended provisions of the Redevelopment Law and pursuant to AB 26 and the California Supreme Court decision in *California Redevelopment Association, et al. v. Ana Matosantos, et al.*, which upheld AB 26, the Agency was dissolved on February 1, 2012.

D. In June 2012, the legislature enacted Assembly Bill 1484 (together with AB 26 and SB 107, the “**Dissolution Law**”), requiring the Successor Agency to the Agency (the “**Successor Agency**”) prepare a long range property management plan (the “**LRPMP**”).

E. The Property was transferred to the City pursuant to the LRPMP, which was approved by the California Department of Finance on November 20, 2015.

F. City put out a request for proposals for the sale the Property and selected Buyer’s proposal to purchase the Property.

G. Buyer desires to purchase the Property and proposes to renovate the existing structure to provide a coffee house and event space, and to lease certain outdoor space to the neighboring Pear Street Bistro for outdoor seating (the “**Project**”).

H. There is a building located on the Property, which was constructed in 1915 to be used as a bank, and is known as the “**Pinole Bank Building**.”

I. On October 24, 1996 The United States Department of the Interior, National Park Service entered the Pinole Bank Building into the National Register of Historic Places (the “**National Register Covenant**”), as set forth Exhibit B and incorporated herein by this reference.

J. The Property and the Pinole Bank Building will also be subject to the Pinole Historic Overlay Ordinance, which is expected to be effective on May 6, 2021 (together with the National Register Covenant, the “**Historic Preservation Requirements**”).

K. The Property is also subject to that certain reciprocal easement agreement recorded in the Contra Costa Official Records as Document Number 96-1777362 on September 23, 1996 (the “**Reciprocal Easement Agreement**”).

K. The purchase price for the Property is Five Hundred Twenty-Five Thousand Dollars (\$525,000) (the “**Purchase Price**”).

L. City desires to sell the Property to Buyer, and Buyer desires to purchase the property from City in accordance with the terms of this Agreement.

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained in this Agreement, and other good and valuable consideration, the receipt and adequacy of which is hereby acknowledged by the Parties, City and Buyer hereby agree as follows:

1. INCORPORATION OF RECITALS AND EXHIBITS. The Recitals set forth above and the Exhibits attached to this Agreement are each incorporated into the body of this Agreement as if set forth in full.

2. PURCHASE AND SALE.

2.1 Agreement to Buy and Sell. Subject to the terms and conditions set forth herein, City agrees to sell the Property to Buyer, and Buyer hereby agrees to acquire the Property from City.

2.2 Purchase Price. The purchase price to be paid by Buyer to City for the Property is Five Hundred Twenty-Five Thousand Dollars and No/100 (\$525,000) (the “**Purchase Price**”).

2.3 Payment of Purchase Price. The Purchase Price will be paid in immediately available funds to Buyer at Closing (defined in Section 5 below).

3. ESCROW.

3.1 Escrow Account. Seller has opened an escrow account (the “**Escrow**”) maintained by Old Republic Title Company as Escrow No. 0147024376-DJ, located at 1000 Burnett Ave., Suite 400, Concord, CA 94523, Attn: Donna Jones (the

“Escrow Holder”). Escrow Holder shall perform all escrow and title services in connection with this Agreement.

3.2 Opening of Escrow. Within five (5) business days after the Effective Date, the Parties will deposit into Escrow the fully executed Agreement, or executed counterparts thereto. The date such fully executed Agreement is received by Escrow Holder will be deemed the **“Opening of Escrow.”**

3.3 Buyer’s Deposit. Upon Opening of Escrow, the Buyer shall deposit Fifteen Thousand Seven Hundred Fifty Dollars and No/100 (\$15,750.00) into Escrow (the **“Deposit”**). The Deposit is non-refundable after the Due Diligence Contingency Period has expired but applicable to the Purchase Price at Closing. In the event Buyer does not approve Due Diligence on or before the expiration of the Due Diligence Contingency Period, Buyer’s deposit shall be immediately returned to Buyer and this Agreement shall terminate.

4. DUE DILIGENCE AND PROPERTY DISCLOSURE REQUIREMENTS.

4.1 Condition of Title/Preliminary Title Report. Within three days of Opening of Escrow, Escrow Holder will deliver a Preliminary Title Report for the Property (the **“Preliminary Report”**) to Buyer and City. Buyer will review the Preliminary Report and approve all of the following exceptions to title, (the **“Permitted Exceptions”**): (a) standard printed exceptions in the Preliminary Report; (b) general and special real property taxes and assessments constituting a lien not yet due and payable; (c) any exceptions approved in writing by Buyer.

4.2 Due Diligence Contingency Period. Buyer will have sixty (60) days from the Effective Date (the **“Due Diligence Contingency Period”**) to complete physical inspections of the Property and due diligence related to the purchase of the Property. City shall provide to Buyer copies of all reasonably available and known documents relating to the ownership and operation of the Property, including but not limited to agreements, plans, permits and reports (environmental, structural, mechanical, engineering and land surveys) that City has in its possession not later than five (5) days following the Effective Date. All physical inspections must be coordinated with City’s representative. Buyer hereby agrees to indemnify and hold City harmless for any damage to the Property caused (but not merely revealed) by Buyer’s inspections.

4.3 Satisfaction of Due Diligence Contingency. Buyer shall have the right, in its sole discretion, to terminate this Agreement for any reason prior to the expiration of the Due Diligence Contingency Period and receive a refund of Buyer’s Deposit. Buyer hereby agrees to provide written notice to City prior to the expiration of the Due Diligence Contingency Period if Buyer disapproves any due diligence items. Upon provision of such notice to City, this Agreement will terminate, and all amounts deposited by Buyer into escrow, together with interest thereon, if any, will be returned to Buyer, and neither Party will have any further rights or obligations hereunder except those which expressly survive the termination of this Agreement. If Buyer fails to notify

City in writing of its approval of its due diligence on or before the expiration of the Due Diligence Contingency Period, it will be conclusively presumed that Buyer has approved due diligence.

4.4 Environmental and Natural Hazards Disclosure. California Health & Safety Code section 25359.7 requires owners of non-residential real property who know, or have reasonable cause to believe, that any release of hazardous substances are located on or beneath the real property to provide written notice of same to the buyer of real property. Other applicable laws require City to provide certain disclosures regarding natural hazards affecting the Property. City agrees to make all necessary disclosures required by law.

5. CLOSING AND PAYMENT OF PURCHASE PRICE.

5.1 Closing. The closing (the “**Closing**” or “**Close of Escrow**”) will occur no later than ninety (90) days from the expiration of the Due Diligence Contingency Period (“**Closing Date**”) or such other date that the Parties agree in writing.

5.2 Buyer's Conditions to Closing. Buyer's obligation to purchase the Property is subject to the satisfaction of all of the following conditions or Buyer's written waiver thereof (in Buyer's sole discretion) on or before the Closing Date:

- (a) Buyer has approved the condition of the Property.
- (b) City has performed all obligations to be performed by City pursuant to this Agreement.
- (c) City's representations and warranties herein are true and correct in all material respects as of the Closing Date.
- (d) The Title Company is irrevocably committed to issue a CLTA Title Policy to Buyer, effective as of the Closing Date, insuring title to Buyer in the full amount of the Purchase Price.

5.3 City's Conditions to Closing. The Close of Escrow and City's obligation to sell and convey the Property to Buyer are subject to the satisfaction of the following conditions or City's written waiver (in City's sole discretion) of such conditions on or before the Closing Date:

- (a) Buyer has performed all obligations to be performed by Buyer pursuant to this Agreement before the Closing Date.
- (b) Buyer's representations and warranties set forth herein are true and correct in all material respects as of the Closing Date.

(c) Buyer has received approval from the City of all entitlements, including but not limited to approval of all Americans with Disabilities Act improvements and tenant improvements, needed to construct the Project. If Buyer has not received the required entitlements by August 31, 2021, and such delay is not caused by the City, this Agreement will terminate immediately.

5.4 Conveyance of Title. City will deliver marketable fee simple title to Buyer at the Closing, subject only to the Permitted Exceptions. The Property will be conveyed by City to Buyer in an “as is” condition, with no warranty, express or implied, by City as to the physical condition including, but not limited to, the soil, its geology, or the presence of known or unknown faults or hazardous materials or hazardous waste (as defined by state and federal law); provided, however, that the foregoing shall not relieve City from disclosure of any such conditions of which City has actual knowledge.

5.5 Deposits into Escrow.

(a) Deliveries by City. City shall deposit into the Escrow for delivery to Buyer at Closing: (i) a grant deed; (ii) an affidavit or qualifying statement which satisfies the requirements of paragraph 1445 of the Internal Revenue Code of 1986, as amended, any regulations thereunder (the “Non-Foreign Affidavit”); and (iii) a California Franchise Tax Board form 590 to satisfy the requirements of California Revenue and Taxation Code Section 18805(b) and 26131.

(b) Deliveries by Buyer. No less than one (1) business day prior to the Close of Escrow, Buyer shall deposit into escrow immediately available funds in the amount, which together with the Deposit plus interest thereon, if any, is equal to: (i) the Purchase Price as adjusted by any prorations between the Parties; (ii) Buyer’s escrow fees, recording fees and Closing Costs (defined below); and (iii) the cost of the Title Policy.

(c) Closing. Upon Closing, Escrow Holder shall: (i) record the grant deed; (ii) disburse to City the Purchase Price; (iii) deliver to Buyer the Non-Foreign Affidavit, the California Certificate and the original recorded grant deed; (iv) pay any commissions and other expenses payable through escrow; and (v) distribute to itself the payment of escrow fees and expenses required hereunder.

(d) Closing Costs. Each party will pay one-half of escrow fees and recording fees. Buyer will pay title insurance and title report costs. Buyer will pay all governmental conveyance fees and all transfer taxes and pro-rated property taxes (the “**Closing Costs**”). Buyer will pay all Broker Fees, if any.

(e) Pro-Rations. At the Close of Escrow, the Escrow Holder shall make the following prorations: (i) property taxes will be prorated as of the close of escrow based upon the most recent tax bill available, including any property taxes which may be assessed after the close of escrow but which pertain to the period prior to the transfer of title to the Property to Buyer, regardless of when or to whom

notice thereof is delivered; (ii) any bond or assessment that constitutes a lien on the Property at the close of escrow will be assumed by Buyer. City does not pay ad valorem property taxes.

6. REPRESENTATIONS, WARRANTIES AND COVENANTS.

6.1 City's Representations, Warranties and Covenants. In addition to the representations, warranties and covenants of City contained in other sections of this Agreement, City hereby represents, warrants and covenants to Buyer that the statements below in this Section 6.1 are each true and correct as of the Closing Date provided however, if to City's actual knowledge any such statement becomes untrue prior to Closing, City will notify Buyer in writing and Buyer will have three (3) business days thereafter to determine if Buyer wishes to proceed with Closing. If Buyer determines it does not wish to proceed.

(a) Authority. City is a municipal corporation, lawfully formed, in existence and in good standing under the laws of the State of California. City has the full right, capacity, power and authority to enter into and carry out the terms of this Agreement. This Agreement has been duly executed by City, and upon delivery to and execution by Buyer is a valid and binding agreement of City.

(b) Encumbrances. City has not alienated, encumbered, transferred, mortgaged, assigned, pledged, or otherwise conveyed its interest in the Property or any portion thereof, nor entered into any Agreement to do so, and there are no liens, encumbrances, mortgages, covenants, conditions, reservations, restrictions, easements or other matters affecting the Property, except as disclosed in the Preliminary Report. City will not, directly or indirectly, alienate, encumber, transfer, mortgage, assign, pledge, or otherwise convey its interest prior to the Close of Escrow, as long as this Agreement is in force.

(c) There are no agreements affecting the Property except those which have been disclosed by City. There are no agreements that will be binding on the Buyer or the Property after the Close of Escrow other than the Historic Preservation Requirements and the Reciprocal Easement Agreement.

The truth and accuracy of each of the representations and warranties, and the performance of all covenants of City contained in this Agreement are conditions precedent to Buyer's obligation to proceed with the Closing hereunder. The foregoing representations and warranties shall survive Close of Escrow or the expiration or termination of this Agreement and shall not be deemed merged into the deed upon closing.

6.2 Buyer's Representations, Warranties and Covenants. In addition to the representations, warranties and covenants of Buyer contained in other sections of this Agreement, Buyer hereby represents, warrants and covenants to City that the statements below in this Section 6.2 are each true as of the Effective Date, and, if to Buyer's actual knowledge any such statement becomes untrue prior to Closing,

Buyer shall so notify City in writing and City shall have at least three (3) business days thereafter to determine if City wishes to proceed with Closing.

(a) Buyer has the full right, capacity, power and authority to enter into and carry out the terms of this Agreement. This Agreement has been duly executed by Buyer, and upon delivery to and execution by City shall be a valid and binding agreement of Buyer.

(b) Buyer is not bankrupt or insolvent under any applicable federal or state standard, has not filed for protection or relief under any applicable bankruptcy or creditor protection statute, and has not been threatened by creditors with an involuntary application of any applicable bankruptcy or creditor protection statute.

(c) Buyer will comply with all aspects of the Historic Preservation Requirements, including both the National Register Covenant and the Pinole Historic Overlay Ordinance.

The truth and accuracy of each of the representations and warranties, and the performance of all covenants of Buyer contained in this Agreement are conditions precedent to City's obligation to proceed with the Closing hereunder.

7. REMEDIES In the event of a breach or default under this Agreement by City, if such breach or default occurs prior to Close of Escrow, Buyer reserves the right to either (a) seek specific performance from City or (b) to do any of the following: (i) to waive the breach or default and proceed to close as provided herein; (ii) to extend the time for performance and the Closing Date until City is able to perform; or (iii) to terminate this Agreement upon written notice to City, whereupon City shall cause Escrow Holder to send Deposit to City and return to Buyer any other sums placed into the Escrow by Buyer, and except for the rights and obligations expressly provided to survive termination of this Agreement, neither Party shall have any further obligations or liabilities hereunder.

IN THE EVENT OF A BREACH OR DEFAULT HEREUNDER BY BUYER AND THE CLOSING DOES NOT OCCUR DUE TO SUCH DEFAULT, SELLER'S SOLE REMEDY SHALL BE TO RETAIN THE DEPOSITS AS LIQUIDATED DAMAGES. THE PARTIES AGREE THAT IN SUCH INSTANCE, THE DEPOSITS REPRESENT A REASONABLE APPROXIMATION OF SELLER'S DAMAGES AND ARE NOT INTENDED AS A FORFEITURE OR PENALTY BUT RATHER AN ENFORCEABLE LIQUIDATED DAMAGES PROVISION PURSUANT TO CALIFORNIA CIVIL CODE SECTION 1671, ET SEQ. IN NO EVENT SHALL EITHER PARTY BE ENTITLED TO LOST PROFITS OR CONSEQUENTIAL DAMAGES AS A RESULT OF THE OTHER PARTY'S BREACH OF THIS AGREEMENT.

Buyer's Initials

Seller's Initials

8. BROKERS.

(a) City represents that no real estate broker has been retained by City in the sale of the Property or negotiation of this Agreement. City is not responsible for any broker fees related to the sale of the Property. Buyer shall indemnify, hold harmless and defend City from any and all claims, actions and liability from any commission, finder's fee, or similar charges arising out of Buyers purchase of the Property.

(b) Buyer has hired Sexton Group Real Estate to represent Buyer as a real estate broker for the procurement of the Property. Buyer is solely responsible for all broker's fees related to Buyer's purchase of the Property. Buyer shall indemnify, hold harmless and defend City from any and all claims, actions and liability from any commission, finder's fee, or similar charges arising out of Buyers purchase of the Property.

9. ASSIGNMENT. Absent an express signed written agreement between the Parties to the contrary, neither City nor Buyer may assign its rights or delegate its duties under this Agreement without the express written consent of the other, which consent may be withheld for any reason. No permitted assignment of any of the rights or obligations under this Agreement shall result in a novation or in any other way release the assignor from its obligations under this Agreement.

10. MISCELLANEOUS.

10.1 Attorneys' Fees. If any Party employs counsel to enforce or interpret this Agreement, including the commencement of any legal proceeding whatsoever (including insolvency, bankruptcy, arbitration, mediation, declaratory relief or other litigation), the prevailing party shall be entitled to recover its reasonable attorneys' fees and court costs (including the service of process, filing fees, court and court reporter costs, investigative fees, expert witness fees, and the costs of any bonds, whether taxable or not) and shall include the right to recover such fees and costs incurred in any appeal or efforts to collect or otherwise enforce any judgment in its favor in addition to any other remedy it may obtain or be awarded. Any judgment or final order issued in any legal proceeding shall include reimbursement for all such attorneys' fees and costs. In any legal proceeding, the "prevailing party" shall mean the party determined by the court to most nearly prevail and not necessarily the party in whose favor a judgment is rendered.

10.2 Interpretation. This Agreement has been negotiated at arm's length and each Party has been represented by independent legal counsel in this transaction and this Agreement has been reviewed and revised by counsel to each of the Parties. Accordingly, each Party hereby waives any benefit under any rule of law (including Section 1654 of the California Civil Code) or legal decision that would require interpretation of any ambiguities in this Agreement against the Party drafting it.

10.3 Survival. All indemnities, covenants, representations and warranties contained in this Agreement shall survive Close of Escrow.

10.4 Successors. Except as provided to the contrary in this Agreement, this Agreement shall be binding on and inure to the benefit of the Parties and their successors and assigns.

10.5 Governing Law. This Agreement shall be construed and interpreted in accordance with the laws of the State of California.

10.6 Integrated Agreement; Modifications. This Agreement contains all the agreements of the Parties concerning the subject hereof any cannot be amended or modified except by a written instrument executed and delivered by the parties. There are no representations, agreements, arrangements or understandings, either oral or written, between or among the parties hereto relating to the subject matter of this Agreement that are not fully expressed herein. In addition there are no representations, agreements, arrangements or understandings, either oral or written, between or among the Parties upon which any party is relying upon in entering this Agreement that are not fully expressed herein.

10.7 Severability. If any term or provision of this Agreement is determined to be illegal, unenforceable, or invalid in whole or in part for any reason, such illegal, unenforceable, or invalid provisions or part thereof shall be stricken from this Agreement, any such provision shall not be affected by the legality, enforceability, or validity of the remainder of this Agreement. If any provision or part thereof of this Agreement is stricken in accordance with the provisions of this Section, then the stricken provision shall be replaced, to the extent possible, with a legal, enforceable and valid provision this is in keeping with the intent of the Parties as expressed herein.

10.8 Notices. Any delivery of this Agreement, notice, modification of this Agreement, collateral or additional agreement, demand, disclosure, request, consent, approval, waiver, declaration or other communication that either Party desires or is required to give to the other Party or any other person shall be in writing. Any such communication may be served personally, or by nationally recognized overnight delivery service (i.e., Federal Express) which provides a receipt of delivery, or sent by prepaid, first class mail, return receipt requested to the Party's address as set forth below:

To Buyer: Pasquale and Marisa D'Onofrio

510-459-5432

To City: City of Pinole
2131 Pear Street
Pinole, CA 94564
(510) 724-9830
Attn: City Manager

To Escrow Holder: Old Republic Title
1000 Burnett Ave., Suite 400
Concord, CA 94520
(510)-687-7880
Attn: Donna Jones

Any such communication shall be deemed effective upon personal deliver or on the date of first refusal to accept delivery as reflected on the receipt of delivery or return receipt, as applicable. Any Party may change its address by notice to the other Party. Each Party shall make an ordinary, good faith effort to ensure that it will accept or receive notices that are given in accordance with this section and that any person to be given notice actually receives such notice.

10.9 Time. Time is of the essence to the performance of each and every obligation under this Agreement.

10.10 Days of Week. If any date for exercise of any right, giving of any notice, or performance of any provision of this Agreement falls on a Saturday, Sunday or holiday, the time for performance will be extended to 5:00 p.m. on the next business day.

10.11 Reasonable Consent and Approval. Except as otherwise provided in this Agreement, whenever a party is required or permitted to give its consent or approval under this Agreement, such consent or approval shall not be unreasonably withheld or delayed. If a party is required or permitted to give its consent or approval in its sole and absolute discretion or if such consent or approval may be unreasonably withheld, such consent or approval may be unreasonably withheld but shall not be unreasonably delayed.

10.12 Further Assurances. The Parties shall at their own cost and expense execute and deliver such further documents and instruments and shall take such other actions as may be reasonably required or appropriate to carry out the intent and purposes of this Agreement.

10.13 Waivers. Any waiver by any party shall be in writing and shall not be construed as a continuing waiver. No waiver will be implied from any delay or failure to take action on account of any default by any party. Consent by any party to any act or omission by another party shall not be construed to be a consent to any other subsequent act or omission or to waive the requirement for consent to be obtained in any future or other instance.

10.14 Signatures/Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Any one of such completely executed counterparts shall be sufficient proof of this Agreement.

10.15 Date and Delivery of Agreement. Notwithstanding anything to the contrary contained in this Agreement, the Parties intend that this Agreement shall be deemed effective, and delivered for all purposes under this Agreement, and for the calculation of any statutory time periods based on the date an agreement between parties is effective, executed, or delivered, as of the Effective Date.

10.16 Representation on Authority of Parties. Each person signing this Agreement represents and warrants that he or she is duly authorized and has legal capacity to execute and deliver this Agreement. Each Party represents and warrants to the other that the execution and delivery of the Agreement and the performance of such Party's obligations hereunder have been duly authorized and that the Agreement is a valid and legal agreement binding on such Party and enforceable in accordance with its terms.

SIGNATURES ON FOLLOWING PAGE

IN WITNESS WHEREOF, this Agreement is executed to be effective as of the date first set forth above.

CITY COUNCIL REPORT

8A

DATE: MARCH 16, 2021

TO: HONORABLE MAYOR AND COUNCIL MEMBERS

FROM: ERIC CASHER, CITY ATTORNEY

BY: ALEX MOG, ASSISTANT CITY ATTORNEY

SUBJECT: ORDINANCE ADDING CHAPTER 17.28, HISTORIC PRESERVATION OVERLAY, TO THE MUNICIPAL CODE AND RESOLUTION READOPTING OLD TOWN DESIGN GUIDELINES

RECOMMENDATION

Staff recommends the City Council adopt a resolution re-adopting the Old Town Design Guidelines, and introduce and waive the first reading of an ordinance adding Chapter 17.28, Historic Preservation Overlay, to the Municipal Code.

BACKGROUND

The City Council previously directed the Municipal Code Update Subcommittee (the "Subcommittee") to consider whether the City should adopt a historic preservation ordinance in Pinole. There are existing State and Federal programs for historic preservation, but cities are authorized to enact their own local historic preservation programs. The Subcommittee met three (3) times in fall of 2020 to consider different options for preserving historic structures in Pinole, and the proposed ordinance is the result of those discussions. The Subcommittee recommended the proposed ordinance be forwarded to the Planning Commission for review and recommendation to the City Council. The Planning Commission considered the proposed ordinance during its February 22, 2021 meeting, and recommended the City Council adopt the proposed ordinance, with certain changes discussed herein.

The City's General Plan and the Three Corridors Specific Plan currently have various goals and policies related to historic preservation, including:

- [**Goal CC.1:**](#) Maintain Pinole's unique qualities and sense of place to preserve the established historic and small-town character of the city.
 - o [**Policy CC.1.4**](#) The historic and urban character of Old Town Pinole shall be revitalized through the density and intensity of new construction, as well as through the use of building materials, architecture and other design elements that reflect the city's past.
- [**Goal CC.4:**](#) Promote a greater awareness of and sensitivity toward Pinole's historical heritage.

- o Policy CC.4.2 Establish and promote programs that identify, maintain and protect buildings, sites or other features of the landscape possessing historic or cultural significance.
 - *Action CC.4.2.1* Pursue recognition of eligible historic properties by the National Register of Historic Places and California Register of Historical Resources, and consider a variety of ways to identify and document historic buildings and properties throughout the city. *Action CC.4.2.2* Maintain an up-to-date inventory of existing historic resources, including artifacts, structures, sites, areas and natural phenomena. Map the location of historic districts and historic and natural resources. *Action CC.4.2.3* Establish a program to identify historical structures, places and events in recognition of their status. This program may include the use of signs, monuments, public art and interpretive exhibits.
- o Policy CC.4.3 The City shall take all possible precautions to ensure that no action by the City results in the loss of the irreplaceable archaeological record present in Pinole's planning jurisdiction and shall work with the County toward that end.
 - *Action CC.4.3.1* Establish review procedures for development projects that recognize the history of the area in conjunction with state and federal laws.
 - *Action CC.4.3.2* Establish a Historic Preservation Ordinance to provide for the appropriate development and maintenance of historic resources and

Enforcing these goals and policies through the design review process can be difficult because only three structures in Pinole have been formally designated as historic. The Bank of Pinole (2361 San Pablo Avenue) and the Fernandez House (100 Tennent Avenue) are both listed on the National Register of Historic Places. Additionally, the Downer Home (2711 San Pablo Avenue) is identified in the General Plan as a historic structure. Except for these three structures, the City's ability to apply the historic preservation goals and policies pursuant to the General Plan is currently limited.

Some communities have created local historic preservation ordinances to help preserve historic structures. These ordinances generally require structures to be designated as landmarks on a case by case basis. Structures designated as landmarks are then subject to strict regulations regarding proposed changes. While those types of ordinances are effective at preserving a designated landmark, they requires considerable work (and generally a historic survey conducted by a professional) to identify structures to be designated as historic. The proposed ordinance recommended by the Subcommittee takes a different approach, and instead requires projects within a specified zone to go through enhanced design review.

DISCUSSION

The purpose of the proposed ordinance is to ensure enhanced design review is applied to projects that will impact historic buildings and structures. The ordinance

accomplishes this goal by creating a historic preservation overlay (“HPO”) zone. An overlay is a type of supplemental zoning designation that establishes regulations in addition to those contained in the underlying zoning for the property. For example, Pinole currently has a high density residential overlay that requires property within the overlay to be developed at a minimum density of 21 units/acre, even when the underlying zoning district allows less density.

A historic preservation overlay zone requires properties included in the overlay to go through additional review before certain development can occur on the property, including alterations to existing structures. The inclusion of a property within a historic preservation overlay is different than the designation of a property as a historic landmark. A property is generally designated as a historic landmark after a thorough review of its historic significance. In contrast, a property may be included in a historic preservation overlay because it is considered potentially historic, or is located in an area with other historic properties.

The proposed ordinance would implement the following program to support historic preservation efforts:

1. Properties are designated for inclusion within the HPO Zone by the City Council.
2. When a project is proposed on a property located within the HPO Zone, the Zoning Administrator must determine whether the proposed project would impact any cultural resources located on that property.
3. If the project would impact a cultural resource, the project is required to comply with special design guidelines.
4. The special design guidelines are applied through the otherwise applicable Administrative Design Review or Comprehensive Design review process.

The initial HPO Zone would apply to the area commonly known as Old Town Pinole, a map of which is included as Attachment A. The draft ordinance also establishes a process to add new properties to the HPO Zone in the future, upon a recommendation by the Planning Commission and approval by the City Council. Importantly, a property does not have to be contiguous to the existing HPO Zone to be added to the HPO Zone.

The draft ordinance defines a cultural resource as any site, place, building, structure, sign, work of art, natural feature or other object with historical, archaeological, cultural, architectural, community, aesthetic or artistic heritage significance to the public for one of the following reasons:

1. It embodies distinctive characteristics of style, type, period or method of construction;
2. It contributes to the significance of a historic area;
3. It embodies elements of architectural design, detail materials or craftsmanship that represents a significant structural or architectural achievement or innovation; or

4. It is identified with persons or events significant in local, state, or national history.

The decision of the Zoning Administrator that a project would impact a cultural resource may be appealed to the Planning Commission.

Under the draft ordinance, projects that will impact a cultural resource are required to comply with special design guidelines. A project could impact a cultural resource because it directly involves changes to the resource (such as an exterior renovation) or indirectly due to the proximity of the proposed project to the resource.

The City Council adopted Old Town Design Guidelines in 1997. It is unclear whether these guidelines were ever implemented, but at the very least they have not been utilized regularly for at least the last ten years. Additionally, the design guidelines as adopted were not mandatory for buildings in Old Town, and compliance with the guidelines was simply “strongly encouraged”. The proposed ordinance will ensure the application of these special design guidelines moving forward. Any project in the HPO Zone that impacts a cultural resource will be required to comply with the design guidelines. Compliance with the guidelines will continue to be encouraged for all other projects in the HPO Zone. The guidelines themselves contain a mix of mandatory requirements and recommendations.

The Planning Commission considered the proposed ordinance and the Old Town Design Guidelines at its February 22, 2021 meeting, and recommended approval by the City Council. The Planning Commission recommended a few minor changes to the Old Town Design Review Guidelines, which have been incorporated into Attachment D.

The Planning Commission also recommended a change to the structure of the ordinance and the City’s design review process. Under the proposed ordinance, the Zoning Administrator determines if a proposed project would impact a cultural resource, and if so, the Old Town Design Guidelines are applied through the City’s otherwise applicable design review process. Design review for small additions is generally done by the Zoning Administrator, while design review for new structures is handled by the Planning Commission. The Planning Commission recommended that for any proposed project within the Historic Preservation Overlay Zone, the Planning Commission determine whether or not a cultural resource would be impacted and handle the design review. This change, if enacted, has the potential to cause significant delays for minor projects. For example, an application to replace the windows on a structure within the Historic Preservation Overlay Zone would now require review and approval by the Planning Commission. Staff can change the proposed ordinance to include the Planning Commission’s recommendation upon direction from the City Council.

FISCAL IMPACT

There is no direct fiscal impact from the adoption of the ordinance creating the historic preservation overlay or the resolution readopting the Old Town Pinole Guidelines. Staff time will be required to implement the ordinance and resolution, but those costs will be recovered through development applications fees.

ORDINANCE NO. 2021-__

**AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF PINOLE
ADDING CHAPTER 17.28, HISTORIC PRESERVATION OVERLAY, TO THE
MUNICIPAL CODE**

WHEREAS, historic buildings and structures are those which are reminders of past eras, events and persons important in local, state or national history, or which provide significant examples of architectural styles of the past, or are unique; and

WHEREAS, historic buildings and structures are irreplaceable assets to the City and its neighborhoods, and an important element of Pinole's identity; and

WHEREAS, the General Plan includes goals of maintaining Pinole's unique qualities and sense of place to preserve the established historic and small-town character of the city, as well as promoting a greater awareness of and sensitivity toward Pinole's historical heritage; and

WHEREAS, in order to implement these goals, the General Plan calls on the City to establish review procedures for development projects that recognize the history of the area in conjunction with state and federal laws and consider adoption of a historic preservation ordinance; and

WHEREAS, the purpose of design review is to promote the orderly and harmonious growth of the city, to encourage development in keeping with the desired character of the city, and to ensure physical and functional compatibility between uses; and

WHEREAS, every development project in the City is required to go through design review; and

WHEREAS, the proposed ordinance would create a Historic Preservation Overlay Zone (the "HPO Zone") within the City; and

WHEREAS, the proposed ordinance would requires properties included in the HPO Zone to go through additional historic review before development projects could occur on the property, including alterations to existing structures; and

WHEREAS, if a proposed project within the HPO Zone would impact a cultural resource, the project would be required to comply with the Old Town Design Guidelines; and

WHEREAS, inclusion within the Historic Preservation Overlay would not change the types of uses allowed on the property; and

WHEREAS, properties within the area commonly known as Old Town Pinole would be included within the HPO Zone; and

WHEREAS, the Planning Commission held a duly noticed public hearing to consider the proposed amendments to the Zoning Code on February 22, 2021, at which time all interested persons had the opportunity to be heard; and

WHEREAS, after close of the public hearing, the Planning Commission recommended that the City Council adopt the proposed amendments to the Zoning Code with specified changes; and

WHEREAS, the City Council held a duly noticed public hearing to consider the proposed amendments to the Zoning Code on March 16, 2021, at which time all interested persons had the opportunity to be heard; and

WHEREAS, after the close of the public hearing, the City Council considered all public comments received both before and during the public hearing, the presentation by city staff, the staff report, and all other pertinent documents regarding the proposed zoning code amendment; and

WHEREAS, the City Council finds that the proposed amendments to the Zoning Code are consistent with and support the Pinole General Plan by helping to preserve historic structures, enhance Pinole's unique qualities and sense of place, and promote a greater sensitivity toward Pinole's historical heritage.

WHEREAS, the City Council desires to adopt the proposed changes to the Zoning Code.

NOW, THEREFORE, the City Council of the City of Pinole does ordain as follows:

Section 1. Recitals.

The above recitals are true and correct and made a part of this Ordinance.

Section 2. Municipal Code Amendment – Chapter 17.28.

Chapter 17.28, Historic Preservation Overlay (HPO) District, is hereby added to the Municipal Code to read as set forth in Exhibit A, attached hereto and incorporated herein by reference.

Section 3. Historic Preservation Overlay.

The Historic Preservation Overlay (HPO) Zone authorized by Municipal Code Section 17.28.030 is hereby established as show in the map attached hereto as Exhibit B and incorporated herein by reference.

Section 4. Severability.

If any provision of this Ordinance or the application thereof to any person or circumstance is held invalid, the remainder of this Ordinance, including the application of such part or provision to other persons or circumstances shall not be affected thereby and shall continue in full force

and effect. To this end, provisions of this Ordinance are severable. The City Council of the City of Pinole hereby declares that it would have passed each section, subsection, subdivision, paragraph, sentence, clause, or phrase hereof irrespective of the fact that any one or more sections, subsections, subdivisions, paragraphs, sentences, clauses, or phrases be held unconstitutional, invalid, or unenforceable.

Section 6. California Environmental Quality Act (“CEQA”).

The proposed amendments are exempt from CEQA based on the rule set forth in CEQA Guidelines Section 15061(b)(3) that CEQA applies only to projects which have the potential for causing a significant effect on the environment. As a series of text amendments and additions, it can be seen with certainty that there is no possibility that the proposed amendments to the Zoning Code will have a significant effect on the environment.

Section 7. Effective Date.

In accordance with California Government Code Section 36937, this Ordinance shall take effect and be in force on the thirty-first day after adoption.

Section 8. Publication.

Within fifteen (15) days after the passage of this Ordinance the City Clerk shall cause this Ordinance or a summary thereof to be published or to be posted in at least three public places in the City of Pinole in accordance with the requirements of California Government Code Section 36933.

EXHIBIT A

Chapter 17.28 Historic Preservation Overlay (HPO) District

17.28.010	Purpose.
17.28.020	Cultural Resources Definition
17.28.030	Historic Preservation Overlay (HPO) Designation
17.28.040	Designation Process
17.28.050	Determination of Existence of a Cultural Resource
17.28.060	Special Guidelines for Design Review
17.28.070	Demolition
17.28.080	Hardship Exemption
17.28.080	Applicability
17.28.100	Public Hearings
17.28.110	Incentives

17.28.010 Purpose.

The general purpose of the Historic Preservation Overlay (HPO) District is to promote the preservation and rehabilitation of historic buildings in Pinole. Historic buildings are those which are reminders of past eras, events and persons important in local, state or national history, or which provide significant examples of architectural styles of the past, or are unique and irreplaceable assets to the City and its neighborhoods.

17.28.020 Cultural Resources Definition

As used in this chapter, “Cultural Resource” means any site, place, building, structure, sign, work of art, natural feature or other object with historical, archaeological, cultural, architectural, community, aesthetic or artistic heritage significance to the citizens of the City, the State of California, or the nation for one of the following reasons:

- A. It embodies distinctive characteristics of style, type, period or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship, or
- B. It contributes to the significance of a historic area being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties or properties which contribute to each other and are unified aesthetically by plan or physical development, or
- C. It embodies elements of architectural design, detail materials or craftsmanship that represents a significant structural or architectural achievement or innovation; or
- D. It is identified with persons or events significant in local, state, or national history.

17.28.030 Historic Preservation Overlay (HPO) Designation

- A. There is hereby created a Historic Preservation Overlay, which shall be used to designate on the City's Zoning Map properties that are possibly worthy of preservation because of the cultural resource(s) located on the property.
- B. Permitted and conditional uses, allowable density and development standards for properties designated with the Historic Preservation overlay shall the same as is required for the underlying zone district, except as otherwise provided for in this Chapter.

17.28.040 Designation Process

- A. The Zoning Administrator, Planning Commission, or City Council may initiate proceedings to add the HPO zone designation to a property. After the process is initiated, the Zoning Administrator shall prepare information regarding the cultural resource(s) located on the property, as appropriate, and present such information to the Planning Commission for consideration.
- B. The Planning Commission may recommend to the City Council, after public hearing, the inclusion of properties within the HPO zone.
- C. The City Council shall consider the recommendation of the Planning Commission and may, after a public hearing, designate by ordinance properties to be included within the HPO Zone.
- D. A property shall only be included within the HPO zone if the approval findings required by Section 17.12.190 for Zoning Code Amendments are made.

17.28.050 Determination of Existence of a Cultural Resource

- A. For any project proposed on a property located within the HPO Zone, prior to the occurrence of any design review, the Zoning Administrator shall determine whether the project would result in changes to a cultural resource on the property.
- B. The Zoning Administrator shall notify the applicant of the determination in writing. The Zoning Administrator's decision may be appealed pursuant to Section 17.10.070.

17.28.060 Special Guidelines for Design Review

- A. Any proposed project within the HPO Zone that would result in changes to a cultural resource on the property shall comply with the Old Town Design Guidelines, as adopted and amended by the City Council from time to time.
- B. Administrative Design Review or Comprehensive Design Review shall not be approved for any project that does not comply with the Old Town Design Guidelines, if the project is subject to such guidelines. The reviewing authority may determine that a project complies with the Old Town Design Guidelines if it satisfies most of the applicable guidelines.

17.28.070 Demolition

No structure on a property located within the HPO Zone shall be demolished unless the Zoning Administrator first determines in writing that either:

- A. The structures is not a Cultural Resource pursuant to Section 17.28.50; or
- B. The structure cannot be feasibly remodeled or rehabilitated in a manner which would allow a reasonable use of or return from the property to the property owner.

The Zoning Administrator's decision may be appealed pursuant to Section 17.10.070.

17.28.080 Hardship Exemption

If the applicant presents facts clearly demonstrating to the satisfaction of the reviewing authority that compliance with the Old Town Design Guidelines will work immediate and substantial hardship because of conditions peculiar to the particular structure or other feature involved, the reviewing authority may approve the application even though it does not meet the standards set forth in this Chapter. Nothing herein shall excuse compliance with any other applicable requirement of this Code.

17.28.090 Applicability

None of the provisions of this chapter shall prevent any measures of construction, alteration or demolition necessary to correct the unsafe or dangerous condition of any structure, other feature, or part thereof, where such condition has been declared unsafe or dangerous by the Building Official or the Fire Marshal, and where the proposed measures have been declared necessary, by such official to correct the condition; provided, however, that only such work as is necessary to correct the unsafe or dangerous condition may be performed pursuant to this section.

17.28.100 Public Hearings

Notice of the public hearings required by this chapter shall be given in the same manner as required by 17.10.050.

17.28.110 Incentives

The City Council may authorize the following incentives to the owners of properties located within the HPO Zone in order to encourage and facilitate preservation of historic structures:

- A. Enact the Mills Act to provide a reduction in property taxes;
- B. Provide rehabilitation grants and low interest loans for facade improvements in the Old Alvarado commercial district; and

- C. Provide rehabilitation loans for low and moderate income homeowners.

CITY OF PINOLE

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PINOLE RE-ADOPTING THE OLD TOWN PINOLE DESIGN GUIDELINES

WHEREAS, historic buildings and structures are those which are reminders of past eras, events and persons important in local, state or national history, or which provide significant examples of architectural styles of the past, or are unique; and

WHEREAS, historic buildings and structures are irreplaceable assets to the City and its neighborhoods, and an important element of Pinole's identify; and

WHEREAS, the General Plan includes goals of maintaining Pinole's unique qualities and sense of place to preserve the established historic and small-town character of the city, as well as promoting a greater awareness of and sensitivity toward Pinole's historical heritage; and

WHEREAS, in order to implement these goals, the General Plan calls on the City to establish review procedures for development projects that recognize the history of the area in conjunction with state and federal laws and consider adoption of a historic preservation ordinance; and

WHEREAS, the purpose of design review is to promote the orderly and harmonious growth of the city, to encourage development in keeping with the desired character of the city, and to ensure physical and functional compatibility between uses; and

WHEREAS, every development project in the City is required to go through design review; and

WHEREAS, Old Town Pinole is a unique and important neighborhood in the City that still retains its historic and architectural character;

WHEREAS, the City adopted Old Town Design Guidelines in 1997, but these guidelines have not been utilized in many years; and

WHEREAS, the City Council desires to readopt the Old Town Design Guidelines, with certain updates, in order to ensure their application in coordination with the proposed Historic Preservation Overlay; and

WHEREAS, the City Council desires to adopt the Old Town Design Guidelines to help preserve historic structures, enhance Pinole's unique qualities and sense of place, and promote a greater sensitivity toward Pinole's historical heritage.

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Pinole hereby declares as follows:

1. The above recitals are true and correct, and incorporated herein by reference.

2. The City Council hereby readopts the Old Town Design Guidelines, with such changes as shown in Exhibit A, attached hereto and incorporated herein.
3. This resolution shall take effect simultaneously with the enactment of Chapter 17.28, Historic Preservation Overlay, of the Pinole Municipal Code.

PASSED AND ADOPTED at a regular meeting of the Pinole City Council held on the 16th day of March, 2021, by the following vote:

AYES: COUNCILMEMBERS:

NOES: COUNCILMEMBERS:

ABSENT: COUNCILMEMBERS:

ABSTAIN: COUNCILMEMBERS:

I hereby certify that the foregoing resolution was introduced, passed, and adopted on the 16th day of March, 2021.

Old Town Design Guidelines

Adopted
Feb. 4, 1997
via City Council
Resolution
106-97

Old Town Design Guidelines Updates 3.16.21

1. *The introduction to Section 3 is replaced in its entirety to read as follows:*

“The design guidelines which follow are to be used as an advisory tool, except where the Municipal Code makes compliance with these guidelines mandatory. The design guidelines are intended to further a dialogue between architects, designers, developers and community representatives about the appropriateness of specific design proposals.

The design guidelines indicate the design elements that should be present in an architecturally compatible Old Town building and focus attention on those design and land use elements that encourage a comfortable pedestrian environment. The design guidelines cannot be used as a checklist, but require interpretation on the building site and the existing architecture.

The guidelines will be applied through the design review process established by the Municipal Code. If there is any inconsistency between these guidelines and the Municipal Code, the Municipal Code shall control.”

2. *The first sentence of Section 3.1 is amended to read as follows:*

“Guidelines which employ the word ‘should’ are intended to be mandatory.”

3. *The first sentence of Section 4.2(B)(4) on page 15 is amended to read as follows:*

“Blank walls or loading areas shall not face public streets.”

4. *The first sentence of Section 4.2(C)(2) on page 16 is amended to read as follows:*

“New buildings are encouraged to contain three parts: a base, a mid-section, and a top.”

5. *The first sentence of Section 4.4(A)(7) on page 25 is amended to read as follows:*

“Native and drought resistant plants, shrubs, and trees shall be used.”

Section 1: Introduction

In December of 1995 the City Council appointed a fifteen member Old Town Design Guidelines Review Committee. The committee's broad charge was to draft a set of design guidelines that would help enhance the positive qualities of Pinole's commercial downtown and protect the livability of its residential neighborhoods. The committee members were chosen for their varied perspectives and the knowledge and skill they would bring to this process.

These design guidelines were drafted to assist those people engaged in the design, construction, review and approval of development projects in the City of Pinole. They are intended as a reference point from which all persons involved in the development process can gain a common understanding of the minimum design expectations in the City of Pinole. Architects, designers and developers are urged to become familiar with these design guidelines and to apply them to the design of projects from the very beginning. Architects, designers and developers are also urged to recognize that these design guidelines are minimums.

These design guidelines identify techniques and minimum standards for achieving the level of design quality the citizens of Pinole have come to expect in commercial and residential development within Old Town. They are offered as one way of achieving attractive and functional projects which compare favorably with the established community character. No claim can be made, however, that these design guidelines encompass every possible technique for achieving a high level of design quality. Architects, designers and developers are therefore, encouraged to use their own creativity and experience to improve upon the means for achieving individual objectives.

1.1 The Boundaries

The area affected by these design guidelines is called the Old Town Design Guidelines Overlay District. The area's boundaries extend north from Interstate 80 along Pinole Valley Road and Tennent Avenue to San Pablo Bay and west from the Hercules/Pinole border along San Pablo Avenue to Second Avenue. Refer to Map 1.

The Old Town Design Guidelines Overlay District contains Pinole's greatest concentration of historic commercial and residential buildings, especially along San Pablo Avenue which forms the spine of this area. These buildings serve as a link to Pinole's cultural heritage and establish a model for design ideas. In some cases certain downtown buildings are connected with notable people and events. Others help establish a street scene that conveys a sense of place and time. They also provide a richness of character, texture and human scale that is one of Pinole's greatest assets. The Old Town Design Guidelines Overlay District was proposed in recognition that development within this area should be managed in a way that protects Pinole's heritage and enhances its economic viability.

1.2 Goals

These design guidelines establish a special commitment to maintaining and enhancing the visual character of the area located within the boundaries of the Old Town Design Guidelines Overlay District. As discussed above, these design guidelines are intended to put in place an explanation of the expected design standards when commercial and/or residential development is planned within the boundaries of the Old Town Design Guidelines Overlay District. The general goals of these design guidelines are to:

Map 1: Old Town Design Guidelines Overlay District

- Preserve the integrity of the historic architectural features of individual commercial and residential buildings located within the Old Town Design Guidelines Overlay District.
- Minimize alterations and new construction that weaken the historic integrity of individual commercial and residential buildings and of the Old Town Design Guidelines Overlay District.
- Encourage new commercial and residential development that respects and enhances the visual characteristics of the Old Town Design Guidelines Overlay District.
- Instill a sense of “pride of place” built upon Pinole’s unique history and character.
- Create an attractive environment which is active throughout the day and evening.
- Maintain a consistently high level of design quality.

These design guidelines address issues of compatibility, project function and aesthetics. They also help to ensure that any new commercial development will preserve and improve the positive character of existing neighborhoods and that any negative impacts on nearby residences are minimized or avoided. Finally, these design guidelines will encourage the provision of efficient vehicular movement and pedestrian circulation.

1.3 Organization

Design guidelines for new commercial and residential construction and for the renovation of existing commercial and residential buildings comprise the bulk of this document. A special section which discusses a regionally serving commercial area, located within the Old Town Design Guidelines Overlay District boundaries, is also included. This special section is quite different

from the commercial section which deals primarily with the commercial buildings located along San Pablo Avenue.

Special sensitivity to scale and use are required when developing along Pinole Creek. Several concepts to be used are described within the commercial, residential and regional sections. The Old Town Design Guidelines also include regulations for sign design. Sensitive design of signage will improve the visual quality and functioning of the downtown area.

Section 2: The Setting

The City of Pinole is located in West Contra Costa County, adjacent to the San Pablo Bay. Interstate 80, which traverses the City, connects the San Francisco/Oakland metropolitan area with Sacramento and points east. Pinole is linked to Central Contra Costa County and the cities of Martinez, Concord and Pleasant Hill by State Route 4, which begins just north of the City and connects with Interstate 680.

Surrounding communities include the unincorporated areas of Montara Bay, Rancho Road and El Sobrante, and the cities of Richmond and Hercules. The planning jurisdictions in the West County Planning Area, as defined in the Contra Costa County General Plan, are comprised of the cities of Pinole, El Cerrito, Richmond, Hercules, San Pablo and Contra Costa County.

2.1 History of Pinole

Native American settlement of the West Contra Costa shoreline began at least 5,000 years ago. The Pinole region was home to the Huchium Indians, whose territory extended from Berkeley to somewhere between Rodeo and Crockett. The recorded history of Pinole dates back to the early 1700s when a Spanish commandant, Don Pedro Fages, led an exploration through Contra Costa County. With a small band of soldiers and a Native American guide, Don Pedro Fages left Monterey and traveled northward until he reached the area known today as Pinole.

In 1823 Don Ignacio Martinez, commandant of the Presidio of San Francisco, received a land grant from the Mexican government. This land grant comprised over 17,000 acres and was known as "El Pinole."

During the 1850s Bernardo Fernandez started a trading facility on the shores of San Pablo Bay and eventually built the historic Fernandez Mansion which still stands

today at the end of Tennent Avenue. From these early beginnings a small but thriving community grew into the city we now know as Pinole.

One of the earliest Anglo-American settlers in Contra Costa County was Dr. Samuel J. Tennent who married Rafaela Martinez, the daughter of Ignacio Martinez. In 1851 the Tennents built their home one half mile from the Tennent Avenue Creek bridge on Valley Road. Dr. Tennent and his wife Rafaela owned much of the vacant land in Pinole.

The advance of the Southern Pacific Railroad allowed the California Powder Works Company to move to what became Hercules, Pinole's neighbor to the north. The company built both the plant and its houses and became the largest producer of dynamite in the world by the turn of the century. The town of Pinole became a service center for the plant and the success of the plant directly impacted the development of Pinole.

Edward M. Downer came to Pinole in 1889 and went to work as a dispatcher and station agent for the Southern Pacific train depot, located at the end of Tennent Avenue. He became one of the most influential and prominent business figures in Pinole and its surrounding areas including Rodeo, Crockett, Port Costa, Richmond, El Cerrito and Albany. His great success was due to a chain of banking houses which he established in these cities and to his civic efforts and successes. A house built by the Downer family stands today along San Pablo Avenue, at the east end of Old Town.

The Old Town area of Pinole is unique. Despite rapid growth since the 1950s, Old Town has retained a great deal of its historic and architectural character. A large number of historic residences, primarily Queen Anne and Italianate cottages, remain in good condition. Many of the old commercial buildings are still in use today.

2.2 Commercial Design Themes

The historic commercial buildings include two story masonry structures, false front type wood frame structures and stucco or plaster structures. Many of these structures were built in the early twentieth century with the shift of the commercial area away from the wharf to San Pablo Avenue, which was the major artery north from the East Bay. The buildings are located on San Pablo between Tennent Avenue and Valley Avenue. The best example of this early period is the Bank of Pinole Building located on San Pablo Avenue.

In addition to the historic commercial buildings, discussed above, there are a number of more modern buildings that were built between 1960-1990. These buildings are either masonry, wood sided or stucco structures. Many of these buildings do not add to the historic quality and character exemplified by many of the older commercial buildings.

2.3 Residential Design Themes

The main historical residential design themes present in Pinole can be categorized as follows:

- Queen Anne Cottages (1880 - 1905)
- Hip Roof Cottages (1870 - 1910)
- Bungalows (1915 - 1930)

All of these homes were built for individuals who worked in Pinole or at the Hercules Powder Plant, the main industry from 1879 to the 1970s. Due to the stability of this main industry, Pinole's residential neighborhoods were not exposed to major changes created by land development or speculation. These homes are simple in character and gain their importance by their neighborhood groupings.

Remaining examples of the Queen Anne Cottage style of architecture in Pinole illustrate a unique evolution of the style from a rural farmhouse with earlier Italianate

Cottage features (tall narrow windows and hip roof) to the more common Queen Anne Cottages of the 1890s. The uniqueness of this collection is that they were all built at the same time and still illustrate the past and future of American housing fashions at that time.

The Hip Roof Cottages are less identified with a specific time period. The subtle stylistic details are the only features that establish the age of the buildings. The earliest examples are of the Italianate era, they have tall narrow windows and a small flat area at the roof peak. The major distinguishing feature is the porch design and detail features which vary according to what was available for decoration at the local lumber yard when they were built.

The Bungalow or Craftsman Bungalow was the predominant housing style between 1915 and 1930. In Pinole these houses are dispersed throughout Old Town as infill. Good unaltered examples of this housing style are located along Pinole Valley Road.

Section 3: Process

The design guidelines which follow are to be used as an advisory tool. All projects must be submitted to the Design Review Board for review and approval. Compliance with these guidelines is strongly encouraged.

The design guidelines are intended to further a dialogue between architects, designers, developers and community representatives about the appropriateness of specific design proposals.

The design guidelines indicate the design elements that should be present in an architecturally compatible Old Town building and focus attention on those design and land use elements that encourage a comfortable pedestrian environment. The design guidelines cannot be used as a checklist, but require interpretation based on the building site and the existing architecture.

The Design Review Board will meet to review project proposals against the adopted design guidelines. A written record of the review and recommendation will be forwarded to the Planning Commission. For projects requiring staff review, a written record will be kept on file in the Community Development Department. Built into the proposed process is an annual evaluation, by the Planning Commission, to gauge the effectiveness of the process and the adequacy of the guidelines.

3.1 Language

Guidelines which employ the word **'should'** are intended to be applied as stated. Guidelines using the word **'encouraged'** are desirable but not mandatory. Guidelines using the word **'discouraged'** should be strictly adhered to. Guidelines using the word **'must'** are based on an existing regulation that must be followed.

Section 4:

Commercial Guidelines

New Construction

Commercial development, within the boundaries of the Old Town Design Guidelines Overlay District, should be especially sensitive to issues of compatibility. Indeed, the economic success of Old Town businesses is in many ways dependent on maintaining the architectural character and quality that sets the downtown apart from other shopping areas in Pinole. For this reason, architectural design guidelines for new buildings are proposed in this section.

4.1 The Setting

The existing buildings and landscape of Old Town are the frame of reference for new development. To the extent that the scale and texture of new buildings blends with what is already there, the city is continuously woven together. Conversely, the blatant disregard of the existing pattern disrupts the essential character of the city.

A. Surrounding Area Character

- ❖ **All new structures and uses should be compatible with the character of the existing neighborhood.**
- 1. New development **should** complement the architectural styles, building forms and landscape patterns of neighboring development.
- 2. New development **should** incorporate representative characteristics of the surrounding area, when the area exhibits a positive and distinctive architectural style and/or established functional pattern.

Figure 1: Similar materials, proportions and scale employed on a new building adjacent to an historic one.

3. New development **should** respect existing structures, in the immediate area, through the use of similar materials and proportions and the avoidance of overwhelming scale and visual obstruction, Refer to Figure 1.

B. Site Character

❖ Site amenities should be preserved and should become part of a new project.

1. Natural amenities such as views, mature trees, creeks and similar features, unique to a site, **should** be preserved and incorporated into development proposals.
2. Structures which are historic, or are otherwise distinctive, **should** be preserved and incorporated into development proposals.
3. Buildings should not back onto natural amenities. High activity areas, such as restaurant dining areas or major pedestrian routes, **should** be oriented to create a connection between the amenity and the project. Refer to Figure 2.

Figure 2: Site plan incorporating a natural amenity.

C. Interfaces

❖ Structures and activities should be located and designed to avoid creating nuisances and hazards for adjoining properties.

1. Noise, traffic, odor generating activities and hazardous activities **should** be located adjacent to similar activities on adjacent properties, whenever possible.

The location of these activities next to residential or other sensitive uses **should** be avoided.

2. Loading areas, access and circulation driveways, trash areas, storage areas and rooftop equipment **should** be located as far as possible from residential or other sensitive uses. These uses **should** never be located next to residential properties without fully mitigating their negative effects.
3. Residential and non-residential uses, except when located in the same structure, **should** be segregated in order to maintain a livable residential environment through the use of masonry walls, landscaping, berms, building orientation and activity limitations.
4. When residential and non-residential uses can mutually profit from a connection rather than a separation, applicable connective elements such as walkways, common landscaped areas, building orientation and unfenced property lines **should** be used and are strongly **encouraged**. Refer to Figure 3.

Figure 3: Loading and trash collection located away from residential properties; utilities and storage incorporated into building.

4.2 Structures

The design and placement of a new building **should** respond to the general characteristics of its surrounding area, to the architectural standards of the larger community and to the opportunities and limitations of its site.

Figure 4: A gradual height transition.

Figure 5: Abrupt height transitions or changes in mass should be avoided.

A. Height and Mass

❖ Height transitions between existing and new buildings should be gradual. Refer to Figure 4. The height and mass of new projects should not create abrupt changes from those of existing buildings. Refer to Figure 5.

1. Minimum building height **should** not be less than seventy five percent of the highest adjacent building.
2. Maximum building height **should** be two stories and thirty five feet.
3. A maximum building height of three stories and forty feet may be remitted if the third story volume is enclosed by a pitched roof, if the third story is setback a minimum of ten feet from all street-fronting elevations or if the third story serves as a transition between adjacent structures of similar height. Note: A variance may need to be obtained to allow a building to be more than two stories or thirty five feet in height.

B. Building Orientation

❖ Buildings should be oriented parallel to streets and, with some exceptions, should be placed as close to the street as established setbacks permit. Refer to Figure 6

Feb. 4, 1997
Reso.
106-97

1. Buildings **should** be generally placed at their front setback lines in order to define and enliven the streets. The front wall of a building may be set back a maximum of five feet from the front property line if seventy five percent of the front wall of the building is parallel to the property line. Exceptions may occur when features of an architecturally significant building are obscured by a building placed directly on its front property line.
2. Side setbacks are **discouraged**. If a building is setback from a side property line the minimum setback from the adjoining structure should be six feet, to allow for pedestrian access.
3. Corner buildings **should** have a strong tie to the setback lines of each street. The primary mass of a building should not be placed at an angle to the corner. This does not preclude angled or sculpted building corners. Corner entrances may be cut back up to six feet to create a diagonal at the ground level and/or upper levels.
4. Blank walls or loading areas, **should** not face public streets. Blank walls without windows and doors are only permitted on the interior side of a building, when such walls are blocked from view from a public place. Blank walls visible from a public place may be allowed if the wall is treated architecturally or with a wall graphic. Refer to Figure 7.

Figure 6: Building edges placed at minimum front setback line.

Figure 7: Blank building walls should not face public streets

Figure 8: Base, mid-section and top treatment for low-rise building.

Figure 9: Base, mid-section and top treatment for taller structure.

C. Building Form and Scale

❖ The elements of a building should relate logically to each other, as well as to surrounding buildings, to enhance the given or potential characteristics of a particular building and area.

1. New buildings **should** reflect the characteristic rhythm of surrounding building facades.
2. New buildings **should** contain three parts: a base, a mid-section and a top. On low-rise buildings, the different parts may be expressed through detailing at the building base and eave or cornice line. Refer to Figure 8. On taller buildings, different treatment of the first, middle and top stories should be used to define the three parts. Refer to Figure 9.
3. When new buildings are built immediately adjacent to or between existing buildings the design of the new building **should** respond to the existing buildings, through the use of architecture that provides transitional treatment between old and new. Such treatments may include matching cornice lines, a continuing colonnade and using similar materials and/or similar building proportions.
4. The scale of a new building **should** be compatible with, but not necessarily the same as, adjacent buildings. Special care, however, should be taken to achieve compatibility next to small scale buildings; techniques **should** include limiting size, building articulation and shadow patterns.

D. Complexity/Unity

- ❖ **A building should be stylistically consistent. Architectural style, materials, colors and form should all work together to express a single theme.**

1. Each building **should** be stylistically consistent.
2. The exterior building design, including roof style, color, materials, architectural form and detailing, **should** be consistent on all elevations of a building.
3. Monotony of building design **should** be avoided; on the other hand to busy of a design **should** also be avoided. Variation in wall plane, roofline, detailing, materials and siting may be used to prevent a monotonous appearance in buildings. Roof and wall plane variations, including building projections, bay windows and balconies, are **encouraged** to reduce scale and bulk.
4. Accessory structures **should** be architecturally consistent with the primary structures on a site.

E. Roofs

- ❖ **Roofs should be an integral part of the building design and overall form of the structure. Roofs should respond to the general design and nature of other roofs along the street. Refer to Figure 10.**

Figure 10: Roof types incompatible with adjacent roof types should be avoided.

1. The rooflines of buildings on adjacent properties **should** be considered when designing a new building so that clashes in style and materials are avoided.
2. Special attention **should** be given to the finish of parapets when buildings have flat roofs. Parapets **should** be finished with cornices, other horizontal decoration and/or clean edges with no visible flashing, depending on the architectural style of the building
3. Roof forms and materials **should** be stylistically consistent with the overall design theme of the building.
4. Roofs and rooflines **should** provide visual interest and should complement the overall facade composition.
5. Decorative roof elements **should** continue all the way around the building. Roof elements may be combined with wall or other roof elements which will work together on all sides of the building.

Figure 11: Use of building materials which are similar to those used on existing buildings.

F. Materials and Colors

- ❖ The choice and use of building materials and colors **should** be balanced and should enhance the substance and character of the building. Refer to Figure 11.

1. Building materials that are similar in texture to those established in the District **should** be used.
2. Materials and colors **should** be varied to provide architectural interest. The number of materials and colors **should** not exceed what is required for contrast

and accent of architectural features and **should** be generally limited.

3. The exterior materials and architectural details of a building **should** relate to each other in ways that are traditional and/or logical. For example, heavy materials **should** appear to support lighter ones.
4. Appropriate building materials include:
 - Stone and Stone Veneers
 - Stucco and Plaster
 - Brick
 - Horizontal Wood Siding
 - Split-Face Concrete
 - BlockWood Shingles
 - Ceramic Tile
5. Inappropriate building materials include:
 - Vertical Wood Siding
 - Aluminum
 - Reflective Glass/Sheathing Glass
 - Simulated Finishes
 - Plywood Siding
6. Trim colors should contrast with building colors.
7. The color palette chosen **should** be compatible with the colors of adjacent structures.
8. Large areas of intense white color **should** be avoided.
9. Bright colors **should** be used sparingly. Fluorescent paints and garish colors are **discouraged**.

10. The number of colors appearing on a structure's exterior **should** be minimized. Small structures **should** use no more than three colors.

4.3 Facade Composition

The basic commercial facade **should** consist of three parts: the storefront, with an entrance and display windows; the upper facade, with regularly spaced windows; and the cornice, which caps the building.

A. Building Entrances/Facades

❖ Building entrances **should** be clearly defined and accessible.

1. Building entrances **should** be prominent and easy to identify.
2. Second floor entrances **should** be placed at the rear or side of the building. Second floor entrances **should** be easily identifiable and distinguishable from first floor entrances.
3. Buildings designed to include prominent corner entrances are **encouraged**.
4. Side and rear building facades **should** have a level of trim and finish compatible with the front facade, especially if they are visible from streets, adjacent parking areas, public spaces, pedestrian spaces or residential buildings.

B. Storefronts

❖ Buildings with inappropriately designed storefronts can clash with each other, visually damaging the overall character of the entire District. Proper design of the storefront is a high priority concern. Refer to Figures 12 and 13.

1. Storefronts **should** have their own base, roofline and pattern of door openings.
2. A panel of tile or other special material is **encouraged** below display windows.
3. The storefront **should** be composed almost entirely of glass, creating visual openness, balanced by more wall and less glass on the upper facade.
4. Recessed entries are **encouraged** as another traditional element of the storefront.
5. Doors **should** be substantial and well-detailed. They should be compatible with the building materials and with the design and character of the windows.
6. Visual elements **should** be provided at the second floor to differentiate the storefront from upper levels of the building.

Figure 12: Well designed store front.

Figure 13: Poorly designed store front.

Figure 14: Awnings to reinforce store front openings are encouraged.

C. Awnings

❖ The use of awnings is an important design element of the traditional storefront. They can be used to add complexity and shade storefront glass. Awnings should be mounted over a metal structure that is framed.

1. Awnings obscuring the architectural features of buildings are **discouraged**. Awnings should reinforce the design of the storefront. Refer to Figure 14.
2. Awnings **should** be in scale with the building.
3. Awnings **should** be placed a minimum of seven and one half feet above the sidewalk and project no more than seven feet from the building wall.
4. Awnings **should** be located above windows and doors, but below the storefront cornice or sign.

D. Windows

❖ Window frames, transoms and first-floor display windows should align horizontally along the street creating a strong visual tie between buildings.

1. The horizontal alignment of the first floor transom and display windows **should** be maintained. Refer to Fig. 15.
2. The pattern created by upper-story windows should be maintained.

Figure 15: Horizontally aligned windows.

3. The clear distinction between the first floor and upper floors **should** be maintained. The first floor should have large areas of glass and upper floors should emphasize solid walls.
4. Clear glazing is strongly **encouraged**. Reflective glazing is strongly **discouraged**. If tinted glazing is used, the tint **should** be kept as light as possible.
5. Muntins or mullions are **encouraged** whenever their use would be architecturally compatible with the overall design of the building. "Snap-in" muntins or mullions are **discouraged**.

E. Lighting

- ❖ **Lighting should be used to create a sense of security and safety for on-site areas.**
1. Lighting **should** be adequate but not overly bright. All building entrances **should** be well lighted.
 2. All lighting fixtures **must** be shielded to confine the light within the site boundaries.
 3. The design of light fixtures and their structural supports **should** be architecturally compatible with the main structures on the street. Light fixtures **should** be integrated in the architectural design of the building.
 4. All light fixtures **should** be designed and for pedestrian activities.

4.4 Landscaping

Planted areas are used to frame and soften buildings, to define site functions, to enhance the quality of the environment and to screen undesirable views.

A. General

❖ **Landscaping should work with the surrounding buildings to make a positive contribution to the aesthetics and function of the specific site and the area.**

1. All areas not covered by structures, service yards, walkways, driveways or parking spaces **should** be landscaped.
2. Landscaping **should** generally consist of live plants. Gravel, colored rock, tan-bark and similar materials are acceptable as mulch but not as ground cover. Plazas and other areas subject to pedestrian traffic may be paved with decorative materials, such as brick or cobblestone, in conjunction with live plants.
3. Landscaping **should** be used to define specific areas, define the edges of various land uses, provide a transition between neighboring properties and provide screening for loading and equipment areas.
4. Unity of design **should** be achieved by repetition of certain plant varieties and other materials and by coordination with adjacent landscaping, where appropriate.
5. Existing mature trees, creeks and riparian corridors **should** be preserved and incorporated into landscape plans.

6. Landscaping incorporated into a building design is **encouraged**. Trellises, arbors and cascading terrace landscaping should be considered.
7. The use of native and drought resistant plants, shrubs and trees is **encouraged**.

4.5 Parking and Circulation

A properly functioning parking lot is a benefit to property owners, their tenants and their customers. A parking lot needs to allow customers and deliveries to reach the site, circulate through the parking lot and exit the site easily and safely. Clear and easy to understand circulation should be designed into the project to allow motorists and pedestrians to move through the site without confusion.

A. General

- ❖ **Parking lots should be designed for convenient parking and safe circulation.**
 1. Parking lots **should** be accessed from commercially developed streets.
 2. Surface parking lots **should** be located to the rear or side of buildings. Refer to Figure 16.
 3. Screen walls must not be located where they block the sight lines of drivers entering, leaving or driving through a site.
 4. Shared parking between adjacent businesses and/or developments is highly **encouraged**, whenever practical.

Figure 16: Rear parking lot accessed from a commercially developed street.

5. Parking areas **should** be landscaped, receiving interior as well as perimeter treatment, and designed in a manner which links the parking area to the street sidewalk system.
6. All parking areas **should** be well lighted.

B. Parking Structures

❖ Parking structures should be designed to minimize negative impacts on adjoining properties and on the streetscape.

1. Parking structures **should** be no taller than the principal building(s) they serve and **should** be complementary in form and materials.
2. Vehicles **should** be screened so as not to be visible above the principal building(s).
3. Every attempt **should** be made to screen parking structures from view from adjoining properties.
4. Parking structures **should** be architecturally consistent with the project and/or surrounding area. Plain or blank wall surfaces **should** be avoided. Ramped floors should not be visible from the street.
5. Setbacks for parking structures **should** match the setbacks for other on-site buildings.
6. Light fixtures within parking structures **should** be designed so the light source is not visible from off-site locations.

7. Lighting on the top deck of a parking structure **should** be architecturally integrated with the building and should not be mounted on tall poles.
8. Parking structure walls, adjacent to residential properties, **should** not have any openings through which sound may be transmitted.

C. Pedestrians and Bicyclists

❖ Safe and convenient facilities and means of access **should** be provided for pedestrians and bicyclists.

1. Pedestrian pathways **should** be provided through parking areas. Refer to Figure 17.
2. Bike racks **should** be provided at all commercial centers and at other retail and office sites large enough to attract and accommodate bicyclists.
3. Provisions for access by disabled persons **should** be incorporated into the overall pedestrian circulation system. The overall project design **must** be in compliance with The American Disability Act and Uniform Building Code.
4. Direct pedestrian access **should** be provided from main thoroughfares and/or side streets to the building entrance.

Figure 17: Dedicated pedestrian pathway through a parking lot.

5. Service access from side streets **should** be preserved and enhanced, wherever possible. Trash and loading areas **should** be centralized and screened from thoroughfares, side streets and properties to the rear.
6. Pedestrian corridors between buildings are **encouraged** where through block access is appropriate.
7. Signage indicating pedestrian routes **should** be provided.

Section 5: Commercial Guidelines Regional Development

This section addresses those design issues related directly to regional commercial development, located along Pinole Valley Road between Henry Avenue and Interstate 80. Regional commercial development has its own set of characteristics which have been acknowledged and treated separately in this section. These guidelines are intended to improve the overall design quality of and emphasize the distinguishing characteristics of regional commercial uses, that may locate within this portion of the Old Town Design Guidelines Overlay District. The commercial design guidelines set forth in Section 4 also apply to all regional commercial development. This section is intended to review issues, specific to regional commercial development, not discussed in Section 4.

5.1 Regional Development

The major design problem facing regional commercial development is the interface between a commercial center's service activities and adjacent residences. The following section provides several techniques for mitigating the negative effects imposed by regional commercial development on adjacent residential uses.

A. Building Setbacks

❖ Refer to Figure 18.

	Non-Residential Interface	Residential Interface
Street	25'	25
Interior	5'	1½' : 1'

Figure 18: One and one half feet of setback from residential for each foot of building height.

B. Site Orientation

1. All buildings on the same site **should** have a strong spatial and functional relationship to each other.
2. Multiple buildings in a single project **should** be varied in size and mass.
3. Portions of primary buildings and free standing buildings should be located at the street setback lines.
4. Parking **should** be provided within convenient walking distance to all commercial tenants.

C. Building Design

Figure 19: Commercial use compatible with adjacent residential use.

1. Building elements, such as large blank building walls or loading areas, which disrupt the continuity of shops and businesses **should** be avoided.
2. Where long buildings are unavoidable, their linearity **should** be mitigated by changes in the building height, wall plane and spatial volumes and by varied use of window areas, arcades, materials and roof elements.
3. Portions of buildings adjacent to and visible from residential properties **should** always be architecturally compatible with surrounding residential uses. Refer to Figure 19.

Section 6: **Residential Design Guidelines** **New Construction**

As discussed in Section 2, Pinole's historic residential design themes include: Queen Anne Cottages, Hip Roof Cottages and Bungalows. Although many of these buildings have retained some of their original character, others have been poorly remodeled or completely altered in appearance. The goal of this section is not to replicate Pinole's historic styles but to encourage new construction that acknowledges the architectural style of existing structures.

6.1 The Setting

The existing buildings and landscape of the city are the frame of reference for new development. To the extent that the scale and texture of new buildings blends with what is already there, the city is continuously woven together. Conversely, the blatant disregard of the existing pattern disrupts the essential character of the city.

A. Surrounding Area Character

- ❖ **All new structures and uses should be compatible with the character of the existing neighborhood.**

1. New development **should** complement the architectural styles, building forms and landscape patterns of neighboring development.

Figure 20: New development *should* incorporate representative characteristics of existing structures.

2. New development **should** incorporate representative characteristics of the surrounding area, when the area exhibits a positive and distinctive architectural style and/or established functional pattern. Refer to Figure 20.
3. New development **should** respect existing structures, in the immediate area, through the use of similar materials and proportions and the avoidance of overwhelming scale and visual obstruction.

B. Site Character

- ❖ Site amenities **should** be preserved and **should** become part of a new project.
1. Natural amenities such as views, mature trees, creeks and similar features, unique to a site, **should** be preserved and incorporated into development proposals.
 2. Structures which are historic, or are otherwise distinctive, **should** be preserved and incorporated into development proposals.

6.2 Structures

The design and placement of a new building **should** respond to the general characteristics of its surrounding area, to the architectural standards of the larger community and to the opportunities and limitations of its site.

A. Height and Mass

- ❖ **The height and mass of a new residence should be compatible with the height and mass of the existing residences in the neighborhood and should respect the streetscape as a whole.**

1. Minimum building height should not be less than ten feet. New residential construction should be compatible with adjacent structures in story height.
2. Maximum building height should be two stories or thirty five feet.
3. A maximum building height of three stories may be permitted, in single-family or multi-family buildings, if the third story volume is enclosed by a pitched roof. Refer to Figure 21. Double-pitched roofs of any kind and mansard or gambrel roofs are acceptable. Single-pitched "shed" roofs are not appropriate and will not qualify for an exception. Note: A variance may need to be obtained to allow a building to be more than two stories.

Figure 21: Maximum building height of three stories may be permitted if compatible with existing residences.

B. Building Orientation

- ❖ **The siting of a new residence should be compatible with the siting of the residences along the street on which the new residence fronts.**

Front Setbacks

1. All buildings **must** be setback a minimum of twenty feet from their front property line.
2. A curbside planting strip four feet wide and a minimum of a four foot wide sidewalk **should** be provided as part of all new development. A public easement **should** be established along the area between the existing street right-of-way and the back edge of the sidewalk.
3. Open porches and stairs may extend a maximum of five feet into the front setback area.
4. Architectural elements that add interest may encroach up to five feet into the front setback area.
5. A variance may need to be obtained to allow a building to encroach into the front setback area.
6. The required depth of the setback abutting a street may be reduced to the average depth of such yard on the adjoining lots if the adjoining lots are developed with residential buildings or if the reduction does not conflict with an already recorded plan line. Refer to Figure 22. Note: A variance may need to be obtained to reduce the depth of the setback abutting a street.

Figure 22: Infill lot front setback should be average of adjacent buildings.

Side Setbacks

7. Buildings **must** be setback a minimum of five feet from the property line on both sides. On the street side of a corner lot, side yards **must** not be less than twenty percent of the lot width. Side yards on streets **must** not be less than ten feet and need not exceed twenty feet.

Rear Setbacks

8. Principal buildings or main structures **must** be setback a minimum of ten feet or twenty percent of the lot depth and need not exceed twenty feet. Refer to Figure 23.
9. Accessory buildings, including garages, but excluding second units, may have a setback of zero feet, provided that the setback from the rear of the principal building is a minimum of eight feet and has a seventy five foot front setback. Freestanding garages **should** be unobtrusive, preferably located at the rear of properties to minimize visual impact.
10. Second units **must** not be less than eight feet from the principal building or main structure and setback not less than five feet.

Figure 23: Building setback minimums.

C. Building Design

- ❖ New residential construction **should** be compatible with the predominant architectural styles in the neighborhood.

1. Architectural elements that add interest, such as courtyards, porches, balconies, trellises, bay windows and planter boxes are **encouraged**.
2. Entrances to buildings **should** be visible from the street. The entryway should be well defined and lead from the sidewalk to an entry door.
3. Each developed parcel **should** provide at least one side or rear yard space of at least five hundred square feet. The yard **should** be based on a rectangular configuration, with no dimension less than eighteen feet in length.
4. Long uninterrupted flat-faced exterior walls should be avoided on all structures. All exterior walls should have architectural relief to help create an interesting design. The use of different textures, relief and design accents on building walls can help improve architectural design.
5. All stairs **should be** boxed and framed by attractive stepped solid walls or balustrade railings. Open porches **should** have attractive solid or open railings and a roof that complements the pitch and materials of the building's main roof. Supporting structures for these elements should be enclosed by solid walls or skirting.
6. The roof form **should** complement building mass. Pitched roofs, dormer windows, chimneys and other traditional residential forms are **encouraged** to add variety and make roofs attractive.

[Return to Agenda](#)

D. Accessory Building Design

- ❖ **Accessory buildings should be compatible with the main residential structure. They should be secondary in importance to the primary structure.**

1. Accessory buildings, including garages and carports, **should** have architectural treatments derived from the main building: surface materials, trim, fenestration, roof, materials and color. Refer to Figure 24.
2. Single-car garage doors are encouraged, with windows, surface panels, trim and other forms of architectural detailing to reduce their impact and scale.

Figure 24: Compatibly designed accessory building/garage.

E. Materials and Colors

- ❖ **The building materials and colors should be similar to those already in use.**

1. Appropriate building materials include:
 - Stucco
 - Brick
 - Horizontal Wood Siding
 - Wood Shingles
2. Inappropriate building materials include:
 - Vertical Wood Siding
 - Aluminum Siding
 - Vinyl Siding
 - Plywood Siding
 - Simulated Masonry Finishes

3. The color palette chosen **should** be compatible with the colors of adjacent structures.
4. Fluorescent paints and garish colors are **discouraged**.
5. A single body of color with a brighter and/or lighter accent color is usually the choice for most houses. A good rule of thumb when one desires to use a bright color is "one light, one bright," the bright color being used sparingly as the accent.

F. Windows

❖ Windows should reflect the window patterns of the District.

1. All windows within a building, large or small, **should** be similar in operating type, proportions and trim. Other unifying elements should be used, such as common sills. Refer to Figure 25.
2. Built-up sills and trim **should** be used to create surface relief and texture.
3. Glass **should** be inset from the exterior surface to add relief to the wall surface, this is especially important for stucco buildings.
4. Special windows such as bays and dormers **should** be used to add interest and a domestic expression to the facade.

Figure 25: Building window style, consistent and inconsistent.

G. Lighting

- ❖ **Lighting should be used to create a sense of security and safety for on-site areas.**

1. Ornamental lighting for porches and walks is **encouraged** to add attractiveness, safety and security.

6.3 Landscaping

Planted areas are used to frame and soften structures, to define site functions, to enhance the quality of the environment and to screen undesirable views.

A. General

- ❖ **Landscaping should work with the surrounding buildings to make a positive contribution to the aesthetics and function of the specific site and the area.**

1. Existing mature trees, creeks and riparian corridors should be preserved and incorporated into landscape plans.
2. Items such as trellises, arbors and special landscape materials that add character to yard spaces and accent the entry sequence are **encouraged**. Items such as low hedges, fences or entry gates are **encouraged** to define the edge between the public street and private property. Refer to Figure 26.
3. The use of native and drought resistant plants, shrubs and trees is encouraged.

Figure 26: Use of trellises and arbors are encouraged as entry accents.

6.4 Vehicular Access

A. Driveways

- ❖ The placement and design of a driveway should respect adjacent structures and properties.

1. All ramps **should** have a maximum grade of sixteen percent.
2. Setbacks from adjacent properties **should** be a minimum of five feet.
3. Setbacks from adjacent buildings **should** be a minimum of three feet.

B. Parking

- ❖ Garages should be part of the overall residential design.

1. Single-family residences **should** have enclosed garages.
2. Multi-family residences **should** have covered parking.
3. Parking spaces for second dwelling units may be uncovered.
4. Freestanding garages **should** be located to the rear of principal buildings. Individual garage doors **should** be provided. A maximum of three garage doors may be lined up consecutively; a space of five feet **should** be provided between each group of three doors. Refer to Figure 27.

Figure 27: Detached garage located near rear of property using individual garage doors.

Section 7: Rehabilitation

The design guidelines enumerated hereinafter are based on the Secretary of the United States Department of the Interior's "Standards for Rehabilitation". The Secretary's "Standards" are a set of ten general criterion developed to provide a practical guide for historic rehabilitation projects.

Care should be taken to preserve those historic buildings that make Pinole unique. The guidelines discussed in the previous sections, coupled with these ten principles, should be used by architects, designers and developers to ensure that Pinole's unique character is maintained. All projects, new construction and rehabilitation, are subject to the guidelines set forth in this document and will be considered by the Design Review Board.

7.1 Guidelines

1. Every reasonable effort **should** be made to provide compatible use for a property which requires minimal alteration of the building, structure, or site and its environment, or to use a property for its originally intended purpose.
2. Destruction of the distinguishing original qualities or character of a building, structure, or site and its environment is **discouraged**. The removal or alteration of any historic material or distinctive architectural features **should** be avoided when possible.
3. All buildings, structures, and sites **should** be recognized as products of their own time. Alterations that have no historical basis or which seek to create an earlier appearance are **discouraged**.

4. Changes which may have taken place in the course of time are evidence of the history and development of a building, structure, or site and its environment. These changes may have acquired significance in their own right, and this significance **should** be recognized and respected.
5. Distinctive stylistic features or examples of skilled craftsmanship which characterize a building, structure, or site **should** be treated with sensitivity.
6. Deteriorated architectural features **should** be repaired rather than replaced, wherever possible. In the event replacement is necessary, the new material **should** match the material being replaced in composition design, color, texture and other visual qualities. Repair or replacement of missing architectural features **should** be based on accurate duplications of features substantiated by historic, physical or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other buildings or structures.
7. The surface cleaning of structures **should** be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials are **discouraged**.
8. Every reasonable effort **should** be made to protect and preserve archeological resources affected by or adjacent to any project.
9. Contemporary design for alterations and additions to existing properties **should not** be discouraged when such alterations and additions do not destroy significant historical, architectural or cultural material, and such design is compatible with the size, scale, color, material, and character of the property, neighborhood or environment. Refer to Figure 28.

Figure 28: Contemporary addition designed to be compatible with historical structure.

10. Whenever possible, new additions or alterations to structure **should** be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would be unimpaired.

Section 8: Sign Guidelines

The functions of a sign are to identify the location of a business, to promote the merchandise or service within the business and to attract customers to the business.

Large and flashy signs disrupt the visual character of Old Town and obscure architectural features. Small signs can serve the needs of businesses, while contributing to both the image of individual building and to the overall character of the Design Guidelines Overlay District.

8.1 Design

The following guidelines are meant as a supplement to the City of Pinole's Sign Regulations (Pinole Municipal Code Chapter 17.28). The objective of these sign guidelines is not uniformity, but elimination of elements that result in a cluttered and unattractive setting. The guidelines provide basic parameters for creative signs that may be as unique as the business they represent.

A. Design

- ❖ **Every structure and commercial complex should be designed or rehabilitated with a precise concept for adequate signing. Provision for sign placement, sign scale and sign readability should be considered in developing the signing concept. All signage should be highly compatible with the building and site design relative to color, materials and placement.**

1. Signs **should** be designed, built and installed by a licensed sign contractor.
2. Keep signs subordinate. They **should** not overwhelm the facade of the building. Refer to Figure 29.
3. Signs **should** fit within the existing features of the facade and **should** not cover architectural elements such as windows, transoms or cornices.
4. Signs **should** be simple and have a direct message. Cluttered signage is difficult to read and may confuse the passersby. Refer to Figure 30.
5. Sign colors, shapes, materials and size should reinforce the overall composition of the facade.
6. Careful consideration **should** be given to minimizing and simplifying every sign's supporting structure.
7. Large signs designed to attract the attention of motorists on the freeway are not permitted, except for shopping center signs or such other similar regional complexes.
8. Signs within a shopping center or other complex **must** be designed as part of the entire project.
9. Consider using simple straight forward shapes that get the message across clearly. Signs as symbols are **encouraged** because they are easily read and enhance the pedestrian quality of the downtown.

Figure 29: Example of appropriate and inappropriate sign size and sign placement.

Figure 30: Example of cluttered signage and clear signage.

Figure 31: Example of appropriate and inappropriate sign placement.

B. Sign Placement/Position

❖ Signs on storefronts should be located above display windows or awnings. Large signs near the top of building facades are discouraged. Refer to Figure 31.

1. Signs **should** be positioned so as not to obscure any architectural details. When several businesses share a building align all signs or use a directory.
2. Signs **must** not extend above the height of the immediately adjacent roof line or parapet.
3. Signs **must** not be mounted on or attached to the roof.
4. No part of a sign attached to or mounted on a building **should** project out more than thirty-six inches from the surface of the building to which it is attached.
5. Signs **must** not extend above the eave line. In case of a mansard roof, the sign may be incorporated in the roof if such sign is an integral part of the design of the building.
6. In multiple story structures, signs **should** be mounted somewhere above the display window or awning and below the second floor window sills.
7. Signs **must** not be located in a manner which may obstruct or interfere with the view of a traffic signal or other traffic regulatory signs.

C. Materials and Color

- ❖ **Sign materials should be durable and easy to maintain. In general, building colors should be coordinated with sign colors.**

1. Appropriate sign materials include:
 - Routed, Carved, Sandblasted, Painted or Engraved Wood
 - Custom Cut and Applied Wood Letter
 - Precast Epoxy Letters
 - Metal
 - Slate or Marble
 - Vinyl
2. Sign colors **should** be coordinated with the colors of the building.

D. Sign Clarity

- ❖ **Text should be kept to a minimum. The objective is to eliminate elements that result in a cluttered and unattractive setting.**

1. Letter styles of signs **should** be simple and easy to read.
2. The number of letter styles **should** be limited. Use of one or two letter styles is **encouraged**.
3. Letter forms **should** occupy no more than a maximum of seventy five percent of the total sign area.

E. Permitted Signs

1. Permitted signs include:

- Projecting Signs
- Flat Mounted or Painted Wall Signs
- Blade Signs Suspended from Canopies or Awnings
- Signs on Awnings or Canopies
- Monument Signs
- Pole Signs - A pole sign shall only be permitted when otherwise permissible freestanding monument sign would not be sufficiently visible due to obstruction or where there is no space in which to place the sign between the sidewalk and the building.
- Window signs with Painted or Vinyl Letters

F. Prohibited Signs

1. Prohibited signs include:

- Flashing Signs
- Signs with banners, flyers, pennants, pinwheels or two or more light bulbs in a wire string
- Portable Signs
- Board Signs
- Mobile Signs
- Moving Signs
- Non-accessory signs
- Reader Boards

G. Sign Lighting

❖ **Sign illumination should be designed so as to avoid glare and light intrusion onto other signs or premises. Brightly illuminated signs are discouraged.**

1. Illumination external to the sign surface with lighting directed at the sign is encouraged. External lighting makes possible the illumination of architectural features. The bottom edge of light fixtures mounted on a building must be at least seven and one half feet above the sidewalk or finished grade.
2. Other types of sign lighting that may be acceptable include:
 - External incandescent sources
 - Small light sources placed inside of opaque projecting letters
 - Internally illuminated signs
3. Exposed neon **should** be carefully and sparingly used in signs.

H. Public Art

❖ **Public artwork can lend identity, a sense of place and pride in a community. Artwork in outdoor public places, unlike gallery art, must be conceived as part of an overall architectural and landscape architectural design for a particular setting.**

1. Wall murals incorporating historic advertising art are **encouraged** to be painted on blank walls in Old Town.

Glossary

The terms listed below have been defined to assist the reader in more fully understanding the Old Town Design Guidelines.

Alteration: Any addition or modification of any portion of the exterior of a building or designated feature that changes the architectural style, arrangement, texture or material of the building or feature or significantly changes the color, if such change, addition or modification is visible from a public street, sidewalk, alley or park

Balustrade: A railing consisting of a series of small columns connected at the top by a coping; a row of balusters.

Berm: A bank of earth, as the piled-up earth along a canal or against a masonry wall.

Building Alignment: A line usually parallel to a property line beyond which a structure may not extend. This generally does not apply to uncovered entrance platforms, porches, terraces, or steps.

Cornice: Any moulded projection which crowns or finishes the part to which it is fixed.

Dormer: A vertically set window on a sloping roof; the roofed structure housing such a window.

Gable Roof: A roof having a gable at one or both ends; a ridged roof that slopes up from only two walls. A gable is the triangular portion of the end a building from eaves to the ridge.

Hipped Roof: A roof with four pitched sides; a roof which rises by inclined planes from all four sides of a building.

Massing: Refers to the building shape; the combination of the different elements of the resulting bulk and shape of the building.

Mullions: A vertical or horizontal primary member dividing a window into 'lites', each of which may be further sub-divided into panes.

Muntins: The secondary member or stile in the framing of a paneled door, screen, as distinct from horizontal member or members called rails.

Parapets: a low protective wall on a bridge, gallery, balcony or above the cornice of a building.

Pitch: The angle, or degree, of slope of a roof.

Roofline: The contour or shape of a roof.

Scale: Refers to building size; the size of a structure relative to the size of the surrounding structures.

Setback: The minimum distance between a property line and a building, or portion thereof, as required by ordinance or code.

Transom: A horizontal member dividing a window.

Window Panes: A flat sheet of glass, cut to size for glazing a window or door

[Return to Agenda](#)

CITY COUNCIL REPORT

9A

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCIL MEMBERS

**FROM: CHRIS WYNKOOP, FIRE CHIEF
ANDREW MURRAY, CITY MANAGER**

**SUBJECT: CITY STAFF'S ASSESSMENT OF THE FIRE STUDY AND
RECOMMENDATIONS REGARDING STEPS TO FORTIFY THE CITY'S
FIRE SERVICE**

RECOMMENDATION

City staff recommends that the City Council receive staff's assessment of the Fire Service Delivery Study ("Fire Study") prepared by Emergency Services Consulting International (ESCI) and approve staff's recommendations on steps to fortify the City's fire service.

INTRODUCTION

The City retained ESCI in April 2019 to conduct the Fire Study. The Fire Study scope of work tasked ESCI with reviewing the City's fire and emergency medical response service levels and making recommendations for increasing fire and emergency medical response capabilities, including assessing several specific options. ESCI provided a report to City Council in October 2019 and completed a final version of the Fire Study, including an addendum, in March 2020.

The City Council began meeting virtually, due to the COVID-19 pandemic, soon after the completion of the Fire Study. The City initially decided to delay ESCI's presentation of the final Fire Study to City Council until it was possible to have an in-person Council meeting. However, the City subsequently decided to schedule ESCI's presentation of the Fire Study at a virtual City Council meeting on March 2, 2021, because it appeared that the Council might not hold an in-person meeting for many additional months.

The Fire Study contains findings and recommendations regarding many different aspects of fire and emergency medical service delivery within Pinole. City staff believes that many of the Fire Study's findings are valid and recommendations worth implementing. However, City staff does not believe that the Fire Study is conclusive regarding the optimal level of fire and emergency medical service, nor the optimal service model. This is primarily due to the fact that ESCI needed to use incomplete data in its analysis and did not use a traditional public policy analysis methodology.

City staff has summarized and assessed the main findings and recommendations of the Fire Study, agreeing with many findings and recommendations while disagreeing with others. City staff has provided its recommendations for steps that the City should take to immediately bolster its fire service. City staff believes that additional data collection and analysis are required to better understand service demands and the precise costs and benefits of potential service modifications prior to drawing any conclusions regarding or pursuing any significant, long-term changes.

BACKGROUND

History

The City of Pinole has a complex history of fire service delivery, including many different models that were deployed to provide service over the years. The City does not have thorough documentation explaining the changes to the model over time. City staff has obtained some information from various documents and stakeholders regarding this history, which is summarized below.

The City created the Pinole Fire Department (PFD) circa 1903 as a volunteer organization to serve its residents and businesses in conjunction with the City's incorporation. The City purchased its first fire engine in 1921, and Fire Chief Pepper Martin became the PFD's first paid employee in 1959. PFD grew over the years as the City grew and annexed newly developed unincorporated areas that had previously been served by other fire districts. A separate special district, the Pinole County Fire Protection District, served some of the unincorporated areas adjacent to the City of Pinole. This district, for which the County Board of Supervisors served as the governing body, diminished in size over time as the City annexed new developments. The district was annexed into the Contra Costa County Fire Protection District (CCCFPD, "Confire") in 1994. PFD provided fire service through a contract to the Pinole County Fire Protection District beginning around 1966 through the district's annexation by Confire in 1994. PFD continued to provide fire service, with other regional agencies, to the former Pinole County Fire Protection District service area, and receive payment for such, from Confire, through June 2014.

West Contra Costa County has been served by an evolving array of different fire agencies over the years. Confire was originally formed in 1964 by the merger of two districts, the Central Fire Protection District and the Mt. Diablo Fire Protection District. Confire now serves much of the unincorporated area as well as one city (San Pablo) in West County, which were previously served by several other districts that have been annexed, including the San Pablo Fire District, El Sobrante Fire District, and West County Fire District.

In the 1960s and 1970s, residential development in Pinole expanded into the upper Pinole Valley Road area, including the Silver Canyon Valley Development. Some stakeholders in that development believed that the City committed at that time to build new City facilities to complement the project, including a swim center (which was constructed and is still in use on Simas Avenue) and a second fire station. As the Silver Canyon Valley Development reached completion, its residents believed that it comprised a substantial

contribution to the City's property tax revenue, and some residents voiced their concern that the City had yet to construct and open a second fire station to serve the area.

At that time, Pinole's only fire station, Station 73, located downtown, was staffed by five personnel on each of three shifts. Three staff were on a fire engine and two were on a "squad" vehicle (a modified off-road support vehicle). Proponents of a second fire station argued that opening a second station, and having three staff on one engine at Station 73 and three staff on another engine at a new station, a net increase of one person on each of three shifts (three new full-time employees), was a minor increase in expenditures that would not create an undue burden on the City's financial capacity. Furthermore, proponents argued that the proposed location for the second station, on Pinole Valley Road, was ideal, given that it could serve the south side of I-80 in the event that a natural disaster precluded Engine 73 (situated north of I-80) from accessing residents on the south side of the freeway.

Another important aspect of the fire station issue was the automatic aid agreement among Confire, Rodeo-Hercules Fire Protection District (RHFPD), and PFD, known as the Battalion 7 Agreement, which was proposed in the 1990s, put into practice functionally in 2000, and formalized in 2020. Reportedly, the original Battalion 7 understanding from the 1990s was that each participating agency would provide two engine companies, and that Pinole's second engine would be provided at a new station in Pinole Valley, which would then make Pinole an equal partner in the Battalion 7 Agreement. The final executed Battalion 7 Agreement does not include any minimum staff or apparatus requirements of the participating agencies.

In September 2000, the City Council approved the expenditure of \$900,000 to construct Station 74 at 3700 Pinole Valley Road. The station opened in 2003, then closed in 2011, in the aftermath of the Great Recession. When Station 74 closed, frontline departmental staff (firefighters, engineers, and captains) were reduced from 18 (6 on each of three shifts) to 12 (4 on each of three shifts), which was lower than the pre-Station 74 staffing level of 15 (5 on each of three shifts). The City continues to operate with 12 frontline staff (plus a fire chief, battalion chief, and management analyst) today.

In 2011, the City hired a consultant, Citygate Associates, to identify opportunities to collaborate on fire services with Confire and RHFPD to reduce the City's fire service costs. The analysis (attached) did not identify any significant cost-saving or performance-improving opportunities, although PFD and RHFPD did subsequently share a fire chief for a short period of time for cost-saving reasons.

In April 2019, the City executed the aforementioned agreement with ESCI (attached) to conduct a fire service delivery study. The scope of work tasked ESCI with reviewing the City's fire and emergency medical response service levels and making recommendations for increasing fire and emergency medical response capabilities, including assessing several specific alternatives. ESCI provided a report to the City in October 2019 (attached) and provided a presentation of such to the City Council (attached). The City subsequently directed ESCI to conduct additional analysis, and ESCI provided an

updated, final report (“addendum”) in March 2020 (attached), and provided a presentation of such to the City Council in March 2021 (attached).

Functions of a Full-Service Municipal Fire Department

The major functions of a full-service municipal fire department are fire suppression, emergency medical response, rescue, and fire prevention (risk reduction through public education and enforcement of the State Fire Code). Fire departments also often play the lead role in a municipality’s emergency preparedness and operations. Below is a brief outline of PFD’s primary functions and support activities.

- Respond to emergency calls for service
 - o Emergency medical service (EMS)
 - o Vehicle accidents
 - o Rescue operations
 - o Structure fires
 - o Brush/wildland fires
- Fire prevention activities
 - o Inspections
 - State mandated inspections (schools, daycare, residential care facilities, assembly occupancies, apartment buildings, medical facilities)
 - Inspection of other occupancy classes requiring operational fire permits (fuel stations, repair shops, LPG propane exchange, auto parts, cleaners, gun powder/explosives, industrial kitchens/ovens, private schools)
 - o Coordinate with City code enforcement for fire ordinance compliance
 - o Plan check
 - Fire alarm systems
 - Fire sprinkler systems
 - Hood and duct fire suppression systems
 - Tenant improvements
 - o Public education
- Defensible space functions
 - o Engagement with property owners, maintenance of City land
 - o Ordinance compliance (w/ code enforcement)
- Emergency preparedness planning
 - o Manage the City Emergency Operations Plan (EOP) and Emergency Operations Center (EOC)
- Administrative duties
 - o Update policies and procedures
 - o Conduct assessment and long-term planning for department
 - o Incident reports
 - o Purchasing and accounts payable
 - o Departmental payroll
 - o Fee collection (inspections/operational permits)

- o Record keeping (inspections, training, narcotics inventories, certifications, etc.)
- Vehicle and equipment maintenance
 - o Daily/weekly/monthly fire apparatus preventive maintenance checks and services
 - o Power tool and rescue tool service and maintenance
- Training
 - o Skills performance and development exercises (hose drills, pumping drills, ladder drills, etc.)
 - o Fire simulation exercises, both stand-alone and in coordination with surrounding fire agencies (multi-agency drills)
 - o Continuing education (CE) related to EMS certification (Paramedic/EMT), and job classification (firefighter/engineer/captain) professional development

ESCI'S KEY FINDINGS AND RECOMMENDATIONS

Findings

From the perspective of City staff, the key findings of the Fire Study, some of which are simply descriptive and others of which are evaluative, are the following:

- PFD does not have sufficient command and administrative staff to address compliance with performance goals, industry standards, and workload.
- Data and records management are inconsistent and incomplete.
- PFD does not have sufficient staff to perform all fire prevention related functions.
- PFD does not have sufficient staff to oversee training, including needs assessments, program design, implementation, and recordkeeping.
- PFD does not have adequate training props.
- PFD's minimum staffing (three firefighters per unit) is not sufficient to enable a single company to enter a structure in compliance with OSHA's two-in/two-out framework.
- Because PFD only staffs one unit per shift, PFD is fully dependent on aid from another agency for any call requiring more than one unit.
- In 2018, none of the reported fire incidents achieved the NFPA Standard 1710 performance objective of 21 firefighters on-scene, nor did the travel time for all apparatus to arrive on-scene meet the NFPA 1710 performance standard of 8 minutes.
- PFD apparatus specifications have not been standardized with the Battalion 7 apparatus.
- At 110 calls per 1,000 population, PFD has a higher number of calls per 1,000 population than the region, but slightly lower than the urban high range.
- Much of the developed residential area in the eastern (southern) part of the City is beyond 1.5 miles of Station 73.

- A portion of the developed residential area in the southeast part of the city is beyond the 4-minute travel time footprint from Station 73.
- The contract proposal from Confire would result in increased services and depth of support; however, the proposed contract costs exceed the costs of providing those services if the City were to remain a standalone department, open Station 74, and add staff.

In summary, ESCI found that PFD does not have adequate staff to address certain fundamental managerial and administrative functions of a full-service fire department, such as planning, policymaking, training, records management, and evaluation. Further, ESCI found that the department handles a normal level of calls for service for an urban department. Due to the department's size, it needs to rely on aid from other fire departments to handle many incidents. ESCI also found that the joint response of PFD and partner departments often does not achieve certain industry benchmarks regarding firefighters on-scene or timeliness of response. Finally, ESCI found that the preferred long-term alternative would be for the City itself to reopen Station 74.

Recommendations

The Fire Study contains the following short-term and mid- to long-term recommendations.

Short-Term Recommendations

- Recommendation A: Adopt Response Performance Goals that are achievable.
- Recommendation B: The City should consider moving forward with the necessary steps to improve service via reopening Station 74, and staffing and administrative support, as funding becomes available.
- Recommendation C: Consider initiating the process of securing additional funding.
- Recommendation D: Standardize apparatus specifications.
- Recommendation E: Review all current fire department alarm assignments.
- Recommendation F: Improve the collection and analysis of incident data.

Mid- to Long-Term Recommendations

- Recommendation G: Initiate recruitment of additional staff.
- Recommendation H: Remodel Station 73.
- Recommendation I: Capital Equipment and Facilities Fund.

In summary, ESCI recommended that PFD update certain policies and practices, add staff and financial resources to address baseline functions and fire prevention, and consider options to expand firefighting force (and associated funding) over time.

CITY STAFF'S REVIEW AND ANALYSIS OF ESCI'S KEY FINDINGS AND RECOMMENDATIONS

Staff's Analysis of ESCI's Findings

Staffing to Address Certain Fundamental Managerial and Administrative Functions and Fire Prevention

As noted above, ESCI found that PFD does not have adequate staffing to address certain baseline managerial and administrative functions, such as planning, policymaking, training, and evaluation, nor fire prevention. ESCI reached this conclusion by comparing what it learned from its own observation of PFD and information obtained from interviews with key PFD personnel and other stakeholders, with standard fire department functions and organizational design. City staff agrees with these findings.

Department Call Volume and Inter-Reliance Among West County Departments

ESCI found that the department handled a normal call volume for an urban department serving a city of Pinole's size. However, because PFD's firefighting force is relatively small, the department needs to rely on aid from other fire departments to handle many incidents. City staff agrees with these findings.

However, the Fire Study seems to suggest that this structure of inter-reliance among the fire departments serving West Contra Costa County is inherently a less desirable arrangement than having each individual department be fully self-sufficient. City staff does not believe that the current arrangement is inherently worse than having each department be fully self-sufficient, particularly when considering cost and other factors such as access to specialized expertise and equipment.

Response Size and Timeliness

ESCI also found that the response to emergency incidents in Pinole, which regularly involves participation by other departments, often does not meet certain benchmarks regarding firefighters on-scene or timeliness of response. The Fire Study noted the following specific shortcomings relative to external benchmarks:

- While turnout time (the response phase between crew notification and when crew/apparatus start toward the incident) meets the NFPA Standard 1710 performance objective of under 90 seconds with 90 percent efficiency, travel and arrival times do not meet the NFPA 1710 standard. Turnout time is controllable by way of motivated PFD crews and efficient station layout; travel and arrival times are influenced by external factors such as the 1.5-mile radius and 4-minute travel time footprint in geographic relationship to station 73 as mentioned above.
- The minimum staffing level for PFD does not provide for the two-in/two-out structure firefighting per OSHA mandates.

City staff agrees with the finding that incident response by PFD often does not meet certain external benchmarks. However, City staff does not believe that the external benchmarks that are referenced in the Fire Study provide a complete assessment of the adequacy of fire service levels. For example, regarding the OSHA two-in/two-out mandate, many fire departments staff apparatus with three personnel. All such departments would need to wait for a second apparatus to arrive before having four staff total and being able to perform two-in/two-out. Even if Pinole reopened Station 74, a second apparatus would still need to arrive before the two-in/two-out standard would be met, and in many situations that second apparatus would continue to come from a partner agency. Similarly, achievement of the 8-minute standard (for 21 firefighters on-scene of a structure fire per NFPA 1710) is dependent upon factors such as topography and local traffic. Many departments do not achieve the 8-minute standard when responding to most fire incidents.

Two other measures of fire service capability provide a different perspective than the NFPA-related measures cited in the Fire Study. The most recent Municipal Service Review completed by the Contra Costa County Local Agency Formation Commission (LAFCO) for EMS/fire services (attached) found that PFD's Code 3 response time was comparable to that of the City of Richmond's and the Moraga-Orinda Fire District's and faster than that of RHFPD and Confire (Table 8). The Municipal Service Review included information on the Fire Suppression Rating Schedule ratings assigned by the Insurance Services Office (ISO) to fire agencies throughout the County. The ratings are an indicator of levels of fire protection and fire risk based on factors such as water distribution, fire department equipment, manpower, and fire alarm facilities. ISO classifies communities from 1 (the best) to 10 (the worst). PFD received a rating of 3.

Different jurisdictions provide significantly different levels of fire and emergency medical response services. Although national benchmarks are useful to some extent, each community must determine the level of service that best suits its needs. More fire protection, in and of itself, would be a benefit to the community. However, investing in one service area might necessitate reducing or foregoing investments in other areas.

ESCI's Preferred Alternative

ESCI determined that the most appropriate and cost-effective model would be for the City to itself reopen Station 74. Staff disagrees with this conclusion, which is based on incomplete data and an incomplete analysis. The Fire Study did not clearly "define the problem" (conclusively determine whether a gap exists between PFD's current service levels and the optimal levels, based on the City's specific needs). A gap may exist, but the Fire Study did not clearly define and validate a gap. The Fire Study also did not thoroughly "evaluate the alternatives" (precisely define the benefits and costs of different service models in order to identify a preferred alternative). The Fire Study did assess the benefits and costs of different options, but not very precisely, and did not evaluate the different options relative to specific criteria. For example, the Fire Study did not precisely quantify what additional fire and emergency medical service/performance each alternative would provide. Without knowing precisely how each alternative would improve service/performance or knowing precisely what each alternative would cost, City staff

does not believe that it is possible to conclude that the City itself reopening Station 74 is the preferred alternative. Given the above, City staff believes that additional analysis is required to define the gap, if any, then to assess various alternatives to address the gap.

City staff generally believes, based on its own observations of the situation in Pinole and best practices in organizational design, that it is likely more efficient and effective for fire service to be provided in Pinole as part of a larger organization. Although the current practice of PFD acting as a small standalone department fortified by the resources of the Battalion 7 partners has sufficed, City staff believes that there would be efficiencies related to economies of scale and benefits from having a deeper pool of resources and expertise upon which to draw were fire service in Pinole to be integrated into a larger regional body. This matter is discussed further below.

Staff's Analysis of ESCI's Recommendations

As noted above, ESCI recommended that PFD update certain policies and practices (Recommendations A, D, E, and F); add staff and financial resources to address fundamental managerial, administrative, and fire prevention functions (Recommendations B, G, and I); and consider options to expand the firefighting force and associated funding over time (Recommendations B, C, and G). (Recommendation H specifically addresses renovating Station 73, which has already been completed.)

Update Certain Policies and Practices

The Fire Study recommends that PFD revisit and possibly update its performance measures; standardize apparatus specifications; improve data collection and analysis; and add staffing for certain critical functions. City staff agrees with these recommendations.

Add Staff and Financial Resources to Address Baseline Functions

The Fire Study recommends that PFD add staff and financial resources to address fundamental managerial, administrative, and fire prevention functions. The study also recommends that PFD establish new budgeting practices to fund equipment and facilities. City staff agrees with these recommendations.

Consider Options to Expand Firefighting Force (and Associated Funding)

The Fire Study recommends that PFD consider options to expand its firefighting force. City staff agrees with the recommendation to consider these options. However, because staff does not believe that the Fire Study conclusively identifies a preferred alternative, the cost of some of the alternatives is substantial, and new options/alternatives might emerge from evolving circumstances of other regional fire agencies, City staff does not recommend proceeding with any significant change in service level or model at this time.

As noted above, different jurisdictions provide significantly different levels of fire and emergency medical response services, and each community must determine the level of

service that best suits its needs. The City has operated with one fire station for most of its history and, through the Battalion 7 arrangement, has managed to provide a reasonable level of fire suppression service, in part because the need for structure fire suppression has generally decreased over time due to evolving building standards that require greater fire safety. However, increasing demand for emergency medical services (EMS) has more than offset the decreasing demand for structure fire response. Additionally, the growing number of fires in California's wildland urban interface (WUI), as nearby as Vacaville in recent months, reminds us of the threat in Pinole's own WUI areas. (Note that the Fire Study refers to two geographic areas adjacent to the Pinole jurisdictional boundary as being "informally contracted areas." These are the aforementioned regions within Confire's service area that were previously part of the Pinole County Fire Protection District and that PFD served on a contract for service basis. PFD might respond to these regions under the Battalion 7 Agreement, but has no obligation to respond to calls for service in these areas beyond its obligation to respond to all areas within Battalion 7.)

The City completed a poll in November 2019 of likely voters to identify top concerns and prevailing opinions. A copy of the presentation of results provided to the City Council is attached. Participants provided the following responses to the question "What do you think is the most important issue facing the City of Pinole today?": traffic/transportation (14%), public services funding/spending (13%), crime/policing (9%), City budget/policies (8%), housing/overpopulation (7%), infrastructure/roads/power issues (6%), jobs/economy/development (6%), schools/education (5%), community improvements (4%), wildfires/fire safety (4%), homelessness (2%), taxes (2%), none/nothing (7%), other (3%), and don't know (11%). In response to the statement "I am satisfied with the current level of service provided by the Pinole Fire Department," 37% strongly agreed, 37% somewhat agreed, 9% didn't know/refused to answer, 11% somewhat disagreed, and 6% strongly disagreed. Approximately half of the respondents did indicate that they would vote to approve a \$498 annual parcel tax to fund the City's reopening of Station 74.

CITY STAFF'S RECOMMENDATIONS REGARDING STEPS TO FORTIFY THE CITY'S FIRE SERVICE

City staff has created its own recommendations, considering ESCI's findings and recommendations, for steps that the City should take to immediately bolster its fire service and continue to assess various options for long-term changes to the fire service model.

Address Baseline Functions by Adding Staff and Budgeting Resources for Capital

The Fire Study did reveal that there are some opportunities to improve the impact and effectiveness of the current service model with marginal increased cost. City staff agrees with the Fire Study finding that PFD should add staff to address certain fundamental managerial and administrative functions, such as planning, policymaking, training, records management, and evaluation. PFD currently has a deficiency in some administrative and managerial functions that creates liability and keeps the operation from achieving maximum efficiency. It does not currently observe all industry best practices.

City staff believes that PFD can achieve best practices and continuous improvement by adding an administrative captain position. The Administrative Fire Captain would oversee report management system (RMS) administration, electronic daily staffing software administration, policy/procedure implementation, emergency medical services (EMS) administration, fire training, vehicle maintenance, cost recovery, and departmental projects. A more detailed description of the Administrative Fire Captain position and an associated justification document for the position are attached.

Staff recommends that a new Administrative Fire Captain position, starting in Q1 of fiscal year (FY) 2021/22, be included in the proposed FY 2021/22 budget.

City staff also agrees with the Fire Study finding that PFD should perform a broader set of fire prevention activities. Although fire prevention functions are currently well performed through a contract with a private company, City staff believes that it will be more cost effective and productive in the long run to in-house that function by eliminating this contract for service and creating a Fire Prevention Captain position. In addition to saving cost, this position could backfill or augment frontline fire engine personnel if needed. Furthermore, the Fire Prevention Captain would be tasked with restoring the Community Emergency Response Team (CERT) program (Strategic Plan Goal #1, Strategy #3).

Staff recommends that a new Fire Prevention Captain position, starting in Q3 of FY 2021/22 (subsequent to the completion of the current contractor's work creating and updating electronic data collection, finance, and tracking systems), be included in the proposed FY 2021/22 budget.

City staff agrees with the Fire Study finding that the City should invest more in facilities and equipment.

Staff recommends that \$65,400 be included in the proposed FY 2021/22 budget for additional investment in training, facilities, equipment, props, and other needed baseline items.

Staff believes that creating the new administrative captain position, in-housing fire prevention, and allocating additional resources to facilities and equipment will enable PFD to accomplish all baseline functions of a full-service fire department.

Increasing Firefighting Capability and Changing the Service Model

City staff does not believe that the Fire Study is conclusive regarding the optimal level of fire and emergency medical response capability in Pinole. Although having a second fire station in the City would increase firefighting and emergency medical capability, having one station, particularly if well-resourced and integrated into a regional organization for expanded capability, might also be an acceptable long-term solution given the City's limited financial resources and competing needs.

One issue that limited the analysis and findings of the Fire Study was the lack of complete data regarding calls for service, workload of agencies in the automatic aid partnership,

and outcomes of calls for service. The addition of an administrative captain, coupled with some planned improvements to the department's reporting and analytical systems, will provide the City, within a couple of years, with much more complete information on service demand, workload, and performance. The City will have better information on all calls for service within Pinole (whether they are handled by PFD, peer fire agencies, or ambulance services); all calls for service to which PFD responds; and changes to the types and volumes of calls.

City staff believes that two service expansion options particularly warrant deeper analysis over the coming couple of years. One is returning to 15 frontline staff (firefighters, engineers, and captains), staffing an engine and a squad vehicle, which had been the standard level prior to Station 74's opening and the Great Recession. That staffing level achieves the two-in/two-out benchmark. The 2-person squad vehicle would also provide more rapid wildfire response because the vehicle can access areas that a fire engine cannot access, thereby stopping potential wildfires in their incipient phase before rapid spread ensues. It would also provide an entire additional unit for emergency medical service. ESCI identified this option as a preferred interim option during its presentation to the City Council on March 2, 2021.

City staff recommends that it conduct further analysis of this option and provide additional information regarding this to the City Council in Q3 FY 2021/22.

The second option that particularly warrants additional analysis is deeper collaboration with Confire, including possibly having Confire provide fire service to Pinole through a contract for service or having Pinole annexed into Confire's service area. A contract for service approach might be scalable, such as possibly an arrangement under which the City would pay for the operation of one station (Station 73) and a portion of the operation of a second station (Station 74) (Confire might be interested in paying for the other portion of Station 74, to allow it to increase service to its area proximate to Station 74). The Fire Study identified several potential benefits of having fire service in Pinole provided by Confire. The major drawback of that arrangement noted in the Fire Study was that it might be more expensive for Confire to operate a station, given higher salaries, than for the City to operate a station. City staff can conduct deeper analysis than that performed by ESCI of the full cost to the City of operating a fire department and work with Confire staff to obtain a more accurate estimate/proposal of what it would cost Confire to operate Station 73. City staff expects those costs to be comparable, particularly in the long run if salaries and pension benefits across the two agencies converge based on similar operational needs and financial constraints. Note that Confire has begun an analysis of possibly annexing East County Fire Protection District and RHFPD. The City will encourage Confire to take a more global perspective in conducting that analysis to include consideration of how Confire and PFD can most effectively collaborate.

City staff recommends that it engage in deeper dialog with Confire regarding opportunities to more closely collaborate and provide additional information regarding this to the City Council in Q3 FY 2021/22.

CONCLUSION

As a result of the Fire Study, the City is aware of some ways in which the City's current fire and emergency medical service levels are below certain benchmarks, and has additional information on some possible options for modifying service. City staff has created its own recommendations, considering the Fire Study, for steps that the City should take to immediately bolster its fire service. Staff specifically recommends that the City add an Administrative Fire Captain position in Q1 FY 2021-22 and transition from a contract Fire Inspector to a sworn Fire Prevention Captain in Q3 FY 2021-22. Further, staff recommends that it conduct further analysis of returning to 15 frontline staff and engage in deeper dialog with Confire regarding opportunities to more closely collaborate, and return to Council in Q3 FY 2021-22 with additional information on each.

FISCAL IMPACT

Staff estimates the following fiscal impact of its recommendations:

- Net cost of \$135,000 annually for the Administrative Captain position. The approximately \$185,000 annual fully burdened cost (wages and benefits) of the position is expected to be partially offset by approximately \$50,000 of new revenue generated by cost recovery activities assigned to the Administrative Captain.
- No net cost of in-housing fire prevention. The approximately \$185,000 annual fully burdened cost (wages and benefits) of the Fire Captain position is expected to be fully offset by an equal reduction in expenditures by terminating the current professional services contract for fire prevention services.
- Net cost of \$65,400 in the first year and \$10,000 annually thereafter for additional investment in training, facilities, equipment, props, and other needed baseline items.
- Total net cost of \$200,540 in the first year and \$145,000 annually thereafter (escalating over time consistent with inflation) for all recommendations.

Fire Services Merger Analysis

**City of Pinole,
Rodeo-Hercules FPD, &
Contra Costa County FPD**

***Project Briefing
January 25, 2011***

Policy Choices Framework

- No mandatory federal or state minimum service levels
- If fire services are provided, they have to be delivered safely, following standards
- Communities have the level of fire services that they need and can afford
- The challenge is matching need with fiscal capacity

Battalion 7 Profile

	Pinole	Hercules Rodeo FPD	<u>West</u> Contra Costa County FPD
Incidents/year	1,621	2,099	Unknown
Stations	2	2	2
FF on Duty each Day	6	6	6
Chief Officers	.75	2	1
Fire Prevention	0	2 part-time	Headquarters
Clerical Assistance	Shared Police	1	Headquarters

Battalion 7 Command Cooperation

- Pinole and ConFire only each have one Chief Officer, while RHFD has 2
- Shared Emergency Incident Command already exists
- This is the minimum necessary incident command staff and any form of merger will not allow saving in these HQ costs

HQ Staff Responsibilities

- Emergency Response incident command
- Fire Prevention - permits and inspections (500)
- Ensuring Federal and State safety regulations are met for firefighting
- Line supervision and application of City rules and regulations
- Planning and liaison with other fire departments
- Fire Investigation and Public Education
- Disaster Preparedness and CERT
- Budgeting and City Fire Department Strategic Planning
- Records, invoices, payroll
- Mandated reports (NFIRS, PCR)
- Response and liaison to City Manager direction
- Coordination with other City departments
- Record keeping
- “Front Desk ” resident inquiries

Battalion 7 Operational Cooperation

- Deployment is about the *speed* and *weight* of the attack
- The basic fire station locations themselves are good, but fire stations do not handle medical emergencies -- firefighters do
- The current common dispatch Automatic Aid arrangement is essential for all three agencies
- All three agencies are operationally co-dependent

Mutual Aid Count

“Out” of Pinole (891 total incidents):	
ConFire Contract	516
ConFire	152
ConFire Total	668
Rodeo-Hercules	124
Richmond	16
Crockett	6
Mutual Aid (no location given)	5
Moraga/ Orinda	2

“Into” Pinole (194 total Incidents):			
	ConFire Responding	Rodeo- Hercules Responding	Richmond Responding
Medical	100	6	2
Fire	20	15	1
Other	37	13	0

Legend

-  Fire Station
-  Freeway
-  CC69
-  CC70
-  P73
-  P74
-  RH75
-  RH76
-  Overlapped Area
-  Pinole City Limits
-  Hercules City Limits

1 inch = 1,300 feet

[Return to Agenda](#)

Area of Interest: Tara Hills
EMS / Fire calls for service: 516
Time period: Calendar 2009

Battalion 7 Serious Emergency Cooperation

- Multiple units (**weight**) are needed to deliver enough firefighters in a reasonable time to serious emergencies to simultaneously and effectively perform the tasks needed for the outcome
- 15 firefighters minimum are needed within an 11-minute total response time for suburban outcomes
- This is known as the concentration of companies
- Pinole has a **weight** of attack problem
- There are not enough career firefighters in any one Batt. 7 agency to provide the “weight” of response to serious and/or multiple emergencies

Daily Operational Staffing

	Pinole Firefighters on Duty		
	Shift 1	Shift 2	Shift 3
Station 73 (Main)	3	3	4
Station 74	3	3	0
Total FF on Duty	6	6	4

	Pinole / RHFD / ConFire Firefighters on Duty		
	Shift 1	Shift 2	Shift 3
Pinole	6	6	4
RHFD	6	6	6
ConFire	6	6	6
Total FF on Duty	18	18	16

ConFire Fiscal Condition

	09/10 Actual	FY 10/11	FY 11/12	FY 12/13	FY 13/14
Employee Costs	\$69,692,716	\$72,861,994	\$75,235,057	\$80,698,599	\$82,042,462
Services, Supplies and Other Expenses	\$21,465,532	\$22,381,852	\$23,114,000	\$23,175,000	\$23,638,500
Total Expenditure	\$91,158,248	\$95,243,846	\$98,349,057	\$103,873,599	\$105,680,962
		Adopted: \$94,479,673			
Revenue	\$88,829,896	\$86,518,770	\$86,821,984	\$87,971,134	\$89,501,104
		Adopted: \$85,667,020			
SHORTFALL	\$2,328,352	\$8,725,076	\$11,527,073	\$15,902,465	\$16,179,858
Fund Balance Available to Meet Shortfall	\$17,610,425	\$15,282,073	\$6,556,997	(\$4,970,076)	(\$20,872,541)
YEAR END FUND BALANCE	\$15,282,073	\$6,556,997	(\$4,970,076)	(\$20,872,541)	(\$37,052,399)

Rodeo-Hercules Fiscal Condition

	FY 2009-10	FY 2010-11
Revenue	\$4,586,162	\$4,472,123
Expenses	\$5,278,680	\$5,136,501
Deficit	(\$692,518)	(\$664,378)
Ending Unrestricted Fund Balance	\$2,178,455	\$1,541,958
Unfunded Retiree Medical	\$2,861,251	

Salary and Benefit Comparison

	Pinole	Rodeo-Hercules
Firefighter	\$110,512	
Firefighter PM	\$138,072	\$184,757
Fire Engineer	\$143,313	\$184,966
Fire Engineer PM	\$155,804	\$206,699
Captain	\$156,642	\$214,580

The difference is higher base pay and higher retirement costs for Rodeo-Hercules

Station Cost Comparison

		Pinole	Rodeo-Hercules FPD	Contra Costa County FPD
Staff	Number	Cost		
Captain	3	\$480,581	\$619,167	\$602,025
Engineer	3	\$438,844	\$554,898	\$538,491
Firefighter/ Paramedic	3	\$374,009	\$554,271	\$537,504
Overtime		\$206,949	\$276,534	\$348,927
Material/ Supplies/ Services		\$168,146	\$224,684	\$321,642
Total Station Cost		\$1,668,530	\$2,229,553	\$2,348,589

Possible Shared Fire Chief Cost with Rodeo-Hercules FPD

	Annual Total Compensation
Pinole Interim Fire Chief	\$127,088
Contracted Half RHFD Fire Chief	\$136,606
Full RHFD Fire Chief	\$273,212
Full Pinole Fire Chief	\$221,194

Current Pinole Operating Model

- Currently budgeted for 16 “Line” Personnel
- Overtime budgeted for 2010-11 = \$309,000
- Currently operate the Main Station 73 with 3-0 staffing daily and Station 74 with 3-0 staffing on two of three shifts

Citygate Observations

- All three agencies are in financial distress
- *Pinole cannot financially sustain two fire stations*
- New revenue is needed by all three fire departments just to maintain the present level of service
- Pinole, with its lower Employee Compensation, cannot afford to merge with anyone right now because it will raise costs with no improvement in service
- All three agencies are already sharing HQ staff
- All three agencies already are operating with Automatic Aid and Dispatch as one responding fire department
- The City is receiving revenue from the County; the County is in no fiscal position to pay more
- What is needed are short-term and long-term plans

Possible 12-24 Month Pinole Operating Model

- Contract with Rodeo-Hercules for Chief services (50% cost)
- The City is accepting the USFA Grant for 1 Battalion Chief
- If the City needs to save another \$200,000 per year, one option is to reduce the OT budget to \$100,000 by:
 - Do not use overtime to cover any sick leave, vacation or WC absence
 - Impacts: when staffing falls below 3-0 on a shift, Station 74 is browned out and remaining staff are reassign to Station 73
 - Savings occur from engine closures to lower overtime and/or attrition, not layoffs
 - Meet and confer obligations

Other Possible Areas of Cooperation in the Short Term

- Pinole could provide Human Resources Administration services to the District
- Both agencies could share fire prevention staff costs based on workload measures, such as # of inspections and plan checks

Long-Term Perspective

- As the City and the Fire Districts navigate the current fiscal crisis with short-term solutions to maintain as much fire service as possible, they should:
 - Jointly develop a Fire Master Plan that can:
 - Engage the community in discussing the level of fire service that is desired over the long term
 - Detail the level of service (stations, staffing, equipment and support services) that is fiscally sustainable and desirable
 - Recommend revenue alternatives that will support the desired services to protect the communities

Next Steps

1. Complete discussions with Rodeo-Hercules for a shared Fire Chief Agreement with Pinole
2. Request Rodeo-Hercules and ConFire to share funding a Fire Master Plan to develop a long-term operating and sustainable fiscal model
3. Meet and Confer with employees to implement a 1-2 year solution
4. All three agencies, but particularly Pinole, have a conversation with the communities regarding sustainable funding for the long-term operating model

Thank you

Questions?

**CONSULTING SERVICES AGREEMENT BETWEEN
THE CITY OF PINOLE AND
EMERGENCY SERVICES CONSULTING INTERNATIONAL (ESCI)**

THIS AGREEMENT for consulting services is made by and between the City of Pinole ("City") and Emergency Services Consulting International (ESCI) ("Consultant") (together sometimes referred to as the "Parties") as of April 17, 2019 (the "Effective Date") in Pinole, California.

Section 1. SERVICES. Subject to the terms and conditions set forth in this Agreement, Consultant shall provide to City the services described in the Scope of Work attached as Exhibit A at the time and place and in the manner specified therein. In the event of a conflict in or inconsistency between the terms of this Agreement and Exhibit A, the Agreement shall prevail.

- 1.1 **Term of Services.** The term of this Agreement shall begin on the Effective Date and shall end on January 31, 2020, and Consultant shall complete the work described in Exhibit A by that date, unless the term of the Agreement is otherwise terminated or extended, as provided for in Section 8. The time provided to Consultant to complete the services required by this Agreement shall not affect the City's right to terminate the Agreement, as provided for in Section 8.
- 1.2 **Standard of Performance.** Consultant shall perform all services required pursuant to this Agreement in the manner and according to the standards observed by a competent practitioner of the profession in which Consultant is engaged in the geographical area in which Consultant practices its profession. Consultant shall prepare all work products required by this Agreement in a professional manner and shall conform to the standards of quality normally observed by a person practicing in Consultant's profession.
- 1.3 **Assignment of Personnel.** Consultant shall assign only competent personnel to perform services pursuant to this Agreement. In the event that City, in its sole discretion, at any time during the term of this Agreement, desires the reassignment of any such persons, Consultant shall, immediately upon receiving notice from City of such desire of City, reassign such person or persons.
- 1.4 **Time.** Consultant shall devote such time to the performance of services pursuant to this Agreement as may be reasonably necessary to meet the standard of performance provided in Section 1.1 above and to satisfy Consultant's obligations hereunder.

Section 2. COMPENSATION. City hereby agrees to pay Consultant an amount not to exceed \$60,000, for all work set forth in Exhibit A and all reimbursable expenses incurred in performing the work. In the event of a conflict between this Agreement and Consultant's proposal regarding the amount of compensation, the Agreement shall prevail. City shall pay Consultant for services rendered pursuant to this Agreement at the time and in the manner set forth herein. The payments specified below shall be the only payments from City to Consultant for services rendered pursuant to this Agreement. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City, Consultant shall not bill City for duplicate services performed by more than one person.

Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

- 2.1 Invoices.** Consultant shall submit invoices, not more often than once a month during the term of this Agreement, based on the cost for services performed and reimbursable costs incurred prior to the invoice date. Invoices shall contain the following information:
- Serial identifications of progress bills, i.e., Progress Bill No. 1 for the first invoice, etc.;
 - The beginning and ending dates of the billing period;
 - A Task Summary containing the original contract amount, the amount of prior billings, the total due this period, the balance available under the Agreement, and the percentage of completion;
 - At City's option, for each work item in each task, a copy of the applicable time entries or time sheets shall be submitted showing the name of the person doing the work, the hours spent by each person, a brief description of the work, and each reimbursable expense;
 - The total number of hours of work performed under the Agreement by Consultant and each employee, agent, and subcontractor of Consultant performing services hereunder, as well as a separate notice when the total number of hours of work by Consultant and any individual employee, agent, or subcontractor of Consultant reaches or exceeds 800 hours, which shall include an estimate of the time necessary to complete the work described in Exhibit A;
 - The Consultant's signature.
- 2.2 Monthly Payment.** City shall make monthly payments, based on invoices received, for services satisfactorily performed, and for authorized reimbursable costs incurred. City shall have 30 days from the receipt of an invoice that complies with all of the requirements above to pay Consultant.
- 2.3 Final Payment.** City shall pay the last 10% of the total sum due pursuant to this Agreement within sixty (60) days after completion of the services and submittal to City of a final invoice, if all services required have been satisfactorily performed.
- 2.4 Total Payment.** City shall pay for the services to be rendered by Consultant pursuant to this Agreement. City shall not pay any additional sum for any expense or cost whatsoever incurred by Consultant in rendering services pursuant to this Agreement. City shall make no payment for any extra, further, or additional service pursuant to this Agreement.

In no event shall Consultant submit any invoice for an amount in excess of the maximum amount of compensation provided above either for a task or for the entire Agreement, unless the Agreement is modified prior to the submission of such an invoice by a properly executed change order or amendment.

- 2.5 **Hourly Fees.** Fees for work performed by Consultant on an hourly basis shall not exceed the amounts shown on the following fee schedule attached hereto as Exhibit A.
- 2.6 **Reimbursable Expenses.** Reimbursable expenses include reasonable travel costs, copying, and mailing and shall not exceed seven thousand five hundred dollars (\$7,500). Any other expenses are not chargeable to City. Reimbursable expenses are included in the total amount of compensation provided under this Agreement that shall not be exceeded.
- 2.7 **Payment of Taxes.** Consultant is solely responsible for the payment of employment taxes incurred under this Agreement and any similar federal or state taxes.
- 2.8 **Payment Upon Termination.** In the event that the City or Consultant terminates this Agreement pursuant to Section 8, the City shall compensate the Consultant for all outstanding costs and reimbursable expenses incurred for work satisfactorily completed as of the date of written notice of termination. Consultant shall maintain adequate logs and timesheets in order to verify costs incurred to that date.
- 2.9 **Authorization to Perform Services.** The Consultant is not authorized to perform any services or incur any costs whatsoever under the terms of this Agreement until receipt of authorization from the Contract Administrator.

Section 3. FACILITIES AND EQUIPMENT. Except as set forth herein, Consultant shall, at its sole cost and expense, provide all facilities and equipment that may be necessary to perform the services required by this Agreement.

Section 4. INSURANCE REQUIREMENTS. Before beginning any work under this Agreement, Consultant, at its own cost and expense, unless otherwise specified below, shall procure the types and amounts of insurance listed below against claims for injuries to persons or damages to property that may arise from or in connection with the performance of the work hereunder by the Consultant and its agents, representatives, employees, and subcontractors. Consistent with the following provisions, Consultant shall provide proof satisfactory to City of such insurance that meets the requirements of this section and under forms of insurance satisfactory in all respects to the City. Consultant shall maintain the insurance policies required by this section throughout the term of this Agreement. The cost of such insurance shall be included in the Consultant's bid. Consultant shall not allow any subcontractor to commence work on any subcontract until Consultant has obtained all insurance required herein for the subcontractor(s) and provided evidence thereof to City. Verification of the required insurance shall be submitted and made part of this Agreement prior to execution.

- 4.1 **Workers' Compensation.** Consultant shall, at its sole cost and expense, maintain Statutory Workers' Compensation Insurance and Employer's Liability Insurance for any and all persons employed directly or indirectly by Consultant. The Statutory Workers' Compensation Insurance and Employer's Liability Insurance shall be provided with limits of not less than ONE MILLION DOLLARS (\$1,000,000.00) per accident. In the alternative, Consultant may rely on a self-insurance program to meet those requirements, but only if the program of self-insurance complies fully with the provisions of the California Labor Code. Determination of whether a self-insurance program meets the standards of the Labor Code shall be solely in the discretion of the City. The insurer, if insurance is provided, or the Consultant, if a program of self-insurance is provided, shall waive all rights of subrogation against the City and its officers, officials, employees, and volunteers for loss arising from work performed under this Agreement.

4.2 **Commercial General and Automobile Liability Insurance.**

- 4.2.1 **General requirements.** Consultant, at its own cost and expense, shall maintain commercial general and automobile liability insurance for the term of this Agreement in an amount not less than ONE MILLION DOLLARS (\$1,000,000.00) per occurrence, combined single limit coverage for risks associated with the work contemplated by this Agreement. If a Commercial General Liability Insurance or an Automobile Liability form or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to the work to be performed under this Agreement or the general aggregate limit shall be at least twice the required occurrence limit. Such coverage shall include but shall not be limited to, protection against claims arising from bodily and personal injury, including death resulting therefrom, and damage to property resulting from activities contemplated under this Agreement, including the use of owned and non-owned automobiles.
- 4.2.2 **Minimum scope of coverage.** Commercial general coverage shall be at least as broad as Insurance Services Office Commercial General Liability occurrence form CG 0001 (ed. 11/88) or GL 0002 (ed. 1/73) covering comprehensive General Liability and Insurance Services Office form number GL 0404 covering Broad Form Comprehensive General Liability. Automobile coverage shall be at least as broad as Insurance Services Office Automobile Liability form CA 0001 (ed. 12/90) Code 1. No endorsement shall be attached limiting the coverage.
- 4.2.3 **Additional requirements.** Each of the following shall be included in the insurance coverage or added as a certified endorsement to the policy:
- a. The insurance shall cover on an occurrence or an accident basis, and not on a claims-made basis.

- b. Any failure of Consultant to comply with reporting provisions of the policy shall not affect coverage provided to City and its officers, employees, agents, and volunteers.

4.3 **Professional Liability Insurance.**

4.3.1 General requirements. Consultant, at its own cost and expense, shall maintain for the period covered by this Agreement professional liability insurance for licensed professionals performing work pursuant to this Agreement in an amount not less than ONE MILLION DOLLARS (\$1,000,000) covering the licensed professionals' errors and omissions. Any deductible or self-insured retention shall not exceed \$150,000 per claim.

4.3.2 Claims-made limitations. The following provisions shall apply if the professional liability coverage is written on a claims-made form:

- a. The retroactive date of the policy must be shown and must be before the date of the Agreement.
- b. Insurance must be maintained and evidence of insurance must be provided for at least five years after completion of the Agreement or the work, so long as commercially available at reasonable rates.
- c. If coverage is canceled or not renewed and it is not replaced with another claims-made policy form with a retroactive date that precedes the date of this Agreement, Consultant must provide extended reporting coverage for a minimum of five years after completion of the Agreement or the work. The City shall have the right to exercise, at the Consultant's sole cost and expense, any extended reporting provisions of the policy, if the Consultant cancels or does not renew the coverage.
- d. A copy of the claim reporting requirements must be submitted to the City prior to the commencement of any work under this Agreement.

4.4 **All Policies Requirements.**

4.4.1 Acceptability of insurers. All insurance required by this section is to be placed with insurers with a Bests' rating of no less than A:VII.

4.4.2 Verification of coverage. Prior to beginning any work under this Agreement, Consultant shall furnish City with complete certified copies of all policies, including complete certified copies of all endorsements. All copies of policies and certified endorsements shall show the signature of a person authorized by that insurer to bind coverage on its behalf.

4.4.3 Notice of reduction in or cancellation of coverage. A certified endorsement shall be attached to all insurance obtained pursuant to this Agreement stating that coverage shall not be suspended, voided, canceled by either party, or reduced in coverage or in limits, except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. In the event that any coverage required by this section is reduced, limited, cancelled, or materially affected in any other manner, Consultant shall provide written notice to City at Consultant's earliest possible opportunity and in no case later than ten (10) working days after Consultant is notified of the change in coverage.

4.4.4 Additional insured; primary insurance. A certified endorsement at least as broad as Insurance Services Office form number CG 20 10 (11/85 ed.) shall be attached to all policies stating that the City and its officers, employees, agents, and volunteers shall be covered as additional insureds with respect to each of the following: liability arising out of activities performed by or on behalf of Consultant, including the insured's general supervision of Consultant; products and completed operations of Consultant, as applicable; premises owned, occupied, or used by Consultant; and automobiles owned, leased, or used by the Consultant in the course of providing services pursuant to this Agreement. The coverage shall contain no special limitations on the scope of protection afforded to City or its officers, employees, agents, or volunteers.

A certified endorsement shall be attached to all policies stating that coverage is primary insurance with respect to the City and its officers, officials, employees and volunteers, and that no insurance or self-insurance maintained by the City shall be called upon to contribute to a loss under the coverage.

4.4.5 Deductibles and self-insured retentions. Consultant shall disclose to and obtain the approval of City for the self-insured retentions and deductibles before beginning any of the services or work called for by any term of this Agreement.

During the period covered by this Agreement, only upon the prior express written authorization of Contract Administrator, Consultant may increase such deductibles or self-insured retentions with respect to City, its officers, employees, agents, and volunteers. The Contract Administrator may condition approval of an increase in deductible or self-insured retention levels with a requirement that Consultant procure a bond, guaranteeing payment of losses and related investigations, claim administration, and defense expenses that is satisfactory in all respects to each of them.

4.4.6 Subcontractors. Consultant shall include all subcontractors as insureds under its policies or shall furnish separate certificates and certified endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.

4.4.7 Variation. The City may approve a variation in the foregoing insurance requirements, upon a determination that the coverage, scope, limits, and forms of such insurance are either not commercially available, or that the City's interests are otherwise fully protected.

4.5 Remedies. In addition to any other remedies City may have if Consultant fails to provide or maintain any insurance policies or policy endorsements to the extent and within the time herein required, City may, at its sole option exercise any of the following remedies, which are alternatives to other remedies City may have and are not the exclusive remedy for Consultant's breach:

- Obtain such insurance and deduct and retain the amount of the premiums for such insurance from any sums due under the Agreement;
- Order Consultant to stop work under this Agreement or withhold any payment that becomes due to Consultant hereunder, or both stop work and withhold any payment, until Consultant demonstrates compliance with the requirements hereof; and/or
- Terminate this Agreement.

Section 5. INDEMNIFICATION AND CONSULTANT'S RESPONSIBILITIES. Consultant shall indemnify, defend with counsel reasonably acceptable to the City, and hold harmless the City and its officials, officers, employees, agents, and volunteers from and against any and all losses, liability, claims, suits, actions, damages, and causes of action arising out of any personal injury, bodily injury, loss of life, or damage to property, or any violation of any federal, state, or municipal law or ordinance, to the extent caused, in whole or in part, by the willful misconduct or negligent acts or omissions of Consultant or its employees, subcontractors, or agents, by acts for which they could be held strictly liable, or by the quality or character of their work. The foregoing obligation of Consultant shall not apply when (1) the injury, loss of life, damage to property, or violation of law arises wholly from the negligence or willful misconduct of the City or its officers, employees, agents, or volunteers and (2) the actions of Consultant or its employees, subcontractor, or agents have contributed in no part to the injury, loss of life, damage to property, or violation of law. It is understood that the duty of Consultant to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Consultant from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply. By execution of this Agreement, Consultant acknowledges and agrees to the provisions of this Section and that it is a material element of consideration.

In the event that Consultant or any employee, agent, or subcontractor of Consultant providing services under this Agreement is determined by a court of competent jurisdiction or the California Public Employees Retirement System (PERS) to be eligible for enrollment in PERS as an employee of City, Consultant shall indemnify, defend, and hold harmless City for the payment of any employee and/or employer contributions for PERS benefits on behalf of Consultant or its employees, agents, or subcontractors, as well as for the

ent of any penalties and interest on such contributions, which would otherwise be the responsibility of City.

Section 6. STATUS OF CONSULTANT.

- 6.1 **Independent Contractor.** At all times during the term of this Agreement, Consultant shall be an independent contractor and shall not be an employee of City. City shall have the right to control Consultant only insofar as the results of Consultant's services rendered pursuant to this Agreement and assignment of personnel pursuant to Subparagraph 1.3; however, otherwise City shall not have the right to control the means by which Consultant accomplishes services rendered pursuant to this Agreement. Notwithstanding any other City, state, or federal policy, rule, regulation, law, or ordinance to the contrary, Consultant and any of its employees, agents, and subcontractors providing services under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any and all claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in the California Public Employees Retirement System (PERS) as an employee of City and entitlement to any contribution to be paid by City for employer contributions and/or employee contributions for PERS benefits.
- 6.2 **Consultant No Agent.** Except as City may specify in writing, Consultant shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Consultant shall have no authority, express or implied, pursuant to this Agreement to bind City to any obligation whatsoever.

Section 7. LEGAL REQUIREMENTS.

- 7.1 **Governing Law.** The laws of the State of California shall govern this Agreement.
- 7.2 **Compliance with Applicable Laws.** Consultant and any subcontractors shall comply with all laws applicable to the performance of the work hereunder including but not limited to the California Labor Code and the prevailing wage requirements.
- 7.3 **Other Governmental Regulations.** To the extent that this Agreement may be funded by fiscal assistance from another governmental entity, Consultant and any subcontractors shall comply with all applicable rules and regulations to which City is bound by the terms of such fiscal assistance program.
- 7.4 **Licenses and Permits.** Consultant represents and warrants to City that Consultant and its employees, agents, and any subcontractors have all licenses, permits, qualifications, and approvals of whatsoever nature that are legally required to practice their respective professions. Consultant represents and warrants to City that Consultant and its employees, agents, any subcontractors shall, at their sole cost and expense, keep in effect at all times during the term of this Agreement any licenses, permits, and approvals that are legally required to practice their respective professions. In addition to the foregoing,

Consultant and any subcontractors shall obtain and maintain during the term of this Agreement valid Business Licenses from City.

- 7.5 **Pinole Business License.** Consultant shall obtain a City of Pinole business license according to the terms of Title 5 of the City of Pinole Municipal Code and deliver to City proof of such business license prior to beginning work under this Agreement. Work under this Agreement cannot begin until the City receives proof that Consultant has obtained a City of Pinole business license.
- 7.6 **Nondiscrimination and Equal Opportunity.** Consultant shall not discriminate, on the basis of a person's race, religion, color, national origin, age, physical or mental handicap or disability, medical condition, marital status, sex, or sexual orientation, against any employee, applicant for employment, subcontractor, bidder for a subcontract, or participant in, recipient of, or applicant for any services or programs provided by Consultant under this Agreement. Consultant shall comply with all applicable federal, state, and local laws, policies, rules, and requirements related to equal opportunity and nondiscrimination in employment, contracting, and the provision of any services that are the subject of this Agreement, including but not limited to the satisfaction of any positive obligations required of Consultant thereby.

Consultant shall include the provisions of this Subsection in any subcontract approved by the Contract Administrator or this Agreement.

Section 8. TERMINATION AND MODIFICATION.

- 8.1 **Termination.** City may cancel this Agreement upon thirty (30) calendar days and without cause upon written notification to Consultant pursuant to this section.

In the event of termination, Consultant shall be entitled to compensation for services performed to the effective date of termination; City, however, may condition payment of such compensation upon Consultant delivering to City any or all documents, photographs, computer software, video and audio tapes, and other materials provided to Consultant or prepared by or for Consultant or the City in connection with this Agreement.

- 8.2 **Extension.** City may, in its sole and exclusive discretion, extend the end date of this Agreement beyond that provided for in Subsection 1.1. Any such extension shall be specified in writing by the City. Consultant understands and agrees that if City issues such an extension, City shall have no obligation to provide Consultant with compensation beyond the maximum amount provided for in this Agreement. Similarly, unless authorized by the City, City shall have no obligation to reimburse Consultant for any otherwise reimbursable expenses incurred during the extension period.

- 8.3 **Consultant's Identity and Personnel.** The person identified on page one as the CONSULTANT's Key Personnel will be the key person for the performance of services under this AGREEMENT. CONSULTANT's additional key personnel who will work on the

PROJECT are identified in Exhibit A. Any addition or deletion of a firm (whether working as a joint venture partner or subconsultant), or any change in key personnel may be made only upon prior written approval by CITY. CONSULTANT shall notify CITY of any proposed change of ownership or fundamental structure in CONSULTANT's firm. Within thirty (30) calendar days of such notice, CITY shall notify CONSULTANT whether CITY will approve such changed firm or personnel to continue providing services under this AGREEMENT or whether CITY will terminate this AGREEMENT. Nothing in this provision shall be construed to limit CITY's right to terminate this AGREEMENT for cause or without cause as set forth in Article I, Section C of this AGREEMENT. Subcontracts between the CONSULTANT and any subconsultants will be subject to review and approval of CITY's representative.

If CONSULTANT reassigns or reduces the commitment of any such key personnel, CONSULTANT shall provide a suitable replacement, subject to the approval of CITY, and CONSULTANT shall provide a reasonable number of unbilled hours of work for such replacement personnel to the extent required to bring the personnel up to speed.

8.4 Amendments. The parties may amend this Agreement only by a writing signed by all the parties.

8.5 Assignment and Subcontracting. City and Consultant recognize and agree that this Agreement contemplates personal performance by Consultant and is based upon a determination of Consultant's unique professional competence, experience, and specialized professional knowledge. Moreover, a substantial inducement to City for entering into this Agreement was and is the personal reputation and competence of Consultant. Consultant may not assign this Agreement or any interest therein without the prior written approval of the City. Consultant shall not subcontract any portion of the performance contemplated and provided for herein, other than to the subcontractors noted in the proposal, without prior written approval of the City.

8.6 Survival. All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating liability between City and Consultant shall survive the termination of this Agreement.

8.7 Options upon Breach by Consultant. If Consultant materially breaches any of the terms of this Agreement, City's remedies shall include, but not be limited to, the following:

8.7.1 Immediately terminate the Agreement;

8.7.2 Retain the plans, specifications, drawings, reports, design documents, and any other work product prepared by Consultant pursuant to this Agreement;

8.7.3 Retain a different consultant to complete the work described in Exhibit A not finished by Consultant; or

- 8.7.4 Charge Consultant the difference between the cost to complete the work described in Exhibit A that is unfinished at the time of breach and the amount that City would have paid Consultant pursuant to Section 2 if Consultant had completed the work.

Section 9. KEEPING AND STATUS OF RECORDS.

- 9.1 **Records Created as Part of Consultant's Performance.** All reports, data, maps, models, charts, studies, surveys, photographs, memoranda, plans, studies, specifications, records, files, or any other documents or materials, in electronic or any other form, that Consultant prepares or obtains pursuant to this Agreement and that relate to the matters covered hereunder shall be the property of the City. Consultant hereby agrees to deliver those documents to the City upon termination of the Agreement. It is understood and agreed that the documents and other materials, including but not limited to those described above, prepared pursuant to this Agreement are prepared specifically for the City and are not necessarily suitable for any future or other use. City and Consultant agree that, until final approval by City, all data, plans, specifications, reports and other documents are confidential and will not be released to third parties without prior written consent of both parties.
- 9.2 **Consultant's Books and Records.** Consultant shall maintain any and all ledgers, books of account, invoices, vouchers, canceled checks, and other records or documents evidencing or relating to charges for services or expenditures and disbursements charged to the City under this Agreement for a minimum of three (3) years, or for any longer period required by law, from the date of final payment to the Consultant to this Agreement.
- 9.3 **Inspection and Audit of Records.** Any records or documents that Section 9.2 of this Agreement requires Consultant to maintain shall be made available for inspection, audit, and/or copying at any time during regular business hours, upon oral or written request of the City. Under California Government Code Section 8546.7, if the amount of public funds expended under this Agreement exceeds TEN THOUSAND DOLLARS (\$10,000.00), the Agreement shall be subject to the examination and audit of the State Auditor, at the request of City or as part of any audit of the City, for a period of three (3) years after final payment under the Agreement.

Section 10 MISCELLANEOUS PROVISIONS.

- 10.1 **Attorneys' Fees.** If a party to this Agreement brings any action, including an action for declaratory relief, to enforce or interpret the provision of this Agreement, the prevailing party shall be entitled to reasonable attorneys' fees in addition to any other relief to which that party may be entitled. The court may set such fees in the same action or in a separate action brought for that purpose.
- 10.2 **Venue.** In the event that either party brings any action against the other under this Agreement, the parties agree that trial of such action shall be vested exclusively in the

state courts of California in the County of Contra Costa or in the United States District Court for the Northern District of California.

- 10.3 Severability.** If a court of competent jurisdiction finds or rules that any provision of this Agreement is invalid, void, or unenforceable, the provisions of this Agreement not so adjudged shall remain in full force and effect. The invalidity in whole or in part of any provision of this Agreement shall not void or affect the validity of any other provision of this Agreement.
- 10.4 No Implied Waiver of Breach.** The waiver of any breach of a specific provision of this Agreement does not constitute a waiver of any other breach of that term or any other term of this Agreement.
- 10.5 Successors and Assigns.** The provisions of this Agreement shall inure to the benefit of and shall apply to and bind the successors and assigns of the parties.
- 10.6 Use of Recycled Products.** Consultant shall endeavor to prepare and submit all reports, written studies and other printed material on recycled paper to the extent it is available at equal or less cost than virgin paper.
- 10.7 Conflict of Interest.** Consultant may serve other clients, but none whose activities within the corporate limits of City or whose business, regardless of location, would place Consultant in a "conflict of interest," as that term is defined in the Political Reform Act, codified at California Government Code Section 81000 *et seq.*

Consultant shall not employ any City official in the work performed pursuant to this Agreement. No officer or employee of City shall have any financial interest in this Agreement that would violate California Government Code Sections 1090 *et seq.*

Consultant hereby warrants that it is not now, nor has it been in the previous twelve (12) months, an employee, agent, appointee, or official of the City. If Consultant was an employee, agent, appointee, or official of the City in the previous twelve months, Consultant warrants that it did not participate in any manner in the forming of this Agreement. Consultant understands that, if this Agreement is made in violation of Government Code §1090 *et seq.*, the entire Agreement is void and Consultant will not be entitled to any compensation for services performed pursuant to this Agreement, including reimbursement of expenses, and Consultant will be required to reimburse the City for any sums paid to the Consultant. Consultant understands that, in addition to the foregoing, it may be subject to criminal prosecution for a violation of Government Code § 1090 and, if applicable, will be disqualified from holding public office in the State of California.

Consultant will comply with all conflict of interest laws and regulations including, without limitation, City's Conflict of Interest Code (on file in the City Clerk's Office). It is incumbent upon the Consultant or Consultant's firm to notify the City pursuant to section 10.10 Notices of any staff changes relating to this Agreement.

- a. In accomplishing the scope of services of this Agreement, all officers, employees and/or agents of Consultant(s), unless as indicated in Subsection b, will be performing a very limited and closely supervised function, and, therefore, are unlikely to have a conflict of interest arise. No disclosures are required for any officers, employees, and/or agents of Consultant, except as indicated in Subsection b.

Initialed by City Attorney's Office

- b. In accomplishing the scope of services of this Agreement, Consultant(s) will be performing a specialized or general service for the City, and there is substantial likelihood that Consultant's work product will be presented, either written or orally, for the purpose of influencing a governmental decision. As a result, the following Consultant(s) shall be subject to the Disclosure Category "1-5" of the City's Conflict of Interest Code:

KURT LATROW, PROJECT MANAGER

- 10.8 **Solicitation.** Consultant agrees not to solicit business at any meeting, focus group, or interview related to this Agreement, either orally or through any written materials.

- 10.9 **Contract Administration.** This Agreement shall be administered by City Manager Michelle Fitzer who shall act as the City's representative. All correspondence shall be directed to or through her or her designee.

- 10.10 **Notices.** Any written notice to Consultant shall be sent to:
Emergency Services Consulting International
Attn: Andrea Hobi, Business Manager
25030 SW Parkway Avenue, Suite 330
Wilsonville, OR 97070

Any written notice to City shall be sent to:
City of Pinole
Attn: Michelle Fitzer, City Manager
2131 Pear Street
Pinole, CA 94564

- 10.11 **Integration; Incorporation.** This Agreement, including all the exhibits attached hereto, represents the entire and integrated agreement between City and Consultant and supersedes all prior negotiations, representations, or agreements, either written or oral. All exhibits attached hereto are incorporated by reference herein.

10.12 Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be an original and all of which together shall constitute one agreement.

The Parties have executed this Agreement as of the Effective Date.

Project Understanding & Methodology

Understanding of Project Opportunities and Challenges

ESCI has worked with hundreds of fire agencies and emergency services providers and is keenly aware of the struggles currently facing these organizations. With the many changes facing today's fire service, a comprehensive long-range vision is essential. ESCI's experience working with agencies in both California and across the U.S. and Canada, offers a broadly knowledgeable perspective with which to help guide the organizations into the future.

ESCI understands that the intent of this project is to provide an unbiased, third-party evaluation, of the current and potential future fire services delivery to the region. ESCI will provide a detailed analysis and evaluation of services, along with recommendations for increased efficiency and effectiveness.

The analysis and determinations to be developed by ESCI are designed to provide the City of Pinole and your regional partners with necessary elements as identified within the RFP. We believe that the detailed scope of work included with this proposal accomplishes those tasks in an ordered and methodical way. We are sure that the recommendations given to policy-makers will be supported by legal requirements, industry standards, benchmarks, and/or best practices.

Methodology

ESCI's methodology reflects our understanding of your expectations and our experience in working with emergency services organizations in communities of similar size and character throughout North America. Key elements of ESCI's methodology include:

- A clear understanding of the project background, goals and objectives, and the complex issues that must be addressed.
- A comprehensive, well designed, and practical scope of work (SOW) and work plan that provides opportunities for ample stakeholder input.
- The utilization of the latest web-based communications technology, computer modeling, and geographic information systems (GIS).
- The commitment of sufficient professional resources, and an ability to complete the project successfully by meeting or exceeding the outlined scope of work and deliverables within the desired period at a reasonable cost.
- The production of a written report that provides systematic observation, analysis, and recommendations for all components and organizational systems.

ESCI's project methodology is augmented by the utilization of web-based communication technology. We will utilize the Dropbox® application to create a secure online project site that enables the client and project team members to collaborate and communicate throughout nearly every phase of the project.

ESCI can also conduct virtual meetings via web conferencing software. This capability allows the project team to display and review documents, maps, and illustrations in real-time, and provides the client with the opportunity to give immediate feedback to the project team. In addition to creating a more efficient work environment, the client benefits from lower travel costs by eliminating on-site reviews of draft documents.

Standards & Best Practices

Depending upon the nature of the project, ESCI will apply local and regional standards; and relevant standards and criteria from the *National Fire Protection Association (NFPA)*, *Insurance Services Office (ISO)*; *Commission on Fire Accreditation International (CFAI)*; *Commission on Accreditation of Ambulance Services (CAAS)*; *Commission on Accreditation of Medical Transport Systems (CAMTS)*; applicable health and safety requirements; and state and federal regulations relative to the fire service, EMS, and other emergency services.

Project Scope of Work

The following phases and tasks will be completed to produce the final report and recommendations. This methodology has been developed specifically for this project based on our understanding of your expectations. ESCI will utilize approaches, tools, and techniques proven through experience to provide the kind and quality of information needed to make objective, informed decisions.

The proposed methods, procedures, and anticipated deliverable items of this project have been organized into phases. Each project phase is described in detail below and on the following pages.

Phase I—Project Initiation

Task I-A: Project Initiation & Development of Work Plan

ESCI will converse with the management teams of the various governments and organizations involved in the study or their project liaisons to gain a comprehensive understanding of the communities' backgrounds, goals, and expectations for the project. Consistent with the RFP this study will focus on information and analysis for increased efficiency, improved effectiveness, enhanced or expanded service or services, cost avoidance, coordination of regional planning, enhanced supervision, elimination of artificial boundaries, standardization of services and programs, potential improvement of ISO rating and enhancements to future state and federal grant writing.

ESCI's project manager will develop and refine a proposed work plan that will guide the project team. This work plan will be developed identifying:

- Primary tasks to be performed
- Person(s) responsible for each task
- Timetable for each objective to be completed
- Method of evaluating results
- Resources to be utilized
- Possible obstacles or problem areas associated with the accomplishment of each task

This process will also help to establish working relationships, make logistical arrangements, determine an appropriate line of communications, and finalize contractual arrangements.

Task I-B: Acquisition & Review of Background Information

ESCI will request pertinent information and data from each organization's assigned project manager. This data will be used extensively in the analysis and development of the report document. Thoroughly researched and relevant studies will be included during our review.

The documents and information relevant to this project will include, but not be limited to, the following:

- Past or current emergency service studies or research
- Standards of Cover assessments
- LAFCO Spheres of Influence and Municipal Service Reviews
- Community Comprehensive Plan documents, including current and future land use information
- Local census, economic and demographic data

- Planning maps and zoning codes
- Financial data, including debt information, long-range financial plans and projections
- Fire Department administrative policies and procedures
- Standard Operating Guidelines (SOGs) and service delivery practices
- Current service delivery objectives and targets for each community
- Training programs
- Facilities and apparatus inventories
- Local collective bargaining agreements
- Automatic and mutual aid agreements
- Records management data, including National Fire Incident Reporting System (NFIRS) incident data
- Computer-Aided Dispatch (CAD) incident records
- Local Geographic Information Systems (GIS) data, where available

Task I-C: Stakeholder Input

The ESCI project team will conduct on-site interviews and gather information from key personnel and stakeholders from each of the Districts. Some information may be acquired through the use of electronic forms and/or telephone interviews. Individuals will include, but not be limited to:

- Interagency Committee members and any other elected members of the City council and respective fire district Boards.
- Each agency Fire Chief and representatives of their respective command staffs
- Individuals responsible for finance and human resources at each agency
- Representative(s) of each agency's labor leadership
- Select group of firefighters and company officers from each District (may be completed through an online survey)
- Community groups
- External fire, law enforcement and EMS agencies within the region
- Medical facilities, medical director for regional or community EMS
- Employee and volunteer groups (such as CERT)
- Others as they may contribute to this project

From these interviews, ESCI will obtain additional perspective on operational, economic, and policy issues facing the agency. Further, the project staff will complete a summary of Strengths, Weaknesses, Opportunities, and Threats (SWOT) identified in the course of stakeholder interviews.

Task I-D: Internal Strengths, Weaknesses, Opportunities, & Threats Survey (SWOT)

In order to provide internal personnel with an opportunity to participate in this data gathering event, ESCI's Survey Manager will work with the ESCI Project Manager to develop an internal survey (All survey tools will be approved by the agency's project manager prior to distribution. ESCI's Survey Manager will receive the responses directly and will develop and produce an executive summary of the survey results. The survey will be designed to gather detailed feedback related to several aspects of the members' priorities, opinions, and expectations related to service delivery, core services and programs, positive and corrective issues, and recommendations. ESCI recommends that the survey be accessible to all personnel.

To ensure respondent anonymity, ESCI will obtain survey responses confidentially. This will be accomplished using an internet-based survey accessible only by the intended participants. The survey results will be delivered directly to ESCI's headquarters office. ESCI's Survey Manager will develop and produce an executive summary of the survey results.

Task I-E (option): Public Meeting and Assessment of Customer Needs and Expectations

(see pricing option below)

ESCI facilitators will assist the department in identifying external customers/key members of the community. Once identified, invitations will be mailed and ESCI will convene these external customers/community leaders for the purpose of addressing the issues outlined above and gaining a realistic view of external customer needs and expectations. The project team will organize the meeting in coordination with the dates they will be in the city conducting field work. The meeting will be scheduled after normal working hours to accommodate citizen work schedules. ESCI has found through experience that 80 to 90 percent of the invitees attend the session and actively participate. At a minimum, we recommend the representatives of this citizen's focus group include, but not be limited to:

- Business owners
- Service groups representative(s) (i.e., Chamber of Commerce, Rotary, Lions)
- Prominent citizens in the community
- Members of civic organizations
- Media representative(s)
- Multiple citizens who have been actual recipients of fire and EMS services respectfully
- Representatives of neighborhood organizations and/or homeowner associations
- Representatives of non-profit organizations
- Representatives of local industry
- Other citizen-customers as identified by the strategic planning group

ESCI will facilitate the group meeting with the presence of at least one organization representative, usually a chief or chief officer, to act only as a technical resource and to answer questions that may arise that the facilitator is unable to answer. In addition to facilitating the session(s), ESCI may utilize surveys and questionnaires to gather necessary information. This step is critical, as it ensures that customer needs and concerns are incorporated into the strategic plan. More and more, the public is demanding the accomplishment of specific objectives and services with fewer resources. This step ensures that the public concerns are recognized by the organization and incorporated into the long-range strategic planning processes and arms influential members of the public with important background information about their public safety agency that they might not have been exposed to under normal circumstances. The process will seek to identify:

- How customers prioritize the services provided by the organization
- Areas of customer concern about the organization
- Customer expectations
- Customers positive attributes of the organization
- How "good service" is measured by the customer

Phase II—Evaluation of Current Conditions

The initial phases of the study focus on a baseline assessment of the current conditions and current service performance. ESCI will conduct an organizational analysis of the department and regional partners based on the elements included in the following tasks. The purpose of this evaluation is to assess the agency's operations in comparison to industry standards and best practices, as well as to create a benchmark against which the options for future service delivery can be measured.

Task II-A: Organization Overview

An overview of the organization will be developed discussing:

- Service area population and demographics
- History, formation, and general description of the agencies
- Description of the current service delivery infrastructure
- Governance and lines of authority
- Foundational policy documents
- Organizational designs
- Operating budget, funding, fees, taxation, and financial resources

Task II-B: Management Components

The organization's basic management processes will be reviewed, including:

- Mission, vision, strategic planning, goals, and objectives
- Internal assessment of critical issues
- Internal assessment of future challenges
- Internal and external communications processes
- Document control and security
- Reporting and recordkeeping
- Information technology systems

Task II-C: Financial Review

ESCI will review the existing financial status of each partner agency to include, but not limited to:

- Sources of recurring and non-recurring revenue, including property taxes
- Existing revenue and projections for the next three to five years
- Cost for existing levels of service and projections for the next three to five years
- Contractual services provided by each agency
- Indirect costs, cost allocations, and contractual obligations
- Review of each District's capital facilities and apparatus replacement and improvement plans

Task II-D: Capital Assets & Capital Improvement Programs

ESCI will review the status of current major capital assets (facilities and apparatus) and analyze needs relative to the existing condition of capital assets and their viability for continued use in future service delivery, including:

Facilities—Tour and make observations in areas related to station efficiency and functionality. Items to be contained in the report include:

- | | |
|------------------------|--------------------|
| • Design | • Code compliance |
| • Construction | • Staff facilities |
| • Safety | • Efficiency |
| • Environmental issues | • Future viability |

Apparatus/Vehicles—Review and make recommendations regarding inventory of apparatus and equipment. Items to be reviewed include:

- | | |
|--------------------------------------|----------------|
| • Regulations compliance | • Maintenance |
| • Age, condition, and serviceability | • Future needs |
| • Distribution and deployment | |

Task II-E: Staffing & Personnel Management

ESCI will review the Department's and regional partner's staffing levels. Areas to be considered include:

- Review and evaluate administration and support staffing levels
- Review and evaluate operational staffing levels
- Review staff allocation to various functions and divisions
- Review staff scheduling methodology
- Analyze current standards of coverage and staffing performance for incidents
- Review firefighter/EMS staff distribution
- Review utilization of companies, if applicable and in accordance with methodologies recommended in NFPA 1710 and 1720
- Review responsibilities and activity levels of personnel

Personnel management systems will also be reviewed, focusing on:

- Human resources policies and handbooks
- Quality and status of job descriptions
- Personnel reports and recordkeeping
- Compensation systems
- Disciplinary processes
- Counseling services
- Application and recruitment processes
- Testing, measuring, and promotion processes
- Health and wellness programs

Task II-F: Service Delivery & Performance—Resource Deployment & Standards of Cover Review

ESCI will review and make observations and or recommendations in areas specifically involved in, or affecting, service levels and performance. Areas to be reviewed shall include, but not necessarily be limited to:

- Service Demand Study—
 - Analysis and geographic display of current service demand by incident type and temporal variation
- Resource Distribution Study—
 - Overview of the current facility and apparatus deployment strategy, analyzed through Geographical Information Systems, with identification of service gaps and redundancies
- Resource Concentration Study—
 - Analysis of response time to achieve full effective response force
 - Analysis of company and staff distribution as related to effective response force assembly

- Response Reliability Study—
 - Analysis of current workload, including unit hour utilization of individual companies (to the extent data is complete)
 - Review of actual or estimated failure rates of individual companies (to the extent data is complete)
 - Analysis of call concurrency and impact on effective response force assembly
- Response Performance Summary—
 - Analysis of actual system reflex time performance, analyzed by individual companies (to the extent data is available)
- Mutual and Automatic Aid Systems
- Compare and benchmark other rapidly growing nearby fire departments and emergency medical providers, to the extent that data is available.

Task II-G: Planning for Fire Protection and Emergency Medical Services

The planning processes within the agency shall be reviewed. Key components include:

- Review and evaluate the adequacy of the current planning process
- Review elements of tactical planning within the organization
- Review operational planning within the organization
- Review strategic planning practices
- Review long range or other planning efforts
- Make recommendations relative to future planning process needs

Task II-H: Support Programs

ESCI will review and make overall observations involving support programs and collaboration with partner agencies, related to critical areas of training and life safety services. Items to be reviewed include:

Training

- General training competencies
- Training administration
- Training schedules
- Training facilities
- Training procedures, manuals, and protocols and record keeping

Life-Safety Services (Fire Prevention)

- Code enforcement activities
- New construction inspection and involvement
- General inspection program
- Fire and Life-Safety public education programs
- Fire investigation programs
- Pre-incident planning
- Statistical collection and analysis

Communications

- Alarm systems and communications infrastructure
- PSAP and Dispatch Center capabilities and methods
- Dispatch Center staffing

Task II-I: Community Risk Analysis

Land use and zoning classifications will be used, along with specific target hazard information, to analyze and classify community risk by geography. This process will be completed with GIS software and will consider:

- Population and population density
- Demographics
- Community land use regulations
- Occupancy types by land use designation
- Hazardous substances and processes

Task II-J: Insurance Service Office Rating Review

Utilizing findings from Service Delivery and Performance section, as well as information contained within the latest ISO Public Protection Classification (PPC) rating for Pinole, a series of recommendations will be provided to assist the department in future ISO assessments and for CFAI and NFPA requirements. These recommendations will be completed using a combination of data analysis techniques, to include performance observations, GIS analysis, and ISO findings.

The ISO section will include discussions and recommendations regarding:

- Emergency Communications
- Fire Department
- Water Department
- Community Risk Reduction
- Divergence
- General Recommendations

The CFAI/NFPA section will include discussions and recommendations regarding:

- Current Performance
- Service Demand Zones
- Data Collection and Reporting
- Staffing and Deployment
- General Recommendations

Phase II—Opportunities for Cooperative Efforts

ESCI will use the completed baseline assessments of each agency to identify opportunities and feasibility for cooperative efforts. The project team will identify areas of duplication that can be reduced through consolidation and or contractual efforts, as well as potential service improvements that can be accomplished. Experience has shown that this frequently becomes the overriding influence for public fire service cooperative efforts.

Items in this section of the report include but are not limited to the areas listed below. The detailed information provides managers, department heads and elected officials with the information necessary to make important decisions regarding emergency services consolidation. Included are:

Task III-A: General Partnering Strategies

The various partnering strategies are described, beginning with a do-nothing approach and ending with complete consolidation of the agencies into a new emergency service provider. The following alternatives will be evaluated and discussed:

- Status Quo
- Advanced auto aid systems
- Functional consolidation
- Operational consolidation
- Legal unification including consolidation or reorganization options

Task III-B: Options for Shared Services

The study will take into account the many shared issues that face each agency, and how such matters affect the effort to construct a regional model for efficient service. These issues are identified, analyzed and the most viable options will be identified. Within each presented option for shared services, ESCI will evaluate and discuss the following:

- Level of cooperation
- Estimated timeline for completion
- Affected section, i.e. Administration, Operations, Support Services
- Objective of strategy
- Summary of strategy
- Governance considerations
- Fiscal considerations
- Social considerations
- Policy actions

Task III: Fiscal Analyses

ESCI uses computer-driven model budgets for each agency to allow a comparative examination of the actual public costs for each fire agency, and as a tool for analyzing the financial effects of any type of consolidation. Budget modeling is also used to measure the effects of the proposed change(s). Funding mechanisms are identified and comprehensive financial outcomes are provided for each consolidation strategy offered.

- Review and analyze budgets and revenues
- Review separate budgets
- Develop projected budget models for each option extending to a minimum of five years
- Identify financial concerns of each option
- Identify areas of short and long-term savings and costs
- Explore potential funding such as parcel tax considerations

Fiscal analysis is an important component of the Regional Fire Service Delivery Study. Long-term survival of an emergency services system requires that the system be adequately funded. ESCI determines the fiscal state of each agency and develops recommendations on improving the financial resources available for emergency services, in addition budgeting practices are thoroughly examined, and alternate methodologies may be suggested.

Phase IV—Future Delivery System Models

The project concludes with strategies intended to place the organization in a position to successfully serve its future demand and risk. ESCI will develop and analyze various operational models for providing emergency services with the specific intent of identifying options that can deliver the desired levels of service identified in the previous task that will result in Potential cost savings/cost avoidance, improved productivity and/or improved customer service and potentially have a positive impact on the agency's ISO rating.

Recommendations will be provided identifying the best long-range strategy for service delivery and the impact of initiating such a strategy. In addition, short and mid-term strategies will be recommended for service delivery improvement or increased efficiency.

Task IV-A: Short & Mid-Term Strategies

Recommendations for improving service delivery and system efficiency prior to any full implementation of the long-term strategy will be provided in areas such as:

- Agency management and organization
- Staffing and personnel deployment
- Service delivery methods
- Training programs
- Prevention programs
- Enhanced cooperative service agreements with other communities or agencies
- System funding and cost recovery
- Others as appropriate and necessary

Task IV-B: Recommended Long-Term Strategy

ESCI will develop a recommended long-term option for resource deployment that will improve the department's level of service towards the identified performance objectives and targets. This may include, but is not necessarily limited to, specific recommendations regarding:

- Any relocations and or reopening of existing facilities
- General locations of future necessary fire stations
- Selection and deployment of apparatus by type
- Deployment of operations personnel
- Future administrative and support personnel
- Deployment special units or resources
- Additional infrastructure or facilities for administration and support programs
- Cooperative agreements and or consolidations

ESCI will evaluate and present in graphical and descriptive format for each of the deployment option(s):

- Degree of benefit to be gained through its implementation
- Extent to which it achieves established performance targets
- Potential negative consequences

Task IV-C: Cost Projections

ESCI will provide general projections of the cost of recommended long-term strategies, specifically related to:

- Facility changes or additions
- Staff changes or additions
- Primary apparatus changes or additions

Cost projections will be provided for both capital expenditures and on-going operational costs. Operational costs will be provided based on five-year projections including but not limited to: Additional or reduced expenditures resulting from full implementation of the strategy. Additional findings and recommendations will be made, where appropriate, regarding:

- Options for long-term funding strategies
- Options for cost avoidance
- Options for cost recovery

Task D: Development of Draft Implementation Plan

Any cooperative venture among agencies presents the organizational leaders with a series of challenges. Successful implementation will require that significant matters be addressed regardless of which option is chosen. Those issues will be identified here.

- Findings
 - Feasibility of each option will be presented
- Preferred Option
 - The preferred option or options will be presented and discussed at length
- Policy Action
 - Necessary policy action by the elected bodies will be described
- Timelines
 - The recommendations outlined in this section provide general completion timelines offered to guide the agencies in developing a more detailed listing during the formal planning process
- Process Issues
 - Strategic planning, legal considerations, management and governance, funding and other issues will be provided in detail

Phase V—Development, Review, & Delivery of the Project Report

Task V-A: Development and Review of the Draft Report

ESCI will develop and produce an electronic version of the draft written report for review by the client and client representatives. Client feedback is a critical part of this project and adequate opportunity will be provided for review and discussion of the draft report prior to finalization. The report will include:

- Detailed narrative analysis of each report component structured in easy-to-read sections and accompanied by explanatory support to encourage understanding by both staff and civilian readers
- Clearly designated recommendations highlighted for easy reference and cataloged as necessary in a report appendix
- Supportive charts, graphs, and diagrams, where appropriate
- Supportive maps utilizing GIS analysis, as necessary

Task V-B: Delivery & Presentation of the Final Report

ESCI will complete any necessary revisions of the draft and produce five publication-quality bound, final versions of the written report along with an electronic copy in PDF file format. A formal presentation of the project report will be made by ESCI project team member(s) to staff, elected officials, and/or the general public as necessary and will include the following:

- A summary of the nature of the report, the methods of analysis, the primary findings, and critical recommendations
- Supportive audio-visual presentation
- Review and explanation of primary supportive charts, graphs, diagrams, and maps, where appropriate
- Opportunity for questions and answers, as needed
- All presentation materials, files, graphics, and written material will be provided to The City of Pinole at the conclusion of the presentation.

Project Timeline & Fee Proposal

Project Completion Timelines

The timeline for the proposed project is anticipated to be 150 days. It is noted that the timing starts once the requested information is received from the client in response to ESCI's initial data request.

Project Phase	Month 1	Month 2	Month 3	Month 4	Month 5
Phase I: Project Initiation					
Phase II: Evaluation of Current Conditions					
Phase III: Opportunities for Cooperative Efforts					
Phase IV: Future Delivery System Models					
Phase V: Development, Review & Delivery of Study					

Reasonableness of Cost and Price

ESCI develops project pricing based on a system in which we identify a scope of work, calculate the hours estimated to complete each task as listed in the work plan, and assigning an hourly rate accordingly. Having completed hundreds of projects nationally and many in California, we have designed a pricing structure that is highly competitive and, most importantly, fair to the client.

Hourly rates are translated into a total project cost. The proposed pricing is a fixed amount, inclusive of all expenses incurred. For this reason, absent changes to the scope of work that may be agreed upon, there will be no surprise cost overruns and are no hidden costs other than the stated contract value.

Project Rate/Fee Schedule

The following is a breakdown of the bid price by phase, consulting, and expense as outlined in the Scope of Work as follows:

Project Phase	Consulting Fees	Expenses	Total
Phase I: Project Initiation	\$6,219	\$2,172	\$8,391
Phase II: Evaluation of Current Conditions	\$18,405		\$18,405
Phase III: Opportunities for Cooperative Efforts	\$7,824		\$7,824
Phase IV: Future Delivery System Models	\$8,581		\$8,581
Phase V: Development, Review & Delivery of Study	\$4,595	\$1,370	\$5,965
Optional: Public Meeting	\$2546.	\$2326.	\$4,871.
Total Cost of Project Without Option:			\$49,166

Total Cost of Project with Optional Public Meeting:

\$54,037

The schedule for all resources necessary to complete the proposed services is shown below. Any optional services requested by the client and performed by ESCI will be provided at the specific rates shown as assigned to specific job responsibilities and/or duties needed for the work.

Project Manager:	\$ 175/hour
Associate Consultants:	\$160/hour
Additional Public Presentations:	\$1,500 each (includes time and expenses)

Proposed Payment Schedule

- 10% payment due upon signing of the contract.
- Monthly invoicing thereafter as work progresses.

Information Relative to Cost Quotation

- Bid quotation is valid for 90 days.
- ESCI Federal Employer Identification Number: 23-2826074.
- When requested, and in a timely manner, the client will provide data, information, and materials required for the completion of the objectives outlined in the Scope of Work submitted in this proposal.
- ESCI shall perform any additional work on a time and materials basis as requested in writing by the client at a negotiated hourly rate.

Project Team Assignments

Emergency Services Consulting International has assigned the following associates to the project. All team members will be available for the duration of the project. Along with the project team, ESCI's full-time staff will be available to assist on the project as needed. Detailed information on the background and qualifications of each member of the team will be found in Appendix A.

The selection and experience of the project manager is important to the success of this project. ESCI is offering a project manager who will:

- Assist in the development and coordination of a project work plan.
- Have the ability to work closely with your representatives.
- Facilitate project team meetings to share project findings and ideas.
- Provide direction based on experience in similar situations, and knowledge of organizational staff analyses.

Team Member	Project Assignments
Kurt Latipow, Project Manager	Project Manager; responsible for the overall content and quality of the project and will ensure that the project is accomplished on schedule and within budget.
Dan Munsey	Fire, EMS, Special Operations and Risk Analysis
Randy Parr	Finance
Pat Lynch PhD	Human Resources
Marsha Cardinal	GIS & Maps
John Stouffer, Regional Manager	General Project Oversight

Profile of Proposing Firm

ESCI Capabilities

Emergency Services Consulting International (ESCI) is an international firm providing specialized, high-quality professional fire, police, communications, and emergency medical services (EMS) consulting services to organizations throughout the United States and Canada. ESCI has been meeting the needs of emergency services agencies since 1976, and is considered by many to be the nation's leader in emergency services consulting.

Utilizing both full-time staff and over 50 field consultants nationwide, ESCI provides consulting services to municipalities; fire, ambulance, and hospital districts; non-profit organizations; and the industrial and commercial community.

ESCI is recognized as an expert in the field by the emergency services community. This is confirmed by our ongoing relationship with the *International Association of Fire Chiefs (IAFC)*, the *Western Fire Chiefs Association*, the *National Fallen Firefighters Foundation*, the *National Volunteer Fire Council*, and the hundreds of clients we serve from coast to coast.

Since the beginning, ESCI has operated on the principles of honesty, integrity, and service. ESCI's philosophy is to maintain an active involvement within the emergency service disciplines and related fields—staying ahead of the rapid changes and issues facing our clients.

The mission of ESCI is to *provide expertise and guidance that enhances community safety*. We will accomplish this by providing the highest value of consulting services and educational programs. ESCI utilizes a team of professionals committed to offering highly beneficial programs covering current and anticipated fire, police, communications, emergency management, and EMS issues and needs.

We provide a wide array of services, including organization audits and evaluations; cooperative effort and consolidation; health and safety evaluations; master, strategic, and growth management plans; deployment planning; hazard mitigation planning; executive searches; assessment centers; and customized consulting. ESCI has helped improve emergency services in hundreds of communities throughout the country. Our innovative training programs are improving the way organizations and people work.

ESCI encourages creative solutions to complex system dilemmas. The firm recognizes the cultural, economic, operational, legal, and political realities of the local environment. ESCI avoids pre-conceived biases in order to develop and implement imaginative and long-lasting solutions. In addition, ESCI equips its clients with the background, understanding, and confidence to tackle future problems as they arise.

All of ESCI's field associates have been active practitioners in their respective fields, with many involved in highly visible and responsible national leadership positions in fire/rescue services, EMS, and law enforcement. We understand your issues, challenges, responsibilities, and offer proven methods to improve your effectiveness.

ESCI at a Glance

- Mission: Provide expertise and guidance that enhances community safety
- Established in 1976
- Headquartered in Wilsonville, Oregon; with branch offices in Texas, Idaho, and Virginia
- Extensive fire and EMS consulting throughout the US and Canada
- Twelve full-time employees, with over 50 expert field consultants

ESCI Experience

ESCI's advantage begins with our technical expertise and capability, extends to our experienced and highly qualified staff, and concludes with a product that will enable your organization to meet the challenges of emergency services into the future.

ESCI's team has first-hand experience in the process of analyzing emergency service providers and recommending an array of opportunities that are economically, culturally, and operationally feasible. Each team member is a specialist in fire, rescue, law enforcement, EMS, or related fields. The team will work collaboratively to create the best possible strategies and options for your organization.

The *ESCI Advantage* includes:

- A clear understanding and appreciation of the complexity of the local and regional environment.
- Over 40 years of public safety consulting experience; the successful completion of hundreds of consulting engagements.
- The ability to deliver a high-quality product on time, and with organizational support and endorsement.
- Knowledge of contemporary issues associated with the delivery of emergency services.
- Experience with a variety of jurisdictions including municipalities, counties, and state government.
- A highly skilled and knowledgeable team of professionals with skill-sets necessary to meet your expectations.

Effective Project Coordination & Management

When engaged, all work progress is measured against a work plan, timetable, budget, and deliverables. During the project, team members confer frequently to discuss progress as well as new or unanticipated issues. Our project management methodology ensures that services and activities are efficiently conducted and are focused, coordinated, and logical. All project team members are available for the duration of the project.

ES Offices

In order to better serve our clients, ESCI maintains two regional offices. The following is the contact information for each office, along with a complete organization chart.

Corporate Headquarters

Andrea Hobi, General Manager

Mike Roth, Operations Manager

4795 Meadow Wood Lane, Chantilly, VA 22033

Andrea—Phone: 800.757.3724 • Email: info@esci.us

Mike—Phone: 703.506.9400 • Email: mike.roth@esci.us

ESCI Organizational Chart

The following is an organizational chart of Emergency Services Consulting International, which includes descriptions of our various positions and services.

Disclosure & Practices

Conflict of Interest Statement

ESCI has neither directly nor indirectly entered into any agreement, participated in any collusion or collusion activity, or otherwise taken any action which in any way restricts or restrains the competitive nature of this solicitation, including but not limited to the prior discussion of terms, conditions, pricing or other offer parameters required by this solicitation. ESCI is not presently suspended or otherwise prohibited by any government from participation in this solicitation or any other contracting to follow thereafter. Neither ESCI nor anyone associated with ESCI has any potential conflict of interest because of or due to any other clients, contracts, or property interests in this solicitation or the resulting project. In the event that a conflict of interest is identified in the provision of services, ESCI will immediately notify the client in writing.

Insurance

ESCI is insured in excess of \$2,000,000. A copy of the ESCI liability insurance certificate is included in an appendix.

Litigation

ESCI has no past and/or pending litigation or unresolved lawsuits.

Employment Practices

ESCI is an equal opportunity employer. The company is guided by recognized industry standards, policies, and procedures. ESCI offers a wide range of employee benefits and ongoing training opportunities that has enabled ESCI to attract and retain quality consultants who are recognized as experts in emergency service organization, management, and service delivery. ESCI will not refuse to hire, discharge, promote, demote, or otherwise discriminate in matters of compensation against any person otherwise qualified, because of age, race, creed, color, sex, national origin, ancestry, or handicap.

Appendix A: Project Team Qualifications

Kurt Latipow

Senior Associate/Project Manager

Summary of Qualifications

Mr. Latipow has enjoyed 40 years in Public Safety with over 27 years of Public Administration in Fire Chief and Chief Officer positions. He has developed and implemented numerous comprehensive fire and emergency services related plans. Mr. Latipow has facilitated the adoption of those plans via a variety of governing bodies. Mr. Latipow offers extensive experience in developing and implementing emergency, strategic, master plans and succession plans/management processes as well as developing and implementing

Standards of Cover Analysis, Fees for Service Cost Recovery Programs and ALS Program Development and Implementation for both transport and engine company-based organizations.

Work Experience

- City of Lompoc, CA - Fire Chief
- Washoe County, NV - County Fire Services Coordinator
- City of Ukiah, CA - Fire Chief
- State of California, Governor's Office of Emergency Services – Deputy Chief, Fire and Rescue Branch
- Stanislaus Consolidated Fire Protection District, CA - Fire Chief/Chief Executive Officer
- Hesperia Fire Protection District, CA - Fire Chief
- City of Arroyo Grande, CA - Fire Chief/Director of Building and Fire
- City of Monterey Park Fire Department, CA - Battalion Chief/Fire Marshal

Education

- National Fire Academy – Accredited Executive Fire Officer
- California Fire Marshal Training and Education System

Publications and Instructor Experience

- Life member International Association of Fire Chiefs

Note: This is a brief summary of Mr. Latipow's CV. A complete version can be made available on request

Dan R. Munsey
Associate Consultant**Summary of Qualifications**

Dan Munsey has been active in the fire service for over 24 years, rising through the ranks of a metro-sized fire department from firefighter-paramedic to assistant fire chief. During his career, Dan has served in a variety of roles including: five years as a training officer where he led and implemented large succession planning efforts to fill the leadership gap of a quickly growing fire department; ten years as a union vice president serving an IAFF local affiliation; two years as the Special Operations Chief overseeing the wildland, aviation, hazardous material, and USAR teams, as well as the EMS and training divisions; five years acting as the "area fire chief" for seven different communities. Chief Munsey is a respected fire service instructor and is a sought-after presenter at national conferences on a broad range of topics such as modern leadership, integration of fire service operational technology to improve performance and fiscal management, and fire service wildland and structural firefighting.

Educational Background

- Master's Degree in Public Administration, Grand Canyon University
- Bachelor's Degree in Business Administration, Grand Canyon University
- Paramedic Program, Crafton Hills College, CA
- Extensive certificates of training in fire service administration, personnel management, incident command and fire department operations and planning

Professional Experience

- President, California Fire Chiefs Association Operations Section
- Assistant Chief, Division 3 (East San Bernardino Valley), San Bernardino County FPD
- Technology Council Member, International Fire Chief Association
- Forum Member, National Fire Protection Agency
- California Incident Management Team 11 member
- California State Fire Marshal, "Expanding Wildland Incidents" Course Curriculum Committee

Relevant Experience

- President, Hi-Desert Water District Board of Directors
- Department Diversity Committee Chairman, San Bernardino County Fire
- Element Leader, County of San Bernardino, Vision Committee, Public Safety Element
- Chair, Victor Valley College EMS Advisory Board
- California State Fire Marshal Instructor for Chief Fire Officer, Fire Officer Wildland, & ICS curriculum

Presentations & Articles

- Deccan International, "Adopting Technology to Improve Fire Service Operations"
- Esri-CalChiefs, Technology Summit, "The Changing Fire Service"
- California Fire Prevention Institute, "The Fire Prevention Officers Role in Large Scale Emergencies"
- IAFC, Tech Council Presentation, "Leadership and Technology"
- National Fire Academy, "Determining Workload Efficiency..."
- FireWire, "The Supervisors Role in the Firefighter Bill of Rights", April 2016

Note: This is a brief summary of Chief Munsey's CV. A complete version can be made available on request

Ms. Maureen Cardinal

Associate Consultant/GIS Specialist

Summary of Qualifications

Ms. Cardinal recently retired after serving for 15 years as a Technology Systems Analyst/GIS with Washoe County Tech. Services, GIS Division. She worked closely providing data-driven solutions for the Truckee Meadows Fire Protection Dept. and Washoe County Emergency Management & Homeland Security, as well as 30 other departments in the County. Ms. Cardinal has been a presenter at the annual Nevada Geographic Information Society (NGIS) for many years.

Ms. Cardinal provided a variety of GIS services for the Truckee Meadows Fire Protection District, Reno Fire Dept., Regional Emergency Operations Center and the combined Reno/Washoe E911 Dispatch Center. She has conducted spatial analyses, network analyses, and dispatch data analyses, as well as data collection, management and real time situation status mapping.

Educational Background

- BA Degree in Biology, the University of Nevada, Reno
- Emergency Services Training including: NIMS, ICS 100- 400, WebEOC, Crisis Track.

Professional Experience

- Technology Systems Analyst/GIS, Washoe County Technology Dept. (15 years).
- GIS Coordinator, Nevada Land Trust; Reno, NV (currently part-time).

Relevant Experience:

- Mapped & installed 911 mile markers along 12 miles of Truckee River
- Provided GIS & GPS Training for AmeriCorps Interns
- Created ArcGIS Story Maps for One Truckee River Program
- Created data for the Washoe County Fire Hazard Map (WUI) <http://wcgisweb.washoecounty.us/FireHazard>

Raúl Parr
Associate Consultant**Summary of Qualifications**

Mr. Parr has over 40 years of experience in the fire service including 20 years as a chief officer. He has served in four different fire departments in Texas and Missouri. The agencies he has worked for range from mid-sized combination fire districts serving a population of 100,000 to a leading a small municipal department's transition from a volunteer based delivery system to a career based delivery system. He has served the past 13 years in a career position as the fire chief for the City of Tomball, a suburb of the City of Houston Texas with a population of 25,000.

He is a certified public accountant and during his career has served as the chief financial officer of several large regional real estate developers and also served as the City of Tomball interim financial officer. Chief Parr brings his diverse skills to ESCI to provide inter-agency collaboration, strategic planning, master planning, and organizational evaluation. He has a track record of focusing on cost effectiveness and efficiency, with a reputation for building regional collaborative solutions. He has advised policy-makers on fire service delivery options, created financial models and has made presentations to larger workshops on such topics as regional collaboration.

Educational Background

- Bachelors in Business, Accounting Major, Indiana University, 1970
- Master's in Public Administration, Sam Houston State University, Huntsville, TX, 2016
- Executive Fire Officer Graduate – National Fire Academy
- Extensive training in leadership, financial management, and planning

Professional Experience

- Fire Chief/Emergency Management Coordinator – City of Tomball, TX (2004 – present)
- Fire Chief – Cypress Creek Fire Department, Houston, TX (1999 – 2004)
- Chief Financial Officer – Turner Adreac Development, Sugar Land, TX
- Controller/Financial Officer – Trammel Crow Residential/Gables Residential Trust

Relevant Experience

- Board of Directors of the Southwest Division of the IAFC
- Southeast Region Director, Texas Fire Chiefs Association
- Facilitator, Northwest Harris County Fire Chiefs Association
- Treasurer, Institution of Fire Engineers, USA Branch
- Peer Assessor I, Center for Public Safety Excellence Accreditation Site Team

Associated Professional Accomplishments

- 2009 recipient of IAFC-VCOS John Buckman Leadership Award
- Developed UASI grant to equip 90 departments in a three-county area, including the City of Houston, with the same electronic accountability system
- Led the development of the Standards of Cover and Strategic plan for the Tomball Fire Department

Note: This is a brief summary of Mr. Parr's CV. A complete version can be made available on request.

Pat Lynch, Ph.D.**Associate Consultant****Summary of Qualifications**

Dr. Pat Lynch has worked as an independent management consultant and subject-matter expert for fire-rescue agencies for over 11 of her 24 years as a consultant. In addition, she has been an associate professor in the California State University system, a senior financial analyst for FedEx, and an arbitrator for the New York Stock Exchange.

Dr. Lynch brings a unique perspective to the public safety arena by virtue of her varied career in the public and private sectors, and by her volunteer work. She has presented at numerous fire-rescue conferences in the U.S. and Canada, written articles, and delivered webinars for the International Association of Fire Chiefs, and provided assistance and guidance to public safety agencies and leaders throughout the U.S.

Educational Background

- Ph.D. in Personnel and Employment Relations, Georgia State University
- MBA in Economics, University of Memphis
- B.A. in Sociology, Smith College
- Certification in Merger and Acquisition Integration
- Certified facilitator for Pritchett Change Essentials for Leaders workshop

Professional Experience

- Associate, Emergency Services Consulting International
- Subject Matter Expert, International Association of Fire Chiefs
- President, Business Alignment Strategies, Inc.
- Principal, HR Value
- Associate Professor of Management and Human Resources, California State University
- Faculty member and curriculum developer, Los Angeles County Learning Academy
- Senior Financial Analyst, Finance and Treasury Divisions, FedEx Corporation

Relevant Experience

- Subject Matter Expert, Company Officers Section, International Association of Fire Chiefs
- Disaster Action Team leader, American Red Cross, Los Angeles Region
- Community Emergency Response Team member, Long Beach, CA

Associated Professional Accomplishments

- Author, Survey Says...: The Professionals' Guide to Great Surveys
- Author, How to Create a Community of Advocates for Public Safety
- Served as subject matter expert for development of the strategic plan for the Company
- Officers Section, International Association of Fire Chiefs
- Served as subject matter expert for development of the succession management white paper by the Company Officers Section, International Association of Fire Chiefs
- Author of dozens of articles, newsletters, and resource materials (assessments, templates, checklists) available on my company web site and in various corporate publications and web sites

Note: This is a brief summary of Ms. Lynch's CV. A complete version can be made available on request.

John Stouffer Western Regional Manager/Project Manager

Summary of Qualifications

Mr. Stouffer began his career in public safety in 1976 as a firefighter/EMT with Yakima County (WA) Fire District #10, where he established the first EMS program in the department. In 1980, he attended the Paramedic Program at Central Washington University and obtained a position with Yakima (WA) Medic One becoming a field paramedic and the organization's first Training Officer. In 1988, he was offered the position of the Director of the Yakima County (WA) Department of Emergency Medical Services. After holding that position for nine years, he took a position with Gresham (OR) Fire & Emergency Services as the EMS Coordinator, occasionally serving as the acting Chief of the Training Division, until his retirement in 2009. Since 1992, in addition to his other employment, Mr. Stouffer has been providing a wide variety of public safety consulting services to clients throughout the U.S. and Canada.

Professional Experience

- Project Manager/Associate Consultant, Emergency Services Consulting International
- Technical Advisor/Program Developer, Vision 20/20 & Institution of Fire Engineers
- EMS Research Investigator/Coordinator, Oregon Health & Science University
- EMS Coordinator (Captain), Gresham Fire & Emergency Services
- Senior Consultant, Pacific Northwest Associates, LLC
- Director, Yakima County Department of Emergency Medical Services
- Training Officer/Paramedic, Yakima Medic One
- Firefighter/EMT-Paramedic/Medical Services Officer | Yakima County Fire District #10
- More than 40 years diverse experience in fire and emergency medical services

Educational Background & Certifications

- Central Washington University
- Yakima Valley Community College
- Western Oregon University
- National Fire Academy Incident Command for EMS
- Seattle/King County Resuscitation Academy Fellowship
- Multiple instructor certifications (NFPA I & II, ACLS, PHTLS, WSFST Instructor II, EZ-IO Instructor)
- Numerous advanced-level EMS certifications
- More than 250 hours fire service education, Washington State Fire Service Training

Associated Professional Accomplishments

- Project Manager and consultant on a number of fire and EMS projects around the U.S. and Canada
- Co-authored and published a number of international prehospital studies (available on request)
- Authored two guides on Community Risk Reduction for Vision 20/20 (available on request)
- Project Co-Director, King LT Airway Implementation Project for Multnomah County (OR)
- Author, Phases I & II of the Yakima County EMS Master Plan
- Earned fourteen professional awards during his career (available on request)

Note: This is a brief summary of Mr. Stouffer's CV. A complete version can be made available on request.

Appendix B: ESCI Experience

Following are examples of ESCI's experience in providing consulting services to various organizations throughout North America. If requested, ESCI can provide more detailed information on any the projects listed.

Project Category & Title	Organization	Location	Year
Cooperative Services & Consolidations			
Performance Review & Alternative Governance.	North Tahoe and Meeks Bay FPD	CA	2018
Consolidation Feasibility Study and Service Review	Local Agency Formation Commission	CA	2018
Cooperative Efforts Feasibility Study	City of Santa Rosa & Rincon Valley FPD	CA	2016
Evaluation & Cooperative Efforts Study	Rifle Fire Protection District	CO	2015
Standards of Cover			
Standards of Cover	Tahoe Douglas Fire Protection District	NV	2018
Standards of Cover/ CRA	Hemet Fire Department	CA	2018
Standards of Cover	Scottsdale Fire Department	AZ	2015
Standards of Cover	Carrollton Fire Rescue	TX	2018
Agency Evaluations			
Fire Department Evaluation	Skamania County Fire District #4	WA	2015
Fire Department Options Analysis	Hemet Fire Department	CA	2015
Emergency Services Operations Analysis	Strathcona County Emergency Services	Canada	2017
Station Location Studies			
Station Location Analysis	American Fork Fire Department	UT	2017
Station Location Analysis	Twin Falls Fire Department	ID	2016
Police and Fire Station Location	Sioux Falls Police & Fire Departments	SD	2018
Master Plan with Station Location Analysis	Telluride Fire Protection District	CO	2015
Miscellaneous Studies			
Public Safety Building Funding Feasibility	City of Homer	AK	2015
Staffing & Deployment Analysis	East Pierce Fire & Rescue	WA	2014

Appendix C: ESCI References

The following are several examples and references out of the hundreds of projects and studies previously completed by ESCI. If requested, ESCI can provide additional examples and client references.

North Tahoe and Meeks Bay Fire Protection Districts, CA			
Project:	Performance Review and Examination of Alternative Governance Models	Contact:	Michael S. Schwartz
Project Lead:	Dawn Mittleman, Kurt Latipow	Title:	Fire Chief
Population:	16,000	Phone:	530 583 6911
Completed:	August 2018	Email:	schwartz@ntfire.net
Project Description: The North Tahoe Fire Protection District and Meeks Bay Fire Protection District Performance Review examined alternate governance models, current conditions, future opportunities for cooperative efforts, financial analysis of trends and current budget as a basis for findings and recommendations. Key Recommendation(s): ESCI advised that legal unification would eliminate duplication of governance and further enhance economy of scale. It was recommended that both districts take the necessary steps to initiate the legal unification process and that both pass substantially similar resolutions of application to LAFCO which include relevant terms and conditions.			

Local Agency Formation Commission of Santa Cruz County (California)

Project:	Consolidation Feasibility Study and Service Review	Contact:	Patrick McCormick
Project Leads:	Dawn Mittleman, Kurt Latipow	Title:	Executive Officer
Population:	67,000	Phone:	831 454 2055
Completed:	August, 2018	Email:	Pat.McCormick@santacruzcounty.us

Project Description:

The Santa Cruz Local Agency Formation Commission in cooperation with Aptos/La Selva Fire Protection District and Central Fire Protection District engaged ESCI to conduct a study to analyze the feasibility of consolidating fire and emergency services of the districts.

Key Recommendation(s):

ESCI recommended that the Aptos/La Selva and Central Fire Protection District fully consolidate, projected to result in a combined cost reduction. It was also recommended that consideration be given moving the CFPD truck company from CFPD Station #2 to A/LSFPD Station #1 and relocating the crew from CFPD Station #3 to A/LSFPD Station #1 for the purpose of staffing the truck company full-time. The districts were advised to meet to negotiate pertinent matters to be included in terms and conditions and it was recommended that consolidation take the form of a reorganization with one district annexing the other.

City of Dearborn (Michigan)

Project:	Hazard Analysis / Master Plan	Contact:	Joseph Murray
Project Manager:	Mike Tucker	Title:	Fire Chief
Population:	111,900	Phone:	313-943-2841
Completed:	June 2018	Email:	Josephmurray@ci.dearborn.mi.us

Project Description:

The City of Dearborn engaged ESCI to conduct a Hazard Analysis and Master Plan for the City's fire department. The project entailed conducting a systematic review of the fire department's organizational structure, analyzing current and future risks, analyzing the effectiveness of current facilities, determining the department's ability to achieve current and future service demands, and providing specific recommendations for additions and improvements.

Key Recommendation(s):

ESCI provided the City with specific recommendations focusing on the administrative structure of the organization designed to increase the department's effectiveness in supporting the department's operational response and service to the citizens of Dearborn. ESCI also conducted an extensive station location analysis of the department's existing facilities and made recommendations relative to future station placement to address the City's increasing call volume. Additional recommendations were made to address the department's current data collection procedures and improvements to better position the department to achieve its goal of earning international accreditation.

City of Santa Rosa & Rincon Valley FPD (California)		
Project:	Cooperative Efforts Feasibility Study	Contact: Anthony Gossner, Fire Chief
Project Manager:	Sheldon D. Gilbert	Phone: (707) 543-3530
Population:	204,000	Email: AGossner@srcity.org
Completed:	May 2016	
Project Description: Emergency Services Consulting International (ESCI) was engaged by the city of Santa Rosa Fire Department (SRFD) to conduct a Cooperative Services Study involving the Santa Rosa Fire Department and the Rincon Valley Fire Protection District (RVFPD). Both agencies have a long-standing and established integrated working relationship. As a result of the long-standing history and coordination between these agencies, the question was raised regarding the ability and practicality of the City of Santa Rosa Fire Department (SRFD) providing contract for service fire protection to the Rincon Valley Fire Protection District (RVFPD). Key Recommendation(s): - Option one, ESCI recommends an enhanced intergovernmental agreement for training, EMS, fire prevention, and battalion coverage between the RFFPD and SRFD. - Option two (model B) would be a more formal cooperative service model with the most equitable cost sharing. This model would result in complete administrative and operational integration through a contract for service with the SRFD. Model should be pursued upon completion of the following seven KPI's: 1) Agree on cost of living adjustment (COLA) assumptions to be used in projection modeling to ensure adequate costs and revenue is accounted for in long range financial plans and contract for service costs. 2) Based on a consecutive 24-month expanded cooperative service model (Option one), adjust administrative and overhead staff to ensure adequate management and oversight of personnel upon creation and implementation of a contract for service. 3) Agreement and adoption of capital replacement funding programs by the SRFD and the RVFPD to be used in contract for service administration and cost modeling 4) Creation and adoption of a long-range financial plan (LRFP) by the RVFPD. The LRFP should address five-year projected revenue and expenditure needs as a stand-alone agency and the desired contract for service (option 2B). The LRFP should ensure adequate cash flow, reasonable cost controls, and a sustainable 20% operational reserve. 5) Demonstrated financial performance by the RVFPD for a period of three fiscal years with no deficit spending and maintenance of a 20% operational reserve. 6) Standardization of budget categories and framework between the SRFD and RVFPD for creation of future contract for service costs, modeling, and reporting. 7) Conduct a joint other Post-Employment Benefit (OPEB) actuary for the SRFD and RVFPD, identify side fund amounts for each jurisdiction, and adopt strategies to address current and future unfunded liability for inclusion in the contract for service.		

City of Fontana (California)	
Project: Plan for Providing Fire & EMS Services & LAFCO Application Process Project Manager: Martin Goughnour Population: 203,000	Contact 1: Jeff McPherson Business Manager, City of Fontana Phone: (909) 350-7600 Contact 2: Kathleen Rollings-McDonald Executive Officer, San Bernardino LAFCO Phone: (909) 388-0480
Project Description: ESCI conducted a review of the San Bernardino Fire Department Proposal for Countywide Consolidation and prepared alternatives for the City of Fontana.	
Project Methodology: 1) The project included a financial review of the proposal comparing it to a 2003 ESCI study and budget actuals for 2003 and 2004. 2) An alternative proposal was developed that included; an annual budget, a five-year forecast of revenue and expenses, a plan for service, and a Joint Powers Agreement (JPA). 3) Throughout the study ESCI worked closely with San Bernardino LAFCO to address Service Review and Sphere of Influence factors.	

Eugene/Springfield Fire Departments (Oregon)	
Project: Cooperative Services Feasibility Study Population: 210,000 Completed: January 2010	Contact: Randy Groves, Fire Chief Phone: (541) 682-7100 Email: randy.b.groves@ci.eugene.or.us
Project Description: A cooperative services feasibility study for the Eugene Fire Department and Springfield Fire and Life Safety. ESCI analyzed the potential for integration at the program, service delivery, and administrative levels of the two municipal fire departments.	
Key Recommendation(s): Of all the feasible options discussed in the study, ESCI's preferred choice was an IGA between Eugene FD and Springfield FLS. It was seen as an intermediary step for a vision of a single fire agency via annexation to a fire district.	

Forest Grove Rural Fire Protection District (Oregon)

Project:	Cooperative Services Study	Contact:	Michael Kinkade, Fire Chief
Project Manager:	Sheldon Gilbert/Lane Wintermute	Phone:	(503) 992-3240
Population:	23,000+		
Completed:	April 2015		

Project Description:

ESCI was engaged by the cities of Forest Grove, Cornelius and the Forest Grove Rural Fire Protections District, Cornelius Rural Fire Protection District, Gaston Fire Protections District and Banks Fire Protection District #13 to conduct a feasibility study regarding opportunities for collaboration and enhanced cooperative service options between and among the participating fire service agencies.

Project Methodology:

- 1) A two-phase process of integration was recommended by the ESCI Team. Phase one would be an enhanced intergovernmental agreement for fire chief and administrative services among all six agencies. Note: As of May 1, 2015, five of the six participating agencies contracted for fire chief services under an established IGA.
- 2) Phase two would be a more formal cooperative service model through a fully integrated Fire Authority IGA, a fire district merger or consolidation into a new fire district.

Cities of Caldwell FD/Meridian FD/Middleton/Star Fire Districts (Idaho)

Project:	Regional Master Plan	Contact:	Mark Niemeyer
Project Manager:	Don Bivins	Title:	Fire Chief
Population:	185,885	Phone:	208-888-1234
Completed:	Winter 2016	Email:	mniemeyer@meridiancity.org

Project Description:

The master plan addressed four agencies in the region, essentially addressing the current conditions of each separate agency and the region as a combined area. The report included all programs and practices, an extensive analysis of current service delivery and response performance for each agency and the region. Future population and community growth projections were used to develop service demand forecasts. Based on these forecasts, options were identified that address future growth and demand.

Key Recommendation(s): Short, mid and long-term recommendations for improving service delivery included existing fire station remodels, implementation of peak activity response units, future station locations, alternate staffing strategies, and exploration of cooperative service delivery. Interest was high in identifying the benefits of a regional approach to service delivery, thus the recommendations addressed those opportunities. A unified presentation to all of the policy-makers was provided.

Lakeside/Pinetop/Show Low Fire Districts (Arizona)

Project:	Collaborative Efforts Feasibility Study	Contact:	Bryan Savage
Project Manager:	Don Bivins	Title:	Lakeside Fire Chief
Population:	97,000	Phone:	928.368.6112
Completed:	June 2014	Email:	bsavage@lakesideazfire.com

Project Description:

Lakeside Fire District (LSFD), Pinetop Fire District (PFD), and Show Low Fire District (SLFD) contracted with ESCI to study the feasibility of the three agencies combining in some fashion. The three agencies have separately experienced significant reductions in assessed valuation and thus, have been losing revenue significantly. After analysis, it was evident that all three agencies have used vastly different methods to survive the economic downturn. Yet, combining was feasible economically and certainly operationally. SLFD and PFD were both operating under interim fire chief guidance with the loss of their fire chief's, making this an opportune time to evaluate combining.

It became clear that LSFD and SLFD was not waiting for the study to conclude, developing collaborative strategies including shared staffing of a station, shared administrative teams, and closer working relationships. The project team felt the three agencies may not move forward together, so evaluated what pairings would work if two of the three agencies wanted to combine. ESCI found that all of the pairing options were also feasible and recommended that all three agencies merge. Failing that, any two of the three agencies could also merge and develop an efficient and effective service delivery model.

Shawnee Fire Department (Kansas)

Project:	Administrative & Support Staffing Study	Contact:	John Mattox
Project Manager:	John Stouffer	Title:	Fire Chief
Population:	65,194	Phone:	913.742.6100
Completed:	May 2018	Email:	Jmattox@cityofshawnee.org

Project Description:

ESCI completed a comprehensive analysis of the Shawnee Fire Department's current administrative and support staff, and determined that the department was understaffed and unable to meet the various administrative and support services functions for a city of that size.

Key Recommendation(s): Re-organize the department into three separate divisions: Operations, Community Risk, and Support Services. ESCI recommended additional positions, along with job descriptions, including promotions of existing officer positions to command staff positions. Also recommended was the addition of a Management Analyst to SFD, and to move Emergency Management Director under the auspices of the City Manager.

Appendix D: ESCI Examples of GIS Maps & Images

The following represents examples of GIS maps and other images created by ESCI for previous projects.

Incident Density Example

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)

4/17/2019

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

PRODUCER WHA Insurance Agency Inc 2930 Chad Drive Eugene OR 97408		CONTACT NAME: Lawralie Bunker PHONE (A/C, No, Ext): 800-852-6140 E-MAIL ADDRESS: lbunker@whainsurance.com FAX (A/C, No): 541-342-3786

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.**BUSINESSOWNERS POLICY-ELITE ENHANCEMENT**

This endorsement modifies insurance provided under the following:

**BUSINESSOWNERS LIABILITY COVERAGE FORM
BUSINESSOWNERS SPECIAL PROPERTY COVERAGE FORM**

It is understood and agreed that the following extensions only apply in the event that no other specific coverage for the indicated loss exposures are provided under this policy. If such specific coverage applies, the terms, conditions and limits of that coverage are the sole and exclusive coverage applicable under this policy.

Throughout this endorsement the words "you" and "your" refer to the Named Insured shown in the Declarations. The words "we", "us" and "our" refer to the Company providing this insurance.

Part 1: Property Coverage Enhancements:

The following amendments are a part of the BUSINESSOWNERS SPECIAL PROPERTY COVERAGE FORM:

1. Increased Glass Limits

Section A. Coverage, item 4.b. is replaced by:

- b. With respect to glass (other than glass building blocks) that is part of the interior of a building or structure, or part of an outdoor sign, we will not pay more than \$3,000 for the total of all loss or damage in any one occurrence.
This Limitation does not apply to loss or damage by the "specified causes of loss", except vandalism.

2. Increased Fire Department Service Charge

Section A. Coverage, item 5.c. is replaced by:

c. Fire Department Service Charge

When the fire department is called to save or protect Covered Property from a Covered Cause of Loss, we will pay up to \$3,000 for your liability for fire department service charges:

- (1) Assumed by contract or agreement prior to loss; or
- (2) Required by local ordinance.

3. Reduced Waiting Period and Longer Duration for Civil Authority Coverage

Section A. Coverage, item 5.i. is replaced by:

i. Civil Authority

We will pay for the actual loss of Business Income you sustain and necessary Extra Expense caused by action of civil authority that prohibits access to the described premises due to direct physical loss of or damage to property, other than at the described premises, caused by or resulting from any Covered Cause of Loss.

The coverage for Business Income will begin 48 hours after the time of that action and will apply for a period of up to three consecutive weeks after coverage begins.

The coverage for necessary Extra Expense will begin immediately after the time of that action and ends:

- (1) 5 consecutive weeks after the time of that action; or
- (2) When your Business Income coverage ends; whichever is later.

The definitions of Business Income and Extra Expense contained in the Business Income and Extra Expense Additional Coverages also apply to this Civil Authority Additional Coverage. The Civil Authority Additional Coverage is not subject to the Limits of Insurance.

4. Broadened Personal Property Coverage

Section A. Coverage, item 1.b., the first paragraph is replaced by:

- b. Personal Property located in or on the buildings at the described premises or in the open (or in a vehicle) within 1,250 feet of the described premises, including:

5. Increased limits for Personal Property Off Premises

Section A. Coverage, item 6.b. is replaced by:

b. Personal Property Off Premises

You may extend the insurance that applies to Business Personal Property to apply to covered Business Personal Property, other than "money" and "securities", "valuable papers and records" or accounts receivable, while it is in the course of transit or temporarily at a premises you do not own, lease or operate. The most we will pay for loss or damage under this Extension is \$10,000.

6. Increased limits for Outdoor Property

Section A. Coverage, item 6.c. is replaced by:

c. Outdoor Property

You may extend the insurance provided by this policy to apply to your outdoor fences, radio and television antennas (including satellite dishes), signs (other than signs attached to buildings), trees, shrubs and plants, including debris removal expense, caused by or resulting from any of the following causes of loss:

- (1) Fire;
- (2) Lightning;
- (3) Explosion;
- (4) Riot or Civil Commotion; or
- (5) Aircraft.

The most we will pay for loss or damage under this Extension is \$5,000, but not more than \$1,000 for any one tree, shrub or plant.

7. Fire Extinguisher Recharge

Section A. Coverage, item 6. Coverage Extensions will also include:

You may extend the insurance provided by this coverage form to cover expenses you incur to recharge portable fire extinguishers, dry chemical, carbon dioxide, or liquid automatic fire extinguishing systems and the cost of resetting automatic fuel shut-off connections, if any of the above are discharged to fight a fire or are discharged due to a mechanical malfunction.

The most we will pay for loss or damage under this extension is \$3,000.

deductible shall apply to this coverage.

8. Business Income Enhancement

Section A. Coverage, item 5. Additional Coverages, section f. Business Income is amended as follows:

The reference to "60 days" as the limitation on payroll expenses is replaced by "365 days."

9. Lock Replacement

Section A. Coverage, item 6. Coverage Extensions will also include:

You may extend the insurance provided by this coverage form to cover necessary expense to repair or replace exterior or interior door locks of a covered building:

- a) If your door keys are stolen in a covered theft loss; or
- b) When your property is damaged and your door keys are stolen by the burglars.

The most we will pay under this extension of \$250 for any one occurrence.

10. Removal of Sewer Backup Exclusion

Section B. Exclusions, item g(3) is amended to include:

Backups of sewers will not be excluded, but the most we will pay for such losses is \$500 in the policy period.

Part 2: Liability Coverage Enhancements:

The following amendments are a part of the BUSINESSOWNERS LIABILITY COVERAGE FORM:

1. Medical Payments

If Medical Payments Coverage (Coverage A.2.) is not otherwise excluded from this Coverage Part: The Medical Expense Limit is changed subject to all the terms of Limits Of Insurance (Section D) to the greater of:

- a. \$10,000; or
- b. The Medical Expense Limit shown in the Declarations of this Coverage Part.

2. Supplementary Payments

In the Supplementary Payments – (Coverage A.1.d.):

- 1. The limit for the cost of bail bonds (item (2)) is changed from \$250 to \$500; and
- 2. The limit for loss of earnings (item (4)) is changed from \$250 a day to \$500 a day.

3. Blanket Additional Insureds

Who is An Insured (Section C) is amended to include the following, but only for liability arising out of the negligence of the Named Insured:

Each of the following is also an Insured:

- a. any Contractor, including contracting governmental entities, who hires you as their subcontractor;
- b. any person or organization who has an ownership interest in you;
- c. any lessor of leased equipment, who rents equipment to you, but only with respect to liability arising out of the maintenance, operation, or use by you, provided however that this

- item c. will not apply to (1) any occurrence which takes place after the equipment lease expires; nr (2) "Bodily Injury" or "Property Damage" arising out of the negligence of the lessor or contractor engaged to operate the leased equipment; and
- d. any owner, mortgagor, lessor, landlord, condominium association or manager of a premises leased by you, but only for "occurrences" that take place while you occupy the premises, provided however that this item d. will not apply to structural alterations, new construction, or demolition operations; and

With regard to parties applicable under items a. through d. above, the Insurer and the Named Insured agree to waive rights of recovery, as provided within the policy.

Nothing contained in this section C. shall serve to nullify matters excluded under section B. of the policy.

4. Bodily Injury - Mental Anguish

The definition of "bodily injury" is changed to read:

"Bodily Injury":

- a. Means bodily injury, sickness or disease sustained by a person, and includes mental anguish resulting from any of these; and
- b. Except for mental anguish, includes death resulting from the foregoing (item a. above) at any time.

5. Liberalization

If we revise this endorsement to provide more coverage without additional premium charge, we will automatically provide the additional coverage to all endorsement holders as of the day the revision is effective in your state.

6. Employee Indemnification Defense Coverage

Under **SUPPLEMENTARY PAYMENTS – COVERAGES A.1.d.**, the following is added:

- (8) We will pay on your behalf defense costs incurred by an "employee" in a criminal proceeding, provided, however that you must have a prior written agreement with such "employee" whereby you agree to indemnify the "employee" for such defense costs, and the agreement includes a provision for repayment of defense costs in the event of an adverse judgment. The most we will pay for any "employee" who is alleged to be directly involved in a criminal proceeding is \$2,500 regardless of the number of employees, claims or "suits" brought or persons or organizations making claims or bringing "suits."

7. Amendment of Aggregate Limit

SECTION D.4. – Aggregate Limits, item B is replaced by:

- b. All other injury or damage, including medical expenses, arising from all "occurrences" during the policy period is three times the Liability and Medical Expenses limit. This limitation does not apply to "property damage" to premises while rented to you or temporarily occupied by you with permission of the owner, arising out of fire or explosion.

8. Amendment to Watercraft Exclusion

Part B- Exclusions, item g.(2)(a) is amended by the following:

The phrase "less than 26 feet" is replaced by "less than 51 feet."

Part 5: Amendment of Conditions:

1. Other provisions of the policy notwithstanding, this policy will be primary for all losses covered herein, and the existence of other insurance will not serve to reduce our obligation.
2. You will have the right to waive our rights of recovery prior to a loss with respect to any party. This must be done in writing to affect our rights.

EXECUTIVE SUMMARY

In April 2019, Emergency Services Consulting International (ESCI) was retained by the City of Pinole to evaluate the following opportunities; 1) Regional cooperation, to include consideration of consolidation or contract for Fire and Rescue Services; 2) Cost estimate to re-open and operate Station 74; and 3) applicable cost to residents through a parcel tax. During a presentation of the initial draft of the study to Pinole City Council on October 8, 2019, the City Council requested an addendum with additional research. The analysis within this document reflects work completed consistent with the original contract. The further research City Council requested will be included within the document titled *Pinole Regional Fire Study Addendum* to be presented at a later date.

The analysis completed during the original study revealed a number of important findings. These include:

- Due to the lack of sufficient command and administrative staff, the department struggles to maintain compliance with performance goals, industry standards, and workload.
- Data collection and records management analysis was challenging due to inconsistencies.
- The department needs additional staffing to fulfill all fire prevention related functions satisfactorily.
- PFD does not have a designated individual committed to the training function for the department. The responsibility for conducting all needs assessments relative to training, as well as program design, coordination, and records keeping.
- The department does not have adequate training props, although funding has been included in the FY 19/20 budget to purchase some.
- The minimum staffing level for PFD does not provide for the two-in/two-out structure firefighting per OSHA mandates.
- PFD is fully dependent on automatic and mutual aid for any call requiring more than one unit.
- In the event of concurrent incidents requiring more than the one staffed Pinole Engine, service to the residents of Pinole for the additional incidents must be provided by other agencies.
- In 2018, none of the reported fire incidents achieved the stated performance objective of 21 firefighters on-scene, nor did the travel time for all apparatus on-scene approach 8 minutes.
- Projected General Fund revenues are not sufficient to provide for Fire Department General Fund expenditures on an annual basis and will require a continued drawdown of General Fund reserve balances.
- Station 73's crew quarters need remodeling and updating, which may include ADA accommodation.
- PFD apparatus specifications have not been standardized with the Battalion 7 apparatus.
- Absent automatic and mutual aid from surrounding agencies, standalone PFD is not capable of handling an incident, such as a trash fire, car fire, or medical incident requiring more than one apparatus, much less a more complex incident.

- At 110 calls per 1,000 population, PFD has a higher median number of calls per 1,000 population than the region but slightly lower than the urban high range.
- Much of the developed residential area in the eastern part of the city is beyond 1.5 miles of Station 73.
- Due to Station 74 being closed, a portion of the developed residential area in the southeast part of the city is beyond the 4-minute travel time footprint.
- Funding does not appear to be available to cash purchase the required Type I apparatus for Station 74, should that station be reopened.

The analysis conducted during the evaluation phase of this process identified several opportunities to improve service (improvement goals). ESCI offers the following improvement goals for consideration. These goals and specific recommendations for each are described in more detail at the end of this report in the *Conclusions* section.

Short-Term Recommendations

Recommendation A: Adopt response performance goals that are achievable.

A community's desired level of service is a uniquely individual decision. No two communities are exactly alike. Performance goals must be tailored to match community expectations, community conditions, and the ability to pay for the resources necessary to attain the desired level of service.

Recommendation B: The City should consider moving forward with the necessary steps to improve service via reopening Station 74, and staffing and administrative support, as funding becomes available.

Recommendation C: Consider initiating the process of securing additional funding.

ESCI recommends that the City consider moving forward with the process of pursuing an additional funding source such as a parcel tax.

Recommendation D: Standardize apparatus specifications.

Consideration should be given to the standardization of apparatus specifications throughout Battalion 7. Standardization of specifications will enhance operational efficiency and could result in cost savings via group purchasing.

Recommendation E: Review all current fire department alarm assignments.

Consideration should be given to reviewing the department's alarm assignments and determine the number of resources required for an effective response force based on risk.

Recommendation F: Improve the collection and analysis of incident data.

Much can be revealed by collecting and evaluating incident data accurately and regularly. Challenges to quick response can be identified and solutions proposed.

Mid- to Long-Term Recommendations

Recommendation G: Initiate recruitment of additional staff.

As soon as funding is available, ESCI recommends that the City recruit the positions identified in Option C: "Expansion of Pinole Fire Department System."

Recommendation H: Remodel Station 73

Fire Station 73's crew quarters require remodeling to accommodate the relocation of the shared shift Battalion Chief and additional administrative staff.

Recommendation I: Capital Equipment and Facilities Fund

Establish a Capital Equipment and Facilities Replacement Fund. A portion of the proposed parcel tax could be used to fund this recommendation.

Section I: EVALUATION OF CURRENT CONDITIONS

CURRENT CONDITIONS

Organizational Overview

ESCI combined data provided by the participating fire agencies with information collected in the course of our fieldwork and used to develop an overview of the organizations. The purpose of the following organizational overview is two-fold. First, it verifies the accuracy of the baseline information and ESCI's understanding of each agency's composition—the foundation from which the study is developed. Second, the overview serves as a reference for the reader, who may not be familiar with the details of each agency's operations.

City of Pinole Fire Department

Governance & Lines of Authority

The City of Pinole was incorporated in 1903 and commenced providing fire protection the same year. Policy direction for the Pinole Fire Department (PFD) is provided by five elected City Council members (Council). The Council is provided the necessary power and authority to govern the provision of fire protection and emergency services. The Council appoints a City Manager who is responsible for implementing Council policy and overseeing the operation of the Organization. The City Manager appoints the Fire Chief to oversee the Fire Department operations.

The Pinole Fire Department (PFD) service area is comprised of the City of Pinole and two informally contracted areas of Contra Costa County, as depicted in the following figure. The Rodeo-Hercules service area is to the north and the southern boundary alternates between the City of Richmond and unincorporated Contra Costa County.

Figure 1: Study Service Area

Design

The organizational design of PFD mimics a paramilitary organization, which is a common design among first responders and emergency services agencies. PFD is an all career agency, meaning all staff are full-time regular employees of the City of Pinole.

Organizational Structure

To operate effectively, a fire department needs an organizational chart that clearly defines its structure. The chart institutionalizes the agency's hierarchy, identifies roles, and, most importantly, clarifies reporting authority. It also helps to ensure that communication flows appropriately and limits opportunities to circumvent the reporting structure.

PFD has a well-defined organizational chart that achieves this purpose and operates under a traditional top-down approach. Lines of authority are clear and depicted; however, the department is minimally staffed. The following figure illustrates the organizational chart for PFD.

Figure 2: Pinole Fire Department Organizational Chart (2019)

Governance & Decision-Making

From a governance and decision-making standpoint, the organization appears to have a clear direction and ability to operate. Lines of authority and the ability to carry out decisions appear to flow appropriately. The administrative staff understands the process to accomplish its mission. The chain of command is identified and clear on responsibilities. The span of control is adequate related to operations; however, as noted later in this report, the organization is lacking key positions necessary for an all-risk fire department.

Service Area & Infrastructure

The size and composition of a fire department's service area affect the type and number of personnel, fire stations, and vehicles that are needed to provide services efficiently. Sometimes complex decisions need to be made regarding deployment strategies to properly position resources based on land area, geography, risk, and similar factors. The following offers a summary of PFD's service area and service infrastructure resources:

Figure 3: Service Area & Apparatus Resources

Agency Description	PFD Observations
Agency type (district, municipality, etc.)	City
Land Area in square miles	5.2/2.4 contract areas ¹
Headquarters location (physical address)	880 Tennent Ave
Number of fire stations	2 (one currently closed)
Engine	1
Engine, reserve	1
Wildland Engine Type 3	1
Wildland Engine Type 6	1
Ladder truck	0
Ladder, reserve	0
Duty BC Command Response Vehicle	1

From 2005 to 2011, PFD was able to deploy personnel and apparatus from two strategically located facilities. During the economic downturn, the second PFD station (74) was browned out and eventually closed. This closure has resulted in an increase in response times to the area in the eastern portion of the City.

Decisions on deployment define the Department's response capability. These decisions need to weigh multiple considerations, including risk exposure, response times, access challenges, deployment, community expectations, personnel safety, and fire department capacity. Furthermore, these decisions not only need to balance the financial considerations but also need to be strategic and in the purview of the elected officials and City Manager, in consultation with the Fire Chief. Ultimately, these individuals are responsible to the public to provide the level of service that the citizens desire and for which they are willing to pay.

¹ The City of Pinole encompasses approximately 11.6 square miles. Of that, 5.2 square miles are land, with the remaining 6.4 sq. miles comprised of the bay.

Staffing Analysis

An organization's greatest asset lies in its people, yet its people also typically comprise its greatest financial cost. Thus, organizations must pay special attention to managing human resources in a way that achieves maximum productivity while ensuring a high level of employee job satisfaction. Consistent management practices combined with a safe working environment, equitable treatment, the opportunity for input, and awards and recognition all comprise key components impacting job satisfaction.

The size and structure of an organization's staffing remain dependent upon the organization's specific needs. These needs must directly correlate with the needs of the community and the available revenue stream. A structure that works for one entity may not necessarily work for another agency. This section provides an overview of the PFD's staffing configuration and management practices.

One can divide Department staffing into two distinctly different groups: the first is what the citizens typically recognize and is commonly known as the operations unit, generally classified as the emergency response personnel; the second group, commonly known as the administrative section, typically works behind the scenes to provide the support that the operation's personnel need to deliver effective emergency response.

In addition to providing fire suppression services, PFD is tasked with providing emergency medical response, fire investigation, fire prevention, life safety education, community risk reduction, disaster/emergency operations planning, and hazardous materials response.

Personnel Responsibilities & Activity Levels

The leadership of PFD has established work responsibilities beyond the emergency response requirements. For example, these additional duties include fleet management, respiratory protection compliance, and training. Due to the lack of sufficient management staff, the department struggles to maintain compliance with performance goals, industry standards, and workload.

Administrative & Support Staffing

One of the primary responsibilities of a response team's administration is to ensure that the operations segment of the organization has the ability and means to respond to and mitigate emergencies safely and efficiently. An effective administration and support services system proves critical to the success of a response agency.

Typical responsibilities of the administration and support staff include planning, organizing, directing, coordinating, and evaluating the various programs within the Department. This list of functions is not exhaustive, and other functions may be added. It is also important to understand that these functions do not occur linearly and can more often coincide. This requires the Fire Chief and the one shift Battalion Chief to focus on many different areas at the same time.

The following figure reviews the administration and the organizational support structure of PFD:

Figure 4: PFD Administrative and Support Staffing

Position	Number
Fire Chief	1
Management Analyst	1
Battalion Chief (Shift)	1
TOTAL	3

Like any other part of a municipal fire department, administration and support need appropriate resources to function properly. By analyzing the administrative and support positions within an organization, we can create a common understanding of the relative resources committed to this function compared to industry best practices and similar organizations. The appropriate balance of administration and support compared to operational resources and service levels is a crucial factor in ensuring the department can accomplish its mission.

Administration

The positions of the Fire Chief, one shift Battalion Chief, and one Management Analyst currently establish the administrative function of the department. Some of the typical responsibilities of the Fire Chief include planning, organizing, directing, and budgeting for all aspects of the department's operations. The current number of positions assigned to this activity is insufficient to meet supervisory expectations; in addition, the daily operational needs can detract from the ability to focus on administrative requirements.

PFD currently operates with a limited number of administrative support staff. The position assigned to administration is one Management Analyst. This one Management Analyst provides critical support to all of the department's administrative functions. In addition, during extreme emergencies, administrative staff are typically called upon to staff numerous duties in support of operations and logistics. One cannot overstate the value of administrative support as these staff members free up fire management staff to concentrate on other areas of operation. The level of administrative support appears to be inadequate for PFD.

Emergency Management

The responsibility for the City's emergency management planning and preparedness is assigned to the Fire Chief and the Police Chief. This shared responsibility is expected to provide for overall management and delivery of emergency management activities for the City of Pinole. Given the current duties of the Fire Chief, there is little time available to devote to this responsibility.

Fire Prevention

Typical fire prevention functions include building plan reviews, building inspections, weed abatement, community outreach, and vegetation management. The department currently outsources some of these functions through contracts; additional staffing would be required to satisfactorily fulfill these functions internally. Currently, the Fire Inspector duties are carried out via a contracted position. This includes the review and approval of building plans and providing building and construction inspections.

Fire Prevention Programs

An aggressive risk management program, through proactive fire and life safety services, is a fire department's best opportunity to minimize the losses and human trauma associated with fires and other community risks.

The National Fire Protection Association recommends a multifaceted, coordinated risk reduction process at the community level to address local risks. This requires engaging all segments of the community, identifying the highest priority risks, and then developing and implementing strategies designed to mitigate the risks.²

A fire department needs to review and understand the importance of fire prevention and public education, appreciating its role in the planning process of a community with diversified zoning, including residential, commercial, and industrial properties. The fundamental components of an effective fire prevention program are listed in the following figure, accompanied by the elements needed to address each component.

Figure 5: Fire Prevention Program Components

Program Components	Elements Needed
Fire Code Enforcement	- Proposed construction and plans review - New construction inspections - Existing structure/occupancy inspections - Internal protection systems design review - Storage and handling of hazardous materials
Public Fire & Life Safety Education	- Public education - Specialized education - Juvenile fire setter intervention - Prevention information dissemination
Fire Cause Investigation	- Fire cause and origin determination - Fire death investigation - Arson investigation and prosecution

² NFPA Standard 1730: *Organizing and Deployment of Fire Prevention Inspection and Code Enforcement, Plan Review, Investigation, and Public Education Operations*, 2019 Edition.

Fire & Life-Safety Code Enforcement

The most effective way to combat fires is to prevent them. A strong fire prevention program, based on locally identified risks and relevant codes and ordinances, reduces the loss of property, life, and the often-crippling impact on a community's economy. The following figure summarizes the new construction and fire protection system plan review programs, and ancillary programs typically found in fire prevention programs.

Figure 6: New Construction Inspections & Involvement

Program Elements	Pinole Fire Department
FD consulted on proposed new construction?	Yes, by utilizing contractors
FD consulted on proposed occupancy changes/tenant improvements?	Yes, via contractor
Perform fire & life-safety plan reviews?	Yes, by utilizing contractors
Charges for inspections or reviews?	Yes
Special risk inspections?	Yes, via contractor
Storage tank inspections?	No, this is a function of the Contra Costa CUPA
Key-box entry program in place?	Yes
Hydrant flow records maintained?	No ³

The following sections provide detail on the qualifications and resources dedicated to fire and life safety code enforcement provided by the Pinole Fire Department.

Pinole Fire Prevention

The Fire Chief has the primary responsibility of ensuring fire prevention activities are conducted to state and local regulations. This is supported by one contract Inspector and the on-duty engine company personnel when they are available. Current services offered include:

- Inspect new or repaired fire protection systems requiring a fire construction permit;
- Inspect existing occupancies required to have an operational permit and those required by the California Health and Safety Code to be inspected on an annual basis;
- Respond to complaints regarding fire and life safety code violations; and
- Investigate major fires and work with law enforcement to make arrests of persons responsible for unlawful actions related to fire.

³ The water and hydrant system are maintained by East Bay Municipal Utilities District (EBMUD). At the time of this report, the hydrant maintenance schedule and flow records could not be acquired from EBMUD.

Community Risk Reduction Program

Lately, U.S. fire departments have begun to recognize the value of Community Risk Reduction (CRR) programs that go beyond traditional fire prevention activities. Some have gone so far as to re-name their “fire prevention” divisions to “Community Risk Reduction Divisions.”

Regardless of the name, fire departments should be able to accurately identify the various potential community risks before developing prevention programs. This is not meant to imply diminishing the focus and importance of addressing the fire problem in a community, rather it affords an opportunity to identify and mitigate additional community risks through targeted prevention activities.

The first step in developing an effective CRR plan is identifying risks unique to a specific community by conducting a community risk assessment. A key component of the assessment process is the collection and analysis of incident data. However, firefighters, officers, and inspectors can also provide substantial anecdotal information on the various risks found within their respective response-areas.

Figure 7: Six Steps of CRR Planning

Fire & Life-Safety Public Education Program

Providing fire and life safety education to the public to minimize the number of emergencies while training the community to take appropriate actions when an emergency occurs is essential to a fire and life safety program. Life and fire safety education provides the best chance for minimizing the effects of fire, injury, and illness to the community.

Public education and outreach are conducted in various ways in each department. The following is a summary of the programs commonly offered by area fire departments.

Figure 8: Life Safety & Public Education Services

Life Safety & Public Education	Description	Pinole Fire Department
PIO/Public Educator	This position often works with the community to identify and eliminate fire and life safety risks.	Not a filled position, delegated as needed if available.
911 Education Program	This program works to reduce the amount of unnecessary 911 calls and provide education to the public on available services.	Website
Exit Drills In The Home (EDITH)	This program is typically offered to elementary school-age children through annual school visits.	Engine company upon request
Smoke Alarm Installation	Often, residents are encouraged to notify their fire departments when they need assistance replacing alarm or alarm batteries.	Engine company upon request.
Carbon Monoxide Alarm Installation	Carbon monoxide alarm installation assistance.	Not available
Bike Helmet Program	Provides information on bicycle helmet use to school-aged children.	Not available
Elder Safety/Fall prevention	Provides information and inspections to seniors to reduce accidents and falls.	Not available
Home Safety Inspections	A home safety program that aims to reduce fire and safety hazards in the household.	Upon request; crews not formally trained.
CPR/First Aid Classes	Classes that offer training in CPR and first aid to citizen groups, city employees, and individuals.	Not available
BP Checks	Often offered at the fire station for any resident on a walk-in basis.	Not available
Car Seat Safety Inspections	Classes, inspection, or training to ensure citizens are properly installing car seats into vehicles.	Not available
Fire Extinguisher Classes	Hands-on training to business employees and citizens on the proper selection and use of fire extinguishers.	Not available
K, 12 Fire Prevention curriculum delivery in schools	Fire Prevention classes designed for school-aged children to reduce burns and fires in the home.	Not available; demos upon request.
Wildfire Defensible Space Education	Education offered to neighborhood associations or individuals on the proper wildfire mitigation efforts around residential and commercial structures.	Website
Water Safety Program	Pool safety, swimming classes, and information on how to safely rescue an individual in the water.	Not available
Safety Fairs	Fairs offered to large groups of individuals with the intention of offering numerous public safety classes at one location.	Not available

Fire Prevention Discussion

In today's fire service, public fire and injury prevention education is much more important than in the past. This is likely the result of evolving community expectations, coupled with the realization by fire departments that community engagement and safety education outreach can build tremendous community support.

Consideration should be given to conducting a formal Community Risk Assessment. The U.S. Fire Administration identified a five-step assessment process for improving public safety education:⁴

1. Conduct a Community Analysis.
2. Develop Community Partnerships.
3. Create an Implementation Strategy.
4. Implement the Strategy.
5. Evaluate the Results.

Fire Cause & Origin Investigation

Accurately determining the cause of a fire is an essential element of a fire prevention program. When fires are intentionally set, identification and/or prosecution of the responsible offender is critical in preventing additional fires, injuries and fatalities, and catastrophic economic impact. Further, identifying the cause and potential trends enables the department to provide specific public information and fire prevention education to prevent reoccurrence.

Pinole receives fire investigation services through mutual aid from Contra Costa County Fire Protection District.

The results of professional and thorough fire investigations can be extremely powerful in:

- Prosecuting arsonists.
- Identifying product safety issues.
- Educating the public about the outcomes of unsafe behaviors and conditions.
- Assisting insurance companies and property owners with insurance claims.
- Providing solid evidence in criminal and civil court proceedings.
- Identifying necessary life safety code changes.

⁴ <https://www.usfa.fema.gov/downloads/pdf/publications/fa-219.pdf>

Training

PFD does not have a designated individual committed to the training function for the department. The responsibility for conducting all needs assessments relative to training, as well as program design, coordination, and evaluation falls to the Fire Chief. The result of this arrangement is that the training of all personnel is delivered inconsistently due to the other duties assigned to the Fire Chief.

While the design and staffing of a fire department are dependent upon the specific needs of the community, the reality is that most of the needed training is common among California fire departments. In addition to maximizing resources through sharing training resources and opportunities, fire departments that train together tend to work better together during mutual aid incidents. This also lends itself to making the firefighters more well-rounded, as they are exposed to other lines of thinking. Finally, a coordinated regionalized, collaborative approach to training delivery, in addition to the benefits noted, can substantially reduce costs, and increase the efficiency of educational efforts. To capitalize on local and regional training opportunities, the department needs an individual whose primary duties include this important function.

Training officers are often assigned to act as the department Safety Officer, reviewing standard operating procedures, adherence to proper personal protective equipment, inspecting facilities for safety hazards, and examining work practices to ensure they meet OSHA and Cal OSHA requirements. Safety Officers review accidents and design training classes to reduce accidents in the workplace.

Training Overview

Providing safe and effective fire protection, EMS, and other emergency services requires a well-trained workforce. Initial, ongoing, and high-quality training and education are critical for fire department effectiveness and the safety of its personnel. A comprehensive training program is necessary to achieve this goal; this is true in all-career or combination fire departments that provide a broad range of services throughout the community. Pinole Fire Department allocated \$25,000 in the fiscal year 2019/2020 budget to provide for this training.

To ensure maximum effectiveness and safety in complex environments, firefighters and officers must acquire and maintain initial training, ongoing training, and EMS Continuing Education (CE). Failure to provide necessary training endangers firefighters and citizens and exposes fire departments to liability. In addition, a well-trained workforce substantially contributes to better emergency incident outcomes and community services.

Newly hired firefighters must participate in a structured recruit training and testing process. The *California State Fire Training* utilizes NFPA 1001: *Standard for Fire Fighter Professional Qualifications* (2013), NFPA 1051: *Standard for Wildland Fire Fighter Professional Qualifications* (2016), and NFPA 472: *Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents* to provide the qualifications for State Fire Training's Fire Fighter I certification. These standards identify the minimum training requirements that serve as the basis for entry-level firefighters. The NFPA recommends other standards that address initial and ongoing training for firefighters and officers in a variety of specific topics. In addition, new recruits must complete or have previously completed basic emergency medical training.

Following initial training, firefighters (i.e., all emergency services personnel) must actively participate in ongoing training that includes testing as well as ensuring practical skills and knowledge are maintained. In its *Fire & Emergency Service Self-Assessment Manual (9th edition)*, the Commission on Fire Accreditation International (CFAI) addresses “Training and Competency,” and lists numerous performance indicators under the headings of training and education program requirements, performance, and resources.

To accomplish this, fire departments must have access to qualified instructors and training resources—either within the organization, externally with regional partners, or both.

Training programs must go beyond simply fulfilling mandatory hours. Emergency services training administrators and instructors must ensure that firefighters, EMS personnel, and officers are not only competent but also self-confident in the variety of skills necessary to perform effectively in high-stress situations. Industry standards outline specific areas that are considered integral to effective training programs. The program should include the following:

- Training administration
- Recordkeeping (records management systems)
- Training facilities and resources
- General training competencies
- Training methodologies

Training Administration

Typically, even smaller fire departments have a dedicated individual assigned to the training division who oversees the training program, sets program goals and objectives, develops training manuals, produces annual reports, and ensures state and local mandatory training is completed. Pinole Fire does not have a dedicated Training Officer.

Contra Costa County Training Officers Association

Under the auspices of the *Contra Costa Fire Chiefs Association*, training officers from the fire departments meet regularly to develop and share resources, as well as promote fire training locally. Pinole participates regularly in the Training Officers’ Association.

Training Facilities & Resources

Pinole does not possess a fire training facility and has limited access to shared resources due to daily staffing arrangements and the need to be available to respond to incidents. The following figure contains common considerations for fire service training and indicates if these training services are available within the PFD service area.

Figure 9: Training Facilities & Resources Findings

Description	Pinole Fire Department
Adequate training ground space/equipment	No
Live fire props	No
Fire & driving grounds	No
Training facility maintenance adequate	Not applicable
Classroom facilities adequate	Shared classroom facilities are available
Video & computer simulations available	No
Instructional materials available	Yes

Training Facilities in Contra Costa County

The Rodeo Hercules Fire Protection District training center is equipped with a wide variety of equipment, props, and other facilities. This facility is available for use by PFD; however, utilizing it requires moving the on-duty fire crew out of the City of Pinole and placing them out-of-service or causing a delay in response.

General Training Records

Fire departments must maintain records to demonstrate competencies and completion of annual mandated (local, state, and federal) training. These records are important to internal processes such as promotions and qualifications for special operations. Externally, training records are often used in defense of litigation, for investigations, and to prove competencies in the Master Mutual Aid System.

Figure 10: Training Records Maintenance

Description	Pinole Fire Department
Individual training files maintained	No ⁵
Records & files computerized	Limited
Daily training records kept	Yes, via hard copy journal
Annual training hours tracked	No
Company training records kept	No
Responsibility for records	Fire Chief
Training equipment inventoried	Props are limited & in need of refurbishment ⁶

General Training Competencies

For training to be fully effective, it should be based on established standards. The next figure lists the general training competencies regularly delivered to the members of the Pinole Fire Department.

Figure 11: General Training Competencies

Description	Pinole Fire Department
Incident command system	No, "Blue Card" is being implemented.
Accountability procedures in place	No, Lexipol policy & procedure system has been purchased and will soon be implemented.
Policy & procedures for training	No, Lexipol policy & procedures purchased and soon to be implemented.
Safety procedures in place	No, Lexipol policy & procedures purchased and soon to be implemented.
Recruit academy	Two recruits will start at the Berkeley Fire Dept Academy in October 2019. Two went through in October 2017.
Special rescue	No
Hazmat certification	No
Wildland firefighter	Yes
Vehicle extrication	Yes
Defensive driving	Yes
Use, safety, & care of small tools	Yes
Use & care of power equipment	Yes
Radio communications & dispatch	Yes
EMS skills & protocols	Yes

⁵ PFD is in the process of configuring Target Solutions to maintain training records and reports.

⁶ In fiscal year 2019/2020, \$2,500 has been allocated for this purpose. This amount is generally enough to maintain one training prop, but as PFD expands its training capabilities, additional funding should be added to the budget for prop maintenance.

EMS Training & Continuing Medical Education

Pinole Fire Department relies on in-house (PFD developed) and other regional sources for training for basic and advanced life support continuing medical education. Pinole personnel are preparing to use Target Solutions to deliver ongoing continuing education for paramedics and emergency medical technicians at a fixed annual cost. The use of online training reduces the need to hire instructors and pay employees overtime as they attend mandated training as well as ensuring annual training mandate records are well kept.

Training Methodologies

Certain resources are necessary to arm the instructor with the tools necessary to deliver adequate educational content to provide effective training to fire and EMS personnel. In addition to such tools, effective methodologies must be employed if training delivery is to be enough to meet the needs.

The following figure lists the various training methodologies and training operations utilized by PFD.

Figure 12: Training Methodologies & Operations

Description	Pinole Fire Department
Manipulative skills	Manipulative training drills for individual and company are conducted weekly.
Task performances/frequency	Manipulative training drills for individual and company are conducted weekly.
Annual training hour requirements	24 hours of EMS "Continuous Education" is accomplished annually.
Use of lesson plans	Each firefighter employee has a task book containing lesson plans. Fire Engineer and Captain task books are being developed.
Produced in-house or commercially	Training plans are produced by PFD members.
Night drills	Annual structure fire drills are held at night.
Multi-agency drills	Annual multi-agency structure fire, wildland, & EMS are held.
Disaster drills conducted	No
Pre-fire planning included in training	Yes
Safety incorporated in training	On large drills, a safety plan is developed as part of a training Incident Action Plan.
Post-incident analysis conducted	On large drills and incidents, an incident or training analysis is completed.

Training Discussion

Ongoing training reduces injuries and other risks associated with firefighting. Mandatory training is required by OSHA, Cal OSHA, and the State of California that must be undertaken and completed on an annual basis by firefighters. In addition, the Insurance Services Office (ISO) reviews training hours to ensure the adequate training of fire service responders.

Emergency Response Staffing

It takes an adequate and properly trained staff of emergency responders to put the appropriate emergency apparatus and equipment to its best use in mitigating incidents. Insufficient staffing at an operational scene decreases the effectiveness of the response and increases the risk of injury to all individuals involved.

One can break down critical tasks performed at a fire into two key components—life safety and fire flow. Life safety tasks are based on the number of building occupants and their location, status, and ability to take self-preservation action. Life safety-related tasks involve search, rescue, and evacuation of victims. The fire-flow component involves delivering enough water to extinguish the fire and to create an environment within the building that allows firefighters' entry.

The number and types of tasks needing simultaneous action will dictate the minimum number of firefighters required to combat different types of fires. In the absence of adequate personnel to perform concurrent action, the Command Officer must prioritize the tasks and complete some in chronological order, rather than concurrently. These tasks include:

- Command
- Scene safety
- Search and rescue
- Fire attack
- Water supply
- Pump operation
- Ventilation
- Back-up/rapid intervention

The first 10 minutes are the most crucial period in the suppression of a fire. The timing of these 10 minutes does not start when the firefighters arrive at the scene but begin when the fire initially starts. How effectively and efficiently firefighters perform during this period has a significant impact on the overall outcome of the event. This general concept is applicable to fire, rescue, and medical situations. Critical tasks must be conducted promptly to control a fire or to treat a patient. PFD is responsible for ensuring those responding companies can perform all the described tasks in a prompt, efficient, and safe manner.

Setting the staffing levels is a determination made at the community level based on risk, capability, and citizen expectations and is guided by national recommendations such as those found in the National Fire Protection Association Standard 1710.

When a fire escalates beyond what the initial assignment can handle, or if the fire has unusual characteristics such as a wind-driven fire or has been accelerated with a highly flammable compound, additional personnel are needed. Other types of scenarios may not include fires but rather mass casualty incidents, explosions, etc., that may need additional staffing. It proves difficult or impossible to staff for these worst-case incidents; they require a robust mutual aid or automatic aid plan for assistance.

The staffing level that PFD is expected to provide is a decision based on a risk assessment and community expectations. A funding level must be established that matches the fire department's deployment capability to mitigate the risk to a level that meets the community's expectations. This funding level is developed through the political process of citizens meeting with local legislators and expressing approval of the level of service being received or indicating improvements that need to be made and the level of additional financial support they are willing to bear to obtain satisfaction with the services. This additional financial support is usually in the form of assessing property or other taxes to generate the necessary revenue. No mandated requirement fits all possible situations, although NFPA 1710 guides the number of personnel and apparatus required for typical scenarios. Incidents may escalate beyond the capability of the initial assignment of units and staff, resulting in additional apparatus and personnel required. It may prove difficult or financially impossible to staff for those worst-case incidents. In those instances, a robust mutual or automatic aid system is required.

On a typical day in Pinole, as in most jurisdictions, the full staffing required by response needs are not available due to budget constraints.⁷ Currently, Pinole has determined that the minimum acceptable department staffing is three operations personnel and a shared Battalion Chief on each shift. This staffing level is generally only adequate for basic calls for service such as low acuity medical aids, small incipient fires, or motor-vehicle accidents with minor injuries. This staffing arrangement results in reliance on other jurisdictions assistance through automatic and mutual aid agreements for calls requiring two or more units, as identified in critical tasking Figure 32.

Battalion 7 designates the geographical area in western Contra Costa County comprised of the Contra Costa County Fire Protection District (CCFPD), City of Pinole Fire Department (PFD), and the Rodeo-Hercules Fire Protection District (RHFPD). Per an agreement with CCFPD, RHFPD, and PFD, each agency provides and shares shift Battalion Chiefs. These chief officers are assigned to Duty Chief coverage for each shift for the area described as "Battalion 7."

While this agreement provides for operational duties at the shift Battalion Chief level, it does not enhance critical administrative support needs for PFD.

The following figure depicts PFD's emergency staffing—with all authorized positions filled for the combined three shifts that PFD employs.

⁷ As an example, a residential structure fire generally requires multiple fire engine crews to accomplish the tasks required to extinguish the fire, located victims, and provide any necessary medical interventions. Another example occurs when two or more calls for service occur within a short time frame. In Pinole, only one fire engine is staffed per day. The capability to respond to complex calls requiring additional personnel or to respond to multiple incidents occurring simultaneously is fully dependent on automatic and mutual aid. See Figure 32 for additional details.

Figure 13: PFD Emergency Response Staffing

Position	Total Authorized Positions	Daily Staffing
Battalion Chief (shared)	1	0 to 1 ⁸
Fire Captain	3	1
Engineer	3	1
Firefighter	6	1
Totals:	13	3 or 4

PFD is authorized at 14 emergency response personnel for EMS, rescue, and fire suppression activities, including the Battalion Chief and Fire Chief. At the end of FY 2018, three of the authorized 12 firefighters in the Fire Operations Division were vacant. This means 25 percent of the response force positions, primarily in the firefighter rank, are vacant.

The resident population of the PFD service area inclusive of contact areas is estimated to be approximately 24,624 (this includes the City of Pinole population of 19,498 and two nearby unincorporated areas located within the service area). PFD provides its community with .69 career firefighters per 1,000 population. This compares to a national average of .99 firefighters per 1,000 population for cities of comparable size in Western states or almost a third less than the average.⁹

The suppression personnel are assigned to one of three shifts, each working 48-hours on/96-hours off and working a total of 2,912 hours each year.

PFD operates from one station, staffed with full-time personnel. The following figure shows the staffing configuration at full utilization of authorized personnel. ESCI notes that the minimum staffing level for PFD absent automatic aid does provide for the two-in/two-out structure firefighting per OSHA mandates.¹⁰

Figure 14: Station Units & Staffing Levels

Station	Apparatus	Minimum On-Duty Staffing
Station 73	Engine 73	3
	Reserve Engine 73A	0
	Type III Engine E273	Cross Staffed
	Wildland Type VI E473	Cross Staffed
	Utility Vehicle U73	As needed
Station 74	Battalion Chief (B shift)	1
Totals:		4

⁸ Chief Officer coverage is not provided for all three shifts by PFD.

⁹ NFPA Research—Career Firefighters per 1,000 population for All Career Fire Departments, 2013–2015. Retrieved from: <https://www.nfpa.org/-/media/Files/News-and-Research/Fire-statistics-and-reports/Emergency-responders/osCareerFF1000Population.ashx?la=en>

¹⁰ Two-in/two-out refers to section (g)(4) of OSHA's Respiratory Protection Standard, 29 CFR 1910.134.

CURRENT FINANCIAL ANALYSIS

Economic Conditions

The state and local economies have followed the trend of modest growth that the national economy has experienced since the economic downturn of 2008/2009. Though current national and international policies have created concerns that have harmed certain sections of the stock market and the economy, the consensus is that the current growth trends are expected to continue at least through the end of 2019.

California's economy has outpaced that of the United States since the third quarter of 2012. Retail sales in the state have increased by 20 percent between 2013 and 2017. While the California unemployment rate continues to be higher than that of the U.S. in general, the gap has been reduced to .4 percent.

California's personal income grew 4.7 percent in 2018 versus a 4.5 percent U.S. personal income growth for the same period. A similar gap was experienced in 2017 with personal income growth at 4.6 percent and 4.4 percent for California and the U.S., respectively.

Contra Costa County is one of the original 27 counties established in California in 1850 and is home to more than a million residents. The county is located in the northern portion of the East Bay region of the San Francisco Bay Area. The county is included in the San Francisco-Oakland-Hayward Metropolitan Statistical Area. The county has a total area of 804 square miles with 716 square miles of land and 88 square miles of water area. There are 19 cities, including Pinole, and numerous established communities in the county.

Due to Contra Costa County's extensive waterfront along the bays in the San Francisco area, significant heavy industry development has occurred, including oil refineries and chemical plants. Agriculture contributes to employment opportunities in the county.

Information from the 2018 Census Bureau indicates that Pinole boasts the second-highest median earnings per worker of \$57,784 of all places in the area. The "area" against which the comparisons were made includes the communities of Montalvin Manor, Bayview-Contra Costa County, West Contra Costa, El Sobrante-Contra Costa County, Tara Hills, San Jose-San Francisco-Oakland, and Hercules.¹¹ This compares with the median earnings of \$46,022 throughout the U.S. Household median income of \$84,255, also places it as the second-highest in the area, and compares favorably against the U.S median household income of \$57,652. Pinole's unemployment rate was 3.7 percent. A significant number of Pinole's residents work outside the city, elsewhere in the Bay Area. This would indicate Pinole serves more like a "bedroom community" than a commerce center.

The area continues to grow but at a very modest rate, gaining 40 new residents in 2018. Significant growth is not expected as Pinole is primarily built-out and bordered by other municipalities, creating little to no opportunity for expansion.

¹¹ TownCharts, <http://www.townchardts.com/California/Economy/Pinole-city-CA-Economy> Data.

Historical Revenue & Expense

The City of Pinole is primarily a residential community located in West Contra Costa County, approximately 30 miles northeast of San Francisco and 20 miles north of Oakland. The city covers a land area of roughly five square miles and is home to approximately 19,200 residents.

The City operates under a Council/Manager form of government. The Council is comprised of a Mayor and four Council members serving four-year terms. The Council is elected in staggered two-year periods with three members standing for election in one cycle and the remaining two positions following in the next cycle two years subsequent. The Mayor is selected by the Council on a rotating annual basis. The Council appoints the City Manager, City Attorney, and City Clerk. As is the case with most municipal governments, the Council is responsible for policymaking decisions and legislative responsibilities, which include, among other items, adopting ordinances, appointing committees, and adopting the budget. The City Manager is responsible for implementing the policies, overseeing the day-to-day operations of the City, and appointing department directors.

Pinole provides all public services including fire, police, road and street maintenance, community development, recreation programs, parks, wastewater, and fiscal services through a staff of 100 full-time and 39 part-time positions.

The local economy has continued to improve following the economic downturn. Sales tax revenues continue to increase, property values have improved, and the local unemployment rate decreased from 4.9 percent in 2017 to 3.1 percent in 2018. A new shopping center has been developed with a portion opening in 2018 and the balance to open in the second half of 2019. Three significant retailers closed their doors during FY 2018. A 15,000 square foot CVS Pharmacy was completed in early 2019.

The City of Pinole employs an accounting and budgeting system that is like most municipal forms of government. This system utilizes multiple "funds," more easily described as separate operating companies, to track expenditures made by and revenues attributable to the operation of each fund. The General Fund typically reflects the operations of the performance of the core services provided by the City, such as law enforcement, fire protection, human resources, legal, debt service, finance, and the administrative side of the City's operations. Within the General Fund, separate budgets for each of the departments are prepared. The City operates on a fiscal year beginning July 1 and ending on June 30.

Additional funds may be created to manage specific projects, programs, special or specific income streams, or to account for allocation of revenue from an assessment of taxes. Pinole employs the use of multiple funds to manage specialized activities such as Housing Programs, Community Development, Wastewater, road maintenance, debt service, and capital projects. Additional funds track police and fire department pension activities. These multiple funds require a detailed review to determine the total activity of any department that has activity in more than one fund to gain a complete picture of the revenues and costs pertaining to the department.

A significant amount of financial information and supporting data was provided to ESCI by the staff of the City of Pinole. ESCI has analyzed the historical actual revenues and expenses from FY 13/14 through FY 17/18 for the City to develop relevant financial trends, strengths, and weaknesses which, in conjunction with the annual budget information for FY 18/19, will assist in the completion of the financial forecasts presented later in this report.

Revenue

A critical component of the success and operation of any business, private or public, is a consistent and reliable funding stream. In the instance of public agencies, this funding is usually provided by the assessment and collection of various forms of taxation such as ad valorem (real estate) taxes, sales taxes, special assessments, and fees for services. Recognizing the limits of public funding, public safety agencies are limited in the level of service they may provide to their communities by the types and levels of revenues that the authority having jurisdiction is willing, or limited by the legislative process, to assess. California's legislative process created Proposition 13 in 1978, restricting the growth of tax revenues to municipal and other government agencies. Public agencies also may charge fees for services under contractual arrangements or interagency agreements to other agencies or areas outside of their political boundaries.

General Fund revenues are classified as recurring or non-recurring. Recurring revenues are those expected to continue annually, such as property taxes, sales taxes, and contracts for service. Non-recurring revenues are those sources that are expected to not continue, such as sales of assets, grant revenues, loan proceeds, and insurance proceeds. Loan proceeds may be received in one fiscal year but not be utilized until a future fiscal year, which may significantly distort the cash flows in both years. The City has sold surplus properties during four of the past five years, supplementing its cash flow for those years, but this source should not be expected on an annual basis.

The City of Pinole is allowed by statute to assess and collect a variety of taxes. The City assesses a property tax as well as a general sales tax. Revenues included in the General Fund to provide for various operations, including fire and police activities, are provided through two Measure "S" sales tax initiatives. The 2006 Measure created a 0.5 percent sales tax, which has been allocated by budget appropriations to fund fire and police department operations. The Measure S 2014 added a .5 percent sales tax to fund City operations, a portion of which has also been allocated to public safety activities. Neither of the Measure S initiatives has an expiration date.

Additionally, a utility use tax (UUT) initiative was originally enacted in 1998 and went into effect on December 1 of that year. The UUT assesses an 8 percent tax on telephone, electric, and gas services. Voters in Pinole have approved extensions of the UUT in 2004 and 2012. In 2018, the tax was extended without a sunset date, so it will now remain in effect until repealed by voters. The tax presently raises approximately \$2,000,000 for the General Fund, equivalent to approximately 14 percent of the General Fund Budget.

Recurring Revenues

Property tax revenue is based on the assessed value of the property within the boundaries of the jurisdiction applied against the tax rate. The following figure shows the growth of the property valuation and the related property tax revenue.

Figure 15: Property Tax Value & Property Tax Revenues for City of Pinole (FY 13/14–FY 17/18 Actual)

Description	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Value Subject To City Tax	868,918,982	990,967,092	1,048,130,045	1,105,435,408	1,170,940,384
Effective Tax Rate	0.19%	0.19%	0.19%	0.19%	0.19%
City Property Tax Collected	1,622,419	1,856,378	1,967,011	2,059,786	2,185,033

The following figure provides a graphical presentation of the relationship between the property valuations and the tax assessed against those values.

Figure 16: Taxable Value & Property Tax Revenue (FY 13/14–FY 17/18)

The City of Pinole serves as the Successor Agency to the Pinole Redevelopment Agency. This agency was dissolved on February 1, 2012, pursuant to State Law ABx1-26. Under the State Law, the City receives Redevelopment Property Tax Trust Fund payments equal to a 19 percent share of the 1 percent property tax from the sale of properties formerly owned by the Redevelopment Agency. Large spikes in these collections result from sales of properties with higher values. The following figure provides a historical perspective of taxes collected on redevelopment property sales. The property tax collections related to the Redevelopment Properties are not included in the previous graphical presentation of City property taxes assessed.

**Figure 17: Pinole Historical Collections of Property Taxes Related to Redevelopment Properties
(FY 13/14–FY 17/18 Actual)**

Description	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Tax collected on redevelopment	105,121	105,121	105,121	104,251	104,295
Redevelopment property sales	973,697	3,138,877	1,309,520	1,289,035	2,325,870
Total Redevelopment Properties:	\$1,078,818	\$3,243,998	\$1,414,641	\$1,393,286	\$2,430,165

Sales tax revenue is the most significant source of tax revenue for the City of Pinole. This amount has steadily increased except for an anomaly in FY 16/17. Sales tax has risen an average of 14.5 percent annually from FY 13/14 to FY 17/18. Franchise tax, typically assessments collected for the use of a city's right-of-way, has experienced annual growth of 3 percent over the five-year history period. Utility and occupancy taxes have increased as real estate development activities have increased. Intergovernmental receipts grew between FY 13/14 and FY 15/16 before most of those revenues were classified as charges for services in FY 16/17 and FY 17/18.

**Figure 18: Sales Tax Collections Including Measure S (2006 & 2014 Initiatives)
FY 13/14–FY 17/18**

Non-Recurring Revenues

Non-recurring revenues consist of proceeds from a capital lease and the sale of surplus properties. Additionally, Net Transfers In (Out) are included in non-recurring revenues.

The following figure shows the recurring and non-recurring revenues for the City of Pinole from FY 13/14 through FY 17/18.

Figure 19: Recurring & Non-Recurring Revenues for Pinole (FY 13/14–FY 17/18 Actual)

Revenue	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Property Taxes	\$1,622,419	\$1,856,378	\$1,967,011	\$2,059,786	\$2,185,033

Non-Recurring:	\$1,581,638	\$3,450,411	\$1,078,612	\$1,292,489	\$12,457,047
Total Revenues:	\$13,648,676	\$17,110,799	\$16,958,485	\$16,473,253	\$29,774,538

General Fund expenditures are classified as recurring and non-recurring with similar definitions to those of revenues. The General Fund includes funds for public safety, general administration, public services, recreation, and community development. In most instances, debt service is classified with non-recurring expenditures; however, the City of Pinole has long-term liabilities that extend for several years and will be included with the recurring expenditures.

Included in the General Fund debt service amounts is the annual payment necessary for the retirement of the \$6,214,630 of bonds that were issued in 2006 to finance the City's unfunded accrued actuarial liability with CalPERS. These bonds require an annual payment plus interest for thirty years until the debt is extinguished in 2036.

Public Safety expenditures comprise between 65 percent and 70 percent of recurring expenditures and have grown annually. The significant portion of this growth is a result of increased costs associated with the Public Employees Retirement System (CalPERS). Due primarily to a change in the expected investment returns by the plan, the City has incurred additional unfunded accrued actuarial liability with CalPERS that require amortization. These amounts are expected to increase over the next several years before the annual payment amounts decrease. This issue will be discussed further in the projections section of this report.

Capital expenditures paid from the Measure S (2014) are intermingled within the individual department expenditures.

Figure 20: Pinole Actual General Fund & Measure S Recurring & Non-Recurring Expenditures (FY 13/14–FY 17/18)

Expenditures	Actual June 30,				
	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18

Recurring Expenditures	\$12,315,199	\$11,916,376	\$13,528,127	\$14,562,745	\$15,546,828
Capital Outlay	—	—	—	—	—
Non-Recurring Expenditures	—	—	—	—	—
Total Expenditures:	\$12,315,199	\$11,916,376	\$13,528,127	\$14,562,745	\$15,546,828

The City established a General Fund reserve in FY 14/15 with a beginning balance of \$3 million. The Council's goal is to provide a reserve balance equal to six months of General Fund operating expenses or approximately \$5.5 million.

The fund balance of the General Fund has improved significantly over the past five years, and the City has achieved its target reserve balance.

Figure 21: Analysis of Fund Balance of the General Fund (FY 13/14–FY 17/18)

Description	Actual June 30,				
	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Total Revenues	13,648,676	17,110,799	16,958,485	16,473,253	29,774,538
Total Expenditures	12,315,199	11,916,376	13,528,127	14,562,745	15,546,828
Increase (Decrease) in Fund Balance	1,333,477	5,194,423	3,430,358	1,910,508	14,227,710
Beginning Fund Balance	(1,358,853)	(25,376)	5,169,047	8,599,405	11,135,715
Prior Year Adjustment	—	—	—	625,802	—
Ending Fund Balance:	\$(25,376)	\$5,169,047	\$8,599,405	\$11,135,715	\$25,363,425

The large increase in the Fund Balance in FY 17/18 results from the repayment of a loan due to the City in an amount slightly greater than \$10 million. All of these funds were transferred from the General Fund to an IRS Section 115 Pension Trust in FY 18/19. An adjustment has been made to the prior year Fund Balance in FY 16/17 to compensate for differences in balances between the annual reports.

City of Pinole Fire Department

The department is presently staffed by 14 career employees and a Management Analyst. PFD serves a community approximately 12 square miles in area with a population within the city limits of approximately 19,364 residents. Services, including fire protection, emergency medical services, fire investigation, fire prevention, life safety education, community risk reduction, disaster/emergency operations planning, and hazardous materials response are presently provided from a single fire station utilizing a single engine staffed with a minimum of three personnel. A Battalion Chief responds on incidents requiring a senior level command presence.

The PFD is a department of the City of Pinole and has no funding source other than that supplied by the City through the revenues generated by its General Fund and other measures enacted to generate revenue at the City level. Two general sales tax measures have been enacted since 2006, which have been allocated by budget appropriation, in whole or in part, to the Public Safety departments of the City.

The Pinole Fire Department participates in an Automatic Aid Agreement with the Contra Costa County Fire Protection District and the Rodeo-Hercules Fire Protection District. This agreement provides the framework under which the three agencies will jointly provide fire and emergency medical services through the integration of operations.

In some of the years prior to those evaluated for this project, the PFD operated from two stations. The economic downturn in 2008/2009 reduced the City's revenue to the level that the second station (Station 74) was initially closed during certain operational periods through a brownout program, but as finances continued to worsen, it was ultimately closed. This closure has resulted in an increase in response times to a portion of the City.

The budget and accounting practices employed by the City of Pinole do not allocate General Fund overhead expenses to the various departments. This makes comparisons with other agencies, such as fire districts difficult. While it may be possible to estimate the executive management costs of the City that would be attributable to the fire department, a portion of those costs may not be applicable to a fire district.

The budget of the Pinole Fire Department has expanded and contracted during the previous five years. However, the overall budget has remained within \$250,000 between FY 13/14 and FY 17/18 except for an anomaly in Services in FY 16/17 for an allocation of administrative costs.

Figure 22: PFD Recurring & Non-Recurring Expenditures (FY 13/14–FY 17/18)

Description	Actuals for the Year Ending June 30,				
	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Salaries (includes overtime)	\$1,650,376	\$1,645,448	\$1,686,694	\$1,575,190	\$1,832,417
Benefits	605,918	660,257	817,636	597,058	604,578

Financial Projections

The Amended City of Pinole General Fund Budget for FY 18/19 projects a negative cash flow of approximately \$950,000 before considering Transfers In and Transfers Out activity. This is due to a \$1 million allocation from the General Fund balance for the purchase of a new fire engine. Approximately \$16,000,000 of the amounts included in the Transfer Out category was utilized to create an Irrevocable Pension Trust to assist the City with funding the CalPERS future retirement expenses of the City's employees. Property tax revenues in FY 18/19 are projected to be approximately \$825,000 less than the amounts received in FY 17/18, decreasing from \$4,615,000 to \$3,787,000.¹² Sales tax revenues from the General Fund, Measure S (2006), and Measure S (2014) are also projected to be approximately \$12,000 less than the previous year. Charges for services are projected to be approximately \$153,000 more in FY 18/19 than the amounts received in FY 17/18.

Revenues are identified as recurring or non-recurring with recurring revenues consisting of those receipts that can be expected to continue annually and that have a reasonably expected amount. Non-recurring receipts are items that may occur sporadically or are difficult to project an amount.

The following figure uses the projected FY 19/20 as a base year on which to create the five-year projections. Property values, as well as property and sales tax revenues, are projected to increase at a 2 percent annual rate. The Utility Users Tax and Franchise Tax increases are forecast to increase at a 1 percent annual rate. Other tax revenues and other revenue sources are both forecast to increase at an annual rate of 2 percent. Beginning in FY 20/21, a significant portion of the annual pension cost increases will be offset by the withdrawals from the Pension Trust with those funds included in the Transfer In category in Recurring Revenues. Non-recurring revenues include miscellaneous proceeds and proceeds from the sale of surplus assets. The following figure uses the information provided by City staff on or before October 8, 2019. Anticipated modifications to these amounts will be contained in the addendum to this report.

¹² FY 2019/20 Proposed Budget for the City of Pinole, Pg. B-1.

Expenses are classified in a manner much like revenues, recurring or non-recurring. Salaries, benefits, and typical operating expenses are identified as recurring in nature. In the instance of Pinole, annual debt service payments are expected for a significant number of years in the future and are also included as recurring expenditures. Capital outlays are projected annually from the Measure S (2014) initiative and are classified as non-recurring expenditures. Transfers to other funds are also classified as non-recurring expenditures.

The projection methodology incorporates expenditure type rather than function type in order to use generalized growth factors. Salary expense across the City is projected to increase at a 3 percent annual rate through the FY 23/24 fiscal year. Benefit increases primarily result from the increase in pension costs to compensate for the reduced returns experienced by CalPERS, the state pension system. Other operating expenses are projected to increase at a 2.8 percent annual rate beginning with the FY 20/21 period. Debt service is projected based on repayment terms for each liability.

Non-recurring expenditures include scheduled transfers from the General Fund and other funds included in the General Fund to other funds such as internal service funds or equipment reserves.

The following figure uses projected amounts provided by City staff as of October 8, 2019. Anticipated modifications to these amounts will be included in the addendum to this report.

Figure 25: City of Pinole Projected Recurring vs. Non-Recurring General Fund and Measure S Initiatives Expenditures (Amended Budget FY 18/19–FY 24/25)

Expenses	Amended Budget	Projected Budget	Projected				
	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Salaries	8,585,194	9,138,860	9,413,026	9,695,417	9,986,280	10,285,867	10,594,443
Benefits & Insurance	4,738,955	5,787,430	9,175,976	11,189,850	13,405,359	15,848,563	18,701,304
Other Operating Expenses	4,324,315	3,797,889	2,876,229	2,956,764	3,039,553	3,124,660	3,212,150
Debt Service	590,433	605,433	555,000	575,000	595,000	610,000	610,000
Recurring Expenditures	18,238,897	19,329,612	22,020,231	24,417,031	27,026,192	29,869,090	33,117,897
Capital Outlay	929,814	882,618	907,331	932,737	958,853	985,701	1,013,301
Transfers Out	22,094,954	1,328,948	1,150,000	1,150,000	1,150,000	1,150,000	1,150,000
Non-Recurring Expenditures	23,024,768	2,211,566	2,057,331	2,082,737	2,108,853	2,135,701	2,163,301
Total Expenditures:	41,263,665	21,541,178	24,077,562	26,499,768	29,135,045	32,004,791	35,281,198

Maintaining an adequate reserve or fund balance is good business practice for private businesses but is especially critical for municipalities as new revenue streams are typically enacted through a legislative process. Comparing the projected revenues and expenditures of the City of Pinole provides insight into the future financial health of the City. The significant anomaly occurring in FY 18/19 is a result of the one-time \$16 million transfer to the IRS 115 Pension Trust. City Council had initiated a plan to accumulate a \$5.5 million emergency reserve and had been able to accomplish this goal in FY 18/19. The goal has been projected to be achieved in each of the following two fiscal years through FY 21/22. However, continued fiscal pressure in the form of increased CalPERS pension funding does not allow for this financial goal to remain sustainable beyond FY 21/22.

The following figure uses projected amounts provided by City staff as of October 8, 2019. Anticipated modifications to these amounts will be included in the addendum to this report.

Figure 26: Projected General Fund Balance for Pinole (Amended FY 18/19 Budget–FY 24/25)

Revenues & Expenditures	Amended Budget	Adopted Budget	Projected				
	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Revenues	25,493,905	19,654,349	22,334,941	23,594,769	25,007,633	26,596,956	26,959,939

Ending Fund Balance	9,593,665	7,706,836	5,964,215	3,059,216	(1,068,195)	(6,476,031)	(14,797,290)

The Pinole Fire Department is a City department, and there is no direct connection between the City's various revenue streams and the fire department's services. Two separate Measure S initiatives have provided sales tax revenues that have been allocated to address various needs of the City, including public safety operations and capital expenditures.

The Pinole Fire Department's FY 18/19 Budget is \$5,188,930, including \$1,280,560 for capital acquisitions. This is an increase of \$1,846,533 over actual expenditures in FY 17/18. Benefit costs increased approximately \$290,000 over FY 17/18 actual costs and are primarily related to the increase in required pension costs. The budget is divided between General Fund expenditures and Measure S (2006) and Measure S (2014) funded expenditures.

The City of Pinole staff developed the adopted fire department FY 19/20 budget with the goal of providing quality services within the City's available resources. This budget forms the basis for the remaining projections.

Like the City's growth factors for expenses, salaries are anticipated to increase 3 percent annually. The increase in employee benefits is driven by the significant increases in the required CalPERS plus a 5 percent increase in other benefits. Service and supplies costs are projected to increase at 2.8 percent annually. Measure S (2006) and Measure S (2014) initiatives are projected to grow at an annual rate of 1 percent during the next five years and will continue to provide funding for a portion of fire department salaries, benefits, operating expenses, and capital acquisitions. The following figure demonstrates what is considered as a status quo option, which shows the projected costs if the City took no action other than to leave the service delivery system as is.

The following figure uses projected amounts provided by City staff as of October 8, 2019. Anticipated modifications to these amounts will be included in the addendum to this report.

**Figure 27: PFD Projected Status Quo Expenditures & Funding Sources
(Amended Budget FY 18/19–FY 24/25)**

Description	Amended	Adopted	Projected				
	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Salaries	1,900,133	2,104,678	2,167,818	2,232,853	2,299,838	2,368,834	2,439,899
Benefits	894,321	1,284,608	2,113,226	2,577,021	3,087,252	3,649,922	4,306,908

Capital Assets & Improvements

Three basic resources are required to successfully carry out the mission of a fire department—trained personnel, firefighting equipment, and fire stations. No matter how competent or numerous the firefighters, if appropriate capital equipment is not available for use by responders, it is impossible for a fire department to deliver services effectively. The capital assets that are most essential to the provision of emergency response are facilities and apparatus (response vehicles).

Fixed Facilities

Fire stations play an integral role in the delivery of emergency services for several reasons. A station's location will dictate, to a large degree, response times to emergencies. A poorly located station can mean the difference between confining a fire to a single room and losing the structure. Fire stations also need to be designed to adequately house equipment and apparatus, as well as meet the needs of the organization and its firefighters.

Consideration should be given to a fire station's ability to support the jurisdiction's mission as it exists today and into the future. The activities that take place within the fire station should be carefully examined to ensure the structure is adequate in both size and function.

ESCI Associates conducted walk-through inspections of the two Pinole Fire Stations. ESCI utilized a standard check-off list for each facility inspection.

Special attention was made to the building's location, future use viability in terms of serving the community, and the capability of accommodating an increase in staffing levels and emergency response apparatuses in the future.

Figure 28: Fire Station Condition Definitions

EXCELLENT	Like new condition. No visible structural defects. The facility is clean and well maintained. Interior layout is conducive to function with no unnecessary impediments to the apparatus bays or offices. No significant defect history. Building design and construction match the building's purposes.
GOOD	The exterior has a good appearance with minor or no defects. Clean lines, good workflow design, and only minor wear of the building interior. Roof and apparatus apron are in good working order, absent any significant full-thickness cracks or crumbling of apron surface or visible roof patches or leaks. Building design and construction match the building's purposes.
FAIR	The building appears to be structurally sound with weathered appearance and minor to moderate non-structural defects. The interior condition shows normal wear and tear but flows effectively to the apparatus bay or offices. Mechanical systems are in working order. Building design and construction may not match the building's purposes well. Showing increasing age-related maintenance, but with no critical defects.
POOR	The building appears to be cosmetically weathered and worn with potentially structural defects, although not imminently dangerous or unsafe. Large, multiple full-thickness cracks and crumbling of concrete on apron may exist. The roof has evidence of leaking and/or multiple repairs. The interior is poorly maintained or showing signs of advanced deterioration with moderate to significant non-structural defects. Problematic age-related maintenance and/or major defects are evident. May not be well suited to its intended purpose.

The following figures depict the results of ESCI's inspections of the City of Pinole's fire stations.

Figure 29: Pinole Fire Department Station 73 & Administrative Headquarters

Station Name/Number:	73						
Address/Physical Location:	880 Tennent Ave., Pinole, CA 94564						
	General Description: This two-story station houses the on-duty crew, Fire Chief, and Management Analyst.						
Structure							
Construction Type	Type 3 Ordinary						
Date of Construction	1985						
Seismic Protection	Unknown						
Auxiliary Power	Diesel Generator with 1,000 Gallons						
General Condition	Fair						
Number of Apparatus Bays	3	Drive-through bays			3	Back-in bays	
Considerations (ADA, etc.)	No						
Square Footage	Two-story, approximately 3,500 square feet						
Facilities Available							
Separate Rooms/Dormitory	2	Bedrooms		3	Beds	12	Beds in dormitory
Maximum Station Staffing Capability	6 (the Captains' room has 3 murphy beds)						
Exercise/Workout Facilities	Yes						
Kitchen Facilities	Yes						
Individual Lockers/Storage Assigned	Yes						
Shower Facilities	Yes						
Training/Meeting Rooms	Yes						
Washer/Dryer	Yes						
Safety & Security							
Sprinklers	Yes						
Smoke Detection	Yes						
Decontamination/Biohazard Disposal	Yes						
Security	Yes						
Apparatus Exhaust System	Yes						

Figure 30: Pinole Fire Department Station 74

Station Name/Number:	74 (open only to a BC)				
Address	3700 Pinole Valley Rd., Pinole, CA 94564				
	General Description: This single-story station has been closed since 2011.				
Structure					
Construction Type	Type 3 Ordinary				
Date of Construction	2003				
Seismic Protection	None				
Auxiliary Power	Yes				
General Condition	Good				
Number of Apparatus Bays	2	Drive-through bays		0	Back-in bays
Special Considerations (ADA, etc.)	Yes				
Square Footage	2,500				
Facilities Available					
Separate Rooms/Dormitory/Other	3	Bedrooms	3	Beds each	Beds in dormitory
Station Staffing Capability	3				
Exercise/Workout Facilities	No				
Kitchen Facilities	Yes				
Individual Lockers/Storage Assigned	Yes				
Shower Facilities	Yes				
Training/Meeting Rooms	No, front office only				
Washer/Dryer	Yes				
Safety & Security					
Sprinklers	Yes				
Smoke Detection	Yes				
Decontamination/Biohazard Disposal	No				
Security	Yes				
Apparatus Exhaust System	Yes				

Facilities Summary

The two facilities range in age from 16 to 34 years old.

Fire Station 73

The exterior is in good shape. Office space is upstairs adjacent to the central living area/kitchen. The upstairs living/dorm space is non-partitioned and cramped with furniture/gym equipment. Very little workstation or training space is available for personnel. Interior modifications would be useful. An SCBA filling station/storage and bunker room are adjacent to the apparatus bay, separated by a single door, which, if open, exposes both rooms to diesel exhaust. Station 73's office was recently remodeled; however, the crew quarters need remodeling and updating, which may include ADA accommodation. Remodeling should take into account the obligation to provide additional office, workspace, gender segregation of crews, and a shift Battalion Chief.

Fire Station 74

The exterior and grounds are well kept. The interior is in good shape with some carpet wear and tear. The FY 19/20 budget includes \$20,000 for these repairs. Individual dorm rooms and bathrooms allow for gender separation. There is some workstation/training space but little room for expansion. The apparatus bays are in good working order with a bunker room directly adjacent. While small, the station is adequate to house a three-person Engine Company and crossed-staffed Type III wildland engine.

Apparatus/Vehicles

Other than firefighters assigned to stations, response vehicles are undoubtedly the next most important resource of the emergency response system. The delivery of emergency services will be compromised if emergency personnel cannot arrive quickly due to unreliable transportation or if the equipment does not function properly.

Fire apparatus are unique and expensive pieces of equipment, customized to operate efficiently for a narrowly defined mission. An engine may be built in such a way that the compartments fit specific equipment and tools. Virtually every space on a fire vehicle is designed for function. This same vehicle, with its specialized design, does not lend itself well to operate in a completely different capacity, such as a hazardous materials unit or a rescue squad. For this reason, fire apparatus offers little flexibility in use or reassigned purpose. As a result, communities across the country have sought to achieve the longest life span possible for these vehicles. Unfortunately, no piece of mechanical equipment can be expected to last forever. As vehicles age, repairs tend to become more frequent and more complex.

Parts may become more difficult to obtain, and downtime for repairs increases. Given the emergency mission that is so critical to the community, downtime is one of the most frequently identified reasons for apparatus replacement. Because of the expense of fire apparatus, most communities develop replacement plans. To enable such planning, communities often turn to the accepted practice of establishing a life cycle for apparatus that results in an anticipated replacement date for each vehicle. The reality is that it may be best to establish a life cycle for planning purposes, such as the development of replacement funding for various types of apparatus; yet, apply a different method (such as a maintenance and performance review) for determining the actual replacement date, thereby achieving greater cost-effectiveness when possible.

Fire administrators should be concerned about the aging of the fleet and have a funded replacement schedule. As frontline apparatus age, fleet costs will naturally be higher, and more downtime will be associated with necessary repairs and routine maintenance.

It is beyond the scope of work and the expertise of ESCI to provide a mechanical assessment of the apparatus. For a mechanical evaluation of the apparatus, ESCI recommends seeking the services of a certified Emergency Vehicle Technician.

The following figure displays the City of Pinole's Apparatus/Vehicle Inventory as submitted by PFD staff.

Figure 31: PFD Station 73 Apparatus & Vehicle Inventory

Apparatus	Type	Year	Make/Model	Condition	Seating Capacity	Pump Capacity	Tank Capacity
Battalion 7, 7301	SUV	2008	Ford/Expedition	Fair	5	N/A	N/A
Engine E73	Type 1	2015	Spartan	Good	5	1500	500
Reserve E73A	Type 1	2005	HME/Rosenbauer	Fair/Poor	5	1500	1200
Wildland E273	Type 3	2008	Rosenbauer	Good/fair	4	1000	500
Wildland E673	Type 6	2001	Ford F550	Fair/Poor	2	160	200
Fire Chief 7300	SUV	2015	Ford/Intercept	Good	5	N/A	N/A
Utility 73	Pickup	2007	Ford F250	Fair	4	N/A	N/A
New Battalion 7	SUV	2019	Ford Expedition	New	5	N/A	N/A

Apparatus Summary

Generally, fire agencies utilize a guideline as follows to establish capital equipment replacement programs:

- **Engines:** 10 years frontline and 5 years in reserve.
- **Wildland Engines:** 15 years frontline 5 years in reserve.
- **Truck Companies:** 15 years frontline and 5 to 10 years in reserve.
- **Ambulance:** 5 years frontline and 5 years in reserve.

The level of activity, topography, and other factors may influence these guidelines.

- PFD apparatus specifications have not been standardized with the Battalion 7 apparatus.
- The age of PFD's frontline engine is 4 years. It is scheduled to become the reserve engine when the engine currently on order arrives in FY 19/20.
- Reserve Engine 73A is 14 years old and will be replaced by current E73 when the engine on order arrives.
- Wildland Engine 273 is 11 years old, and 673 is 18 years old and should be scheduled for replacement.

Capital Replacement Planning

Long-range capital replacement planning is always a challenge for any municipality. Pinole has done a commendable job of purchasing and maintaining its fleet of fire apparatus using General Fund Reserves. This practice—while not uncommon—has resulted in a significant number of replacements being deferred. Fire vehicles have a readily predictable service life and an easily forecast future replacement cost, which should be preplanned. If future needs are identified and funding is set aside to accommodate the need, the agency will not be dependent on reserves in the future to meet its long-term financial demands. ESCI recommends to clients that, as soon as a new piece of fire apparatus is purchased, funding should start to be set aside for its replacement.

Critical Tasking

Critical tasks are those activities that must be conducted promptly by firefighters at emergency incidents to control the situation, stop loss, and to perform necessary tasks required for a medical emergency. The Pinole Fire Department is responsible for assuring that responding PFD personnel are capable of performing all of the described tasks in a prompt, efficient, and safe manner.

Fires: Critical tasking for fire operations is the minimum number of personnel to perform the tasks required to control a fire in the listed risk category effectively. Major fires (beyond first alarm) will require additional personnel and apparatus.

Emergency Medical: Critical tasking for emergency medical incidents is the minimum number of personnel to perform the tasks required and support the identified strategy based on the department's adopted medical protocol.

The following figure details PFD's available response staffing by type of incident

Figure 32: Critical Tasking
Low Rise Structure Fire

Alarm Assignments

To ensure adequate personnel and apparatus are dispatched to an emergency event, the following first alarm response assignments have been established. "Total PFD Staffing available" is the number identified in the Critical Tasking analysis above. The number of personnel and apparatus required to mitigate an active and complex working incident will require additional resources above and beyond the numbers listed as available. The "Alarm Assignments" are what has been identified as the number of resources and personnel necessary to address the challenges of each identified event.

Figure 33: Alarm Assignments

Low Rise Structure Fire

Total Staffing Provided		4
Total Staffing Needed		14

Absent automatic and mutual aid from surrounding agencies, standalone, PFD is not capable of filling the alarm assignments noted above. In the event PFD Station 74 is reopened, the department will be able to initiate an initial attack and comply with the OSHA two-in/two-out rule.

Staff Scheduling Methodology

PFD utilizes a traditional three platoon system operating on a 48-hour shift rotation to achieve this minimum staffing of three FTEs per day as required. The total number of positions required per jurisdiction becomes a policy decision based on the jurisdiction's needs. The jurisdiction also then establishes the number of employees needed above the minimum to allow for vacancies due to vacation, sick, and other types of leave, yielding an overall number of full-time employees required to ensure that necessary staffing, according to policy, is available daily. This staffing methodology is prevalent across the Western United States for firefighters to work a 24- or 48-hour shift cycle. Studies have been undertaken and remain ongoing in an attempt to better understand the impact of this work cycle on the physiological process.¹⁴ The science indicates that sleep is important and that going without sleep for too long or interrupting the sleep rhythm leads to physical and cognitive problems. That said, no easy answer to the problem exists. Intuitively, the problems would be exacerbated in a busy station and lessened in a less busy station.

All personnel are trained as firefighters, with most trained at a minimum of Emergency Medical Technician (EMT) level. Six have been trained to the Paramedic level. The department provides Advanced Life Support (ALS) services utilizing its one Engine Company. Ambulance response and patient transport are currently assigned to CCFPD.

¹⁴ Is the firefighter 48/96 shift a health hazard? Sara Jahnke, FireRescue1, <https://www.firerescue1/fire-rehab/articles/223601018-is-the-firefighter-48-96-shift-a-health-hazard/>.

SERVICE DEMAND & INCIDENT STAFFING PERFORMANCE

Service delivery is the foundation of any service-oriented organization. Without an understanding of how services are organized, deployed, and managed, one cannot quantify efficiency and effectiveness. This section of the report will analyze multiple facets of the current delivery of fire services for the City of Pinole, including the identification of incidents by type and frequency, deployment analysis, system reliability, and a summary of performance. By understanding current performance and how the system functions, goals and objectives for future performance improvements can be established and implemented.

Service-Demand Study

Incidents by Type & Frequency

When and how demands for services occur can follow predictable patterns over time. To identify those patterns occurring in Pinole, ESCI conducted an analysis and geographic display of current service demand by incident type and temporal variation using dispatch data obtained from the Contra Costa Fire Protection District. Incident types were selected based on the classification system established by the National Fire Incident Reporting System (NFIRS); temporal variation, or the way service demand changes over time, was analyzed by the month, by the day, and by the hour.

The following figure provides a historical view of service types and frequency of incidents over the past nine years (2009–2017) *only within the City of Pinole and Contract 2/Upper Pinole Valley Road*, as the Contract/Tara Hills Area incident data were not provided. This figure shows the incidents in which Station 73 and BC7 responded. Incidents that did not indicate that they were a fire or an EMS incident, such as HazMat or Good Intent, were placed in the “Other” category.

Figure 34: PFD Service Demand by Year & Type, 2009–2017, City of Pinole & Contract 2

Over the nine years, the total number of incidents increased from 976 in 2009 to 1,805 in 2017, an average increase of 8 percent per year, with noticeable increases in 2010 and 2013 (22% and 17%, respectively). Without those outliers, the average increase per year is 4%.

Additional incident data for the calendar year 2018 was received from CCRFCC that did include incident data for the Contract/Tara Hills area, resulting in a separate detailed analysis. The calendar year 2018 data showed 2,020 incidents, including 399 in Contract/Tara Hills. The incidents by type for the calendar year 2018 are shown in the following figure.

Figure 35: Service Demand by Type, City of Pinole & Both Contract Areas, 2018

As illustrated in Figure 35, EMS represents the greatest impact on service demand at 78.42 percent, followed by accident calls, which accounted for 6.58 percent of incidents. Accident data includes motorcycle, vehicle, bicycle, and pedestrian incidents.

The following figure displays a comparison of the total number of incidents (2,020) in 2018 within the City of Pinole and the two contract areas, as compared to other similar-sized urban fire departments around the country.

Figure 36: Incidents per 1,000 Population, 2018, City of Pinole & Both Contract Areas

Dept. Size	Number of Incidents/1,000
Rural Low Range	56
Regional Median	93
Pinole FD	104
Urban Low Range	111
Rural High Range	117
Urban High Range	179

At 104 calls per 1,000 population, PFD has a higher than the regional median number of calls per 1,000 population but slightly lower than the urban high range.

The following figure displays a comparison of the total number of fire incidents in Pinole as compared to other similar-sized urban fire departments around the country. This figure uses incidents within the City of Pinole and the two contract areas (65 fires in 2018).

Figure 37: Fire Incidents per 1,000 Population, 2018, City of Pinole & Both Contract Areas

Dept. Size	Fires/1,000
Pinole FD	3.5
Regional Median	2.5
Rural High Range	17.2
Rural Low Range	4
Urban High Range	4.7
Urban Low Range	2.9

PFD's 3.4 fires per 1,000 population are just above the regional median of 2.5 fires per 1,000 population. It is comparable to most other Urban Low Range and Rural Low Range fire departments.

The next figure is fire loss per capita compared with other national and regional departments. In 2018, at \$22.90 per capita, PFD's fire loss was much lower compared to the national average and very comparable to the regional average.

Figure 38: Fire Loss per Capita, 2018**Figure 39: Comparison Chart, Fire Loss per Capita**

Depts.	Fire Loss per Capita (in dollars)
Regional Average	\$24.70
National Average	\$36.10
Pinole	\$22.90

Temporal Analysis

In addition to understanding the types and frequency of service demand, an understanding of when these events occur is critical to the understanding of when system demand will most likely reach its peak. Knowing the high demand periods will assist administrators in determining whether staffing levels are adequate for the demand and also in scheduling additional duties such as training, fire safety inspections, and vehicle maintenance.

The following figure shows the temporal variation of PFD's service area demand by month during 2018. There is only minor variation in workload by month. The winter months of January and December are the busiest months with August following closely.

Figure 40: Service Demand by Month, 2018, City of Pinole & Both Contract Areas

The next figure illustrates service demand by day of the week. Again, only minor variations in workload exist by day of the week, although Monday is the busiest.

Figure 41: Service Demand by Weekday, 2018, City of Pinole & Both Contract Areas

Finally, the following figure shows service demand by the hour. Workload increases significantly during daytime hours as compared to nighttime hours.

Figure 42: Service Demand by Hour, 2018, City of Pinole & Both Contract Areas

Peak workload is between 9:00 a.m. and 7:00 p.m., and it is most heavily concentrated during the commute hours.

Spatial Analysis

In addition to the temporal analysis, it is useful to examine the geographic distribution of service demand. The following figures indicate the distribution of emergency incidents in PFD during 2018. The incident data received from Contra Costa County Dispatch uses a "road address range" system rather than a "site address" system. This always places a data point on a roadway rather than on the adjacent structure or actual site of the incident

The first figure displays the number of incidents per square mile within various parts of the city. The area of greatest service demand is the northwest and central portions of the city.

Figure 43: Service-Demand Density, City of Pinole & Both Contract Areas

The two densest concentrations of incidents are at Appian Way/Michael Drive, which is adjacent to a large commercial/retail development; the second densest concentration of incidents is Estates Ave/Paloma—which is adjacent to a senior retirement center. The third densest concentration is at the Tara Hills Mobile Home Park, a “55 years and over” community. Again, the use of street address ranges to place a data point might lead to an interpretation of “dangerous intersections,” where the reality is the incident is related to proximal activities or populations.

While the service demand density reflects all calls served within the PFD service area, service demand can vary based on incident type. The following figure displays the location of all fire types occurring within the PFD’s service area during 2018.

Figure 44: All Fire Types, 2018, City of Pinole & Both Contract Areas

The fire incidents are distributed widely but predominantly in the PFD's northwestern half. Again, it appears as though all the fires are in roadways, but only 21 percent (14 of the 65 fires) involved a vehicle. The remaining 79 percent were structural, electrical, or vegetation fires in areas adjacent to roadways.

The following figure depicts the locations of the 20 commercial and residential structure fires in 2018.

Figure 45: Structure Fires, Commercial & Residential, 2018, City of Pinole & Both Contract Areas

These structure fires were distributed equally throughout the PFD's service area.

The following figure compares structure fires over the last decade by the hour of the day. Other than no structure fires reported at the 5 a.m. hour within the entire decade, structure fires do occur throughout the day and night, with greater incident reporting in the latter part of the day and into the evening.

Figure 46: Structure Fires by Hour of Day, 2009–2018

Again, the 2009–2017 incident data did not include any incidents for the Tara Hills contract area, whereas the 2018 incident data did include incident data for that contract area. In 2018, there were three structure fires in the Tara Hills contract area; one reported at noon, one at 8 p.m., and one at 9 p.m.

Similarly, emergency medical incidents also occur in greater concentration in areas of higher population density. The next figure depicts the EMS incidents in the PFD service area in 2018.

Figure 47: Emergency Medical Incidents, 2018, City of Pinole & Both Contract Areas

The incidents are widely scattered but primarily located in the northwestern portion of the PFD service area.

As shown previously, EMS calls are the primary incident type. The following figure displays emergency medical incidents per square mile during 2018.

Figure 48: Emergency Medical Incidents per Square Mile, 2018, City of Pinole & Both Contract Areas

The previously identified areas of incident density re-appear, the commercial/retail area, the senior retirement home, and the senior mobile home park.

EMS response workload also varies by the hour of the day, as shown in the following figure. As it is the predominant type of incident, it closely follows the total workload by the hour of the day.

Figure 49: EMS Responses by Hour of Day, 2018, City of Pinole & Both Contract Areas

Unit Workload Analysis

A review of workload by response unit can reveal much about response time performance. Although fire stations and response units may be distributed in a manner to provide quick response, that level of performance can only be obtained when the response unit is available in its primary service area. If a response unit is already on an incident and a concurrent request for service is received, a more distant response unit will need to be dispatched. This will increase response times.

Response Unit Workload

The workload of individual response units during the study period is shown in the following figure. The individual response unit workload can be greater than the workload in its home station area. Many incidents, such as structure fires, require more than one response unit. The next figure depicts the total number of calls (2,272) received by PFD in 2018, regardless of jurisdiction.

Figure 50: PFD Response Unit Workload, 2018

As the only fully staffed apparatus, Engine 73 is naturally the busiest in the PFD. Not shown in the figure are Reserve Engines E73A and E473, which had limited use, with one and two calls, respectively.

The following figure shows the extent of these calls, reaching from the Carquinez Bridge to San Pablo. In 2018, there were 2,020 incidents within the city and 401 calls outside of the City of Pinole.

Figure 51: PFD Incident Locations by Apparatus, 2018

The amount of time a given unit is committed to an incident is also an important workload factor. The following figure illustrates the average time each unit was committed to an incident, from initial dispatch until it was available for another incident. Multiple units responded to the same incident, such as the Battalion Chief and the Engine Crew. The more complex an incident, the greater the number of resources are required.

Figure 52: Average Time Committed to an Incident by Unit, 2018

Unit	Responses	Average per Response
Battalion 7	355	0:29:59 minutes
Engine 73	2,060	0:20:49 minutes
Engine 273	210	0:21:55 minutes

Unit Hour Utilization

Unit hour utilization (UHU) is an important workload indicator. It is calculated by dividing the total time a unit is committed to all incidents during a year divided by the total time in a year. UHU describes the amount of time expressed as a percentage that a unit is not available for a response since it is already committed to an incident. The larger the percentage, the greater a unit's utilization, and the less available it is for assignment to an incident. Unit hour utilization is an important statistic to monitor for those fire agencies using percentile-based performance standards, as does PFD. In PFD's case, where performance is measured at the 90th percentile, unit hour utilization greater than 10 percent means that the response unit will not be able to provide on-time responses to its 90 percent target, even if response is its only activity. While Pinole Engine 73 is not at 10 percent UHU at this time, absent the addition of a second engine in Pinole, it will most likely be at and exceed the threshold in a few years.

Figure 53: Unit Hour Utilization

Based on the historical incident data from 2009 to 2017, call volume is projected to increase by 3 percent per year, which, as mentioned above, did not include the Contract/Tara Hills incidents. Approximately 20 percent of the PFD incidents came from this area in 2018 incident data.

Distribution Study

Next, an overview of the current deployment strategy, which includes facility and apparatus locations, was analyzed using Geographic Information Systems (GIS) software to identify potential service gaps and redundancies of resources. The following figure is an overview of the PFD service area. PFD stations and nearby adjacent agency stations are displayed.

Figure 54: PFD Service Area

The City of Pinole encompasses approximately 11.6 square miles. Of that, 5.2 square miles are land, with the 6.4 sq. miles remainder comprised of the bay. The PFD provides service to the city as well as to the two contract areas depicted. PFD staffs one fire station located within the city.

An important consideration for fire departments and other service delivery organizations is to understand the location of population concentrations. If the majority of people live in a concentrated area, it is intuitive to anticipate that that area will also request the highest levels of service demand as calls for service are generally initiated by people.

The definitions per the Center for Public Safety Excellence Standards of Cover 6th edition:

- **Urban:** population of over 30,000 and or a population density of 2,000 per sq. mile
- **Suburban:** population of 10,000 to 29,000 and or a density of 1,000 to 2,000 per sq. mile
- **Rural:** population of less than 10,000 or 1,000 per sq. mile

The following figure presents Pinole's population by census block, based on the 2010 census. Census data divides a census defined place, such as a city or county, into small areas known as *census blocks*. The boundaries follow natural or manmade features such as rivers, ridgelines, or roads. The area of a census block can be calculated in fractions of a square mile. The total counted population for each census block is divided by the area, resulting in an estimate of relative population density. The densest population area of the City of Pinole is in the northwest.

Figure 55: Population per Square Mile, 2012

The total population used in this study was 19,364, which is classified as Suburban. However, the density of various areas of Pinole shifts it into an Urban classification. The majority of Pinole has 2,000 to 5,000 people per square mile. However, much of the northwest area of the City of Pinole and the western contract area have population densities of greater than 5,000 people per square mile, which is classified as Urban. Pinole has a small but densely concentrated population.

Next, the distribution of PFD resources will be examined and compared to the Insurance Services Office (ISO) and the National Fire Protection Association (NFPA) criteria. These standards provide baseline criteria for comparison of PFD's deployment strategy. These are important standards for comparison because, while ISO criteria focus on fire suppression capabilities for insurance purposes, NFPA standards establish a foundation for overall system benchmarking for fire suppression, rescue, and other activities fire departments may be required to perform.

ISO Distribution

The ISO Public Protection Classification (PPC®) score was developed for communities to provide recommendations for key areas of improvement. The PPC system is a national system used by the New Jersey-based advisory organization ISO to provide insurance providers with a classification rating of a local community's fire protection. The PPC score classifies communities based upon a rating scale of 1 (best protection) to 10 (no protection) and assesses all areas related to fire protection broken into four major categories, which include: emergency dispatch and communications (10 points), water system supply and distribution capabilities (40 points), the fire department (50 points), and Community Risk Reduction (5.5 points).¹⁵ The PPC score is developed using the Fire Suppression Rating Schedule (FSRS), which outlines sub-categories and the detailed requirements for each area of the evaluation.

The first component of ISO distribution is the ability of a fire department to arrive on-scene equipped with personnel, equipment, and sufficient water to effectively mitigate a fire. To determine whether a structure is eligible to receive a PPC rating better than 10, indicating that the fire department does not meet minimum ISO criteria for the structure to receive a rating, a service area of five road miles from the fire station is generally used. The only area of Pinole beyond five miles of a fire station is in the roadless southeast portion, as depicted in the following figure.

¹⁵ ISO uses a 100-point grading scale, yet 105.5 total points are available to each agency. The Fire Service Rating Scale lists a large number of items (facilities and practices) that a community should have to fight fires effectively. The schedule is performance based and assigns credit points for each item. Using the credit points and various formulas, ISO then calculates a total score on a scale of 0 to 100 with 5.5 points being available as extra-credit.

Figure 56: Pinole Fire Station 73, 5-Mile ISO Coverage

The next figure illustrates 1.5-mile coverage from PFD Station 73. ISO is concerned with the provision of fire suppression services to the built-upon areas, meaning that ISO is less concerned with the protection of unpopulated regions of a service area that lack permanent structures.

Figure 57: Fire Station 73, 1.5-Mile ISO Coverage

Much of the developed residential area in the eastern part of the city is beyond 1.5 miles of Station 73.

Like the maximum service area of engine companies shown in Figure 57, there is a maximum service area for ladder companies. The next figure illustrates the 2.5-mile maximum service area for the closest ladder company, Rodeo-Hercules FPD Station 76 for 1st Alarm and El Cerrito Station 71 for Mutual Aid.

Figure 58: Fire Station Distribution, 2.5-Mile Ladder Company ISO Criteria

Neither ladder company can fully cover the PFD. RHPD Ladder 76 extends approximately 0.5-mile into PFD, while the El Cerrito ladder would still be 4 to 5 miles away.

The following figure shows the 2.5-mile ISO coverage of three- and four-story buildings within the City of Pinole.

Figure 59: Detail of Station 76, 2.5 mi. ISO coverage for Pinole Three- & Four-Story Buildings

None of these taller structures are within this 2.5-mile coverage, although the Pinole Vista Apartments are a mere 300 feet further.

PFD Goals Distribution

While ISO criteria are focused on fire suppression activities exclusively, PFD's goals define expected performance for all response services. PFD advised ESCI to utilize NFPA standards. These standards establish a four-minute travel time objective for the arrival of the first capable response unit. This, and PFD's other response performance goals are measured using that same standard.

The following figure models four-minute travel time coverage using posted street speeds from PFD Station 73. The model travel time does not account for traffic congestion.

Figure 60: Station 73 Four-Minute Model Travel Time (Entire Response District)

A portion of the developed residential area in the southeast portion of the city is beyond the four-minute travel time footprint. The next figure shows the four-minute travel time footprint allocated to the closest station, should Station 74 be re-opened.

Figure 61: Station 73 & 74 Four-Minute Model Travel Time

Concentration & Effective Response Force Capability Analysis

Effective Response Force (ERF) is the number of personnel and apparatus required to be present on the scene of an emergency to perform the critical tasks in a manner to effectively mitigate the incident without unnecessary loss of life or property. The ERF is specific to each type of incident and is based on the critical tasks that must be performed. Per NFPA 1710, a moderate risk building fire is modeled for this analysis.

The NFPA response time goal for the delivery of the full ERF to a moderate risk building fire is within 8 minutes, 90 percent of the time. PFD has defined the minimum full effective response force for moderate risk building fires as four fire engines, one ladder truck, and two Battalion Chiefs for a total of 21 firefighters. Eight minutes of travel time is allowed to assemble the defined, fully effective response force on the scene.

The next figure shows the ERF for the 20 structure fires that occurred in 2018, showing the 90th percentile travel time for the on-scene resources. The travel time is not cumulative, as the various resources could be traveling simultaneously. This figure includes the resources of five adjacent automatic aid stations.

Of the 20 structure fires, E73 was the first on-scene at 12 incidents (60%). E169 and E170 were the first on-scene at three incidents (15%); BC7 was the first on-scene at three incidents (15%), while E273 was first on-scene twice (10%).

Figure 62: Effective Response Force, Structure Fires, 90th Percentile, in the City of Pinole & Both Contract Areas

Engine 73 or BC7 was second on-scene at nine incidents (45%). None of the structure fire incidents achieved the 8-minute travel time standard for all apparatus arriving on-scene.

In 2018, PFD responded to 20 fires—10 commercial and 10 residential. The following figure shows the incident type and the total number of apparatus that were assigned for the year. Much of the incident data did not have timestamps for all the units assigned, possibly due to being canceled en route.

Figure 63: Structure Fire Aid to PFD, 2018

Using the data with complete arrival timestamps, there were two incidents, both residential fires, where a maximum number of firefighters on-scene were 14 or 15 firefighters, depending on how many firefighters were on the adjacent station's ladder trucks. None of the incidents achieved 21 firefighters on-scene.

Concurrency

One way to look at resource workload is to examine the number of times multiple incidents happen within the same timeframe in each station area. ESCI examined incidents during the study period to determine the frequency of concurrent events. This is important because concurrent incidents can stretch available resources and extend response times.

The following figure shows the number of times during the study period that one or more incidents occurred concurrently. This shows that in most cases (1,767), only one incident was in progress at a time. However, 568 times, there were two incidents in progress at the same time; 86 times, there were three or more incidents in progress at the same time, and once there were six incidents in progress at the same time.

Figure 64: Incident Concurrency, 2018 (By Time of Day)

Station	Incidents 9:00 a.m.–8:59 p.m.	Incidents 9:00 p.m.–8:59 a.m.	Incidents per hour 9:00 a.m.–8:59 p.m.	Incidents per hour 9:00 p.m.–8:59 a.m.
73	1,697	930	141	77

Figure 65: Incident Concurrency, 2018 (By Number of Concurrent Incidents)

City of Pinole & Both Contract Areas

Concurrent Incidents	Count
1	1,767
2	568
3	77
4	7
5	1
6	1

It is important to note that Pinole only staffs one response unit. As a result, anytime there is more than one incident, the City is dependent on outside aid.

Peak workload periods occur every day of the week. The following figure illustrates the Station 73 workload by the time of day during the study period.

Figure 66: PFD Overall Incidents by Hour, 2018, Calls in the City of Pinole & Both Contract Areas

Performance Summary

Incident data for the period between January 1 and December 31, 2018, was evaluated in detail to determine PFD's current performance. Data was obtained from PFD incident reports and the dispatch center's computer-aided dispatch system.

Only incidents occurring within the PFD service area that were dispatched as a "priority" are included in the analysis. Priority incidents involve emergencies to which the fire department initiated a "code 3" (using warning lights and sirens) response (1,706 incidents during 2018). Incidents initially dispatched as non-emergency responses were excluded. Performance is reported based on the final determination of the incident type, which may be different than how it was initially dispatched. For example, a person may report smoke coming from a building that turns out to only be steam. It may have been dispatched as a structure fire, but its final type would be reported as "good intent."

Each phase of the incident response sequence was evaluated to determine the current performance. This allows an analysis of each phase to determine where opportunities might exist for improvement.

The total incident response time continuum consists of several steps, beginning with the initiation of the incident and concluding with the appropriate mitigation of the incident. The time required for each of the components varies. The policies and practices of the Department directly influence some of the steps.

ESCI compared PFD's response performance to the national consensus standard for response performance found in the NFPA 1710: *Standard for the Organization and Deployment of Fire Suppression Operations, Emergency Medical Operations, and Special Operations to the Public by Career Fire Departments*, 2010 Edition. ESCI compared the various primary answer points and CCRFCC performance to the PFD's goals as well as standards found in NFPA 1221: *Standard for the Installation, Maintenance, and Use of Emergency Services Communications Systems*, 2013 Edition.

The following figure summarizes the performance standards found in the National Fire Protection Association (NFPA) documents.

Figure 67: Summary of NFPA Performance Standards

Incident Interval	Performance Goal
911 call answer time (time from the first ring to answer)	Within 15 seconds, 95% of the time Within 40 seconds, 99% of the time
Call transfer time (time from the answer to acceptance at the secondary dispatch center)	Within 30 seconds, 95% of the time
Call process time (time from acceptance at the dispatch center until notification of response units)	Within 70 seconds, 90% of the time
Turnout time (time from notification of response personnel until the initiation of movement towards the incident)	Within 60 seconds, 90% of the time
First unit travel time (time from initiation of response until the arrival of the first unit at the incident)	Within 4 minutes, 90% of the time
First unit response time (time from dispatch until the arrival of the first unit at the incident)	Within 5 minutes, 90% of the time
Full effective response force travel time (time from dispatch until all units initially dispatched arrive at the incident. Response resources needed for a moderate risk building fire are used for the evaluation.)	Within 8 minutes, 90% of the time

In keeping with NFPA 1710 and 1221, all response time elements are reported at a given percentile. Percentile reporting is a methodology by which response times are sorted from least to greatest, and a “line” is drawn at a certain percentage of the calls to determine the percentile. The point at which the “line” crosses the 90th percentile, for example, is the percentile time performance. Thus, 90 percent of times were at or less than the result. Only 10 percent were longer.

Percentiles differ greatly from averages. Averaging calculates response times by adding all response times together and then dividing the total number of minutes by the total number of responses (mean average). Measuring and reporting average response times is not recommended. Using averages does not give a clear picture of response performance because it does not clearly identify the number and extent of events with times beyond the stated performance goal.

What follows is a detailed description and review of each phase of the response time continuum. All phases will be compared to the NFPA performance goals.

Call Processing

Most emergency incidents are reported by telephone to the 911 center. Call takers must quickly elicit accurate information about the nature and location of the incident from persons who are apt to be excited. A citizen well-trained in how to report emergencies can reduce the time required for this phase. The dispatcher must identify the correct units based on incident type and location, dispatch them to the emergency, and continue to update information about the emergency while the units respond. This phase begins when the 911 call is answered at the primary Public Safety Answer Point (PSAP) and ends when response personnel are notified of the emergency. This phase, which has two parts, is labeled “call processing time.”

NFPA 1221 recommends that 911 calls be answered within 15 seconds, 95 percent of the time (within 40 seconds, 99 percent of the time) and then be transferred to the dispatch center within 30 seconds, 95 percent of the time (within 40 seconds, 99 percent of the time). None of the primary PSAPs provided information necessary to quantify current performance at this time.

The second part of call processing time, dispatch time, begins when the call is received at the dispatch center (CCRFCC) and ends when response units are notified of the incident. PFD's goal prescribes that this phase should occur within 70 seconds, 90 percent of the time.

The following figure illustrates performance by CCRFCC from the time it receives the call until it notifies response units. Overall performance was 2 minutes, 15 seconds, 90 percent of the time.

**Figure 68: CCRFCC Dispatch Time Performance,
Calls in the City of Pinole & Both Contract Areas**

Incident Type	Processing Time
EMS	0:02:25
Fire	0:01:57
Other	0:01:47
All Types	0:02:15

Turnout Time

Turnout time is a response phase controllable by the fire department. This phase begins at the notification of an emergency in progress by the dispatch center and ends when personnel and apparatus begin to move towards the incident location. Personnel must don appropriate equipment, assemble on the response vehicle, and begin travel to the incident. Good training and proper fire station design can minimize the time required for this step.

The NFPA performance goal for turnout time is within 90 seconds, 90 percent of the time. The following figure lists turnout time for all incidents as well as specific incident types.

**Figure 69: PFD Turnout Time Performance,
Calls in the City of Pinole & Both Contract Areas**

Incident Type	Turnout Time
EMS	0:00:53
Fire	0:02:15
Other	0:01:36
All Types	0:01:28

Turnout time for all incidents is within 1 minute, 28 seconds, 90 percent of the time, meeting their performance goal. The turnout time for fire incidents is above the performance goal.

Distribution and Initial Arriving Unit Travel Time

Travel time is potentially the longest of the response phases. The distance between the fire station and the location of the emergency influences response time the most. The quality and connectivity of streets, traffic, driver training, geography, and environmental conditions are also factors. This phase begins with the initial apparatus movement towards the incident location and ends when response personnel and apparatus arrive at the emergency's location. Within the NFPA goal, 4 minutes is allowed for the first response unit to arrive at an incident.

PFD and automatic aid units are selected for the response to an incident based on a calculation by the dispatch computer system to determine the unit that will have the shortest travel time. This method ensures the shortest possible travel times.

The following figure lists travel time for all priority incidents, as well as specific incident types, for all units responding to the City of Pinole and the two contract areas.

Figure 70: Travel Time Performance, First Arriving Unit, Incidents in the City of Pinole & Both Contract Areas

Incident Type	90% Percentile Travel Time
EMS	0:07:45
Fire	0:08:01
Other	0:07:55
All Types	0:07:45

Overall, travel time for all incidents within the city for all responding units is within 7 minutes, 45 seconds, 90 percent of the time. This does not meet the performance objectives. It is unknown what causes the lengthy travel time, whether it is congested traffic, traffic signal timing, or steep terrain issues.

Travel Time Performance by Region

Travel time performance by region is variable and influenced by a number of factors, including individual station area workload and the number of times a station must cover another station's area. Additional factors include the size of the station area and the street system serving it. More highly connected, grid-patterned street systems contribute to faster response times than do areas with meandering streets with numerous dead-ends.

The following figure evaluates travel time performance by sub-area using Inverse Distance Weighting analysis (IDW). This process uses travel time for known points (actual incidents) to predict travel time for the area surrounding the actual incident. Better performance is generally noted near fire stations, with progressively longer response times for those incidents more distant from the stations.

Figure 71: Actual Travel Time Performance by Region, Calls in the City of Pinole & Both Contract Areas

The four-minute travel time objective is generally met near the fire station, with progressively longer travel times at further distances. The pockets of 10 to 12-minute travel times near the station do correspond to hilly locations with many turns to reach the interior of a neighborhood.

First Arriving Unit Response Time

Response time is defined as that period between the notification of response personnel by the dispatch center that an emergency is in progress until the arrival of the first fire department response unit at the emergency. When turnout time and travel time are combined, the NFPA performance goal for response time is within 5 minutes, 90 percent of the time.

The following figure illustrates the response time for all priority incidents as well as specific incident types during 2018.

Figure 72: Response Time Performance, First Arriving Unit, Calls in the City of Pinole & Both Contract Areas

Incident Type	Time
EMS	00:08:11
Fire	00:09:32
Other	00:08:37
All Types	00:08:17

Overall, response time for all priority incidents was within 8 minutes, 17 seconds, 90 percent of the time.

The following figure represents the number of calls in 2018, where the travel time was greater than 4 minutes. There are notable spikes at the commute hours, 7 to 9 a.m. and again from 5 to 8 p.m.

Figure 73: PFD Number of Calls Over a Four-Minute Travel Time by the Incident Hour, Calls in the City of Pinole & Both Contract Areas

First Arriving Unit Received to Arrival Time

From the customer's standpoint, response time begins when the emergency occurs. Their first contact with emergency services is when they call for help, usually by dialing 911. Received to arrival time combines answer/transfer, call processing, turnout, and travel time. As described in the "Call Processing" discussion in this section, data for call answer and transfer time is not available. The time the call was "received" will either be the actual answer time for calls created by PSAPs other than CCRFCC or the time CCRFCC received the call transferred by another agency. When the PFD performance goals are combined, received to arrival time should be within 6 minutes, 90 percent of the time.

The next figure shows received to arrival performance during 2018 at the 90th percentile for priority incidents within the PFD service area. Overall, received time to arrival time is within 9 minutes, 55 seconds, 90 percent of the time.

**Figure 74: Received to Arrival Time, First Arriving Unit
Calls in the City of Pinole & Both Contract Areas**

Incident Type	Time
EMS	00:10:00
Fire	00:10:30
Other	00:09:33
All Types	00:09:55

Second Unit Arrival Time

The PFD fire engine is staffed with three personnel. Safety regulations require that at least four firefighters be on scene before firefighters can enter a burning building. The only exception is if it is known that a person is inside the building and needs to be rescued. Current staffing levels at PFD require the arrival of a second response unit before non-rescue interior firefighting activities can be initiated.

Incident data for building fires during the study period were analyzed to determine the time the second response unit arrived on the scene. The data indicated that the second unit arrived on the scene of a structure fire within 6 minutes, 45 seconds, 90 percent of the time.

The dispatch data uses a priority coding system for incidents, as shown in the following figure.

Figure 75: CCRFCC Priority Codes

Priority	Description
1	P1 Emergency
2	P2 Emergency
3	P3 Urgent
4	P4 Routine
5	P5 Non-Emergency
6	P6 Non-Emergency
7	P7 Triage status that should be updated to another priority during call taking.
8	P8 No Response
9	P9 Test

Priority 1–4 are Code 3, “lights/sirens.” All other priorities are Code 2, no lights/sirens.

The following figure shows the 2018 incidents within the City of Pinole and the two contract areas where adjacent fire agencies were dispatched. There were 3,860 dispatch requests for aid from adjacent fire agencies. This number reflects the dispatch of multiple units not the total number of calls.

Figure 76: Dispatched Aid for PFD, Calls in the City of Pinole & Both Contract Areas

Of those 3,860 requests, 940 incidents did not have a timestamp for “Arrived on Scene”—perhaps these units were canceled en route. The adjacent fire agency units that responded to the remaining 2,920 incidents are shown in the following figure.

Figure 77: Adjacent Fire Agency Assistance, PFD available

Unit	# of Requests	Unit	# of Requests	Unit Name	# of Requests
E169	124	E163	2	E1676	1
Q176	82	E168	2	E369	1
E175	52	E178	2	E372	1
E176	20	E375	2	E376	1
E170	12	E378	2	E379	1
R369	8	1122	1	HM21	1
SQ70	7	BC4	1	HM4	1
BC71	5	E107	1	T114	1
BC64	2	E142	1	USCG	1

In 2018, 27 different fire agency units responded to PFD, while PFD was available. CCFPD Station 69's engine was the most frequent responding engine at 124 requests.

On occasion, the engine from Station 73 was not available to respond to an incident as it had not been cleared from a previous incident. Available engines from the adjacent agencies were dispatched to the City of Pinole and the two contract areas in their stead. The following figure shows the frequency of adjacent agencies' assistance.

Figure 78: Adjacent Fire Agency Engine Assistance, PFD not available

Again, the engine from CCFPD Station 69 was the most frequent responder when E73 was not available, followed by the engine from Rodeo-Hercules Station 75.

The adjacent agencies' engines were dispatched to a variety of incident types, as the next figure shows.

Figure 79: Incident Types; PFD not available

Incident Type	Number of Incidents
5150 PD Request	2
EMS—Alpha (Fall)	1
EMS—Alpha *Code 2	4
EMS—B Ltd	2
EMS—Bravo	12
EMS—Charlie	31
EMS—Delta	39
EMS—Echo	1
EMS—Richmond	2
EMS—Alpha Code 2 With Engine	2
EMS—Medical Emergency	1
Fire—Veh Large	3
Fire Alarm—Commercial	6
Fire Alarm—Residential	7
Fire Exterior	2
On View	4
Single Engine C2	2
Single Engine C3	5
Veh Accident Motorcycle	4

The most frequent type of incident of the adjacent fire agencies' response was a variety of EMS incidents.

The following information relates to codes utilized for EMS calls shown in Figure 79.

**Figure 80: List of Common Emergency Medical Dispatch (EMD) Codes
Used by Most Dispatch Agencies in the United States**

Code	Type	BLS/ALS	Emergency Status
Alpha	Non-Life-Threatening	Basic Life Support	Non-Emergency
Bravo	Possibly Life-Threatening	Basic Life Support	Emergency
Charlie	Life-Threatening	Advanced Life Support	Emergency
Delta	Serious Life Threat	Advanced Life Support	Emergency
Echo	Life Status Questionable	Closest Available (Multiple Resources Sent)	Emergency
Omega "Ω"	Public Assist Only	Basic Life Support	Non-Emergency

FUTURE SYSTEM DEMAND PROJECTIONS

The City provided a population forecast. Future population growth for Pinole is forecast to average 0.79 percent per year through 2050. Using this estimate, the city's population could reach 22,228 by 2050. This projection is based on historical growth. Future growth projections have not been available from other sources. It is unlikely that actual projections will differ much unless city zoning density increases occur.

Incident Workload Projection

The most significant predictor of future incident workload is population and historical call volume; 100 percent of requests for emergency medical service is people driven. The National Fire Protection Association reports that approximately 70 percent of all fires are the result of people either doing something they should not have (i.e., misuse of an ignition source) or not doing something they should have (i.e., failure to maintain equipment). It is reasonable to use forecast population growth to predict future fire department response workload.

The current department services utilization rate is 110 incidents per 1,000 population; the PFD has a higher than the regional median number of calls per 1,000 population but slightly lower than the urban high range.

The utilization of fire department services is expected to grow modestly over time at a rate of about 3 percent per year based on the nine years of historical incident data. This, plus expected population growth, will increase the PFD's workload, as shown in the following figure. Response workload could reach approximately 4,300 responses per year by 2038, driven primarily by requests for emergency medical care. Figure 81 utilizes three data sets to provide response forecasts. PFD data is based on the fire department's fire records management system. "Calls in the City" used call history within the city limits, and "Calls in the Service Area," used data from within the city limits and the contract areas.

Figure 81: Response Forecast, 2018–2038

Community Risk Factors

This section analyzes risks that are present within the study area that potentially threaten people and property. These risks are identified to assist the study area agency in planning where to locate response resources in the types and numbers necessary to effectively respond to likely emergencies. While not all hazards of individual occupancies can be considered—that is beyond the scope of the study—there are risks that seem to be relevant to the area. ESCI recommends that the department be aware of and rate the hazard and risks in terms of frequency and severity within the jurisdiction.

The City of Pinole fire service area has many risks, including the shoreline, a significant wildland interface, underground pipelines, a freeway, and a railroad. The arrangement of the service area is constrained by topography such that few areas have grid coverage from the Pinole Fire Station and neighboring automatic aid from other fire departments. Due to this configuration, the response is funneled through gateways at the foot of each valley. Significant challenges and risks exist in the City of Pinole.

The following figure represents a method of identifying and analyzing risks within Pinole. This figure should be reviewed annually by department leadership with the goal of improvement through the continuous re-evaluation of the risks facing the city.

Figure 82: Risk Identification and Analysis Process¹

Step	Action
Hazard Identification	Identify hazards.
	What is the probability this hazard will occur?
	Is this hazard a significant threat to your jurisdiction?
	Approximately how often does this hazard occur in your jurisdiction?
Vulnerability Assessment	For each hazard identified in the hazard identification process, consider each of the five factors. Factor 1: Danger/Destruction/Personal harm Factor 2: Economic Impacts Factor 3: Environmental Impacts Factor 4: Social Impacts Factor 5: Political Considerations
	Score the vulnerability of this hazard.
	Reconsider the priority of each hazard based on vulnerability.
Risk Rating Score	Risk Rating = Probability ² X Vulnerability ²

¹ Adapted from the Community Risk Reduction Model, United States Fire Administration, National Fire Academy

² Probability and Vulnerability are rated as 3 = High, 2 = Moderate, 1 = Low

The fire service assesses the relative risk of properties based on several factors: the service area population and population density, the demographics of the population, local land use and development, and the geography and natural risks present within the community. These factors affect the number and type of resources (both personnel and apparatus) necessary to mitigate an emergency. Properties with high fire and life risk often require greater numbers of personnel and apparatus. Therefore, staffing and deployment decisions should be made with consideration to the level of risk within the geographic sub-areas of a community.

Overall Geospatial Characteristics

The following community risk assessment has been developed based on intended land uses as described in the zoning designations of the study area. The following figure translates zoning to categories of relative fire and life risk.

Figure 83: Translation of Zoning to Relative Risk Categories

Relative Risk Category	Zoning
Low Risk	Areas zoned and used for agricultural purposes, open space, and very-low-density residential use.
Moderate Risk	Areas zoned for medium-density single-family properties, small commercial and office uses, low-intensity retail sales, and equivalently sized business activities.
High Risk	Areas zoned for Higher-intensity business districts, mixed-use areas, high-density residential, industrial, warehousing, and large mercantile centers.

The following shows the relative percentages of zoning in the City of Pinole.

Figure 84: Pinole Zoning Percentages

The following figure illustrates the distribution of the current zoning classifications in the City of Pinole. By acreage, nearly half of the City of Pinole is residential, and 1/3 is zoned commercial. The current zoning data was undergoing review as some of the parcels were without a zoning code, i.e., the white areas within the city. Some of these are likely "Commercial" due to their proximity to existing commercial zoning.

Figure 85: Pinole & Contract Area's Current Zoning

Geographic & Weather-Related Risks

The number and frequency of federal disaster declarations affecting Pinole paint a picture of the risks that natural hazards pose to the region. The next figure is a summary of federal disaster declarations that have occurred in Contra Costa County:¹⁶

- Between 1969 and 2017, Contra Costa County has received 14 presidential disaster declarations and two emergency declarations.
- These events are important to consider in establishing recurrence intervals for hazards of concern.

Figure 86: Summary of Federal Disaster Declarations in Pinole by Type, 1965–2017

Type of Event	Declaration Date	FEMA Disaster #
Severe Winter Storms, Flooding, Mudslides	4/1/2017	DR-4308
Severe Winter Storms, Flooding, and Mudslides	3/16/2017	DR-4305
Severe Storms, Flooding, and Mudslides	2/14/2017	DR-4301
Severe Storms, Flooding, Mudslides, and Landslides	2/3/2006	DR-1628
Severe Winter Storms and Flooding	2/9/1998	DR-1203
Severe Storms, Flooding, Mud and Landslides	1/4/1997	DR-1155
Severe Winter Storms, Flooding Landslides, Mud Flow	3/12/1995	DR-1046
Severe Winter Storms, Flooding, Landslides, Mud Flows	1/10/1995	DR-1044
Severe Winter Storm, Mud and Land Slides, and Flooding	2/3/1993	DR-979
Loma Prieta Earthquake	10/18/1989	DR-845
Severe Storms and Flooding	2/21/1983	DR-758
Coastal Storms, Floods, Slides, and Tornadoes	2/9/1983	DR-677
Severe Storms, Flood, Mudslides, and High Tide	1/7/1982	DR-651
Torrential Rain, High Tide, and Winds	2/1/1980	EM-3078
Drought	1/20/1977	EM-3023
Severe Storms and Flooding	1/26/1969	DR-253

EM = Emergency Declaration; DR = Disaster Declaration

From a planning perspective, there are several weather-related risks of concern to the study area, as noted in the previous figure. Severe storms can include lightning strikes and significant wind events.

¹⁶ Retrieved from <http://www.co.contra-costa.ca.us/DocumentCenter/View/48893/Contra-Costa-County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=>.

Weather Risks

The climate for Pinole is moderate. Pinole receives 27 inches of rain, on average, per year, the U.S. average is 38 inches of rain per year. The average annual temperatures range from a high of 80°F in July to a low of 40°F in January—with the average temperature being 71°F. Pinole receives 255 sunny days on average, this is 50 more days than the national average.¹⁷

Flood Risk

There are various risks associated with flooding. It is essential, therefore, that the community in the area of flood zones and areas prone should be informed of the risks, before the flood and as part of the planning process. Further, this should be a part of the public education process to ensure that residents are aware of the risks associated with flooding and the actions they should take to ensure readiness.

During a flooding event, the fire department will be called upon to assist in evacuations and rescues. These evacuations may include facilities with large numbers of people requiring EMS resources. Rescue and emergency evacuations may involve moving water requiring the specialty-trained technical rescue team to intervene.

After a flood as the residents begin recovery, EMS-related incidents will increase as injuries and medical conditions occur. Public education can help the community prepare for the recovery process.

The Contra Costa Hazards Mitigation Plan addresses two principal sources of floods. These two sources are summarized and defined in the next figure.

Figure 87: Sources of Flooding in Contra Costa County¹⁸

Source of Flood	Description
Riverine (river and stream)	Riverine floods described in terms of their extent (including the horizontal area affected and the vertical depth of floodwater) and the related probability of occurrence (expressed as the percentage chance that a flood of a specific extent will occur in any given year).
Flash Flooding	Flash floods occur suddenly after a brief but intense downpour. They move rapidly, end suddenly, and can occur in areas not generally associated with flooding (such as subdivisions not adjacent to a water body and areas serviced by underground drainage systems). Although the duration of these events is usually brief, the damage they cause can be severe. Flash floods cannot be predicted accurately and happen whenever there are heavy storms.

Garrity Creek Watershed

This 1,790-acre area in western Contra Costa County includes the watershed of Garrity Creek (3.67 miles). This watershed includes sections of the City of Pinole.

Pinole Creek Watershed

Pinole Creek is a perennial creek that runs through the center of the city.

The next figure illustrates the Special Flood Hazard Areas (SFHA) as designated by FEMA. There are areas with the risk of flooding throughout the city. For the most part, the areas that are flood-prone have a one-percent increase in annual flooding. There are small portions of the study area that include a 0.2 percent annual chance of flooding. Station 73 and 74 are located very close to Pinole Creek drainage and potential flood areas, as seen in the following figures.

Figure 88: Watersheds in the Study Area

Figure 89: Flood Zones in the Study Area

Flood hazard areas identified on the Flood Insurance Rate Map are identified as an SFHA. SFHA are defined as the area that will be inundated by the flood event having a 1-percent chance of being equaled or exceeded in any given year. The 1-percent annual chance of flood is also referred to as the base flood or 100-year flood. Moderate flood hazard areas are the areas between the limits of the base flood and the 0.2-percent-annual-chance (or 500-year) flood. The Coastal High Hazard area is that part of the coastal floodplain where the wave heights during the base flood will be three feet or more.

There are 145 parcels that intersect various FEMA flood zones. Ten of these parcels are zoned "agricultural/open space," and 25 additional parcels are zoned "commercial," including one corner of a school parcel. The remaining 110 parcels are zoned "residential," including 109 single family parcels and one multifamily parcel with 12 units. Using the 2010 census data, the Pinole average household size is 2.7 persons; this gives an estimated total population of flood risk of 327 persons. The following figure shows the population within the various flood zones.

Figure 90: Flood Hazard Areas

Population Within the 10%, 1%, and 0.2% Annual Chance Flood Hazard Areas					
10% Annual Chance Flood Hazard Area		1% Annual Chance Flood Hazard Area		0.2% Annual Chance Flood Hazard Area	
Population Exposed	% of Total Population	Population Exposed	% of Total Population	Population Exposed	% of Total Population
0	0	0	0	327	1.7%

The commercial and agricultural/open space parcels were located in the 10 percent and 1 percent SFHAs.

Tornadoes

Tornadoes can have winds of over 300 mph, which—at the higher ranges—will cause a significant threat to life and damage to property. The intensity of tornadoes is measured on the Enhanced Fujita Tornado Damage Scale. This scale has an intensity range for tornadoes from EF-0 to EF-5, including wind estimates. The next figure is a summary of the damage associated at the various levels. Pinole has not experienced a tornado within written history.

Figure 91: Tornado Intensity, Enhanced Fujita Scale

Designation	Wind Speed, mph	Typical Damage
EF-0	65–85	Minor or no damage. Peels surface off some roofs; some damage to gutters or siding; branches broken off trees; shallow-rooted trees pushed over. Confirmed tornadoes with no reported damage are always rated EF-0.
EF-1	86–110	Moderate damage. Roofs severely stripped; mobile homes overturned or badly damaged; loss of exterior doors; windows and other glass broken.
EF-2	111–135	Considerable damage. Roofs torn off well-constructed houses; foundations of frame homes shifted; mobile homes completely destroyed; large trees snapped or uprooted; light-object missiles generated; cars lifted off ground.
EF-3	136–165	Severe damage. Entire stories of well-constructed houses destroyed; severe damage to large buildings such as shopping malls; trains overturned; trees debarked; heavy cars lifted off the ground and thrown; structures with weak foundations are badly damaged.
EF-4	166–200	Devastating damage. Well-constructed and whole frame houses completely leveled; cars and other large objects thrown, and small missiles generated.
EF-5	> 200	Extreme damage. Strong-framed, well-built houses leveled off foundations are swept away; steel-reinforced concrete structures are critically damaged; tall buildings collapse or have severe structural deformations; some cars, trucks, and train cars can be thrown approximately 1 mile (1.6 km).

While ranges of winds are listed on the scale, the wind estimate is not exact—nor have they been verified in science or engineering. Different wind speeds may cause similar-looking damage from place to place—even from building to building.

While preventing tornadoes is not possible, the preparation for the potential of a tornado should be considered as a high priority. Tornadoes can occur with little or no warning and can result in devastating damage; departments must consider that as part of their planning for disaster readiness, the likelihood of a tornado occurring is minimal in Pinole.

Tsunamis

A tsunami is a series of high-energy waves radiating outward from an area where a generating event occurs. Earthquakes may produce displacements of the seafloor that can set the overlying column of water in motion, initiating a tsunami, depending on the magnitude of the earthquake and the type of faulting.

The San Pablo Bay area is a likely site of tsunami impacts in Contra Costa County that would rise with floodwaters from a San Francisco Bay tsunami caused by a local earthquake. According to the Contra Costa Hazard Mitigation Plan, Pinole only has a small threat of tsunamis immediately along its coastline vicinity.¹⁹

Additional Weather-Related Hazards

Severe weather hazards also pose a threat to Pinole. Aside from the weather-related hazards described in the preceding section, several other weather-related events have been analyzed as part of the hazard mitigation plan. The next figure—while applicable to the whole County—is a summary of these events, including the definitions, severities, and impacts.

¹⁹ <https://www.contracosta.ca.gov/DocumentCenter/View/48893/Contra-Costa-County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=>.

Figure 92: Other Weather-Related Hazards in Contra Costa County²⁰

	High Winds	Heavy Rain and Thunderstorms
Definition	The National Weather Service defines high winds as, “sustained wind speeds of 40 mph or greater lasting for one hour or longer, or winds of 58 mph or greater for any duration.”	Heavy rainfall is any amount of rain produced in a relatively short time period that exceeds the capacity of natural systems’ or stormwater infrastructures’ ability to effectively and safely convey the flow of stormwater.
Severity	The entire county is directly or indirectly susceptible to the effects of high-speed winds. Trees are susceptible to blowing over and causing damage to surrounding property. All communities can suffer extended power outages.	The entire county is directly or indirectly susceptible to the effects of heavy rains or thunderstorms. All communities can suffer the impacts of heavy rains or thunderstorms.
Impacts	Widespread power outages. Mass of downed debris on the transportation network impedes the response of emergency personnel and utility crews. Electrical blackouts force the closure of government offices, businesses, and schools. Power outages can disrupt transportation, generating traffic snarls resulting in thousands of motorists seeking few available alternate routes on local arterials and collectors, complicated by blocked roads.	Heavy rain can have significant impacts, including rising rivers, flash flooding, mudslides, and landslides. Stormwater runoff from heavy rains can also impair water quality by washing pollutants into water bodies. When power outages coincide with heavy stormwater flows, public works crews may struggle to provide auxiliary power to sewer lift stations to prevent backups or flooding in suburban and urbanized areas. Thunderstorms carry the same risks as heavy rain events, and depending on the type of storm, they can also include tornadoes, lightning, and heavy winds, increasing risk of injury and property damage.

²⁰ Retrieved from https://www.trpc.org/DocumentCenter/View/4172/HazMit_Ch4-2_Storm?bidId=.

Earthquakes

The Contra Costa Hazard Mitigation Plan rates the hazard profile of earthquakes as a high probability. Earthquakes can cause widespread damage and disrupt many services across the area.

Figure 93: Earthquake Fault Lines In and Around Pinole

The Pinole Fault and the Moraga Fault, both undifferentiated quaternary faults, pass through the study area. The historic Hayward Fault, with a slip rate of 5 mm/year, moves to the southwest of the study area.

The effects of earthquakes are described in the following figure.

Figure 94: Effects of Earthquakes

Effect	Description
Ground Motion	When a fault ruptures, seismic waves radiate, causing the ground to vibrate. This wave movement causes the ground to shake during an earthquake.
Ground Failures	Earthquakes can cause surface faulting, landslides, subsidence, and uplifting. Surface faulting is the differential movement of two sides of a fracture.
Liquefaction	Liquefaction is the phenomenon that occurs when ground shaking causes loose soils to lose strength and act as a viscous fluid. Liquefaction causes two types of ground failure: lateral spread and loss of bearing strength.
Tsunamis	Tsunamis are large ocean waves generated by sudden changes in the seafloor elevation, which displace a significant volume of water.

Wildfire Risk

Like many areas of California, there is a wildfire risk in the Pinole area. The level of risk associated with wildfires in any given area of a community is dependent upon several factors, including climate, vegetation, and topography. Another factor is the number of homes that are built within the Wildland Urban Interface. Pinole has 30 buildings within the Very High Fire Hazard Severity Zone (FHSZ).

According to the Contra Costa Hazards Mitigation Plan, the summary assessment on wildfire reads:

The geography, weather patterns, and vegetation in the East Bay area provide ideal conditions for recurring wildfires. Especially vulnerable are the East Bay Hills in Lamorinda, which includes Lafayette, Moraga, and Orinda. Parts of Walnut Creek, including the area surrounding Rossmoor, are vulnerable to wildfires, as are Clayton, the Danville/San Ramon area, and the San Pablo-El Cerrito, El Sobrante area. Because the natural vegetation and dry-farmed grain areas of the county are extremely flammable during late summer and fall, wildfire is a serious hazard in undeveloped areas and on large lot home sites with extensive areas of un-irrigated vegetation.²¹

The next figure illustrates a summary of the historical wildfire occurrences and impacts. The Castro and the Carson Fires of 2011 were the most significant incidents, with numerous small incidents in the succeeding years.

²¹ Retrieved from https://www.trpc.org/DocumentCenter/View/4172/HazMit_Ch4-2_Storm?bidId=County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=.

The next figure shows the historical wildfires listed in the previous figure in and near Pinole. There have been many small wildfires (< 10 acres) in the more remote portions of the county.

Figure 96: Historical Wildfires in and Near Pinole through 2018

The next figure shows the wildfire threat in and near Pinole.

Figure 97: Degree of Wildfire Threat

The fire threat is a combination of two factors: 1) fire frequency, or the likelihood of a given area burning, and 2) potential fire behavior (hazard). These two factors are combined to create four threat classes ranging from moderate to extreme (California Department of Forestry and Fire Protection's Fire and Resource Assessment Program [FRAP]).

The next figure shows the estimated land area, population, and dwellings that are in the Wildland Urban Interface areas.

Figure 98: Study Area Current Estimates as Related to the Urban Interface, 2015

Fire Department/District	Population		Residential Dwellings	
	Total	Percent in the Hazard Area	Total	Value in the Hazard Area
Pinole Fire Department	94	.5% ²³	30	\$16,007,875

Of concern is the Galbreath Road neighborhood to the southwest of Station 74. This area is characterized by a single road in, as well as being surrounded by dense vegetation. This is a large concern for the ingress of fire equipment during an emergency (such as a wildfire event) and egress of residents who may be evacuating the Galbreath Road area. Future development should evaluate hazards to the development area and ensure adequate traffic routes are designed and implemented.

Figure 99: Galbreath Road Neighborhood

²³ Retrieved from: <http://www.co.contra-costa.ca.us/DocumentCenter/View/48893/Contra-Costa-County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=>.

Transportation Risks

Highways

There are several transportation corridors and various modes of transportation that fall within the study area for which the department is responsible. Beginning with major roadways, Interstate 80 goes through the middle of Pinole. Additionally, there are several major local roads within the City, including San Pablo, Appian Way, and Pinole Valley Road. Regardless of the size of the roadway or the speed limit, any roadway has the potential for motor vehicle crashes, vehicle fires, medical emergencies, brush fires, or hazardous material spills/leaks. Each of these is not only a risk to the community, but the responders are also at risk of being struck by vehicles while operating near moving traffic.

Last year, the town of Paradise faced a devastating fire. Evacuations from the town on narrow two-lane roads became problematic to those leaving the fire area. In 2019, Streetlight Data, Inc. listed Pinole as three times the national average in difficulty in evacuating the city in case of emergency due to limited evacuation routes and narrow streets.²⁴ Due to the general geography of Pinole, this road arrangement is nearly unavoidable. The Pinole Police Department has a plan to use all lanes to travel in one direction to evacuate residents from the fire area in an expedient manner.

²⁴ It should be noted that Streetlight Data only studied cities of under 40k in population. The study also made the assumption that people would choose familiar and preferred routes even though other exists exist.

Figure 100: Major Transportation Infrastructure in the Study Area

Airports

The City of Pinole does not have an airport. Two international airports are located nearby, the Oakland International Airport (27 miles) and the San Francisco International Airport (34 miles). There is a heliport in San Pablo.

Railroads

Figure 100 shows the rail line through Pinole. Amtrak provides regular service through the city with over 16 rail stations within a 30-mile radius. In addition, Union Pacific's Martinez Subdivision and BNSF Stockton Subdivision transport freight through the area. Although a comparatively safe mode of transport, railway operations do come with hazards, including accidents involving pedestrians, other vehicles, derailments, and accidental hazardous material releases. The next figure discusses some of these incidents.

Figure 101: Hazard Descriptions Faced by the Pinole Fire Department

Type of Incident	Description/Hazard
Train Collisions	Collisions can be between two or more trains or between trains and infrastructure.
Derailments	Derailments occur when one or more cars of a train leave the tracks; generally, it involves just one train.
Grade Crossings Crashes	There are various scenarios in which accidents occur at railroad crossings.
Railroad Staff Injuries	Railroad staff may get injured while working on or near the tracks. In some cases, accessibility will be a problem.
Dangerous Goods Release	As the railroads carry hazardous goods, there is always the potential for product release.

The effects of these incidents can require large numbers of fire and EMS resources. In review of the previous figure, several of these incidents could require the response of a Haz-Mat team, Technical Rescue, and EMS. Many times, the complexity of the incidents will require multiple operational periods. Risk analysis and planning for these types of incidents must consider the need for higher than usual personnel, equipment, and Automatic or Mutual Aid resources. When incidents occur at a grade crossing, fire and EMS personnel will have to operate near the tracks. Training in proper precautions is essential.

Buildings

Many buildings in the city are used for purposes that create more significant risks than others during an emergency. High occupancy buildings, facilities providing care to vulnerable populations, and others may require greater numbers of emergency response and resources during an emergency.

Numerous buildings lie within the study area in which large numbers of people gather for entertainment, worship, and other similar events. A variety of small businesses and entertainment venues also exist.

Colleges and Schools

The next figure shows the locations of the educational facilities within the study area. These facilities present additional risk, primarily for mass casualty incidents. Fire, criminal mischief, and potentially terrorism could cause a major medical emergency requiring significant emergency service resources.

Figure 102: Colleges and Schools in the Study Area

Medical and Congregate Care Facilities

Medical and congregate-care facilities, particularly hospitals and nursing homes. Although these facilities have regular fire safety inspections and are generally built of fire-resistive construction with built-in fire suppression, emergencies still can occur that require the quick movement of patients away from the hazard. Incidents at these facilities will require high resource levels.

Pinole does not have a hospital, but has 11 assisted living facilities, as the next figure depicts.

Figure 103: Assisted Living Facilities

Other Critical Infrastructure

One concern to fire departments is the water and fire hydrant system. Providing enough storage, distribution, and access to this valuable firefighting resource is very important. The next figure illustrates the hydrant system in the study area. As expected, in the more populated urbanized areas, fire hydrants coverage is very good. Some rural areas of the city depend on water delivered by tenders, but generally good hydrant coverage exists throughout the service area. From a risk assessment standpoint, planning consideration must be given to situations when the water system could fail.

Figure 104: Fire Hydrant Distribution in the Study Area

The next figure shows the commercial building and hydrant locations in Pinole. Represented on the map is the Needed Fire Flow (NFF) for each of the commercial buildings. Fire flow is the amount of water that would need to be supplied and pumped from an apparatus to control a building fire. Pinole's fire engine can pump 1,500 gallons per minute. Many buildings in Pinole could require a much higher fire flow to control an established fire.

Figure 105: Fire Hydrant Distribution, Commercial Building with Needed Fire Flow (NFF)

Emergency communication centers and the associated transmitting and receiving equipment are essential facilities for emergency response. The Contra Costa Regional Fire/EMS Communications Center (CCR FCC) provides call receipt and dispatch service to the Pinole Fire Department and many of the neighboring jurisdictions. This center answers 911 calls, dispatches fire and other emergency responders, and provides important support to the on-scene incident management function. This center is the secondary Public Safety Answering Point (PSAP). All 911 calls made from landlines in the city limits are automatically routed to the City of Pinole Police Department, which is the Public Safety Answering Point (PSAP). Calls from landlines in the unincorporated areas within the City's fire service area are automatically routed to the Contra Costa County Sheriff. Once one of these PSAP's dispatchers determines a call requires fire department response, the call is relayed to CCR FCC.

There are other communication facilities and equipment that are equally important to the community and government operations within the study area. These are the telephone company central offices and the transmission lines of local telephone service providers. Internet service providers, along with wireless cellular communication providers, provide essential communication capabilities for the community as well as emergency personnel through their facilities and equipment. Failures in any of these systems can influence emergency services.

Energy

The loss of electrical power is also a risk to the community. Community services, from communications to traffic signals to normal operation of supermarkets, require the use of energy. Whether it is electricity generation and transmission systems, fuel distribution and storage tanks, or natural gas pipelines and regulator stations, the community is dependent upon energy sources. The loss of energy is a planning consideration for response and readiness.

Structural Risks

Certain buildings, contents, functions, and size present a greater firefighting challenge and require special equipment, operations, and training.

The Insurance Services Office calls for a ladder truck within 2.5 miles of developed areas containing buildings three or more stories in height. Accessing the upper floors and roofs of buildings this tall, typically requires ladder truck capability as ground ladders may not provide access. The next figure documents current commercial facilities and the number of stories each building possesses.

Figure 106: Commercial Buildings, One to Four Stories in Height

Large buildings such as warehouses, malls, and large “box” stores require greater volumes of water for firefighting and require more firefighters to advance hose lines long distances into the building. The following figure demonstrates building locations and their relative total floor space in relationship to Pinole’s Station 73.

Figure 107: Commercial Buildings, Total Floor Area

Terrorism

Pinole is, as is anywhere, a potential target for terrorism. Most of the previously categorized risks in the community are targets for such activity. These include schools, commercial buildings, public infrastructure, and public assembly areas that are located within the study area. In addition, the outdoor public gathering events during the year can also be targets. All fire-rescue departments need to be vigilant in their training and preparedness in the event one or more coordinated acts of terror occur in the region, Pinole is no different. Despite the small likelihood of a terrorist attack, training to ensure coordination and unified command with law enforcement partners is critical.

Demographics

Current Population Information

The next figure is a summary of the service area and population, according to the United States Census Bureau.

Figure 108: Study Area Size and Population Estimates

Fire Department/District	2017 Population Estimate	Area in Sq. Miles	Population Density
Pinole City	19,364	5.32	3,455/sq. mi.

An NFPA report has identified the groups that face a higher risk of being injured or killed in a fire as:²⁵

- Children under 5 years of age;
- Older adults over 65 years of age;
- People with disabilities;
- Those with a language barrier; and
- People in low-income communities.

The following figures were created to provide an overview of the demographics related to these identified groups. Select demographics are provided in the following figure to the extent that the data was available.

Figure 109: Select Population Demographics

	Persons under 5 years	Persons under 18 years	Persons 65 years and over	Persons with Disabilities Under the Age of 65	Language other than English Spoken at Home
Pinole ²⁶	3.7%	17.1%	18.8%	9.1%	36.3%

Based on the preceding figure, 18.8 percent of the population is over 65 years of age, and an additional 3.7 percent of the population is under five years of age. This places a total of approximately 22.5 percent of the populations within the age groups that are at the highest risk in residential fire incidents and account for some of the highest use of emergency medical services.²⁷ Senior citizens can have difficulty escaping from fire due to physical limitations. Seniors also tend to use emergency medical services more frequently than younger persons. As the population ages, this will create an increase in service demand for emergency medical services. In addition, just over 36 percent of the population may have language barriers that make communication with first responders during an emergency difficult.²⁸

²⁵ National Fire Protection Association, 2007; Urban Fire Safety Project, Emmitsburg, MD; retrieved from <http://www.nfpa.org/public-education/by-topic/people-at-risk/urban-fire-safety/reports-and-presentations>.

²⁶ Information retrieved from the United States Census Bureau.

²⁷ This is very close to the national average of 21.7 percent.

²⁸ The national average is 21.8 percent.

As noted, the very young also represent a vulnerable population, both regarding their ability to escape a structure fire as well as their susceptibility to serious medical ailments such as asthma, traumatic events, choking, or injury from vehicular accidents.

The demographics displayed in Figure 110 are factors that indicate that a population is more likely to use fire department services than other populations. Individuals in poverty or with no health insurance are more likely to use local EMS resources compared to individuals with health insurance and a personal physician. A high percentage of owner-occupied homes may indicate a more stable community and residents willing to invest in their community and community services; Pinole with an owner-occupied housing rate of 70 percent is approximately 7 percent higher than the national average.

Figure 110: Other Demographic Comparisons

Subject	Pinole
Persons without health insurance, under age 65 years	4.7%
Owner Occupied Housing Rate, 2012–2016	70.2%
Median household income (in 2017 dollars), 2012–2017	\$84,255
Residents at the poverty level	5.4%

Population Density

Most communities contain areas with different population densities and property risks allowing the community's policymakers to specify different response performance objectives by geographic area. The classifications that are identified by the National Fire Protection Association (NFPA) in Standard 1720 and the percentage of the city in the classification is provided in the following figure.²⁹

Figure 111: Population Classifications

Classification	Criteria
Urban	> 1,000 people/square mile
Suburban	500–1,000 people/square mile
Rural	< 500 people/square mile
Remote Area	Travel Distance ≥ 8 miles

²⁹ NFPA 1720: *Standard for the Organization and Deployment of Fire Suppression Operations, Emergency Medical Operations, and Special Operations to the Public by Volunteer Fire Departments*, 2014 Edition.

The next figure illustrates the population density.

Figure 112: Study Area Population Density

Population Growth Projections

The population in Pinole has grown slowly over the last decades. The population in 1980 was 14,253—in 2019, the population has been estimated to have grown to 19,364.³⁰ This is an overall increase of .077 percent per year. Pinole, in 2010 (during the last national census) had a population was 18,390. The 2019 estimated total is 19,364—an increase of just over 5 percent.

With population growth, there come increases in service demand. More people mean not only more incidents generated, but it also means a need for expanded geographical coverage. Resource additions will need to be planned to provide service delivery and performance at acceptable levels if higher density growth occurs within the service area.

Expansion and growth will affect not only the delivery of fire-rescue services but also other fire department functions, such as code enforcement and community risk reduction. The department must maintain awareness and be involved in monitoring the relationship between population and demand.

Section II:

PUBLIC WORKSHOP & STAKEHOLDER INPUT

PUBLIC INPUT

During the development of the community expectations portion of the Regional Fire Service Delivery Study Scope of Work, the City made it very clear they desired a number of opportunities for public input. The final scope of work included a Community Fire Study Workshop, several days of stakeholder interviews, and no less than two presentations to the City Council that would be conducted with opportunities for public input. This section of the study reflects the results of the Community Fire Study Workshop and the stakeholder interviews.

On May 29, 2019, at 6 p.m., ESCI facilitated the Community Fire Study Workshop, which was attended by approximately 45 people. The format for the workshop was an interactive presentation utilizing Swift Polling on-line platform. This program allowed for a series of questions and input opportunities that could be instantly responded to by the audience with the results displayed in real-time. Responses were collected via text message, internet polling website, or paper polling form as displayed in applicable figures that follow as "SMS," "Web," or "Paper Vote." All polls and inputs were captured and are as follows.

For ESCI to gauge the community's awareness of, access to, and experience with the services provided by the Pinole Fire Department, four questions were presented:

- What services, emergency, and other, are provided by the Pinole Fire Department?
- How many firefighters are on duty daily in Pinole to provide services?
- Have you received any services, emergency, or other, from the Pinole Fire Department?
- If you received services, how satisfied were you with the service?

Responses to the question regarding services provided by the department are summarized in Figure 113. The participants understood the department's primary mission and the services that are or should be available to fulfill that mission.

Figure 113: Services Provided by the Pinole Fire Department

Figure 114 indicates that the participants were aware of the department's on-duty force. In addition to daily staffing, the department enjoys effective automatic and mutual aid agreements with surrounding jurisdictions. However, increasing service demands across the spectrum of partnering agencies often leaves Pinole resources stretched thinly.

Figure 114: Number of Firefighters on Duty Daily in Pinole

In the following two figures (Figure 115 and Figure 116), several participants reported having received services from the department, emergency, or other. Of those residents who received services, the majority indicated that they were satisfied with the outcome of those services. This is a very good sign given the minimal resources the department is able to provide at this point in time and is demonstrative of the department's commitment to its service mission.

Figure 115: Have You Received Any Services from PFD?

Figure 116: How Satisfied Were You with the Service?

The next set of four questions were designed for ESCI to gain a sense of the community's awareness of the adequacy of the fire protection system in Pinole to meet service demands:

- Is the existing system adequate?
- If not, what is lacking?
- Is the current staffing of the PFD adequate or not?
- How long should it take for resources to arrive from the time that you call?

As displayed in Figure 117, a majority of respondents believe that the existing service delivery system in Pinole is inadequate. Responses to what is lacking regarding the system are summarized in Figure 118

Figure 117: Response to, "Is the Existing System Adequate?"

Figure 118: Response to, "What is the Current System Lacking?"

Insufficient personnel and resources were expressed as being the biggest challenges in the current system. Although responses under the category “Other” did not fall under the other four categories, they are important to note here: response time objectives not being met and a lack of preparedness for infrastructure development were noteworthy concerns of some participants.

Responses to current Department staffing in Figure 119 are synonymous with the responses to whether or not the overall existing system is adequate. The respondents believe that their fire department is not adequately staffed at present. This further correlates to the responses in Figure 120 regarding response time expectations. The respondents had a realistic view of how long it should take for resources to arrive when they call, given current staffing of the PFD and automatic/mutual aid agreements.

Figure 119: Response to, “Is Current PFD Staffing Adequate?”

Figure 120: Response to, “How Long Should It Take a Fire Engine to Arrive?”

The final six questions presented were designed to determine the community's awareness and understanding of prospective partnering options, the desirability of those options, and positive or negative impacts that may arise with each option:

- How important is it that the City of Pinole has its own fire department?
- Would there be advantages in contracting with Contra Costa County FPD for fire-based services?
- Would there be advantages in the Rodeo-Hercules FPD annexing the city area to provide fire-based services?
- What advantages would there be in partnering with either agency for services?
- What disadvantages would there be in partnering with either agency for services?
- Would you support a parcel tax measure if the revenue it generated improved services and financial stability either as a sole agency or in a partnering option?

Figure 121: Response to, "How Important is it to the City of Pinole To Have Its Own Fire Department?"

Figure 122: Response to, "Are There Advantages with Contracting With CCCFD?"

Figure 123: Response to, "Are There Advantages in Rodeo-Hercules Annexing the Pinole Area into the RH Fire Protection District?"

Figure 124: Response to, “What Advantages Would There Be in Partnering with Either Agency for Services?”

Figure 125: Response to, “What Disadvantages Would There be in Partnering with Either Agency for Services?”

The participants recognized that there are advantages to partnering with one of the surrounding agencies because of the increased staffing and resource depth it would bring. However, several residents expressed that it is important for Pinole to have its own fire department irrespective of whether a partnering option is pursued. Several residents clearly articulated that it is very important that Station 74 be re-opened and staffed full-time. Also expressed was a need for more information regarding partnering options so that the community can make the best-informed decision for service delivery going forward. Increased costs and loss of local control are primary concerns with agency partnering.

Figure 126: Response to, “Would You Support a Parcel Tax Measure if the Revenue it Generated Improved Services and Financial Stability Either as a Sole Agency or in a Partnering Option?”

Support for a parcel tax measure exists among the participants, as indicated in Figure 126. However, consideration of a senior citizen exemption and some idea of a dollar amount per resident are important factors for residents in their deciding whether to support a tax measure.

The second phase of soliciting opinions and expectations about the Pinole Fire Department and the services it delivers were gathered by direct interviews of stakeholders. Eighteen stakeholders were scheduled for interviews that were completed over a two-day period. Of the 18 interviewees, these stakeholders represented the City Council, City Administration, Community Members, Business Community, PFD Labor, Administrative Staff Members, Chief Officers, and surrounding Fire Chiefs.

It is important to note that the information solicited and provided during this process was provided in the form of “individual inputs,” some of which are perceptions as reported by stakeholders. All information was accepted at face value without an in-depth investigation of its origination or reliability. The project team reviewed the information for consistency and frequency of comment to identify specific patterns and/or trends. The stakeholder responses are summarized next.

Elected Officials, Business Community, & Citizens

Are you aware of why we are here and the purpose of this project?

- The majority of those interviewed were aware of why ESCI’s representatives were present.
- Several of those interviewed stated that issues such as the closure of Station 74 and the on-going discussion of merging/consolidating/contracting, etc., with a neighboring fire department or district have been going on for several years.
- Others interviewed indicated that the purpose is to find out where the needs are and where to go from there.
- For those individuals who were not aware of the “why” and “purpose” an update was provided.

In your opinion, what are the advantages/positives/strengths of the existing emergency service delivery system?

- The City Fire Department is providing a service and doing it well.
- Benefits were different between the bargaining groups; now, they are the same which has created harmony amongst the employees.
- The fire department has been serving the City for a long time; and people like the idea of having their own full-service fire department; one station staffed with three firefighters.
- Quick and efficient response by the fire department; impressed with the fire department.
- Responding firefighters are competent, and we have local control.
- Motivated, committed, responsive, well trained, and organized.

What are the disadvantages/negatives/weaknesses of the existing system?

- Understaffed due to disabilities, budgeting for equipment, and excessive repairs.
- The relationship between the fire department and the City could be improved.
- Closure of Station 74, due to the City having zero reserve(s) when the recession occurred in December of 2007. Financial recovery for the City has been slow resulting in not having enough funding to reopen Station 74.
- Adversarial situation due to personnel now paying for a portion of the employer's contribution to the Public Employees Retirement System.
- Strained relationship between elected officials and the fire department.
- Assuming there are services that are not currently provided.
- Pinole Fire Department is understaffed, lacks resources, equipment, and money.
- There are potential disadvantages when reflecting on the wildland fires in California last year and the close proximity of homes, schools, etc., to hills and undeveloped land within the City.
- Strong leadership, need to increase training, develop succession planning, implement performance evaluations.

Does the existing system provide the residents and community with acceptable protection?

- No, due to traffic congestion during commute hours.
- There is a perception that there is a negative impact on surrounding agencies due to Pinole Fire Department having only one fire station.
- Three firefighters is not very many; need to bring in other firefighters from neighboring agencies.
- Yes, the existing system provides acceptable protection.
- No, if the Engine has a mechanical issue; response time is negatively affected and is not an adequate response due to having to depend on our neighboring fire agencies.
- Not sure and want to have resources to respond appropriately to any requests for fire services.

How important do you think it is for the City to have its own fire department?

- The fire department is providing services now.
- Recognizes that there are efficiencies with everyone under the same roof.
- Very important.
- There appears to be a struggle now due to the need for additional resources.
- It is not that important; Stations 73 and 74 are in Pinole; who controls it does not really matter.
- If having our own fire department enables the fire department enhanced ability to respond to emergencies, then it is very important.

Do you believe there would be advantages to the City and level of service if the City were to contract with Contra Costa County FPD or have Rodeo-Hercules annex the area for the provision of fire-based services?

- Yes. Preference is partnering with Rodeo-Hercules Fire Protection District rather than Contra Costa County Fire Protection District.
- Yes, with the assumption that there are services that are not currently provided.
- There definitely would be an advantage.
- Yes, there would be additional training and resources as well as access to services Pinole does not have but the other agencies do.
- Would want this to go to the voters.
- It could be detrimental if the department could not provide—at a minimum—the current level of service.

Do you believe the community would support a parcel tax if the additional funding would improve operations and enhance the financial stability of the department either as a standalone or to fund one of the options mentioned?

- It depends on the dynamics; fixed income recipients are less likely to support an increase in taxes.
- There are competing priorities due to existing conditions of our roadways; should they be addressed at the same time?
- If they understood what improvements were and what the costs are to them; then yes.
- Folks who have wanted the improvements for a while will support it.
- Yes, however, the funds must be allocated specifically for fire service(s).
- The interviewee believes the community will support a parcel tax.
- Possibly; cannot say yes or no. Some communities will support it and other will not.

In the event the City were to contract with Contra Costa County FPD or have Rodeo-Hercules annex the area for the provision of fire-based services, what is the one issue that—if not addressed properly—would be a deal-breaker.

- Financial/cost.
- Identify how services that are provided now will improve and identify the cost.
- Must be able to prove that response times will improve.
- If there is presence in the City.
- Amount of safety personnel provided to the area.
- Taking the time, obtaining appropriate information, making sure that all the agencies coming together are on the same page.

Who do you think would be opposed to the change?

- No—not an organized group.
- There are citizens out there that take pride in having their own fire department.
- Those who do not understand the advantages.
- None; hold on to Pinole's identity.
- People who cannot afford it.
- Those who live in Pinole and only are familiar with Station 73.
- Possibly those who believe they will be stimulating the economy; not supporting the fire department.
- Those who opposed the construction of Station 74.
- Those who oppose spending funds from the City's General Fund.
- Employees affected by combining agencies into one.

Is there anything you would like to add that we have not discussed?

- Hoping for a viable solution that is within the City's financial means.
- What does it take to provide services? A cross section of input is what is anticipated as a result of the current "report."
- Possibly the "study" will put this issue to bed so they can move forward.
- The Pinole Fire Department has always been "spot on."
- 10 years ago, it was appropriate to close Station 74; it should go to a ballot question.
- Residents in this town want more fire coverage; this report is offering the benchmark. What happens when the benchmark is met?
- It is important to come up with a viable solution that the City can afford. If community supports staffing #74—let's do it with a parcel tax. We have options.

Chief Officers, Labor Leaders, & Firefighters Representatives***What are some areas in which you think the department could make improvements?***

- Infrastructure
- Improve labor relations with the City Council
- Administrative support
- Succession Planning
- Leadership stability; in the past 9 years, Pinole Fire Department has had 13 Fire Chiefs
- Battalion Chief training
- Consistent training for all safety personnel
- Open Station 74
- Policies are lacking in various yet needed areas
- Lack of a formal hiring process; at this point in time, there has been no consistency.

What do you see as the top critical issues faced by the City fire department today?

- Lack of supervision on A and C shifts
- Staffing
- Policies; there are none
- Adequate Administration—a good service model
- Morale
- Communication

What opportunities, in your view, are available to improve the service and capabilities?

- Collaboration with others
- On-line training
- Policy Development
- Contra Costa Fire Protection District
- Opportunities prevail with a reorganization

What challenges do you see to the change?

- The will of the Fire Chiefs and Elected Officials
- Going to the Union first before going to the Fire Chief
- Finances
- Public perception(s)
- Collectively reviewing the existing Budget in detail
- Local control

What drawbacks do you see to the City contracting with Contra Costa County FPD or have Rodeo-Hercules annex the area for the provision of fire-based services?

- Price of contracting with Contra Costa Fire Protection District
- Cultural differences between the three entities
- Concerned that Rodeo-Hercules Fire financial status and would not add any depth to existing services currently provided
- Health insurance and retirement benefits differ between agencies

What are the critical issues that you believe will need to be addressed prior to moving forward?

- Feasibility
- Viability
- Identify improvements
- How functioning as one will benefit the safety of personnel
- Retirement (PERS vs County Retirement)
- The type of method that will bring us together, i.e., consolidation/annexation/merger/administrative 5-year agreement

Who or what groups do you believe would oppose the change?

- Some City Council members
- Public opposition

Is there anything that you would like to add that we have not discussed?

- Battalion 7 service model should have a temporary fix; there are multiple safety issues.
- Bringing these three agencies together.
- Trying to train together.
- Salary differences
- Open to hearing the options; Pinole Fire has a stressed response number, no training, etc.

Surrounding Area Fire Chiefs***What are some areas in which you think the department (Pinole) could make improvements?***

- Pinole Fire is a “taker” due to having one fire station and the need to depend on neighboring agencies.
- Open and staff Station 74.
- Increase staffing levels.
- If Pinole cannot stand alone, opportunities exist operationally when working as the same agency.
- The Battalion 7 agreement is being redesigned; however, it is not as good as being one agency.

What opportunities, in your view, are available to improve the service and capabilities within the region?

- Increase the staffing levels and validate why the levels should be increased; i.e., one or two more firefighters per shift.
- Opportunities exist operationally when working as the same agency.

What in your opinion are the top critical issues you believe Pinole Fire is facing over the next 5 years?

- Aging fleet.
- A station in the wrong location based on the population density at the waterfront.
- The constant struggle with funding.
- Expansion of services.
- Having the capability to sustain what they have developed into the future; Pinole Fire has not been able to re-gain staffing levels prior to the Recession.

What are the critical issues that you believe will need to be addressed in the Battalion 7 area in the next 5 years?

- Personnel safety
- Capacity
- Common communications
- Ensuring that each cooperating partner lives up to what they have agreed to

How would you propose to address the coverage challenges in the area around the closed Station 74?

- It is important to review existing numbers, i.e., requests for services/assistance from surrounding agencies, etc.—if the numbers aren't working today how will they work in the future?
- There exists a concern that if Rodeo-Hercules annexes the Pinole Fire Department's response area, how will Rodeo-Hercules Fire be able to maintain an acceptable level of service and staff Station(s) 73 and 74?

In your opinion does the area in and around Pinole need a staffed truck company to compliment the required effective response force?

- If there is an effective training plan, the will of the Firefighters to train, etc., then staff the truck.
- Most likely would not staff it as the Truck Company response responsibilities are contained within the Battalion 7 Agreement.
- Currently, Rodeo-Hercules' Truck Company is the only Truck Company in the area and; is currently first-out for Rodeo-Hercules Fire.

What other information would you like to add?

- This is the third request for a proposal from the City of Pinole.
- Pinole needs to do something; the current situation is not sustainable.
- The City of Pinole has placed "Fire" in the background.

Section III:

OPTIONS FOR SHARED SERVICES

SHARED SERVICES OPTIONS

The following discussion identifies and explains multiple approaches that may be accessed in the State of California for sharing services or partnering in the delivery of services with neighboring agencies.

It is ESCI's understanding based on data review, on-site interviews, and stakeholder input, that since 1971, discussions, studies and proposals, to annex, merge, and/or contract for services between one or more neighboring agencies, have taken place. To date, none of these options have had the administrative, operational, political, or community support necessary to pursue any of the options. While other fire service delivery models are reviewed in this report, an overview of available delivery systems is included to ensure a basic understanding of available partnering strategies.

To adequately discuss the partnering continuum, the terminology and statutory provisions that are available to decision-makers must be understood. The following partner strategies, while not necessarily described by statute, differentiate between various approaches to partnering:

Status Quo

This option continues the current status of PFD without change. PFD continues to do business as they are today. There is no change to governance, staffing, or deployment of resources beyond the level of that is already in place. The current collaborative practices, through the existing cooperative service arrangements and agreements, would remain in effect.

Advanced Auto Aid Systems

When two or more agencies participate in a full boundary drop approach to dispatching the closest resource first regardless of jurisdiction. This process can be greatly enhanced with the utilization of automatic vehicle location technology.

This approach is already in place between PFD, RHFPD, and CCFPD and is memorialized via the "Battalion 7 Agreement."

Functional Consolidation

When two or more agencies enter a collaborative relationship, typically through a contract for service, no permanent organizational commitment is made, and all decision-making power remains with each organization. Interagency collaboration can take many forms and may include shared administrative and support functions, combined operational practices, the participation of fire agencies in activities such as local fire management bodies (such as fire defense boards), mutual aid agreements, and interagency disaster planning exercises. It can also provide for complete service delivery as an integrated/consolidated fire agency from one local agency to another.

One form of functional consolidation is through Contract for Service or Intergovernmental Agreement (IGA), described in greater detail as follows.

Contract for Service—Intergovernmental Agreement (IGA)³¹

In the State of California, authorization for an intergovernmental agreement (contract for service) for the provision of fire services between agencies as provided for by California Statute and Government Code (CGC) Section 55613-55614, and the California Public Contracting Code (CPCC) Section 20811 are commonly referred to as a "Contract for Service."

The California Government Code and Public Contracting Code is written with the intent of being liberally construed relating to contracting for public safety services by cities and fire districts, and states, in part, that:

CPCC 20811. When a district board determines that it is in the public interest, a district may contract with any other public agency for fire protection services, rescue services, emergency medical services, hazardous material emergency response services, ambulance services, and any other emergency services for the protection of lives and property.

This permissive statute allows for a local agency, which includes cities and districts to enter into a written agreement with any other unit or units of a local agency for the performance of any or all fire services and activities that a party to the agreement, its officers or agencies, have authority to perform. The agreement may provide for the performance of a function or activity:

- (1) By a consolidated and fully integrated department;
- (2) By jointly providing for administrative officers and services;
- (3) By means of facilities or equipment jointly constructed, owned, leased, or operated;
- (4) By services and/or functions provided by one of the parties for any other party;

Collaborative approaches under the CGC can include shared or contracted programmatic services, often referred to as *functional unification* or *functional consolidation*. Approaches may include shared administrative service, training programs, fire prevention outreach, or numerous other functional collaborative strategies. This approach can also include a fully integrated/consolidated fire district with services contracted to another local agency.

California law, regulations, and policy directives declare intergovernmental cooperation as a matter of statewide concern and grants special districts broad power to contract with other governmental entities for any function or activity the agencies have authority to perform.

An example of an IGA is the May 29th Fire Services Contract proposal from Contra Costa Fire Protection District to the City of Pinole (Appendix A).

Operational Consolidation

Operational consolidation occurs when two or more separate departments join operationally or administratively to form one organization. The entities remain largely separate; however, they deliver service as if they were one agency.

³¹ California Government Code and California Public Contracting Code, Sections 55513–55614, 55631, 55632, 20811.

Joint Powers Authority

(CGC Section 6500, et seq.)

Joint powers are exercised when the public officials of two or more agencies agree to create another legal entity or establish a joint approach to work on a common problem, fund a project, or act as a representative body for a specific activity.

Before 2016, LAFCOs did not have authority over contracts between government agencies such as Joint Powers Agreements/Agencies (JPA). However, changes in the law require cities and districts to apply to LAFCO for approval of a JPA in certain circumstances.

Many of the changes in the laws governing LAFCO are in response to confusion among citizens regarding who and how their local government services are provided. Also, constituents are requesting increased transparency in government. LAFCOs are expected to provide resources to sort out government service providers, as well as assist in the coordination and long-range planning of those services. LAFCO's role has expanded from oversight of boundary changes to conducting studies that analyze the efficient and economical provision of local government services.

Legal Unification

The concept of legal unification means combining two or more existing organizations into a single, unified, agency. Doing so includes all aspects of the organization's policies, administration, governance, financing, functions, and operations. Legal integration of fire services in California can be achieved in a number of ways, the most common forms for fire districts are district formation, consolidation, reorganization, annexation, or formation of a Joint Powers Agency. District formation, consolidation, reorganization, and annexation are changes of organization which require approval by LAFCO. In some cases, the formation or expansion of a JPA also requires LAFCO approval.

Section IV: OPTIONS FOR DELIVERY OF FIRE-BASED SERVICES

OPTIONS

Per the Regional Fire Service Delivery Study Scope of Work, ESCI was to research possible options for providing fire protection to the community. The alternatives available to accomplish providing these services were limited due to the lack of availability of agencies with capacity and capability in general proximity to Pinole.

Option A: Rodeo-Hercules Fire Protection District

During preliminary discussions with the City of Pinole and the Chief of the Rodeo-Hercules Fire Protection District (RHFPD), ESCI was led to believe that the District was interested in offering a proposal to provide fire protection services under contract to territory within the City of Pinole or annex the area within the City limits into the District so it would receive services comparable to other territories within the District.

Several weeks into developing the baseline analysis of options, the RHFPD Fire Chief transmitted a note via email that RHFPD would not be interested in submitting proposals until the study is completed. Prior to receiving the communication from RHFPD, ESCI had initiated a preliminary analysis of the District's organizational structure and financial condition based on information available via the internet.

RHFPD is similar in operational make up to PFD with the exception being RHFPD operates two staffed stations versus PFD's one. RHFPD, like PFD, has minimal administrative staff to carry out critical administrative tasks. In the event RHFPD were to submit any proposal to provide service, the proposal should include a provision for opening PFD Station 74 as well as staffing key administrative functions.

Should RHFPD express an interest in annexing the area within the Pinole City Limits, the following will need to be considered:

- Expand the boundaries of the Rodeo-Hercules FPD to include territory within the City of Pinole by submitting an annexation proposal to LAFCO.
- Transfer (or lease) City-owned fire service facilities and equipment (i.e., stations, rolling stock, hoses, ladders, etc.) to the Rodeo-Hercules FPD.
- Have the RHFPD hire City of Pinole employees who provide fire protection and wish to become employees of the RHFPD and devise a process to determine relative employee seniority.
- Determine how to fund the additional service responsibilities incurred by the RHFPD such as reallocate a percentage of the City's property tax allocation to RHFPD effective the year the annexation becomes effective. This percentage amount would be negotiated and approved by the City, the District, and the Board of Supervisors and consider extending an existing Special Tax already imposed by Rodeo-Hercules FPD within its current boundaries to the parcels being annexed. It is assumed this would be a condition of LAFCO's approval of the annexation.

- As a result of these changes, (1) the territory within the City would be within the boundaries and service area of the RHFPD, (2) the City would receive a smaller portion of the 1 percent property tax levied within its boundaries but would have fewer municipal expenses since it would no longer provide fire protection services, and (3) property owners within the City would begin paying the special tax which is already being paid by property owners within the Rodeo-Hercules FPD.
- Any proposal from RHFPD should include a plan to staff Pinole Station 74 and provide the administrative functions currently missing within PFD.

Option B: Contra Costa County Fire Protection District

The City of Pinole requested a proposal from Contra Costa County Fire Protection District (CCFPD) to provide services within the Pinole City Limits.

The proposal received from CCFPD is analyzed below. It must be noted that as stated in the document from CCFPD, this is a proposal, not an offer to provide service, and all terms of the proposal would require negotiation.

CCFPD provides fire and emergency medical services to nearly a million people across its 304-square-mile District area, and through mutual aid, in and around the 19 cities and unincorporated communities of Contra Costa County, California. With few exceptions, county emergency ambulance transport services are provided by CCFPD through its unique sub-contractor Alliance model. In 2018, the District responded to nearly 75,000 fire and EMS emergencies and dispatched some 95,000 ambulances, providing expert medical care on more than 74,000 ambulance transports. The District, with 26 fire stations and more than 400 employees, appears to be well funded, well equipped, and is capable of expanding services to include the City of Pinole.

The terms of the proposal include staffing each station with a crew of three personnel on a 24-hour per day, seven days per week basis, and one Battalion Chief-level position on a 56-hour per shift basis with an annual 5 percent escalation for all labor costs. The proposal includes providing components of administration currently understaffed by PFD, such as training, EMS program oversight, duty chief coverage, IT support, and others. The proposal does not include Fire Prevention/Fire Investigation Services or code enforcement that is not cost neutral. The proposal also does not include annual charges for dispatch services. Should Pinole elect to purchase or retain its own equipment, the District would provide maintenance services on those vehicles at an hourly rate of \$100 per hour. The proposal does not include a cost for mobile or hand-held radio equipment. Should Pinole elect to allow the CCFPD to purchase fire trucks for use in the City, the proposal contains a provision for the City to contribute funds to the District's apparatus replacement fund, based on a 10-year replacement cycle for the apparatus.

The City of Pinole may negotiate a contract with CCFPD that would not include acquiring fire apparatus through the service contract; however, it would still be necessary for the City to acquire apparatus to provide the services contemplated under the contract. Operating costs proposed under the contract are indicated in the following figure. Capital costs included in the proposal from CCFPD are separately indicated below the operating costs. The City is in the process of acquiring a new Type I engine. The engine, while capable of comparably performing all the required tasks, does not meet the current specifications of CCFPD.

Figure 127: Contra Costa Fire Protection District Proposal for Fire Protection Services

Contra Costa Fire Protection District Proposal	Projected				
	Year 1	Year 2	Year 3	Year 4	Year 5
Staffing Costs, Including Benefits, Escalates at 5% per Year					
Station 73	3,274,629	3,438,360	3,610,278	3,790,792	3,980,332
Station 74	3,274,629	3,438,360	3,610,278	3,790,792	3,980,332
Shift Battalion Chief	467,880	491,274	515,838	541,630	568,711
Staffing Sub-Total	7,017,138	7,367,995	7,736,395	8,123,214	8,529,375
Administrative Overhead (10%)	701,714	736,799	773,639	812,321	852,938
Total Operating Costs Per the Proposal	7,718,852	8,104,794	8,510,034	8,935,535	9,382,313
Optional Capital Replacement Costs and Staff Vehicle Rental					
Battalion Chief Vehicle	8,700	8,700	8,700	8,700	8,700
Type I Engine—Station 73	94,985	94,985	94,985	94,985	94,985
Type I Engine—Station 74	94,985	94,985	94,985	94,985	94,985
Type III Engine—Station 73	42,150	42,150	42,150	42,150	42,150
Type III Engine—Station 74	42,150	42,150	42,150	42,150	42,150
Capital Replacement Reserve	310,000	310,000	310,000	310,000	310,000
Type I Engine Loose Equipment—73	45,000	-	-	-	-
Type I Engine Loose Equipment—74	45,000	-	-	-	-
Type III Engine Loose Equipment—73	25,000	-	-	-	-
Type III Engine Loose Equipment—74	25,000	-	-	-	-
Battalion Chief Loose Equipment	25,000	-	-	-	-
Equipment Replacement Reserve	22,500	22,500	22,500	22,500	22,500
Totals	\$8,499,322	\$8,720,264	\$9,125,504	\$9,551,006	\$9,997,783

The following figure shows the impact on the City of Pinole's projected budgets through the fifth year. This proposal uses the total operating costs from the CCFPD proposal from Figure 127 as the starting point. These costs would include a minimum of three crew members per shift staffing at both stations, the cost of a Battalion Chief's position, and administrative costs of 10 percent of the total salary and benefits costs. The proposal has an automatic five percent annual escalator included for anticipated cost increases. All current costs associated with the fire department are removed, and the contract fire prevention officer costs added back to determine the impact on the City's General Fund Budget for the five years. These calculations freeze the City's General Fund and Measure S contributions at current levels. To re-open Station 74, an apparatus will be required and, to ensure funds are available to purchase replacement apparatus, an apparatus replacement fund is indicated as being created. While the City would no longer pay for current, normal costs for pensions, the City's unfunded actuarial liabilities would not be extinguished, and payments would be required to pay off that liability. The costs associated with accepting the Contra Costa FPD proposal assume that the City of Pinole will, rather than purchase apparatus through the proposal, purchase its own apparatus and create a fleet replacement fund to provide cash to replace the vehicles at the end its useful life. Accordingly, some amount should be considered for annual maintenance costs related to the apparatus. Similar to the projected amounts contained in prior figures, the information contained in the following figures represents amounts available on October 8, 2019. These amounts will be modified as amended amounts are provided and will be included in the addendum to this report. **The additional funding required for this alternative is in addition to the funds required under the five-year operating costs of the PFD.**

Figure 128: Impact on Future City of Pinole Operating Budgets of Accepting the Contra Costa FPD Proposal

Costs	Year				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Contra Costa Proposed Operating Costs (Figure 127)	7,718,852	8,104,794	8,510,034	8,935,536	9,382,313
Add Fire Prevention Costs	160,000	160,000	160,000	160,000	160,000
UAL Pension Liability Payment	386,129	441,171	506,390	559,659	591,073
Total Operating Costs	8,264,981	8,705,965	9,176,424	9,655,195	10,133,386
Additional Type I Engine Lease	102,948	102,948	102,948	102,948	102,948
Replacement Fund	231,454	231,454	231,454	231,454	231,454
Total Capital Expenditures	334,402	334,402	334,402	334,402	334,402
Total Expenditures	8,599,383	9,040,367	9,510,826	9,989,597	10,467,788
Deduct GF Funding Cap	(3,395,335)	(3,395,335)	(3,395,335)	(3,395,335)	(3,395,335)
Projected Funding from Measure S Initiatives	(1,103,888)	(1,103,888)	(1,103,888)	(1,103,888)	(1,103,888)
Revised Net Funding from the Parcel Tax	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565
Commercial Tracts	574	574	574	574	574
Parcel Tax Per Tract	886	981	1,083	1,186	1,290
Costs Allocated	508,515	563,207	621,555	680,934	740,240
Multi-Family Tracts	105	105	105	105	105
Parcel Tax Per Tract	738	818	902	989	1,075
Costs Allocated	77,518	85,855	94,749	103,801	112,842
Single Family Tracts	5,950	5,950	5,950	5,950	5,950
Parcel Tax Per Tract	591	654	722	791	860
Costs Allocated	3,514,127	3,892,082	4,295,299	4,705,639	5,115,483
Total Tracts	6,629	6,629	6,629	6,629	6,629
Parcel Tax Per Tract	618.52	685.04	756.01	828.24	900.37
Total Costs Allocated	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565
Escalation		10.76%	10.36%	9.55%	8.71%

The decrease in the annual escalation results from the reduction in the percentage growth rate of the funding for the UAL pension costs.

Option C: Expansion of the Pinole Fire Department System

A third alternative to be considered is the restoration of the service model using the currently closed Station 74 and staffing of key administrative positions. This alternative maintains minimum staffing of three personnel for each of the three shifts at this station and enhances service to the area around Station 74 to include initial attack for fire incidents and the provision of advanced life support (Paramedics). It is contemplated that the officers and engineers for Station 74 will be promoted from the current employees at Station 73 and all new hires will be at the firefighter level and placed under the PEPRAs pension system. Salaries for each of the three positions are projected using Step B from the City of Pinole Salary Ranking schedule dated May 31, 2019. Since May 31, 2019, employees have received a 3 percent cost of living adjustment. Overtime costs are projected to be approximately \$100,000 per year higher than those projected at Station 73 or approximately \$400,000 per year, or \$133,333 per shift. Pension and benefit costs are projected by interpolating costs from the FY 19/20 Budget. Medicare costs are calculated at 1.045 percent of gross salaries. Education and certification pay is calculated at \$50 per month per position. Salary costs are escalated at the previously established 3 percent annually. Benefits other than pension costs increase at a 5 percent annual rate. Pension costs are estimated to remain at 13.1 percent per the CalPERS August 2018 PEPRAs Safety Fire Plan Annual Valuation report as of June 30, 2017, for the new employees.

There will be other miscellaneous but minimal station operating expenses resulting from the occupancy of the station on a full-time basis. There will be additional supplies, including the annual employee clothing allowances and start-up costs for turnout gear for new employees.

Additionally, capital expenditures may include the acquisition of a new Type I engine to be used by the expanded crews at Station 74.

The following figure indicates the costs associated with adding Station 74 back into the deployment model.

Figure 129: Projected Costs to Re-Open Station 74, Years 1–5

Station 74 Staffing Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Station 74 Staffing Costs					
Captain	95,539	98,405	101,357	104,398	107,530

Total Costs	\$2,000,327	\$2,006,914	\$2,048,245	\$2,091,089	\$2,135,491

Based on ESCI's review of critical administrative functions, PFD will need additional full-time staffing to manage programs and other administrative tasks. ESCI is recommending the creation of three 40-hour per week positions to assist in managing the organization. The first position would be an Administrative Battalion Chief, responsible for the EMS program, training program oversight, policies and procedures, and provide an additional chief officer for supervision. The second position would be a Training Captain responsible for the training program with oversight from the Administrative Battalion Chief. A third recommended position would be a Fire Prevention Officer responsible for all fire prevention duties, including those carried out by the current contract inspector. The following figure provides an estimated cost for each position and in total.

Figure 130: Projected Costs of Additional Administrative Positions, FY 19/20–FY 23/24

Projected Administrative Position Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

Total Administrative Personnel Costs	\$435,295	\$450,074	\$465,382	\$481,240	\$497,669

The following figure combines the current projections, projected costs associated with re-opening Station 74, and the costs to increase administrative positions for the fire department. This alternative includes setting a fixed amount to be funded from the City's General Fund Budget that is limited to the funding amount in the adopted FY 19/20 budget. The Measure S initiatives from both 2014 and 2006 are frozen in a similar manner. The funds to provide for these costs are proposed to be derived from the implementation of a parcel tax.

Current fire department operating costs, as identified in Figure 27 and the following figure, includes payments under the legacy CalPERS pension system, which is anticipated to increase dramatically over the next several years. Pension costs on salaries included in the proposed Station 74 and Administrative positions are calculated under the less expensive PEPR system.

Figure 131: Projected Fire Department Costs Including Station 74 and Administrative Staffing, FY 20/21–FY 24/25

Projected Fire Department Operating Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Current Fire Dept Operating Projections (Figure 27)	5,272,626	5,829,220	6,434,978	7,095,984	7,854,198

Percentage Increase in Parcel Tax, Annual		18.96%	18.26%	16.78%	16.35%

Option D: Staffing of Station 74 Service Area Utilizing Two-Person Unit

A fourth alternative to consider is the implementation of a service model using the currently closed Station 74 and utilizing a quick response/attack unit staffed with two qualified personnel. This option enhances service to the area around Station 74 to include limited initial attack for fire incidents and improved provision of advanced life support (Paramedics). Salaries for the two positions are projected using Step B from the City of Pinole Salary Ranking schedule dated May 31, 2019. Pension costs are calculated at the PEPRA rate of 13.1 percent, and benefit costs are projected by interpolating costs from the FY 19/20 Budget. Medicare costs are calculated at 1.045 percent of gross salaries. Education and certification pay is calculated at \$50 per month per position. Salary costs are escalated at the previously established 3 percent annually. Benefits other than pension costs increase at a 5 percent annual rate. Pension costs are estimated to remain at 13.1 percent per the CalPERS August 2018 PEPRA Safety Fire Plan Annual Valuation report as of June 30, 2017, for the new employees. This alternative, while not recommended, restores the minimum staffing of two personnel for each of the three shifts at this station.

Figure 132: Estimated Cost of Reopening and Staffing a Quick Response Pumper at Station 74

Station 74 Staffing Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Engineer	86,337	88,927	91,595	94,343	97,173

Escalation		30.15%	26.69%	22.94%	21.32%

Capital Costs to Implement the Expansion of Services

To accomplish the reopening of Station 74 as a firefighting unit with medical first response capabilities and to fill the administrative and prevention positions recommended above, it will be necessary to invest in capital resources. The following figure estimates the amounts necessary to acquire the vehicles identified in the preceding recommendations.

Figure 133: Costs of Capital Resources to Reopen Station 74 and Add Administrative and Prevention Staff

Description	Vehicle Cost	Equipment Cost	Total Cost
Quick attack	\$150,000	\$50,000	\$200,000
Or Type I Engine	\$850,000	\$50,000	\$900,000
Battalion Chief SUV	\$45,000	\$30,000	\$75,000
Training Captain Pickup	\$35,000	\$20,000	\$55,000
Fire Prevention Officer	\$35,000	\$5,000	\$40,000

In comparing the costs between a Type I engine with a crew of three and a Type VI quick attack pumper with a crew of two, several issues need to be considered in the decision. The first issue is the expectation of the community as to the effectiveness of the smaller crew of the Type VI in arriving on a structure fire and being expected to safely perform the tasks of the larger crew of the Type I engine. Placing a Type I engine in Station 74 would improve response times to the area served by the station and would increase firefighter safety as well as effectiveness throughout the system. Personnel costs would increase approximately \$400,000 per year to add the third firefighter position per shift at Station 74.

Potential Revenue Source to Provide Funding for Restoration of Services from Station 74

Costs required to improve the performance of the Pinole Fire Department by restoring fire and EMS response services from Station 74 are significant and include operations as well as capital costs. As the City of Pinole continues to experience fiscal issues associated with, among other demands, increased pension funding requirements, an additional source of revenue is necessary to provide funding for the increased costs associated with Station 74. Figure 129 indicates the projected first five-years of costs associated with PFD providing service from Station 74.

ESCI evaluated various service fee lists provided by the City of Pinole to determine if any were a suitable model for an allocation schedule that fairly distributes the costs among the types of parcels. ESCI determined that none of the provided fee allocation schedules were appropriate and elected to develop a model based on differences in assumed risk between the three categories; commercial, multi-family residential, and single-family residential. The methodology assumes that single-family residential would be the base risk upon which the other categories would be viewed and would assign it a 1.0 risk factor. Multi-family residential would be assigned a risk factor of 1.25 or 25 percent higher risk than that of a single-family residence, the thought is that the impact to multiple residents is greater due to the proximity of a neighboring residence (two layers of sheetrock versus a required separation between single-family homes). Commercial parcels are assigned a risk factor of 1.5 or 50 percent higher than single-family residential units due to, typically, larger floor space, more flammable contents and the risk extending beyond the typical life hazards found in residential structures to the potential economic impact of the loss of an employer and sales tax generator in the city. This methodology creates a higher parcel assessment for multi-family residential and commercial parcels than single-family residential parcels. The same methodology was utilized to evaluate the various alternatives to provide fire protection services. An additional per parcel calculation is included that spreads the increased costs over the total number of parcels.

The above calculation does not recognize any discounts for senior citizens. Proposed discounts may be calculated and totaled to determine the impact on the total assessment and, to offset that impact, a formula may be developed using the revenue generated by each \$0.01 to compensate for the discounts.

Section V:

CONCLUSIONS & RECOMMENDATIONS

KEY FINDINGS

This section of the report contains findings as well as recommendations that have been noted and or developed during the course of this study. The following lists ESCI's key findings:

- Due to the lack of sufficient command and administrative staff, the department struggles to maintain compliance with performance goals, industry standards, and workload.
- Data collection and records management analysis was challenging due to inconsistencies.
- The department needs additional staffing to fulfill all fire prevention related functions satisfactorily.
- PFD does not have a designated individual committed to the training function for the department. The responsibility for conducting all needs assessments relative to training, as well as program design, coordination, and records keeping.
- The department does not have adequate training props, although funding has been included in the FY 19/20 budget to purchase some.
- The minimum staffing level for PFD does not provide for the two-in/two-out structure firefighting per OSHA mandates.³²
- PFD is fully dependent on automatic and mutual aid for any call requiring more than one unit.
- In the event of concurrent incidents requiring more than the one staffed Pinole Engine, service to the residents of Pinole for the additional incidents must be provided by other agencies.
- In 2018, none of the reported fire incidents achieved the stated performance objective of 21 firefighters on-scene, nor did the travel time for all apparatus on-scene approach 8 minutes.
- Projected General Fund revenues are not sufficient to provide for Fire Department General Fund expenditures on an annual basis and will require a continued drawdown of General Fund reserve balances.
- Station 73's crew quarters need remodeling and updating, which may include ADA accommodation.
- PFD apparatus specifications have not been standardized with the Battalion 7 apparatus.
- Absent automatic and mutual aid from surrounding agencies, standalone PFD is not capable of handling an incident, such as a trash fire, car fire, or medical incident requiring more than one apparatus, much less a more complex incident.
- At 110 calls per 1,000 population, PFD has a higher median number of calls per 1,000 population than the region but slightly lower than the urban high range.
- Much of the developed residential area in the eastern part of the city is beyond 1.5 miles of Station 73.
- Due to Station 74 being closed, a portion of the developed residential area in the southeast part of the city is beyond the 4-minute travel time footprint.

³² Section (g)(4) of OSHA's Respiratory Protection Standard, 29 CFR 1910.134.

- Funding does not appear to be available to cash purchase the required Type I apparatus for Station 74, should that station be reopened.
- The contact proposal from Contra Costa Fire Protection District would result in increased services and depth of support; however, the proposed contract costs exceed the costs of providing those services if the City were to remain a standalone department, open Station 74, and add staff as recommended in Option C.

Short-Term Recommendations

Recommendation A: Adopt Response Performance Goals that are Achievable

A community's desired level of service is a uniquely individual decision. No two communities are exactly alike. Performance goals must be tailored to match community expectations, community conditions, and the ability to pay for the resources necessary to attain the desired level of service.

Levels of service and resource allocation decisions are the responsibility of the community's elected officials, in this case, the Pinole City Council. The policymaking body must carefully balance the needs and expectations of its citizenry when deciding how to allocate money to all the services it provides.

ESCI recommends the following as PFD fire and life safety response performance goals. Formal adoption of goals allows PFD management to report progress on the achievement of these goals, conditions that are impeding progress, and resources needed to improve service regularly.

Call-Processing Performance Goal

The first phase of overall response time is call processing time. This phase begins when the call is received at the PSAP center and ends when response resources are notified of an emergency. There are two components: answer time and dispatch time.

Recommended Call-Processing Goal:

- 911 calls will be answered at the primary PSAP within 15 seconds, 95 percent of the time.
- Response resources shall be notified of a priority incident within 64 seconds from receipt of the call at the dispatch center, 90 percent of the time.

Turnout Time Performance Goal

Turnout time is one area over which the fire department has total control and is not affected by outside influences. Turnout time, or the time between when the call is received by the response units (dispatched) and when the unit is en route to the incident location (responding), affects overall response times. Reducing this time component reduces total response time.

NFPA 1710 recommends turnout time performance of 80 seconds or less for fire and special operations responses, and 60 seconds or less for all other priority responses.

Recommended Turnout Goal:

- Response personnel shall initiate the response of a unit capable of mitigating an incident to a priority fire and special operations incident 80 seconds from notification, 90 percent of the time.
- Response personnel shall initiate a response to all other priority incidents within 60 seconds from notification, 90 percent of the time.

Response Time for the First-Due Unit Goal

The time required to deliver the first response unit capable of intervening in the emergency includes both turnout time and travel time but not call processing time. Based on current performance and implementation of operational improvements, the following are recommended.

Recommended First-Due Response Time Goal:

- The first response unit capable of initiating effective incident intervention shall arrive at a priority fire or special operations incident within 5 minutes, 20 seconds from notification of response personnel, 90 percent of the time.
- The first response unit capable of initiating effective incident intervention shall arrive at all other priority incidents within 5 minutes from notification of response personnel, 90 percent of the time.

Effective Response Force Performance Goal

A fire department's resource *concentration* is the spacing of multiple resources close enough together so that an initial "Effective Response Force" (ERF) for a given risk can be assembled on the scene of an emergency within the specific time frame identified in the community's performance goals for that risk type. An initial effective response force is defined as that which will be most likely to stop the escalation of the emergency.

The minimum ERF for a low-rise structure fire is identified as the arrival of at least four fire engines, one ladder truck, and one Battalion Chief (17 personnel total). This initial ERF does not necessarily represent the entire alarm assignment, as additional units may be assigned based on long-term incident needs and risks. Additional engines, ladders, or other specialty companies are assigned to higher risk responses to accomplish additional critical tasks that are necessary beyond the initial attack and containment.

Recommended Effective Response Force Goal:

- The full effective response force shall arrive at a moderate risk structure fire within 9 minutes, 20 seconds of notification of response personnel, 90 percent of the time.

Estimated Cost: None

Recommendation B: The City should consider moving forward with the necessary steps to improve service via reopening Station 74, and staffing and administrative support, as funding becomes available.

Based on ESCI's review of all options and associated costs to implement, the recommendation is for the City to consider moving forward with Option C: Expansion of Pinole Fire Department System as discussed and portrayed in Figure 129, Figure 130, and Figure 131 and summarized in the following.

To create a safer environment for the firefighters and citizens and provide an appropriate administrative workforce, the restoration of the service model using the currently closed Station 74 and staffing of key administrative positions is essential.

Moving forward with this option will restore all-risk services to the area around the currently closed Station 74, increase the safety of the firefighters by allowing for compliance with the OSHA two-in/two-out rule for structure fires, provide for enhanced Advanced Life Support (Paramedic) response to requests for emergency medical services, make available a second unit in the city for concurrent incidents, and provide staffing of key administrative positions.

Consider a lease-purchase of the new apparatus for Station 74, which will minimize the fluctuations in the amounts of the parcel tax assessments.

Recommendation C: Consider initiating the process of securing additional funding.

ESCI recommends that the City consider moving forward with the process of pursuing an additional funding source such as a parcel tax as shown in Figure 131 and restated below:

Figure 134: Projected Fire Department Costs Including Station 74 and Administrative Staffing, FY 20/21–FY 24/25

Projected Fire Department Operating Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

Total Allocation	2,613,231	3,108,584	3,676,305	4,293,146	4,995,125
Total Costs Allocated	3,049,026	3,626,986	4,289,383	5,009,091	5,828,136
All Tracts w/o Regard to Classification	6,629	6,629	6,629	6,629	6,629
Parcel Tax Per Tract	459.95	547.14	647.06	755.63	879.19
Percentage Increase in Parcel Tax, Annual		18.96%	18.26%	16.78%	16.35%

ESCI, in conjunction with the recommendation to adopt a parcel tax, recommends that the City consider the use of a lease/purchase facility to acquire the Type I engine required in Recommendation A.

Regardless of the option chosen, additional funding must be developed to fill the gap between existing financing of the current fire service deployment model and the proposed expanded deployment model. Available options for California jurisdictions include special sales tax assessments and parcel tax assessments. ESCI recommends that consideration be given that the selected alternative be restricted to funding only costs associated with funding the expanded deployment model.

Recommendation D: Standardize apparatus specifications.

Consideration should be given to the standardization of apparatus specifications throughout Battalion 7. Standardization of specifications will enhance operational efficiency and could result in cost savings via group purchasing.

Recommendation E: Review all current fire department alarm assignments.

Consideration should be given to reviewing the department's alarm assignments and determine the number of resources required for an effective response force based on risk.

Recommendation F: Improve the collection and analysis of incident data.

Much can be revealed by collecting and evaluating incident data accurately and regularly. Challenges to quick response can be identified and solutions proposed. Trends can be discovered, allowing the fire department to prepare for changes and or increases in response workload. Frequent incident types can be identified, and steps can be taken to reduce their occurrences, such as public safety education or building engineering.

Mid- to Long-Term Recommendations**Recommendation G: Initiate recruitment of additional staff.**

As soon as funding is available, ESCI recommends that the City recruit the positions identified in Option C: "Expansion of Pinole Fire Department System." This would include:

- 3 Captains
- 3 Fire Apparatus Operators
- 3 Firefighters
- 1 Administrative Battalion Chief
- 1 Training Captain
- 1 Fire Prevention Officer

Recommendation H: Remodel Station 73

Fire Station 73's crew quarters require remodeling to accommodate the relocation of the shared shift Battalion Chief and additional administrative staff.

Recommendation G: Capital Equipment and Facilities Fund

Establish a capital equipment and facilities replacement fund. A portion of the proposed parcel tax could be used to fund this recommendation.

IMPLEMENTATION PLAN

This section cannot be completed until the City Council determines which, if any, of the options they wish to pursue.

Section VI: APPENDICES

APPENDIX A: PROPOSAL FROM CONTRA COSTA FPD

CONTRA COSTA COUNTY FIRE PROTECTION DISTRICT

May 29, 2019

Michelle Fitzer, City Manager
City of Pinole
2131 Pear Street
Pinole, CA 94564

Dear City Manager Fitzer,

Please see the attached proposal to provide fire, emergency medical, rescue, administration, and fire prevention services to the City of Pinole. This proposal is a best effort at identifying the Fire District's costs for such services prior to any meaningful discussions with your consultant or representative from the city. As such the figures are estimates and subject to change based on further discussions or additional information that would be relevant to our ability to provide certain services to the city.

I look forward to meeting with ESCI this week for a more detailed discussion.

Please let me know if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Lewis T. Broschard III".

Lewis T. Broschard III
Fire Chief

CC: File

4005 Port Chicago Highway, Suite 250 • Concord, CA 94520-1180
Telephone: (925) 941-3300 • Fax: (925) 941-3309 • www.cccfpd.org

CONTRA COSTA COUNTY FIRE PROTECTION DISTRICT

Fire Services Contract Proposal for the City of Pinole (5-30-19)

Fire/EMS/Rescue Services

The District will provide staffing of three (3) full-time positions at Fire Station 73 and Fire Station 74. At least one position at each station on each shift will be a paramedic. All other positions will be an EMT. Each station will be staffed by one (1) Fire Captain, one (1) Engineer, and one (1) Firefighter or Firefighter-Paramedic. The District reserves the right to use qualified acting positions when necessary.

ANNUAL COSTS

Fire Station 73 (crew of three)	\$3,274,629
Fire Station 74 (crew of three)	\$3,274,629
One (1) 56-hour Battalion Chief	\$ 467,880
Subtotal	\$7,017,138
Administrative Overhead (10%)	\$ 701,713
Total	\$7,718,851*

These rates include all components of administration, annual/ongoing training, EMS certifications, medical direction, administration, duty chief coverage, access to specialized/technical services and resources, ePCR program administration, personal protective equipment replacement for all personnel, IT support, and PIO coverage.

These rates do not include CCRFCC annual charges for dispatch and communications center support.

*These rates shall be increased at 5% per year to account for labor cost increases and other benefit cost escalation factors.

Fire Prevention/Fire Investigation Services

Traditional code enforcement and new construction plan review and inspections are generally cost neutral. Additional data and information is needed from the City in order to provide a specific cost estimate and quote for these services. Weed abatement and exterior hazard control services, specifically, would not be cost neutral and detailed discussion is needed to understand the needs of the city for this program. Additional data and discussion is needed to understand the needs of the city for fire investigation services and what, if any, additional costs would be to provide these services.

Apparatus Maintenance

Apparatus maintenance for all non-District owned apparatus will be provided at the hourly shop rate plus parts/equipment. The current shop rate is \$100/hour.

Apparatus

The information provided below assumes the following: (1) all prices are based on 2018 costs, (2) annual price inflation of 3%, (3) apparatus is purchased new at time of contract commencement, (4) all

4005 Port Chicago Highway, Suite 250 • Concord, CA 94520-1180
Telephone: (925) 941-3300 • Fax: (925) 941-3309 • www.cccfpd.org

fire engines are replaced at 10 year intervals consistent with CCCFPD standards, (5) CCCFPD provides spare engines as needed.

Pierce Velocity Type I Engine x2 (CCCFPD Spec)	\$800,000 (including tax)
Type III Engine x2 (Cal Fire Spec)	\$355,000 (including tax)
Battalion Chief Vehicle	\$725 (monthly lease)
Annual replacement allocation	\$310,000

Equipment for Fire Apparatus

Generally, equipment is purchased new with each fire apparatus purchase and replaced throughout its lifetime as needed. The information below represents estimates for total cost of outfitting each apparatus with our standardized inventory.

Type I Engine Loose Equipment (x2)	\$45,000
Type III Engine Loose Equipment (x2)	\$25,000
Battalion Chief Vehicle Upfitting (x1)	\$25,000
Annual replacement allocation	\$22,500

Mobile and Portable Radios

Additional data is needed to understand current radio inventory and future replacement needs. Current costs of EBRCS compliant portable radios is approximately \$8,000 each and mobile radios can be as much as \$10,000 each. Expected service life is approximately 10 years. Replacement costs for these items is not currently included in our proposal.

TOTAL ANNUAL COSTS

Fire Station Staffing	\$ 6,549,258
Battalion Chief	\$ 467,880
Administrative Overhead	\$ 701,713
Apparatus Replacement Allocation	\$ 310,000
Equipment Replacement Allocation	\$ 22,500
Fire Prevention/Investigation Services	\$ TBD
Radio/Communication Equipment	\$ TBD
Total	\$ 8,051,351

This proposal is not binding or final. The District reserves the right to modify or amend this proposal based on additional information received, revised cost estimates, or any other materially significant information that has not been accounted for or was otherwise omitted in creating this initial proposal.

Consulting International**

City of Pinole Fire Department

Draft Regional Fire Service Delivery Study

October 8 , 2019

Study Options Per The RFP

The City of Pinole has a specific interest in studying the following options:

1. Stay as we currently operate (independent department) with one fire station and one engine company.
2. Open the currently closed station (74) to provided additional services within the area (remain independent) for a total of two engine companies.
3. Based on data review, determine if a medical response unit is needed in lieu of an engine company.

4. Identify what Pinole Fire Department would need to function at an optimal service delivery model (all aspects, including responding to calls for service, Fire Prevention, Community Programs, etc).
5. Determine the feasibility of consolidation or a contract for services with Rodeo/ Hercules Fire Protection District.
6. Determine the feasibility of contract for service with Contra Costa County Fire Protection District.
7. Look into other alternative staffing models.

Prepared for the City of Pinole in accordance with the guidelines contained within ESCI's Scope of Work as proposed and accepted in response to the City's Request For Proposals.

- Evaluation of Current Conditions
- Stakeholder Input
- Options for Shared Services
- Options for Delivery of Fire Based Services
- Overall Evaluation, Conclusions, and Recommendations

Community Expectations

During the development of the community expectations portion of the Regional Fire Service Delivery Study Scope of Work, the City made it very clear they desired a number of opportunities for public input. The final scope of work included a Community Fire Study Workshop, several days of stakeholder interviews, and no less than two presentations to the City Council that would be conducted with opportunities for public input. The study reflects the results of the Community Fire Study Workshop and the stakeholder interviews.

This document is:

- A thorough review and assessment of community risk, emergency response capability, apparatus, and facilities
- An analysis of the level of service currently provided to the community
- Recommendations for service delivery options

The Community

- Urban community
- City Population 19,498
- Service Area Population – 24,624

PFD

- Full-service fire department
- 1 staffed fire station and 14 full-time employees
- Minimum 3 firefighters on duty each day

- Fire Suppression (structural, wildland, other)
- Emergency Medical Services (basic and advanced life support)
- Technical Rescue
 - Auto Extrication
 - Confined space rescue
 - Low Angle
 - Trench Rescue Support
 - Shoreline Water
- Hazardous Materials Emergency Response
- Fire Prevention and Public Safety Education

scene.”*

The NFPA response time goal for the delivery of the full ERF to a moderate risk building fire is within 8 minutes, 90 percent of the time.

PFD has defined the minimum full effective response force for moderate risk building fires as four fire engines, one ladder truck, and two Battalion Chiefs for a total of 21 firefighters.

Eight minutes of travel time is allowed to assemble the defined, fully effective response force on the scene. This figure includes the resources of five adjacent automatic aid stations.

Service
Area where
PFD was
not
available.

Overview of Findings

[Return to Agenda](#)

- Due to the lack of sufficient command and administrative staff, the department struggles to maintain compliance with performance goals, industry standards, and workload.
- The department needs additional staffing to satisfactorily fulfill all fire prevention related functions.
- The minimum staffing level for PFD does not provide for the two-in/two-out structure firefighting per OSHA mandates.

Overview of Findings

[Return to Agenda](#)

- PFD is fully dependent on automatic and mutual aid for any call requiring more than one unit.
- In the event of concurrent incidents requiring more than the one staffed Pinole Engine, service to the residents of Pinole for the additional incidents must be provided by other agencies.

Overview of Findings

[Return to Agenda](#)

- PFD is fully dependent on automatic and mutual aid for any call requiring more than one unit.
- In the event of concurrent incidents requiring more than the one staffed Pinole Engine, service to the residents of Pinole for the additional incidents must be provided by other agencies.

▪

ESCI Offers the Following Options for Consideration

Should RHFPD express an interest in annexing the area within the Pinole City Limits, the following will need to be considered:

Expand the boundaries of the Rodeo-Hercules FPD to include territory within the City of Pinole by submitting an annexation proposal to LAFCO.

Transfer (or lease) City-owned fire service facilities and equipment (i.e., stations, rolling stock, hoses, ladders, etc.) to the Rodeo-Hercules FPD.

Have the RHFPD hire City of Pinole employees who provide fire protection and wish to become employees of the RHFPD and devise a process to determine relative employee seniority.

Determine how to fund the additional service responsibilities incurred by the RHFPD such as reallocate a percentage of the City's property tax allocation to RHFPD effective the year the annexation becomes effective. This percentage amount would be negotiated and approved by the City, the District, and the Board of Supervisors and consider extending an existing Special Tax already imposed by Rodeo-Hercules FPD within its current boundaries to the parcels being annexed. It is assumed this would be a condition of LAFCO's approval of the annexation.

Option A: Rodeo-Hercules Fire Protection District (Cont.)

[Return to Agenda](#)

As a result of these changes, (1) the territory within the City would be within the boundaries and service area of the RHFPD, (2) the City would receive a smaller portion of the 1 percent property tax levied within its boundaries but would have fewer municipal expenses since it would no longer provide fire protection services, and (3) property owners within the City would begin paying the special tax which is already being paid by property owners within the Rodeo-Hercules FPD.

Any proposal from RHFPD should include a plan to staff Pinole Station 74 and provide the administrative functions currently missing within PFD.

Option B: Contra Costa County Fire Protection District

[Return to Agenda](#)

The City of Pinole requested a proposal from Contra Costa County Fire Protection District (CCCFPD) to provide services within the Pinole City Limits. The terms of the proposal include staffing each station with a crew of three personnel on a 24-hour per day, seven days per week basis, and one Battalion Chief-level position on a 56-hour per shift basis with a 10 percent administrative fee and a 5 percent annual escalation for all labor costs. It also includes administrative positions currently lacking in PFD.

The county proposal assumes the current general fund contribution to the PFD will remain constant at \$3,395,335 and the Measure S funding will remain constant at \$1,103,888 throughout the five-year projection period. Additional funds will be required to fulfill the financial requirement of the proposed contract.

Option B: Contra Costa County Fire Protection District (Cont.)

[Return to Agenda](#)

Total operating costs	7,718,852	8,104,794	8,510,034	8,935,536	9,382,313
Fire Prevention	160,000	160,000	160,000	160,000	160,000
Deduct projected GF funding cap	(3,395,335)	(3,395,335)	(3,395,335)	(3,395,335)	(3,395,335)
UAL Pension liability	386,129	441,171	506,390	559,659	591,073
Deduct Measure S Initiatives cap	(1,103,888)	(1,103,888)	(1,103,888)	(1,103,888)	(1,103,888)
Net impact to Operating Budget	3,765,758	4,206,742	4,677,201	5,155,972	5,634,163
Additional Type I Engine lease	102,948	102,948	102,948	102,948	102,948
Replacement Fund	231,454	231,454	231,454	231,454	231,454
Additional funding required	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565

Option B: Contra Costa County Fire Protection District (Cont.)

[Return to Agenda](#)

Additional funding required	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565
Total tracts	6,198	6,198	6,198	6,198	6,198
Parcel tax per tract	661.53	732.68	808.58	885.83	962.98
Total costs allocated	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565
Escalation		10.76%	10.36%	9.55%	8.71%

A third alternative to be considered is the restoration of the service model using the currently closed Station 74 and staffing of key administrative positions. This alternative maintains a minimum staffing of three personnel for each of the three shifts at this station. This combines Figure 130 and Figure 131 from the report.

The costs of this proposed expansion require additional funding which may be generated by a parcel tax, but similarly freeze current funding levels and Measure S allocations.

Option C: Expansion of Pinole Fire Department (Cont.)

[Return to Agenda](#)

Based on ESCI's review of critical administrative functions, PFD will need additional full-time staffing to manage programs and other administrative tasks. ESCI is recommending the creation of three 40-hour per week positions to assist in managing the organization, each position and in total.

EXECUTIVE SUMMARY

In April 2019, Emergency Services Consulting International (ESCI) was retained by the City of Pinole to evaluate the following opportunities; 1) Regional cooperation, to include consideration of consolidation or contract for Fire and Rescue Services; 2) Cost estimate to re-open and operate Station 74; and 3) applicable cost to residents through a parcel tax. During a presentation of the initial draft of the study to Pinole City Council on October 8, 2019, the City Council requested an addendum with additional research. The analysis within this addendum reflects the work completed consistent with the original contract *and* the additional research requested by the City Council. The additional updates/research items are as follows: Updated original financial calculations utilizing the most current budget to actuals; Development of additional parcel tax options; Development of a Reserve Firefighter Program; Analysis of placing a single-role advanced life support ambulance in the City in lieu of staffing an additional all-risk response unit. Highlighted and/or asterisked tables or narrative indicates changes and additions resulting from the supplementary research and related changes.

The analysis completed during the original study revealed a number of important findings. These include:

- Due to the lack of sufficient command and administrative staff, the department struggles to maintain compliance with performance goals, industry standards, and workload.
- Data collection and records management analysis was challenging due to inconsistencies.
- The department needs additional staffing to fulfill all fire prevention related functions satisfactorily.
- PFD does not have a designated individual committed to the training function for the department. The responsibility for conducting all needs assessments relative to training, as well as program design, coordination, and records keeping.
- The department does not have adequate training props, although funding has been included in the FY 19/20 budget to purchase some.
- The minimum staffing level for PFD does not provide for the two-in/two-out structure firefighting per OSHA mandates.
- PFD is fully dependent on automatic and mutual aid for any call requiring more than one unit.
- In the event of concurrent incidents requiring more than the one staffed Pinole Engine, service to the residents of Pinole for the additional incidents must be provided by other agencies.
- In 2018, none of the reported fire incidents achieved the stated performance objective of 21 firefighters on-scene, nor did the travel time for all apparatus on-scene approach 8 minutes.
- Projected General Fund revenues are not sufficient to provide for Fire Department General Fund expenditures on an annual basis and will require a continued drawdown of General Fund reserve balances.
- Station 73's crew quarters need remodeling and updating, which may include ADA accommodation.
- PFD apparatus specifications have not been standardized with the Battalion 7 apparatus.
- Absent automatic and mutual aid from surrounding agencies, standalone PFD is not capable of handling an incident, such as a trash fire, car fire, or medical incident requiring more than one apparatus, much less a more complex incident.

- At 110 calls per 1,000 population, PFD has a higher median number of calls per 1,000 population than the region but slightly lower than the urban lower range.
- Much of the developed residential area in the eastern part of the city is beyond 1.5 miles of Station 73.
- Due to Station 74 being closed, a portion of the developed residential area in the southeast part of the city is beyond the 4-minute travel time footprint.
- Funding does not appear to be available to cash purchase the required Type I apparatus for Station 74, should that station be reopened.

The analysis conducted during the evaluation phase of this process identified several opportunities to improve service (improvement goals). ESCI offers the following improvement goals for consideration. These goals and specific recommendations for each are described in more detail at the end of this report in the *Conclusions* section.

Short-Term Recommendations

Recommendation A: Adopt response performance goals that are achievable.

A community's desired level of service is a uniquely individual decision. No two communities are exactly alike. Performance goals must be tailored to match community expectations, community conditions, and the ability to pay for the resources necessary to attain the desired level of service.

Recommendation B: The City should consider moving forward with the necessary steps to improve service via reopening Station 74, and staffing and administrative support, as funding becomes available.

Recommendation B-1: As a temporary measure until sufficient funding is developed to implement Recommendation B, to improve cost-effective response performance to both medical as well as fire and other emergency incidents, the City should consider acquiring and staffing a two-person, advanced life support equipped, quick response apparatus (Type VI) appropriately. Included in this recommendation is the hiring of an Administrative Captain to manage, among other administrative tasks, a continuing education program for fire and medical personnel.

Recommendation C: Consider initiating the process of securing additional funding.

ESCI recommends that the City consider moving forward with the process of pursuing an additional funding source such as a parcel tax.

Recommendation D: Standardize apparatus specifications.

Consideration should be given to the standardization of apparatus specifications throughout Battalion 7. Standardization of specifications will enhance operational efficiency and could result in cost savings via group purchasing.

Recommendation E: Review all current fire department alarm assignments.

Consideration should be given to reviewing the department's alarm assignments and determine the number of resources required for an effective response force based on risk.

Recommendation F: Improve the collection and analysis of incident data.

Much can be revealed by collecting and evaluating incident data accurately and regularly. Challenges to quick response can be identified and solutions proposed.

Mid- to Long-Term Recommendations**Recommendation G: Initiate recruitment of additional staff.**

As soon as funding is available, ESCI recommends that the City recruit the positions identified in Option C: "Expansion of Pinole Fire Department System."

Recommendation H: Remodel Station 73

Fire Station 73's crew quarters require remodeling to accommodate the relocation of the shared shift Battalion Chief and additional administrative staff.

Recommendation I: Capital Equipment and Facilities Fund

Establish a Capital Equipment and Facilities Replacement Fund. A portion of the proposed parcel tax could be used to fund this recommendation.

Section I:

EVALUATION OF CURRENT CONDITIONS

CURRENT CONDITIONS

Organizational Overview

ESCI combined data provided by the participating fire agencies with information collected in the course of our fieldwork and used to develop an overview of the organizations. The purpose of the following organizational overview is two-fold. First, it verifies the accuracy of the baseline information and ESCI's understanding of each agency's composition—the foundation from which the study is developed. Second, the overview serves as a reference for the reader, who may not be familiar with the details of each agency's operations.

City of Pinole Fire Department

Governance & Lines of Authority

The City of Pinole was incorporated in 1903 and commenced providing fire protection the same year. Policy direction for the Pinole Fire Department (PFD) is provided by five elected City Council members (Council). The Council is provided the necessary power and authority to govern the provision of fire protection and emergency services. The Council appoints a City Manager who is responsible for implementing Council policy and overseeing the operation of the Organization. The City Manager appoints the Fire Chief to oversee the Fire Department operations.

The Pinole Fire Department (PFD) service area is comprised of the City of Pinole and two informally contracted areas of Contra Costa County, as depicted in the following figure. The Rodeo-Hercules service area is to the north and the southern boundary alternates between the City of Richmond and unincorporated Contra Costa County.

Figure 1: Study Service Area

Design

The organizational design of PFD mimics a paramilitary organization, which is a common design among first responders and emergency services agencies. PFD is an all career agency, meaning all staff are full-time regular employees of the City of Pinole.

Organizational Structure

To operate effectively, a fire department needs an organizational chart that clearly defines its structure. The chart institutionalizes the agency's hierarchy, identifies roles, and, most importantly, clarifies reporting authority. It also helps to ensure that communication flows appropriately and limits opportunities to circumvent the reporting structure.

PFD has a well-defined organizational chart that achieves this purpose and operates under a traditional top-down approach. Lines of authority are clear and depicted; however, the department is minimally staffed. The following figure illustrates the organizational chart for PFD.

Figure 2: Pinole Fire Department Organizational Chart (2019)

Governance & Decision-Making

From a governance and decision-making standpoint, the organization appears to have a clear direction and ability to operate. Lines of authority and the ability to carry out decisions appear to flow appropriately. The administrative staff understands the process to accomplish its mission. The chain of command is identified and clear on responsibilities. The span of control is adequate related to operations; however, as noted later in this report, the organization is lacking key positions necessary for an all-risk fire department.

Service Area & Infrastructure

The size and composition of a fire department's service area affect the type and number of personnel, fire stations, and vehicles that are needed to provide services efficiently. Sometimes complex decisions need to be made regarding deployment strategies to properly position resources based on land area, geography, risk, and similar factors. The following offers a summary of PFD's service area and service infrastructure resources:

Figure 3: Service Area & Apparatus Resources

Agency Description	PFD Observations
Agency type (district, municipality, etc.)	City
Land Area in square miles	5.2/2.4 contract areas ¹
Headquarters location (physical address)	880 Tennent Ave
Number of fire stations	2 (one currently closed)
Engine	1
Engine, reserve	1
Wildland Engine Type 3	1
Wildland Engine Type 6	1
Ladder truck	0
Ladder, reserve	0
Duty BC Command Response Vehicle	1

From 2005 to 2011, PFD was able to deploy personnel and apparatus from two strategically located facilities. During the economic downturn, the second PFD station (74) was browned out and eventually closed. This closure has resulted in an increase in response times to the area in the eastern portion of the City.

Decisions on deployment define the Department's response capability. These decisions need to weigh multiple considerations, including risk exposure, response times, access challenges, deployment, community expectations, personnel safety, and fire department capacity. Furthermore, these decisions not only need to balance the financial considerations but also need to be strategic and in the purview of the elected officials and City Manager, in consultation with the Fire Chief. Ultimately, these individuals are responsible to the public to provide the level of service that the citizens desire and for which they are willing to pay.

¹ The City of Pinole encompasses approximately 11.6 square miles. Of that, 5.2 square miles are land, with the remaining 6.4 sq. miles comprised of the bay.

Staffing Analysis

An organization's greatest asset lies in its people, yet its people also typically comprise its greatest financial cost. Thus, organizations must pay special attention to managing human resources in a way that achieves maximum productivity while ensuring a high level of employee job satisfaction. Consistent management practices combined with a safe working environment, equitable treatment, the opportunity for input, and awards and recognition all comprise key components impacting job satisfaction.

The size and structure of an organization's staffing remain dependent upon the organization's specific needs. These needs must directly correlate with the needs of the community and the available revenue stream. A structure that works for one entity may not necessarily work for another agency. This section provides an overview of the PFD's staffing configuration and management practices.

One can divide Department staffing into two distinctly different groups: the first is what the citizens typically recognize and is commonly known as the operations unit, generally classified as the emergency response personnel; the second group, commonly known as the administrative section, typically works behind the scenes to provide the support that the operation's personnel need to deliver effective emergency response.

In addition to providing fire suppression services, PFD is tasked with providing emergency medical response, fire investigation, fire prevention, life safety education, community risk reduction, disaster/emergency operations planning, and hazardous materials response.

Personnel Responsibilities & Activity Levels

The leadership of PFD has established work responsibilities beyond the emergency response requirements. For example, these additional duties include fleet management, respiratory protection compliance, and training. Due to the lack of sufficient management staff, the department struggles to maintain compliance with performance goals, industry standards, and workload.

Administrative & Support Staffing

One of the primary responsibilities of a response team's administration is to ensure that the operations segment of the organization has the ability and means to respond to and mitigate emergencies safely and efficiently. An effective administration and support services system proves critical to the success of a response agency.

Typical responsibilities of the administration and support staff include planning, organizing, directing, coordinating, and evaluating the various programs within the Department. This list of functions is not exhaustive, and other functions may be added. It is also important to understand that these functions do not occur linearly and can more often coincide. This requires the Fire Chief and the one shift Battalion Chief to focus on many different areas at the same time.

The following figure reviews the administration and the organizational support structure of PFD:

Figure 4: PFD Administrative and Support Staffing

Position	Number
Fire Chief	1
Management Analyst	1
Battalion Chief (Shift)	1
TOTAL	3

Like any other part of a municipal fire department, administration and support need appropriate resources to function properly. By analyzing the administrative and support positions within an organization, we can create a common understanding of the relative resources committed to this function compared to industry best practices and similar organizations. The appropriate balance of administration and support compared to operational resources and service levels is a crucial factor in ensuring the department can accomplish its mission.

Administration

The positions of the Fire Chief, one shift Battalion Chief, and one Management Analyst currently establish the administrative function of the department. Some of the typical responsibilities of the Fire Chief include planning, organizing, directing, and budgeting for all aspects of the department's operations. The current number of positions assigned to this activity is insufficient to meet supervisory expectations; in addition, the daily operational needs can detract from the ability to focus on administrative requirements.

PFD currently operates with a limited number of administrative support staff. The position assigned to administration is one Management Analyst. This one Management Analyst provides critical support to all of the department's administrative functions. In addition, during extreme emergencies, administrative staff are typically called upon to staff numerous duties in support of operations and logistics. One cannot overstate the value of administrative support as these staff members free up fire management staff to concentrate on other areas of operation. The level of administrative support appears to be inadequate for PFD.

Emergency Management

The responsibility for the City's emergency management planning and preparedness is assigned to the Fire Chief and the Police Chief. This shared responsibility is expected to provide for overall management and delivery of emergency management activities for the City of Pinole. Given the current duties of the Fire Chief, there is little time available to devote to this responsibility.

Fire Prevention

Typical fire prevention functions include building plan reviews, building inspections, weed abatement, community outreach, and vegetation management. The department currently outsources some of these functions through contracts; additional staffing would be required to satisfactorily fulfill these functions internally. Currently, the Fire Inspector duties are carried out via a contracted position. This includes the review and approval of building plans and providing building and construction inspections.

Fire Prevention Programs

An aggressive risk management program, through proactive fire and life safety services, is a fire department's best opportunity to minimize the losses and human trauma associated with fires and other community risks.

The National Fire Protection Association recommends a multifaceted, coordinated risk reduction process at the community level to address local risks. This requires engaging all segments of the community, identifying the highest priority risks, and then developing and implementing strategies designed to mitigate the risks.²

A fire department needs to review and understand the importance of fire prevention and public education, appreciating its role in the planning process of a community with diversified zoning, including residential, commercial, and industrial properties. The fundamental components of an effective fire prevention program are listed in the following figure, accompanied by the elements needed to address each component.

Figure 5: Fire Prevention Program Components

Program Components	Elements Needed
Fire Code Enforcement	- Proposed construction and plans review - New construction inspections - Existing structure/occupancy inspections - Internal protection systems design review - Storage and handling of hazardous materials
Public Fire & Life Safety Education	- Public education - Specialized education - Juvenile fire setter intervention - Prevention information dissemination
Fire Cause Investigation	- Fire cause and origin determination - Fire death investigation - Arson investigation and prosecution

² NFPA Standard 1730: *Organizing and Deployment of Fire Prevention Inspection and Code Enforcement, Plan Review, Investigation, and Public Education Operations*, 2019 Edition.

Fire & Life-Safety Code Enforcement

The most effective way to combat fires is to prevent them. A strong fire prevention program, based on locally identified risks and relevant codes and ordinances, reduces the loss of property, life, and the often-crippling impact on a community's economy. The following figure summarizes the new construction and fire protection system plan review programs, and ancillary programs typically found in fire prevention programs.

Figure 6: New Construction Inspections & Involvement

Program Elements	Pinole Fire Department
FD consulted on proposed new construction?	Yes, by utilizing contractors
FD consulted on proposed occupancy changes/tenant improvements?	Yes, via contractor
Perform fire & life-safety plan reviews?	Yes, by utilizing contractors
Charges for inspections or reviews?	Yes
Special risk inspections?	Yes, via contractor
Storage tank inspections?	No, this is a function of the Contra Costa CUPA
Key-box entry program in place?	Yes
Hydrant flow records maintained?	No ³

The following sections provide detail on the qualifications and resources dedicated to fire and life safety code enforcement provided by the Pinole Fire Department.

Pinole Fire Prevention

The Fire Chief has the primary responsibility of ensuring fire prevention activities are conducted to state and local regulations. This is supported by one contract Inspector and the on-duty engine company personnel when they are available. Current services offered include:

- Inspect new or repaired fire protection systems requiring a fire construction permit;
- Inspect existing occupancies required to have an operational permit and those required by the California Health and Safety Code to be inspected on an annual basis;
- Respond to complaints regarding fire and life safety code violations; and
- Investigate major fires and work with law enforcement to make arrests of persons responsible for unlawful actions related to fire.

³ The water and hydrant system are maintained by East Bay Municipal Utilities District (EBMUD). At the time of this report, the hydrant maintenance schedule and flow records could not be acquired from EBMUD.

Community Risk Reduction Program

Lately, U.S. fire departments have begun to recognize the value of Community Risk Reduction (CRR) programs that go beyond traditional fire prevention activities. Some have gone so far as to re-name their “fire prevention” divisions to “Community Risk Reduction Divisions.”

Regardless of the name, fire departments should be able to accurately identify the various potential community risks before developing prevention programs. This is not meant to imply diminishing the focus and importance of addressing the fire problem in a community, rather it affords an opportunity to identify and mitigate additional community risks through targeted prevention activities.

The first step in developing an effective CRR plan is identifying risks unique to a specific community by conducting a community risk assessment. A key component of the assessment process is the collection and analysis of incident data. However, firefighters, officers, and inspectors can also provide substantial anecdotal information on the various risks found within their respective response-areas.

Figure 7: Six Steps of CRR Planning

Fire & Life-Safety Public Education Program

Providing fire and life safety education to the public to minimize the number of emergencies while training the community to take appropriate actions when an emergency occurs is essential to a fire and life safety program. Life and fire safety education provides the best chance for minimizing the effects of fire, injury, and illness to the community.

Public education and outreach are conducted in various ways in each department. The following is a summary of the programs commonly offered by area fire departments.

Figure 8: Life Safety & Public Education Services

Life Safety & Public Education	Description	Pinole Fire Department
PIO/Public Educator	This position often works with the community to identify and eliminate fire and life safety risks.	Not a filled position, delegated as needed if available.
911 Education Program	This program works to reduce the number of unnecessary 911 calls and provide education to the public on available services.	Website
Exit Drills In The Home (EDITH)	This program is typically offered to elementary school-age children through annual school visits.	Engine company upon request
Smoke Alarm Installation	Often, residents are encouraged to notify their fire departments when they need assistance replacing alarm or alarm batteries.	Engine company upon request.
Carbon Monoxide Alarm Installation	Carbon monoxide alarm installation assistance.	Not available
Bike Helmet Program	Provides information on bicycle helmet use to school-aged children.	Not available
Elder Safety/Fall prevention	Provides information and inspections to seniors to reduce accidents and falls.	Not available
Home Safety Inspections	A home safety program that aims to reduce fire and safety hazards in the household.	Upon request; crews not formally trained.
CPR/First Aid Classes	Classes that offer training in CPR and first aid to citizen groups, city employees, and individuals.	Not available
BP Checks	Often offered at the fire station for any resident on a walk-in basis.	Not available
Car Seat Safety Inspections	Classes, inspection, or training to ensure citizens are properly installing car seats into vehicles.	Not available
Fire Extinguisher Classes	Hands-on training to business employees and citizens on the proper selection and use of fire extinguishers.	Not available
K, 12 Fire Prevention curriculum delivery in schools	Fire Prevention classes designed for school-aged children to reduce burns and fires in the home.	Not available; demos upon request.
Wildfire Defensible Space Education	Education offered to neighborhood associations or individuals on the proper wildfire mitigation efforts around residential and commercial structures.	Website
Water Safety Program	Pool safety, swimming classes, and information on how to safely rescue an individual in the water.	Not available
Safety Fairs	Fairs offered to large groups of individuals with the intention of offering numerous public safety classes at one location.	Not available

Fire Prevention Discussion

In today's fire service, public fire and injury prevention education is much more important than in the past. This is likely the result of evolving community expectations, coupled with the realization by fire departments that community engagement and safety education outreach can build tremendous community support.

Consideration should be given to conducting a formal Community Risk Assessment. The U.S. Fire Administration identified a five-step assessment process for improving public safety education:⁴

1. Conduct a Community Analysis.
2. Develop Community Partnerships.
3. Create an Implementation Strategy.
4. Implement the Strategy.
5. Evaluate the Results.

Fire Cause & Origin Investigation

Accurately determining the cause of a fire is an essential element of a fire prevention program. When fires are intentionally set, identification and/or prosecution of the responsible offender is critical in preventing additional fires, injuries and fatalities, and catastrophic economic impact. Further, identifying the cause and potential trends enables the department to provide specific public information and fire prevention education to prevent reoccurrence.

Pinole receives fire investigation services through mutual aid from Contra Costa County Fire Protection District.

The results of professional and thorough fire investigations can be extremely powerful in:

- Prosecuting arsonists.
- Identifying product safety issues.
- Educating the public about the outcomes of unsafe behaviors and conditions.
- Assisting insurance companies and property owners with insurance claims.
- Providing solid evidence in criminal and civil court proceedings.
- Identifying necessary life safety code changes.

⁴ <https://www.usfa.fema.gov/downloads/pdf/publications/fa-219.pdf>

Training

PFD does not have a designated individual committed to the training function for the department. The responsibility for conducting all needs assessments relative to training, as well as program design, coordination, and evaluation falls to the Fire Chief. The result of this arrangement is that the training of all personnel is delivered inconsistently due to the other duties assigned to the Fire Chief.

While the design and staffing of a fire department are dependent upon the specific needs of the community, the reality is that most of the needed training is common among California fire departments. In addition to maximizing resources through sharing training resources and opportunities, fire departments that train together tend to work better together during mutual aid incidents. This also lends itself to making the firefighters more well-rounded, as they are exposed to other lines of thinking. Finally, a coordinated regionalized, collaborative approach to training delivery, in addition to the benefits noted, can substantially reduce costs, and increase the efficiency of educational efforts. To capitalize on local and regional training opportunities, the department needs an individual whose primary duties include this important function.

Training officers are often assigned to act as the department Safety Officer, reviewing standard operating procedures, adherence to proper personal protective equipment, inspecting facilities for safety hazards, and examining work practices to ensure they meet OSHA and Cal OSHA requirements. Safety Officers review accidents and design training classes to reduce accidents in the workplace.

Training Overview

Providing safe and effective fire protection, EMS, and other emergency services requires a well-trained workforce. Initial, ongoing, and high-quality training and education are critical for fire department effectiveness and the safety of its personnel. A comprehensive training program is necessary to achieve this goal; this is true in all-career or combination fire departments that provide a broad range of services throughout the community. Pinole Fire Department allocated \$25,000 in the fiscal year 2019/2020 budget to provide for this training.

To ensure maximum effectiveness and safety in complex environments, firefighters and officers must acquire and maintain initial training, ongoing training, and EMS Continuing Education (CE). Failure to provide necessary training endangers firefighters and citizens and exposes fire departments to liability. In addition, a well-trained workforce substantially contributes to better emergency incident outcomes and community services.

Newly hired firefighters must participate in a structured recruit training and testing process. The *California State Fire Training* utilizes NFPA 1001: *Standard for Fire Fighter Professional Qualifications* (2013), NFPA 1051: *Standard for Wildland Fire Fighter Professional Qualifications* (2016), and NFPA 472: *Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents* to provide the qualifications for State Fire Training's Fire Fighter I certification. These standards identify the minimum training requirements that serve as the basis for entry-level firefighters. The NFPA recommends other standards that address initial and ongoing training for firefighters and officers in a variety of specific topics. In addition, new recruits must complete or have previously completed basic emergency medical training.

Following initial training, firefighters (i.e., all emergency services personnel) must actively participate in ongoing training that includes testing as well as ensuring practical skills and knowledge are maintained. In its *Fire & Emergency Service Self-Assessment Manual (9th edition)*, the Commission on Fire Accreditation International (CFAI) addresses “Training and Competency,” and lists numerous performance indicators under the headings of training and education program requirements, performance, and resources.

To accomplish this, fire departments must have access to qualified instructors and training resources—either within the organization, externally with regional partners, or both.

Training programs must go beyond simply fulfilling mandatory hours. Emergency services training administrators and instructors must ensure that firefighters, EMS personnel, and officers are not only competent but also self-confident in the variety of skills necessary to perform effectively in high-stress situations. Industry standards outline specific areas that are considered integral to effective training programs. The program should include the following:

- Training administration
- Recordkeeping (records management systems)
- Training facilities and resources
- General training competencies
- Training methodologies

Training Administration

Typically, even smaller fire departments have a dedicated individual assigned to the training division who oversees the training program, sets program goals and objectives, develops training manuals, produces annual reports, and ensures state and local mandatory training is completed. Pinole Fire does not have a dedicated Training Officer.

Contra Costa County Training Officers Association

Under the auspices of the *Contra Costa Fire Chiefs Association*, training officers from the fire departments meet regularly to develop and share resources, as well as promote fire training locally. Pinole participates regularly in the Training Officers’ Association.

Training Facilities & Resources

Pinole does not possess a fire training facility and has limited access to shared resources due to daily staffing arrangements and the need to be available to respond to incidents. The following figure contains common considerations for fire service training and indicates if these training services are available within the PFD service area.

Figure 9: Training Facilities & Resources Findings

Description	Pinole Fire Department
Adequate training ground space/equipment	No
Live fire props	No
Fire & driving grounds	No
Training facility maintenance adequate	Not applicable
Classroom facilities adequate	Shared classroom facilities are available
Video & computer simulations available	No
Instructional materials available	Yes

Training Facilities in Contra Costa County

The Rodeo Hercules Fire Protection District training center is equipped with a wide variety of equipment, props, and other facilities. This facility is available for use by PFD; however, utilizing it requires moving the on-duty fire crew out of the City of Pinole and placing them out-of-service or causing a delay in response.

General Training Records

Fire departments must maintain records to demonstrate competencies and completion of annual mandated (local, state, and federal) training. These records are important to internal processes such as promotions and qualifications for special operations. Externally, training records are often used in defense of litigation, for investigations, and to prove competencies in the Master Mutual Aid System.

Figure 10: Training Records Maintenance

Description	Pinole Fire Department
Individual training files maintained	No ⁵
Records & files computerized	Limited
Daily training records kept	Yes, via hard copy journal
Annual training hours tracked	No
Company training records kept	No
Responsibility for records	Fire Chief
Training equipment inventoried	Props are limited & in need of refurbishment ⁶

General Training Competencies

For training to be fully effective, it should be based on established standards. The next figure lists the general training competencies regularly delivered to the members of the Pinole Fire Department.

Figure 11: General Training Competencies

Description	Pinole Fire Department
Incident command system	No, "Blue Card" is being implemented.
Accountability procedures in place	No, Lexipol policy & procedure system has been purchased and will soon be implemented.
Policy & procedures for training	No, Lexipol policy & procedures purchased and soon to be implemented.
Safety procedures in place	No, Lexipol policy & procedures purchased and soon to be implemented.
Recruit academy	Two recruits will start at the Berkeley Fire Dept Academy in October 2019. Two went through in October 2017.
Special rescue	No
Hazmat certification	No
Wildland firefighter	Yes
Vehicle extrication	Yes
Defensive driving	Yes
Use, safety, & care of small tools	Yes
Use & care of power equipment	Yes
Radio communications & dispatch	Yes
EMS skills & protocols	Yes

⁵ PFD is in the process of configuring Target Solutions to maintain training records and reports.

⁶ In fiscal year 2019/2020, \$2,500 has been allocated for this purpose. This amount is generally enough to maintain one training prop, but as PFD expands its training capabilities, additional funding should be added to the budget for prop maintenance.

EMS Training & Continuing Medical Education

Pinole Fire Department relies on in-house (PFD developed) and other regional sources for training for basic and advanced life support continuing medical education. Pinole personnel are preparing to use Target Solutions to deliver ongoing continuing education for paramedics and emergency medical technicians at a fixed annual cost. The use of online training reduces the need to hire instructors and pay employees overtime as they attend mandated training as well as ensuring annual training mandate records are well kept.

Training Methodologies

Certain resources are necessary to arm the instructor with the tools necessary to deliver adequate educational content to provide effective training to fire and EMS personnel. In addition to such tools, effective methodologies must be employed if training delivery is to be enough to meet the needs.

The following figure lists the various training methodologies and training operations utilized by PFD.

Figure 12: Training Methodologies & Operations

Description	Pinole Fire Department
Manipulative skills	Manipulative training drills for individual and company are conducted weekly.
Task performances/frequency	Manipulative training drills for individual and company are conducted weekly.
Annual training hour requirements	24 hours of EMS "Continuous Education" is accomplished annually.
Use of lesson plans	Each firefighter employee has a task book containing lesson plans. Fire Engineer and Captain task books are being developed.
Produced in-house or commercially	Training plans are produced by PFD members.
Night drills	Annual structure fire drills are held at night.
Multi-agency drills	Annual multi-agency structure fire, wildland, & EMS are held.
Disaster drills conducted	No
Pre-fire planning included in training	Yes
Safety incorporated in training	On large drills, a safety plan is developed as part of a training Incident Action Plan.
Post-incident analysis conducted	On large drills and incidents, an incident or training analysis is completed.

Training Discussion

Ongoing training reduces injuries and other risks associated with firefighting. Mandatory training is required by OSHA, Cal OSHA, and the State of California that must be undertaken and completed on an annual basis by firefighters. In addition, the Insurance Services Office (ISO) reviews training hours to ensure the adequate training of fire service responders.

Emergency Response Staffing

It takes an adequate and properly trained staff of emergency responders to put the appropriate emergency apparatus and equipment to its best use in mitigating incidents. Insufficient staffing at an operational scene decreases the effectiveness of the response and increases the risk of injury to all individuals involved.

One can break down critical tasks performed at a fire into two key components—life safety and fire flow. Life safety tasks are based on the number of building occupants and their location, status, and ability to take self-preservation action. Life safety-related tasks involve search, rescue, and evacuation of victims. The fire-flow component involves delivering enough water to extinguish the fire and to create an environment within the building that allows firefighters' entry.

The number and types of tasks needing simultaneous action will dictate the minimum number of firefighters required to combat different types of fires. In the absence of adequate personnel to perform concurrent action, the Command Officer must prioritize the tasks and complete some in chronological order, rather than concurrently. These tasks include:

- Command
- Scene safety
- Search and rescue
- Fire attack
- Water supply
- Pump operation
- Ventilation
- Back-up/rapid intervention

The first 10 minutes are the most crucial period in the suppression of a fire. The timing of these 10 minutes does not start when the firefighters arrive at the scene but begin when the fire initially starts. How effectively and efficiently firefighters perform during this period has a significant impact on the overall outcome of the event. This general concept is applicable to fire, rescue, and medical situations. Critical tasks must be conducted promptly to control a fire or to treat a patient. PFD is responsible for ensuring those responding companies can perform all the described tasks in a prompt, efficient, and safe manner.

Setting the staffing levels is a determination made at the community level based on risk, capability, and citizen expectations and is guided by national recommendations such as those found in the National Fire Protection Association Standard 1710.

When a fire escalates beyond what the initial assignment can handle, or if the fire has unusual characteristics such as a wind-driven fire or has been accelerated with a highly flammable compound, additional personnel are needed. Other types of scenarios may not include fires but rather mass casualty incidents, explosions, etc., that may need additional staffing. It proves difficult or impossible to staff for these worst-case incidents; they require a robust mutual aid or automatic aid plan for assistance.

The staffing level that PFD is expected to provide is a decision based on a risk assessment and community expectations. A funding level must be established that matches the fire department's deployment capability to mitigate the risk to a level that meets the community's expectations. This funding level is developed through the political process of citizens meeting with local legislators and expressing approval of the level of service being received or indicating improvements that need to be made and the level of additional financial support they are willing to bear to obtain satisfaction with the services. This additional financial support is usually in the form of assessing property through ad valorem taxes or other taxes to generate the necessary revenue. No mandated requirement fits all possible situations, although NFPA 1710 guides the number of personnel and apparatus required for typical scenarios. Incidents may escalate beyond the capability of the initial assignment of units and staff, resulting in additional apparatus and personnel required. It may prove difficult or financially impossible to staff for those worst-case incidents. In those instances, a robust mutual or automatic aid system is required.

On a typical day in Pinole, as in most jurisdictions, the full staffing required by response needs are not available due to budget constraints.⁷ Currently, Pinole has determined that the minimum acceptable department staffing is three operations personnel and a shared Battalion Chief on each shift. This staffing level is generally only adequate for basic calls for service such as low acuity medical aids, small incipient fires, or motor-vehicle accidents with minor injuries. This staffing arrangement results in reliance on other jurisdictions assistance through automatic and mutual aid agreements for calls requiring two or more units, as identified in critical tasking Figure 32.

Battalion 7 designates the geographical area in western Contra Costa County comprised of the Contra Costa County Fire Protection District (CCFPD), City of Pinole Fire Department (PFD), and the Rodeo-Hercules Fire Protection District (RHFPD). Per an agreement with CCFPD, RHFPD, and PFD, each agency provides and shares shift Battalion Chiefs. These chief officers are assigned to Duty Chief coverage for each shift for the area described as "Battalion 7."

While this agreement provides for operational duties at the shift Battalion Chief level, it does not enhance critical administrative support needs for PFD.

The following figure depicts PFD's emergency staffing—with all authorized positions filled for the combined three shifts that PFD employs.

⁷ As an example, a residential structure fire generally requires multiple fire engine crews to accomplish the tasks required to extinguish the fire, located victims, and provide any necessary medical interventions. Another example occurs when two or more calls for service occur within a short time frame. In Pinole, only one fire engine is staffed per day. The capability to respond to complex calls requiring additional personnel or to respond to multiple incidents occurring simultaneously is fully dependent on automatic and mutual aid. See Figure 32 for additional details.

Figure 13: PFD Emergency Response Staffing

Position	Total Authorized Positions	Daily Staffing
Battalion Chief (shared)	1	0 to 1 ⁸
Fire Captain	3	1
Engineer	3	1
Firefighter	6	1
Totals:	13	3 or 4

PFD is authorized at 14 emergency response personnel for EMS, rescue, and fire suppression activities, including the Battalion Chief and Fire Chief. At the end of FY 2018, three of the authorized 12 firefighters in the Fire Operations Division were vacant. This means 25 percent of the response force positions, primarily in the firefighter rank, are vacant.

The resident population of the PFD service area inclusive of contact areas is estimated to be approximately 24,624 (this includes the City of Pinole population of 19,498 and two nearby unincorporated areas located within the service area). PFD provides its community with .69 career firefighters per 1,000 population. This compares to a national average of .99 firefighters per 1,000 population for cities of comparable size in Western states or almost a third less than the average.⁹

The suppression personnel are assigned to one of three shifts, each working 48-hours on/96-hours off and working a total of 2,912 hours each year.

PFD operates from one station, staffed with full-time personnel. The following figure shows the staffing configuration at full utilization of authorized personnel. ESCI notes that the minimum staffing level for PFD absent automatic aid does provide for the two-in/two-out structure firefighting per OSHA mandates.¹⁰

Figure 14: Station Units & Staffing Levels

Station	Apparatus	Minimum On-Duty Staffing
Station 73	Engine 73	3
	Reserve Engine 73A	0
	Type III Engine E273	Cross Staffed
	Wildland Type VI E473	Cross Staffed
	Utility Vehicle U73	As needed
Station 74	Battalion Chief (B shift)	1
Totals:		4

⁸ Chief Officer coverage is not provided for all three shifts by PFD.

⁹ NFPA Research—Career Firefighters per 1,000 population for All Career Fire Departments, 2013–2015. Retrieved from: <https://www.nfpa.org/-/media/Files/News-and-Research/Fire-statistics-and-reports/Emergency-responders/osCareerFF1000Population.ashx?la=en>

¹⁰ Two-in/two-out refers to section (g)(4) of OSHA's Respiratory Protection Standard, 29 CFR 1910.134.

CURRENT FINANCIAL ANALYSIS

Economic Conditions

The state and local economies have followed the trend of modest growth that the national economy has experienced since the economic downturn of 2008/2009. Though current national and international policies have created concerns that have harmed certain sections of the stock market and the economy, the consensus is that the current growth trends are expected to continue at least through the end of 2019.

California's economy has outpaced that of the United States since the third quarter of 2012. Retail sales in the state have increased by 20 percent between 2013 and 2017. While the California unemployment rate continues to be higher than that of the U.S. in general, the gap has been reduced to .4 percent.

California's personal income grew 4.7 percent in 2018 versus a 4.5 percent U.S. personal income growth for the same period. A similar gap was experienced in 2017 with personal income growth at 4.6 percent and 4.4 percent for California and the U.S., respectively.

Contra Costa County is one of the original 27 counties established in California in 1850 and is home to more than a million residents. The county is located in the northern portion of the East Bay region of the San Francisco Bay Area. The county is included in the San Francisco-Oakland-Hayward Metropolitan Statistical Area. The county has a total area of 804 square miles with 716 square miles of land and 88 square miles of water area. There are 19 cities, including Pinole, and numerous established communities in the county.

Due to Contra Costa County's extensive waterfront along the bays in the San Francisco area, significant heavy industry development has occurred, including oil refineries and chemical plants. Agriculture contributes to employment opportunities in the county.

Information from the 2018 Census Bureau indicates that Pinole boasts the second-highest median earnings per worker of \$57,784 of all places in the area. The "area" against which the comparisons were made includes the communities of Montalvin Manor, Bayview-Contra Costa County, West Contra Costa, El Sobrante-Contra Costa County, Tara Hills, San Jose-San Francisco-Oakland, and Hercules.¹¹ This compares with the median earnings of \$46,022 throughout the U.S. Household median income of \$84,255, also places it as the second-highest in the area, and compares favorably against the U.S median household income of \$57,652. Pinole's unemployment rate was 3.7 percent. A significant number of Pinole's residents work outside the city, elsewhere in the Bay Area. This would indicate Pinole serves more like a "bedroom community" than a commerce center.

The area continues to grow but at a very modest rate, gaining 40 new residents in 2018. Significant growth is not expected as Pinole is primarily built-out and bordered by other municipalities, creating little to no opportunity for expansion.

¹¹ TownCharts, <http://www.towncharts.com/California/Economy/Pinole-city-CA-Economy> Data.

Historical Revenue & Expense

The City of Pinole is primarily a residential community located in West Contra Costa County, approximately 30 miles northeast of San Francisco and 20 miles north of Oakland. The city covers a land area of roughly five square miles and is home to approximately 19,200 residents.

The City operates under a Council/Manager form of government. The Council is comprised of a Mayor and four Council members serving four-year terms. The Council is elected in staggered two-year periods with three members standing for election in one cycle and the remaining two positions following in the next cycle two years subsequent. The Mayor is selected by the Council on a rotating annual basis. The Council appoints the City Manager, City Attorney, and City Clerk. As is the case with most municipal governments, the Council is responsible for policymaking decisions and legislative responsibilities, which include, among other items, adopting ordinances, appointing committees, and adopting the budget. The City Manager is responsible for implementing the policies, overseeing the day-to-day operations of the City, and appointing department directors.

Pinole provides all public services including fire, police, road and street maintenance, community development, recreation programs, parks, wastewater, and fiscal services through a staff of 100 full-time and 39 part-time positions.

The local economy has continued to improve following the economic downturn. Sales tax revenues continue to increase, property values have improved, and the local unemployment rate decreased from 4.9 percent in 2017 to 3.1 percent in 2018. A new shopping center has been developed with a portion opening in 2018 and the balance to open in the second half of 2019. Three significant retailers closed their doors during FY 2018. A 15,000 square foot CVS Pharmacy was completed in early 2019.

The City of Pinole employs an accounting and budgeting system that is like most municipal forms of government. This system utilizes multiple "funds," more easily described as separate operating companies, to track expenditures made by and revenues attributable to the operation of each fund. The General Fund typically reflects the operations of the performance of the core services provided by the City, such as law enforcement, fire protection, human resources, legal, debt service, finance, and the administrative side of the City's operations. Within the General Fund, separate budgets for each of the departments are prepared. The City operates on a fiscal year beginning July 1 and ending on June 30.

Additional funds may be created to manage specific projects, programs, special or specific income streams, or to account for allocation of revenue from an assessment of taxes. Pinole employs the use of multiple funds to manage specialized activities such as Housing Programs, Community Development, Wastewater, road maintenance, debt service, and capital projects. Additional funds track police and fire department pension activities. These multiple funds require a detailed review to determine the total activity of any department that has activity in more than one fund to gain a complete picture of the revenues and costs pertaining to the department.

A significant amount of financial information and supporting data was provided to ESCI by the staff of the City of Pinole. ESCI has analyzed the historical actual revenues and expenses from FY 13/14 through FY 17/18 for the City to develop relevant financial trends, strengths, and weaknesses which, in conjunction with the annual budget information for FY 18/19, will assist in the completion of the financial forecasts presented later in this report.

Revenue

A critical component of the success and operation of any business, private or public, is a consistent and reliable funding stream. In the instance of public agencies, this funding is usually provided by the assessment and collection of various forms of taxation such as ad valorem (real estate) taxes, sales taxes, special assessments, and fees for services. Recognizing the limits of public funding, public safety agencies are limited in the level of service they may provide to their communities by the types and levels of revenues that the authority having jurisdiction is willing, or limited by the legislative process, to assess. California's legislative process created Proposition 13 in 1978, restricting the growth of tax revenues to municipal and other government agencies. Public agencies also may charge fees for services under contractual arrangements or interagency agreements to other agencies or areas outside of their political boundaries.

General Fund revenues are classified as recurring or non-recurring. Recurring revenues are those expected to continue annually, such as property taxes, sales taxes, and contracts for service. Non-recurring revenues are those sources that are expected to not continue, such as sales of assets, grant revenues, loan proceeds, and insurance proceeds. Loan proceeds may be received in one fiscal year but not be utilized until a future fiscal year, which may significantly distort the cash flows in both years. The City has sold surplus properties during four of the past five years, supplementing its cash flow for those years, but this source should not be expected on an annual basis.

The City of Pinole is allowed by statute to assess and collect a variety of taxes. The City assesses a property tax as well as a general sales tax. Revenues included in the General Fund to provide for various operations, including fire and police activities, are provided through two Measure "S" sales tax initiatives. The 2006 Measure created a 0.5 percent sales tax, which has been allocated by budget appropriations to fund fire and police department operations. The Measure S 2014 added a .5 percent sales tax to fund City operations, a portion of which has also been allocated to public safety activities. Neither of the Measure S initiatives has an expiration date.

Additionally, a utility use tax (UUT) initiative was originally enacted in 1998 and went into effect on December 1 of that year. The UUT assesses an 8 percent tax on telephone, electric, and gas services. Voters in Pinole have approved extensions of the UUT in 2004 and 2012. In 2018, the tax was extended without a sunset date, so it will now remain in effect until repealed by voters. The tax presently raises approximately \$2,000,000 for the General Fund, equivalent to approximately 14 percent of the General Fund Budget.

Recurring Revenues

Property tax revenue is based on the assessed value of the property within the boundaries of the jurisdiction applied against the tax rate. The following figure shows the growth of the property valuation and the related property tax revenue.

Figure 15: Property Tax Value & Property Tax Revenues for City of Pinole (FY 13/14–FY 17/18 Actual)

Description	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Value Subject to City Tax	868,918,982	990,967,092	1,048,130,045	1,105,435,408	1,170,940,384
Effective Tax Rate	0.19%	0.19%	0.19%	0.19%	0.19%
City Property Tax Collected	1,622,419	1,856,378	1,967,011	2,059,786	2,185,033

The following figure provides a graphical presentation of the relationship between the property valuations and the tax assessed against those values.

Figure 16: Taxable Value & Property Tax Revenue (FY 13/14–FY 17/18)

The City of Pinole serves as the Successor Agency to the Pinole Redevelopment Agency. This agency was dissolved on February 1, 2012, pursuant to State Law ABx1-26. Under the State Law, the City receives Redevelopment Property Tax Trust Fund payments equal to a 19 percent share of the 1 percent property tax from the sale of properties formerly owned by the Redevelopment Agency. Large spikes in these collections result from sales of properties with higher values. The following figure provides a historical perspective of taxes collected on redevelopment property sales. The property tax collections related to the Redevelopment Properties are not included in the previous graphical presentation of City property taxes assessed.

**Figure 17: Pinole Historical Collections of Property Taxes Related to Redevelopment Properties
(FY 13/14–FY 17/18 Actual)**

Description	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Tax collected on redevelopment	105,121	105,121	105,121	104,251	104,295
Redevelopment property sales	973,697	3,138,877	1,309,520	1,289,035	2,325,870
Total Redevelopment Properties:	\$1,078,818	\$3,243,998	\$1,414,641	\$1,393,286	\$2,430,165

Sales tax revenue is the most significant source of tax revenue for the City of Pinole. This amount has steadily increased except for an anomaly in FY 16/17. Sales tax has risen an average of 14.5 percent annually from FY 13/14 to FY 17/18. Franchise tax, typically assessments collected for the use of a city's right-of-way, has experienced annual growth of 3 percent over the five-year history period. Utility and occupancy taxes have increased as real estate development activities have increased. Intergovernmental receipts grew between FY 13/14 and FY 15/16 before most of those revenues were classified as charges for services in FY 16/17 and FY 17/18.

**Figure 18: Sales Tax Collections Including Measure S (2006 & 2014 Initiatives)
FY 13/14–FY 17/18**

Non-Recurring Revenues

Non-recurring revenues consist of proceeds from a capital lease and the sale of surplus properties. Additionally, Net Transfers In (Out) are included in non-recurring revenues.

The following figure shows the recurring and non-recurring revenues for the City of Pinole from FY 13/14 through FY 17/18.

Figure 19: Recurring & Non-Recurring Revenues for Pinole (FY 13/14–FY 17/18 Actual)

Revenue	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Property Taxes	\$1,622,419	\$1,856,378	\$1,967,011	\$2,059,786	\$2,185,033

Non-Recurring:	\$1,581,638	\$3,450,411	\$1,078,612	\$1,292,489	\$12,457,047
Total Revenues:	\$13,648,676	\$17,110,799	\$16,958,485	\$16,473,253	\$29,774,538

General Fund expenditures are classified as recurring and non-recurring with similar definitions to those of revenues. The General Fund includes funds for public safety, general administration, public services, recreation, and community development. In most instances, debt service is classified with non-recurring expenditures; however, the City of Pinole has long-term liabilities that extend for several years and will be included with the recurring expenditures.

Included in the General Fund debt service amounts is the annual payment necessary for the retirement of the \$6,214,630 of bonds that were issued in 2006 to finance the City's unfunded accrued actuarial liability with CalPERS. These bonds require an annual payment plus interest for thirty years until the debt is extinguished in 2036.

Public Safety expenditures comprise between 65 percent and 70 percent of recurring expenditures and have grown annually. The significant portion of this growth is a result of increased costs associated with the Public Employees Retirement System (CalPERS). Due primarily to a change in the expected investment returns by the plan, the City has incurred additional unfunded accrued actuarial liability with CalPERS that require amortization. These amounts are expected to increase over the next several years before the annual payment amounts decrease. This issue will be discussed further in the projections section of this report.

Capital expenditures paid from the Measure S (2014) are intermingled within the individual department expenditures.

Figure 20: Pinole Actual General Fund & Measure S Recurring & Non-Recurring Expenditures (FY 13/14–FY 17/18)

Expenditures	Actual June 30,				
	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18

Recurring Expenditures	\$12,315,199	\$11,916,376	\$13,528,127	\$14,562,745	\$15,546,828
Capital Outlay	—	—	—	—	—
Non-Recurring Expenditures	—	—	—	—	—
Total Expenditures:	\$12,315,199	\$11,916,376	\$13,528,127	\$14,562,745	\$15,546,828

The City established a General Fund reserve in FY 14/15 with a beginning balance of \$3 million. The Council's goal is to provide a reserve balance equal to six months of General Fund operating expenses or approximately \$5.5 million.

The fund balance of the General Fund has improved significantly over the past five years, and the City has achieved its target reserve balance.

Figure 21: Analysis of Fund Balance of the General Fund (FY 13/14–FY 17/18)

Description	Actual June 30,				
	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Total Revenues	13,648,676	17,110,799	16,958,485	16,473,253	29,774,538
Total Expenditures	12,315,199	11,916,376	13,528,127	14,562,745	15,546,828
Increase (Decrease) in Fund Balance	1,333,477	5,194,423	3,430,358	1,910,508	14,227,710
Beginning Fund Balance	(1,358,853)	(25,376)	5,169,047	8,599,405	11,135,715
Prior Year Adjustment	—	—	—	625,802	—
Ending Fund Balance:	\$(25,376)	\$5,169,047	\$8,599,405	\$11,135,715	\$25,363,425

The large increase in the Fund Balance in FY 17/18 results from the repayment of a loan due to the City in an amount slightly greater than \$10 million. All of these funds were transferred from the General Fund to an IRS Section 115 Pension Trust in FY 18/19. An adjustment has been made to the prior year Fund Balance in FY 16/17 to compensate for differences in balances between the annual reports.

City of Pinole Fire Department

The department is presently staffed by 14 career employees and a Management Analyst. PFD serves a community approximately 12 square miles in area with a population within the city limits of approximately 19,364 residents. Services, including fire protection, emergency medical services, fire investigation, fire prevention, life safety education, community risk reduction, disaster/emergency operations planning, and hazardous materials response are presently provided from a single fire station utilizing a single engine staffed with a minimum of three personnel. A Battalion Chief responds on incidents requiring a senior level command presence.

The PFD is a department of the City of Pinole and has no funding source other than that supplied by the City through the revenues generated by its General Fund and other measures enacted to generate revenue at the City level. Two general sales tax measures have been enacted since 2006, which have been allocated by budget appropriation, in whole or in part, to the Public Safety departments of the City.

The Pinole Fire Department participates in an Automatic Aid Agreement with the Contra Costa County Fire Protection District and the Rodeo-Hercules Fire Protection District. This agreement provides the framework under which the three agencies will jointly provide fire and emergency medical services through the integration of operations.

In some of the years prior to those evaluated for this project, the PFD operated from two stations. The economic downturn in 2008/2009 reduced the City's revenue to the level that the second station (Station 74) was initially closed during certain operational periods through a brownout program, but as finances continued to worsen, it was ultimately closed. This closure has resulted in an increase in response times to a portion of the City.

The budget and accounting practices employed by the City of Pinole do not allocate General Fund overhead expenses to the various departments. This makes comparisons with other agencies, such as fire districts difficult. While it may be possible to estimate the executive management costs of the City that would be attributable to the fire department, a portion of those costs may not be applicable to a fire district.

The budget of the Pinole Fire Department has expanded and contracted during the previous five years. However, the overall budget has remained within \$250,000 between FY 13/14 and FY 17/18 except for an anomaly in Services in FY 16/17 for an allocation of administrative costs.

Figure 22: PFD Recurring & Non-Recurring Expenditures (FY 13/14–FY 17/18)

Description	Actuals for the Year Ending June 30,				
	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Salaries (includes overtime)	\$1,650,376	\$1,645,448	\$1,686,694	\$1,575,190	\$1,832,417

Financial Projections

The Amended City of Pinole General Fund Budget for FY 18/19 projects a negative cash flow of approximately \$950,000 before considering Transfers In and Transfers Out activity. This is due to a \$1 million allocation from the General Fund balance for the purchase of a new fire engine. Approximately \$16,000,000 of the amounts included in the Transfer Out category was utilized to create an Irrevocable Pension Trust to assist the City with funding the CalPERS future retirement expenses of the City's employees. Property tax revenues in FY 18/19 are projected to be approximately \$825,000 less than the amounts received in FY 17/18, decreasing from \$4,615,000 to \$3,787,000.¹² Sales tax revenues from the General Fund, Measure S (2006), and Measure S (2014) are also projected to be approximately \$12,000 less than the previous year. Charges for services are projected to be approximately \$153,000 more in FY 18/19 than the amounts received in FY 17/18.

Revenues are identified as recurring or non-recurring with recurring revenues consisting of those receipts that can be expected to continue annually and that have a reasonably expected amount. Non-recurring receipts are items that may occur sporadically or are difficult to project an amount.

The following figure uses the projected FY 19/20 as a base year on which to create the five-year projections. Property values, as well as property and sales tax revenues, are projected to increase at a 2 percent annual rate. The Utility Users Tax and Franchise Tax increases are forecast to increase at a 1 percent annual rate. Other tax revenues and other revenue sources are both forecast to increase at an annual rate of 2 percent. Beginning in FY 20/21, a significant portion of the annual pension cost increases will be offset by the withdrawals from the Pension Trust with those funds included in the Transfer In category in Recurring Revenues. Non-recurring revenues include miscellaneous proceeds and proceeds from the sale of surplus assets. The following figure uses the updated five-year projection information provided by City staff on approximately December 15, 2019.

¹² FY 2019/20 Proposed Budget for the City of Pinole, Pg. B-1.

Non-Recurring:	25,000	—	—	—	—	—
Total Revenues:	25,493,905	19,654,349	20,700,056	21,495,707	22,290,480	22,963,511

Expenses are classified in a manner much like revenues, recurring or non-recurring. Salaries, benefits, and typical operating expenses are identified as recurring in nature. In the instance of Pinole, annual debt service payments are expected for a significant number of years in the future and are also included as recurring expenditures. Capital outlays are projected annually from the Measure S (2014) initiative and are classified as non-recurring expenditures. Transfers to other funds are also classified as non-recurring expenditures.

The projection methodology incorporates expenditure type rather than function type in order to use generalized growth factors. Salary expense across the City is projected to increase at a 3 percent annual rate through the FY 23/24 fiscal year. Benefit increases primarily result from the increase in pension costs to compensate for the reduced returns experienced by CalPERS, the state pension system. Other operating expenses are projected to increase at a 2.8 percent annual rate, beginning with the FY 20/21 period. Debt service is projected based on repayment terms for each liability.

Non-recurring expenditures include scheduled transfers from the General Fund and other funds included in the General Fund to other funds such as internal service funds or equipment reserves.

The following figure uses updated five-year projected amounts provided by City staff as of December 15, 2019.

Figure 25: City of Pinole Projected Recurring vs. Non-Recurring General Fund and Measure S Initiatives Expenditures (Amended Budget FY 18/19–FY 23/24)

Expenses	Amended Budget	Projected Budget	Projected			
	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24
Salaries	8,585,194	9,138,860	9,413,026	9,695,417	9,986,280	10,285,867
Pension Costs	1,794,443	2,695,381	3,257,816	3,658,293	4,050,617	4,319,202
Other Benefits	2,944,512	3,092,049	3,215,730	3,344,360	3,478,135	3,617,259
Other Operating Expenses	4,324,315	4,009,429	2,542,572	2,642,914	2,681,578	2,770,630
Debt Service	590,433	605,433	555,000	575,000	595,000	610,000
Recurring Expenditures	18,238,897	19,541,152	18,984,144	19,915,984	20,791,610	21,602,958
Capital Outlay	929,814	1,627,799	517,000	315,000	150,000	150,000
Transfers Out	22,094,954	1,328,948	1,249,000	1,250,500	1,251,000	1,251,500
Non-Recurring Expenditures	23,024,768	2,956,747	1,766,000	1,565,500	1,401,000	1,401,500
Total Expenditures:	41,263,665	22,497,899	20,750,144	21,481,484	22,192,610	23,004,458

Maintaining an adequate reserve or fund balance is good business practice for private businesses but is especially critical for municipalities as new revenue streams are typically enacted through a legislative process. Comparing the projected revenues and expenditures of the City of Pinole provides insight into the future financial health of the City. The significant anomaly occurring in FY 18/19 is a result of the one-time \$16 million transfer to the IRS 115 Pension Trust. City Council had initiated a plan to accumulate a \$5.5 million emergency reserve and had been able to accomplish this goal in FY 18/19. The goal has been projected to be achieved in each of the following fiscal years through FY 23/24 and beyond.

The following figure uses updated five-year projected amounts provided by City staff as of December 15, 2019.

Figure 26: Projected General Fund Balance for Pinole (Amended FY 18/19 Budget–FY 23/24)

Revenues & Expenditures	Amended Budget	Adopted Budget	Projected			
	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24
Revenues	25,493,905	19,654,349	20,700,056	21,495,708	22,290,479	22,963,511
Expenditures	41,263,665	22,497,899	20,750,144	21,481,484	22,192,610	23,004,458
Net Cash Flow (Deficit)	(15,769,760)	(2,843,550)	(50,088)	14,224	97,869	(40,947)
Beginning Fund Balance	25,363,425	9,593,665	6,750,115	6,700,027	6,714,251	6,812,120
Ending Fund Balance	9,593,665	6,750,115	6,700,027	6,714,251	6,812,120	6,771,173

The Pinole Fire Department is a City department, and there is no direct connection between the City's various revenue streams and the fire department's services. Two separate Measure S initiatives have provided sales tax revenues that have been allocated to address various needs of the City, including public safety operations and capital expenditures.

The Pinole Fire Department's FY 18/19 Budget is \$5,188,930, including \$1,280,560 for capital acquisitions. This is an increase of \$1,846,533 over actual expenditures in FY 17/18. Benefit costs increased approximately \$290,000 over FY 17/18 actual costs and are primarily related to the increase in required pension costs. The budget is divided between General Fund expenditures and Measure S (2006) and Measure S (2014) funded expenditures.

The City of Pinole staff developed the adopted fire department FY 19/20 budget with the goal of providing quality services within the City's available resources. This budget forms the basis for the remaining projections.

Like the City's growth factors for expenses, salaries are anticipated to increase 3 percent annually. The increase in employee benefits is driven by the significant increases in the required CalPERS plus a 5 percent increase in other benefits. Service and supplies costs are projected to increase at 2.8 percent annually. Measure S (2006) and Measure S (2014) initiatives are projected to grow at an annual rate of 1 percent during the next five years and will continue to provide funding for a portion of fire department salaries, benefits, operating expenses, and capital acquisitions. The following figure demonstrates what is considered as a status quo option, which shows the projected costs if the City took no action other than to leave the service delivery system as is.

The following figure uses projected amounts provided by City staff as of December 15, 2019.

**Figure 27: PFD Projected Status Quo Expenditures & Funding Sources
(Amended Budget FY 18/19–FY 23/24)**

Description	Amended	Adopted	Projected			
	FY 18/19	FY 19/20	FY 20/21	FY 21/22	FY 22/23	FY 23/24

Capital Assets & Improvements

Three basic resources are required to successfully carry out the mission of a fire department—trained personnel, firefighting equipment, and fire stations. No matter how competent or numerous the firefighters, if appropriate capital equipment is not available for use by responders, it is impossible for a fire department to deliver services effectively. The capital assets that are most essential to the provision of emergency response are facilities and apparatus (response vehicles).

Fixed Facilities

Fire stations play an integral role in the delivery of emergency services for several reasons. A station's location will dictate, to a large degree, response times to emergencies. A poorly located station can mean the difference between confining a fire to a single room and losing the structure. Fire stations also need to be designed to adequately house equipment and apparatus, as well as meet the needs of the organization and its firefighters.

Consideration should be given to a fire station's ability to support the jurisdiction's mission as it exists today and into the future. The activities that take place within the fire station should be carefully examined to ensure the structure is adequate in both size and function.

ESCI Associates conducted walk-through inspections of the two Pinole Fire Stations. ESCI utilized a standard check-off list for each facility inspection.

Special attention was made to the building's location, future use viability in terms of serving the community, and the capability of accommodating an increase in staffing levels and emergency response apparatuses in the future.

Figure 28: Fire Station Condition Definitions

EXCELLENT	Like new condition. No visible structural defects. The facility is clean and well maintained. Interior layout is conducive to function with no unnecessary impediments to the apparatus bays or offices. No significant defect history. Building design and construction match the building's purposes.
GOOD	The exterior has a good appearance with minor or no defects. Clean lines, good workflow design, and only minor wear of the building interior. Roof and apparatus apron are in good working order, absent any significant full-thickness cracks or crumbling of apron surface or visible roof patches or leaks. Building design and construction match the building's purposes.
FAIR	The building appears to be structurally sound with weathered appearance and minor to moderate non-structural defects. The interior condition shows normal wear and tear but flows effectively to the apparatus bay or offices. Mechanical systems are in working order. Building design and construction may not match the building's purposes well. Showing increasing age-related maintenance, but with no critical defects.
POOR	The building appears to be cosmetically weathered and worn with potentially structural defects, although not imminently dangerous or unsafe. Large, multiple full-thickness cracks and crumbling of concrete on apron may exist. The roof has evidence of leaking and/or multiple repairs. The interior is poorly maintained or showing signs of advanced deterioration with moderate to significant non-structural defects. Problematic age-related maintenance and/or major defects are evident. May not be well suited to its intended purpose.

The following figures depict the results of ESCI's inspections of the City of Pinole's fire stations.

Figure 29: Pinole Fire Department Station 73 & Administrative Headquarters

Station Name/Number:	73						
Address/Physical Location:	88o Tennent Ave., Pinole, CA 94564						
	General Description: This two-story station houses the on-duty crew, Fire Chief, and Management Analyst.						
Structure							
Construction Type	Type 3 Ordinary						
Date of Construction	1985						
Seismic Protection	Unknown						
Auxiliary Power	Diesel Generator with 1,000 Gallons						
General Condition	Fair						
Number of Apparatus Bays	3	Drive-through bays			3	Back-in bays	
Considerations (ADA, etc.)	No						
Square Footage	Two-story, approximately 3,500 square feet						
Facilities Available							
Separate Rooms/Dormitory	2	Bedrooms		3	Beds	12	Beds in dormitory
Maximum Station Staffing Capability	6 (the Captains' room has 3 murphy beds)						
Exercise/Workout Facilities	Yes						
Kitchen Facilities	Yes						
Individual Lockers/Storage Assigned	Yes						
Shower Facilities	Yes						
Training/Meeting Rooms	Yes						
Washer/Dryer	Yes						
Safety & Security							
Sprinklers	Yes						
Smoke Detection	Yes						
Decontamination/Biohazard Disposal	Yes						
Security	Yes						
Apparatus Exhaust System	Yes						

Figure 30: Pinole Fire Department Station 74

Station Name/Number:	74 (open only to a BC)				
Address	3700 Pinole Valley Rd., Pinole, CA 94564				
	General Description: This single-story station has been closed since 2011.				
Structure					
Construction Type	Type 3 Ordinary				
Date of Construction	2003				
Seismic Protection	None				
Auxiliary Power	Yes				
General Condition	Good				
Number of Apparatus Bays	2	Drive-through bays		0	Back-in bays

Washer/Dryer	Yes				
Safety & Security					
Sprinklers	Yes				
Smoke Detection	Yes				
Decontamination/Biohazard Disposal	No				
Security	Yes				
Apparatus Exhaust System	Yes				

Facilities Summary

The two facilities range in age from 16 to 34 years old.

Fire Station 73

The exterior is in good shape. Office space is upstairs adjacent to the central living area/kitchen. The upstairs living/dorm space is non-partitioned and cramped with furniture/gym equipment. Very little workstation or training space is available for personnel. Interior modifications would be useful. An SCBA filling station/storage and bunker room are adjacent to the apparatus bay, separated by a single door, which, if open, exposes both rooms to diesel exhaust. Station 73's office was recently remodeled; however, the crew quarters need remodeling and updating, which may include ADA accommodation. Remodeling should take into account the obligation to provide additional office, workspace, gender segregation of crews, and a shift Battalion Chief.

Fire Station 74

The exterior and grounds are well kept. The interior is in good shape with some carpet wear and tear. The FY 19/20 budget includes \$20,000 for these repairs. Individual dorm rooms and bathrooms allow for gender separation. There is some workstation/training space but little room for expansion. The apparatus bays are in good working order with a bunker room directly adjacent. While small, the station is adequate to house a three-person Engine Company and crossed-staffed Type III wildland engine.

Apparatus/Vehicles

Other than firefighters assigned to stations, response vehicles are undoubtedly the next most important resource of the emergency response system. The delivery of emergency services will be compromised if emergency personnel cannot arrive quickly due to unreliable transportation or if the equipment does not function properly.

Fire apparatus are unique and expensive pieces of equipment, customized to operate efficiently for a narrowly defined mission. An engine may be built in such a way that the compartments fit specific equipment and tools. Virtually every space on a fire vehicle is designed for function. This same vehicle, with its specialized design, does not lend itself well to operate in a completely different capacity, such as a hazardous materials unit or a rescue squad. For this reason, fire apparatus offers little flexibility in use or reassigned purpose. As a result, communities across the country have sought to achieve the longest life span possible for these vehicles. Unfortunately, no piece of mechanical equipment can be expected to last forever. As vehicles age, repairs tend to become more frequent and more complex.

Parts may become more difficult to obtain, and downtime for repairs increases. Given the emergency mission that is so critical to the community, downtime is one of the most frequently identified reasons for apparatus replacement. Because of the expense of fire apparatus, most communities develop replacement plans. To enable such planning, communities often turn to the accepted practice of establishing a life cycle for apparatus that results in an anticipated replacement date for each vehicle. The reality is that it may be best to establish a life cycle for planning purposes, such as the development of replacement funding for various types of apparatus; yet, apply a different method (such as a maintenance and performance review) for determining the actual replacement date, thereby achieving greater cost-effectiveness when possible.

Fire administrators should be concerned about the aging of the fleet and have a funded replacement schedule. As frontline apparatus age, fleet costs will naturally be higher, and more downtime will be associated with necessary repairs and routine maintenance.

It is beyond the scope of work and the expertise of ESCI to provide a mechanical assessment of the apparatus. For a mechanical evaluation of the apparatus, ESCI recommends seeking the services of a certified Emergency Vehicle Technician.

The following figure displays the City of Pinole's Apparatus/Vehicle Inventory as submitted by PFD staff.

Figure 31: PFD Station 73 Apparatus & Vehicle Inventory

Apparatus	Type	Year	Make/Model	Condition	Seating Capacity	Pump Capacity	Tank Capacity
Battalion 7, 7301	SUV	2008	Ford/Expedition	Fair	5	N/A	N/A
Engine E73	Type 1	2015	Spartan	Good	5	1500	500
Reserve E73A	Type 1	2005	HME/Rosenbauer	Fair/Poor	5	1500	1200
Wildland E273	Type 3	2008	Rosenbauer	Good/fair	4	1000	500
Wildland E673	Type 6	2001	Ford F550	Fair/Poor	2	160	200
Fire Chief 7300	SUV	2015	Ford/Intercept	Good	5	N/A	N/A
Utility 73	Pickup	2007	Ford F250	Fair	4	N/A	N/A
New Battalion 7	SUV	2019	Ford Expedition	New	5	N/A	N/A

Apparatus Summary

Generally, fire agencies utilize a guideline as follows to establish capital equipment replacement programs:

- **Engines:** 10 years frontline and 5 years in reserve.
- **Wildland Engines:** 15 years frontline 5 years in reserve.
- **Truck Companies:** 15 years frontline and 5 to 10 years in reserve.
- **Ambulance:** 5 years frontline and 5 years in reserve.

The level of activity, topography, and other factors may influence these guidelines.

- PFD apparatus specifications have not been standardized with the Battalion 7 apparatus.
- The age of PFD's frontline engine is 4 years. It is scheduled to become the reserve engine when the engine currently on order arrives in FY 19/20.
- Reserve Engine 73A is 14 years old and will be replaced by current E73 when the engine on order arrives.
- Wildland Engine 273 is 11 years old, and 673 is 18 years old and should be scheduled for replacement.

Capital Replacement Planning

Long-range capital replacement planning is always a challenge for any municipality. Pinole has done a commendable job of purchasing and maintaining its fleet of fire apparatus using General Fund Reserves. This practice—while not uncommon—has resulted in a significant number of replacements being deferred. Fire vehicles have a readily predictable service life and an easily forecast future replacement cost, which should be preplanned. If future needs are identified and funding is set aside to accommodate the need, the agency will not be dependent on reserves in the future to meet its long-term financial demands. ESCI recommends to clients that, as soon as a new piece of fire apparatus is purchased, funding should start to be set aside for its replacement.

Critical Tasking

Critical tasks are those activities that must be conducted promptly by firefighters at emergency incidents to control the situation, stop loss, and to perform necessary tasks required for a medical emergency. The Pinole Fire Department is responsible for assuring that responding PFD personnel are capable of performing all of the described tasks in a prompt, efficient, and safe manner.

Fires: Critical tasking for fire operations is the minimum number of personnel to perform the tasks required to control a fire in the listed risk category effectively. Major fires (beyond first alarm) will require additional personnel and apparatus.

Emergency Medical: Critical tasking for emergency medical incidents is the minimum number of personnel to perform the tasks required and support the identified strategy based on the department's adopted medical protocol.

The following figure details PFD's available response staffing by type of incident

Figure 32: Critical Tasking
Low Rise Structure Fire

Alarm Assignments

To ensure adequate personnel and apparatus are dispatched to an emergency event, the following first alarm response assignments have been established. "Total PFD Staffing available" is the number identified in the Critical Tasking analysis above. The number of personnel and apparatus required to mitigate an active and complex working incident will require additional resources above and beyond the numbers listed as available. The "Alarm Assignments" are what has been identified as the number of resources and personnel necessary to address the challenges of each identified event.

Figure 33: Alarm Assignments

Total Staffing Needed		14

Absent automatic and mutual aid from surrounding agencies, standalone, PFD is not capable of filling the alarm assignments noted above. In the event PFD Station 74 is reopened, the department will be able to initiate an initial attack and comply with the OSHA two-in/two-out rule.

Staff Scheduling Methodology

PFD utilizes a traditional three platoon system operating on a 48-hour shift rotation to achieve this minimum staffing of three FTEs per day as required. The total number of positions required per jurisdiction becomes a policy decision based on the jurisdiction's needs. The jurisdiction also then establishes the number of employees needed above the minimum to allow for vacancies due to vacation, sick, and other types of leave, yielding an overall number of full-time employees required to ensure that necessary staffing, according to policy, is available daily. This staffing methodology is prevalent across the Western United States for firefighters to work a 24- or 48-hour shift cycle. Studies have been undertaken and remain ongoing in an attempt to better understand the impact of this work cycle on the physiological process.¹⁴ The science indicates that sleep is important and that going without sleep for too long or interrupting the sleep rhythm leads to physical and cognitive problems. That said, no easy answer to the problem exists. Intuitively, the problems would be exacerbated in a busy station and lessened in a less busy station.

All personnel are trained as firefighters, with most trained at a minimum of Emergency Medical Technician (EMT) level. Six have been trained to the Paramedic level. The department provides Advanced Life Support (ALS) services utilizing its one Engine Company. Ambulance response and patient transport are currently assigned to CCFPD.

¹⁴ Is the firefighter 48/96 shift a health hazard? Sara Jahnke, FireRescue1, <https://www.firerescue1/fire-rehab/articles/223601018-is-the-firefighter-48-96-shift-a-health-hazard/>.

SERVICE DEMAND & INCIDENT STAFFING PERFORMANCE

Service delivery is the foundation of any service-oriented organization. Without an understanding of how services are organized, deployed, and managed, one cannot quantify efficiency and effectiveness. This section of the report will analyze multiple facets of the current delivery of fire services for the City of Pinole, including the identification of incidents by type and frequency, deployment analysis, system reliability, and a summary of performance. By understanding current performance and how the system functions, goals and objectives for future performance improvements can be established and implemented.

Service-Demand Study

Incidents by Type & Frequency

When and how demands for services occur can follow predictable patterns over time. To identify those patterns occurring in Pinole, ESCI conducted an analysis and geographic display of current service demand by incident type and temporal variation using dispatch data obtained from the Contra Costa Fire Protection District. Incident types were selected based on the classification system established by the National Fire Incident Reporting System (NFIRS); temporal variation, or the way service demand changes over time, was analyzed by the month, by the day, and by the hour.

The following figure provides a historical view of service types and frequency of incidents over the past nine years (2009–2017) *only within the City of Pinole and Contract 2/Upper Pinole Valley Road*, as the Contract/Tara Hills Area incident data were not provided. This figure shows the incidents in which Station 73 and BC7 responded. Incidents that did not indicate that they were a fire or an EMS incident, such as HazMat or Good Intent, were placed in the “Other” category.

Figure 34: PFD Service Demand by Year and Type, 2009–2017, City of Pinole & Contract 2

Over the nine years, the total number of incidents increased from 976 in 2009 to 1,805 in 2017, an average increase of 8 percent per year, with noticeable increases in 2010 and 2013 (22% and 17%, respectively). Without those outliers, the average increase per year is 4%.

Additional incident data for the calendar year 2018 was received from CCRFCC that did include incident data for the Contract/Tara Hills area, resulting in a separate detailed analysis. The calendar year 2018 data showed 2,020 incidents, including 399 in Contract/Tara Hills. The incidents by type for the calendar year 2018 are shown in the following figure.

Figure 35: Service Demand by Type, City of Pinole & Both Contract Areas, 2018

As illustrated in Figure 35, EMS represents the greatest impact on service demand at 78.42 percent, followed by accident calls, which accounted for 6.58 percent of incidents. Accident data includes motorcycle, vehicle, bicycle, and pedestrian incidents.

The following figure displays a comparison of the total number of incidents (2,020) in 2018 within the City of Pinole and the two contract areas, as compared to other similar-sized urban fire departments around the country.

Figure 36: Incidents per 1,000 Population, 2018, City of Pinole & Both Contract Areas

Dept. Size	Number of Incidents/1,000
Rural Low Range	56
Regional Median	93
Pinole FD	104
Urban Low Range	111
Rural High Range	117
Urban High Range	179

At 104 calls per 1,000 population, PFD has a higher than the regional median number of calls per 1,000 population but slightly lower than the urban low range.

The following figure displays a comparison of the total number of fire incidents in Pinole as compared to other similar-sized urban fire departments around the country. This figure uses incidents within the City of Pinole and the two contract areas (65 fires in 2018).

Figure 37: Fire Incidents per 1,000 Population, 2018, City of Pinole & Both Contract Areas

Dept. Size	Fires/1,000
Pinole FD	3.5
Regional Median	2.5
Rural High Range	17.2
Rural Low Range	4
Urban High Range	4.7
Urban Low Range	2.9

PFD's 3.4 fires per 1,000 population are just above the regional median of 2.5 fires per 1,000 population. It is comparable to most other Urban Low Range and Rural Low Range fire departments.

The next figure is fire loss per capita compared with other national and regional departments. In 2018, at \$22.90 per capita, PFD's fire loss was much lower compared to the national average and very comparable to the regional average.

Figure 38: Fire Loss per Capita, 2018**Figure 39: Comparison Chart, Fire Loss per Capita**

Depts.	Fire Loss per Capita (in dollars)
Regional Average	\$24.70
National Average	\$36.10
Pinole	\$22.90

Temporal Analysis

In addition to understanding the types and frequency of service demand, an understanding of when these events occur is critical to the understanding of when system demand will most likely reach its peak. Knowing the high demand periods will assist administrators in determining whether staffing levels are adequate for the demand and also in scheduling additional duties such as training, fire safety inspections, and vehicle maintenance.

The following figure shows the temporal variation of PFD's service area demand by month during 2018. There is only minor variation in workload by month. The winter months of January and December are the busiest months with August following closely.

Figure 40: Service Demand by Month, 2018, City of Pinole & Both Contract Areas

The next figure illustrates service demand by day of the week. Again, only minor variations in workload exist by day of the week, although Monday is the busiest.

Figure 41: Service Demand by Weekday, 2018, City of Pinole & Both Contract Areas

Finally, the following figure shows service demand by the hour. Workload increases significantly during daytime hours as compared to nighttime hours.

Figure 42: Service Demand by Hour, 2018, City of Pinole & Both Contract Areas

Peak workload is between 9:00 a.m. and 7:00 p.m., and it is most heavily concentrated during the commute hours.

Spatial Analysis

In addition to the temporal analysis, it is useful to examine the geographic distribution of service demand. The following figures indicate the distribution of emergency incidents in PFD during 2018. The incident data received from Contra Costa County Dispatch uses a "road address range" system rather than a "site address" system. This always places a data point on a roadway rather than on the adjacent structure or actual site of the incident

The first figure displays the number of incidents per square mile within various parts of the city. The area of greatest service demand is the northwest and central portions of the city.

Figure 43: Service-Demand Density, City of Pinole & Both Contract Areas

The two densest concentrations of incidents are at Appian Way/Michael Drive, which is adjacent to a large commercial/retail development; the second densest concentration of incidents is Estates Ave/Paloma—which is adjacent to a senior retirement center. The third densest concentration is at the Tara Hills Mobile Home Park, a “55 years and over” community. Again, the use of street address ranges to place a data point might lead to an interpretation of “dangerous intersections,” where the reality is the incident is related to proximal activities or populations.

While the service demand density reflects all calls served within the PFD service area, service demand can vary based on incident type. The following figure displays the location of all fire types occurring within the PFD’s service area during 2018.

Figure 44: All Fire Types, 2018, City of Pinole & Both Contract Areas

The fire incidents are distributed widely but predominantly in the PFD's northwestern half. Again, it appears as though all the fires are in roadways, but only 21 percent (14 of the 65 fires) involved a vehicle. The remaining 79 percent were structural, electrical, or vegetation fires in areas adjacent to roadways.

The following figure depicts the locations of the 20 commercial and residential structure fires in 2018.

Figure 45: Structure Fires, Commercial & Residential, 2018, City of Pinole & Both Contract Areas

These structure fires were distributed equally throughout the PFD's service area.

The following figure compares structure fires over the last decade by the hour of the day. Other than no structure fires reported at the 5 a.m. hour within the entire decade, structure fires do occur throughout the day and night, with greater incident reporting in the latter part of the day and into the evening.

Figure 46: Structure Fires by Hour of Day, 2009–2018

Again, the 2009–2017 incident data did not include any incidents for the Tara Hills contract area, whereas the 2018 incident data did include incident data for that contract area. In 2018, there were three structure fires in the Tara Hills contract area; one reported at noon, one at 8 p.m., and one at 9 p.m.

Similarly, emergency medical incidents also occur in greater concentration in areas of higher population density. The next figure depicts the EMS incidents in the PFD service area in 2018.

Figure 47: Emergency Medical Incidents, 2018, City of Pinole & Both Contract Areas

The incidents are widely scattered but primarily located in the northwestern portion of the PFD service area.

As shown previously, EMS calls are the primary incident type. The following figure displays emergency medical incidents per square mile during 2018.

Figure 48: Emergency Medical Incidents per Square Mile, 2018, City of Pinole & Both Contract Areas

The previously identified areas of incident density re-appear, the commercial/retail area, the senior retirement home, and the senior mobile home park.

EMS response workload also varies by the hour of the day, as shown in the following figure. As it is the predominant type of incident, it closely follows the total workload by the hour of the day.

Figure 49: EMS Responses by Hour of Day, 2018, City of Pinole & Both Contract Areas

Unit Workload Analysis

A review of workload by response unit can reveal much about response time performance. Although fire stations and response units may be distributed in a manner to provide quick response, that level of performance can only be obtained when the response unit is available in its primary service area. If a response unit is already on an incident and a concurrent request for service is received, a more distant response unit will need to be dispatched. This will increase response times.

Response Unit Workload

The workload of individual response units during the study period is shown in the following figure. The individual response unit workload can be greater than the workload in its home station area. Many incidents, such as structure fires, require more than one response unit. The next figure depicts the total number of calls (2,272) received by PFD in 2018, regardless of jurisdiction.

Figure 50: PFD Response Unit Workload, 2018

As the only fully staffed apparatus, Engine 73 is naturally the busiest in the PFD. Not shown in the figure are Reserve Engines E73A and E473, which had limited use, with one and two calls, respectively.

The following figure shows the extent of these calls, reaching from the Carquinez Bridge to San Pablo. In 2018, there were 2,020 incidents within the city and 401 calls outside of the City of Pinole.

Figure 51: PFD Incident Locations by Apparatus, 2018

The amount of time a given unit is committed to an incident is also an important workload factor. The following figure illustrates the average time each unit was committed to an incident, from initial dispatch until it was available for another incident. Multiple units responded to the same incident, such as the Battalion Chief and the Engine Crew. The more complex an incident, the greater the number of resources are required.

Figure 52: Average Time Committed to an Incident by Unit, 2018

Unit	Responses	Average per Response
Battalion 7	355	0:29:59 minutes
Engine 73	2,060	0:20:49 minutes
Engine 273	210	0:21:55 minutes

Unit Hour Utilization

Unit hour utilization (UHU) is an important workload indicator. It is calculated by dividing the total time a unit is committed to all incidents during a year divided by the total time in a year. UHU describes the amount of time expressed as a percentage that a unit is not available for a response since it is already committed to an incident. The larger the percentage, the greater a unit's utilization, and the less available it is for assignment to an incident. Unit hour utilization is an important statistic to monitor for those fire agencies using percentile-based performance standards, as does PFD. In PFD's case, where performance is measured at the 90th percentile, unit hour utilization greater than 10 percent means that the response unit will not be able to provide on-time responses to its 90 percent target, even if response is its only activity. While Pinole Engine 73 is not at 10 percent UHU at this time, absent the addition of a second engine in Pinole, it will most likely be at and exceed the threshold in a few years.

Figure 53: Unit Hour Utilization

Based on the historical incident data from 2009 to 2017, call volume is projected to increase by 3 percent per year, which, as mentioned above, did not include the Contract/Tara Hills incidents. Approximately 20 percent of the PFD incidents came from this area in 2018 incident data.

Distribution Study

Next, an overview of the current deployment strategy, which includes facility and apparatus locations, was analyzed using Geographic Information Systems (GIS) software to identify potential service gaps and redundancies of resources. The following figure is an overview of the PFD service area. PFD stations and nearby adjacent agency stations are displayed.

Figure 54: PFD Service Area

The City of Pinole encompasses approximately 11.6 square miles. Of that, 5.2 square miles are land, with the 6.4 sq. miles remainder comprised of the bay. The PFD provides service to the city as well as to the two contract areas depicted. PFD staffs one fire station located within the city.

An important consideration for fire departments and other service delivery organizations is to understand the location of population concentrations. If the majority of people live in a concentrated area, it is intuitive to anticipate that that area will also request the highest levels of service demand as calls for service are generally initiated by people.

The definitions per the Center for Public Safety Excellence Standards of Cover 6th edition:

- **Urban:** population of over 30,000 and or a population density of 2,000 per sq. mile
- **Suburban:** population of 10,000 to 29,000 and or a density of 1,000 to 2,000 per sq. mile
- **Rural:** population of less than 10,000 or 1,000 per sq. mile

The following figure presents Pinole's population by census block, based on the 2010 census. Census data divides a census defined place, such as a city or county, into small areas known as *census blocks*. The boundaries follow natural or manmade features such as rivers, ridgelines, or roads. The area of a census block can be calculated in fractions of a square mile. The total counted population for each census block is divided by the area, resulting in an estimate of relative population density. The densest population area of the City of Pinole is in the northwest.

Figure 55: Population per Square Mile, 2012

The total population used in this study was 19,364, which is classified as Suburban. However, the density of various areas of Pinole shifts it into an Urban classification. The majority of Pinole has 2,000 to 5,000 people per square mile. However, much of the northwest area of the City of Pinole and the western contract area have population densities of greater than 5,000 people per square mile, which is classified as Urban. Pinole has a small but densely concentrated population.

Next, the distribution of PFD resources will be examined and compared to the Insurance Services Office (ISO) and the National Fire Protection Association (NFPA) criteria. These standards provide baseline criteria for comparison of PFD's deployment strategy. These are important standards for comparison because, while ISO criteria focus on fire suppression capabilities for insurance purposes, NFPA standards establish a foundation for overall system benchmarking for fire suppression, rescue, and other activities fire departments may be required to perform.

ISO Distribution

The ISO Public Protection Classification (PPC®) score was developed for communities to provide recommendations for key areas of improvement. The PPC system is a national system used by the New Jersey-based advisory organization ISO to provide insurance providers with a classification rating of a local community's fire protection. The PPC score classifies communities based upon a rating scale of 1 (best protection) to 10 (no protection) and assesses all areas related to fire protection broken into four major categories, which include: emergency dispatch and communications (10 points), water system supply and distribution capabilities (40 points), the fire department (50 points), and Community Risk Reduction (5.5 points).¹⁵ The PPC score is developed using the Fire Suppression Rating Schedule (FSRS), which outlines sub-categories and the detailed requirements for each area of the evaluation.

The first component of ISO distribution is the ability of a fire department to arrive on-scene equipped with personnel, equipment, and sufficient water to effectively mitigate a fire. To determine whether a structure is eligible to receive a PPC rating better than 10, indicating that the fire department does not meet minimum ISO criteria for the structure to receive a rating, a service area of five road miles from the fire station is generally used. The only area of Pinole beyond five miles of a fire station is in the roadless southeast portion, as depicted in the following figure.

¹⁵ ISO uses a 100-point grading scale, yet 105.5 total points are available to each agency. The Fire Service Rating Scale lists a large number of items (facilities and practices) that a community should have to fight fires effectively. The schedule is performance based and assigns credit points for each item. Using the credit points and various formulas, ISO then calculates a total score on a scale of 0 to 100 with 5.5 points being available as extra-credit.

Figure 56: Pinole Fire Station 73, 5-Mile ISO Coverage

The next figure illustrates 1.5-mile coverage from PFD Station 73. ISO is concerned with the provision of fire suppression services to the built-upon areas, meaning that ISO is less concerned with the protection of unpopulated regions of a service area that lack permanent structures.

Figure 57: Fire Station 73, 1.5-Mile ISO Coverage

Much of the developed residential area in the eastern part of the city is beyond 1.5 miles of Station 73.

Like the maximum service area of engine companies shown in Figure 57, there is a maximum service area for ladder companies. The next figure illustrates the 2.5-mile maximum service area for the closest ladder company, Rodeo-Hercules FPD Station 76 for 1st Alarm and El Cerrito Station 71 for Mutual Aid.

Figure 58: Fire Station Distribution, 2.5-Mile Ladder Company ISO Criteria

Neither ladder company can fully cover the PFD. RHPD Ladder 76 extends approximately 0.5-mile into PFD, while the El Cerrito ladder would still be 4 to 5 miles away.

The following figure shows the 2.5-mile ISO coverage of three- and four-story buildings within the City of Pinole.

Figure 59: Detail of Station 76, 2.5 mi. ISO coverage for Pinole Three- & Four-Story Buildings

None of these taller structures are within this 2.5-mile coverage, although the Pinole Vista Apartments are a mere 300 feet further.

PFD Goals Distribution

While ISO criteria are focused on fire suppression activities exclusively, PFD's goals define expected performance for all response services. PFD advised ESCI to utilize NFPA standards. These standards establish a four-minute travel time objective for the arrival of the first capable response unit. This, and PFD's other response performance goals are measured using that same standard.

The following figure models four-minute travel time coverage using posted street speeds from PFD Station 73. The model travel time does not account for traffic congestion.

Figure 60: Station 73 Four-Minute Model Travel Time (Entire Response District)

A portion of the developed residential area in the southeast portion of the city is beyond the four-minute travel time footprint. The next figure shows the four-minute travel time footprint allocated to the closest station, should Station 74 be re-opened.

Figure 61: Station 73 & 74 Four-Minute Model Travel Time

Concentration & Effective Response Force Capability Analysis

Effective Response Force (ERF) is the number of personnel and apparatus required to be present on the scene of an emergency to perform the critical tasks in a manner to effectively mitigate the incident without unnecessary loss of life or property. The ERF is specific to each type of incident and is based on the critical tasks that must be performed. Per NFPA 1710, a moderate risk building fire is modeled for this analysis.

The NFPA response time goal for the delivery of the full ERF to a moderate risk building fire is within 8 minutes, 90 percent of the time. PFD has defined the minimum full effective response force for moderate risk building fires as four fire engines, one ladder truck, and two Battalion Chiefs for a total of 21 firefighters. Eight minutes of travel time is allowed to assemble the defined, fully effective response force on the scene.

The next figure shows the ERF for the 20 structure fires that occurred in 2018, showing the 90th percentile travel time for the on-scene resources. The travel time is not cumulative, as the various resources could be traveling simultaneously. This figure includes the resources of five adjacent automatic aid stations.

Of the 20 structure fires, E73 was the first on-scene at 12 incidents (60%). E169 and E170 were the first on-scene at three incidents (15%); BC7 was the first on-scene at three incidents (15%), while E273 was first on-scene twice (10%).

Figure 62: Effective Response Force, Structure Fires, 90th Percentile, in the City of Pinole & Both Contract Areas

Engine 73 or BC7 was second on-scene at nine incidents (45%). None of the structure fire incidents achieved the 8-minute travel time standard for all apparatus arriving on-scene.

In 2018, PFD responded to 20 fires—10 commercial and 10 residential. The following figure shows the incident type and the total number of apparatus that were assigned for the year. Much of the incident data did not have timestamps for all the units assigned, possibly due to being canceled en route.

Figure 63: Structure Fire Aid to PFD, 2018

Using the data with complete arrival timestamps, there were two incidents, both residential fires, where a maximum number of firefighters on-scene were 14 or 15 firefighters, depending on how many firefighters were on the adjacent station's ladder trucks. None of the incidents achieved 21 firefighters on-scene.

Concurrency

One way to look at resource workload is to examine the number of times multiple incidents happen within the same timeframe in each station area. ESCI examined incidents during the study period to determine the frequency of concurrent events. This is important because concurrent incidents can stretch available resources and extend response times.

The following figure shows the number of times during the study period that one or more incidents occurred concurrently. This shows that in most cases (1,767), only one incident was in progress at a time. However, 568 times, there were two incidents in progress at the same time; 86 times, there were three or more incidents in progress at the same time, and once there were six incidents in progress at the same time.

Figure 64: Incident Concurrency, 2018 (By Time of Day)

Station	Incidents 9:00 a.m.–8:59 p.m.	Incidents 9:00 p.m.–8:59 a.m.	Incidents per hour 9:00 a.m.–8:59 p.m.	Incidents per hour 9:00 p.m.–8:59 a.m.
73	1,697	930	141	77

Figure 65: Incident Concurrency, 2018 (By Number of Concurrent Incidents)

City of Pinole & Both Contract Areas	
Concurrent Incidents	Count
1	1,767
2	568
3	77
4	7
5	1
6	1

It is important to note that Pinole only staffs one response unit. As a result, anytime there is more than one incident, the City is dependent on outside aid.

Peak workload periods occur every day of the week. The following figure illustrates the Station 73 workload by the time of day during the study period.

Figure 66: PFD Overall Incidents by Hour, 2018, Calls in the City of Pinole & Both Contract Areas

Performance Summary

Incident data for the period between January 1 and December 31, 2018, was evaluated in detail to determine PFD's current performance. Data was obtained from PFD incident reports and the dispatch center's computer-aided dispatch system.

Only incidents occurring within the PFD service area that were dispatched as a "priority" are included in the analysis. Priority incidents involve emergencies to which the fire department initiated a "code 3" (using warning lights and sirens) response (1,706 incidents during 2018). Incidents initially dispatched as non-emergency responses were excluded. Performance is reported based on the final determination of the incident type, which may be different than how it was initially dispatched. For example, a person may report smoke coming from a building that turns out to only be steam. It may have been dispatched as a structure fire, but its final type would be reported as "good intent."

Each phase of the incident response sequence was evaluated to determine the current performance. This allows an analysis of each phase to determine where opportunities might exist for improvement.

The total incident response time continuum consists of several steps, beginning with the initiation of the incident and concluding with the appropriate mitigation of the incident. The time required for each of the components varies. The policies and practices of the Department directly influence some of the steps.

ESCI compared PFD's response performance to the national consensus standard for response performance found in the NFPA 1710: *Standard for the Organization and Deployment of Fire Suppression Operations, Emergency Medical Operations, and Special Operations to the Public by Career Fire Departments*, 2010 Edition. ESCI compared the various primary answer points and CCRFCC performance to the PFD's goals as well as standards found in NFPA 1221: *Standard for the Installation, Maintenance, and Use of Emergency Services Communications Systems*, 2013 Edition.

The following figure summarizes the performance standards found in the National Fire Protection Association (NFPA) documents.

Figure 67: Summary of NFPA Performance Standards

Incident Interval	Performance Goal
911 call answer time (time from the first ring to answer)	Within 15 seconds, 95% of the time Within 40 seconds, 99% of the time
Call transfer time (time from the answer to acceptance at the secondary dispatch center)	Within 30 seconds, 95% of the time
Call process time (time from acceptance at the dispatch center until notification of response units)	Within 70 seconds, 90% of the time
Turnout time (time from notification of response personnel until the initiation of movement towards the incident)	Within 60 seconds, 90% of the time
First unit travel time (time from initiation of response until the arrival of the first unit at the incident)	Within 4 minutes, 90% of the time
First unit response time (time from dispatch until the arrival of the first unit at the incident)	Within 5 minutes, 90% of the time
Full effective response force travel time (time from dispatch until all units initially dispatched arrive at the incident. Response resources needed for a moderate risk building fire are used for the evaluation.)	Within 8 minutes, 90% of the time

In keeping with NFPA 1710 and 1221, all response time elements are reported at a given percentile. Percentile reporting is a methodology by which response times are sorted from least to greatest, and a “line” is drawn at a certain percentage of the calls to determine the percentile. The point at which the “line” crosses the 90th percentile, for example, is the percentile time performance. Thus, 90 percent of times were at or less than the result. Only 10 percent were longer.

Percentiles differ greatly from averages. Averaging calculates response times by adding all response times together and then dividing the total number of minutes by the total number of responses (mean average). Measuring and reporting average response times is not recommended. Using averages does not give a clear picture of response performance because it does not clearly identify the number and extent of events with times beyond the stated performance goal.

What follows is a detailed description and review of each phase of the response time continuum. All phases will be compared to the NFPA performance goals.

Call Processing

Most emergency incidents are reported by telephone to the 911 center. Call takers must quickly elicit accurate information about the nature and location of the incident from persons who are apt to be excited. A citizen well-trained in how to report emergencies can reduce the time required for this phase. The dispatcher must identify the correct units based on incident type and location, dispatch them to the emergency, and continue to update information about the emergency while the units respond. This phase begins when the 911 call is answered at the primary Public Safety Answer Point (PSAP) and ends when response personnel are notified of the emergency. This phase, which has two parts, is labeled “call processing time.”

NFPA 1221 recommends that 911 calls be answered within 15 seconds, 95 percent of the time (within 40 seconds, 99 percent of the time) and then be transferred to the dispatch center within 30 seconds, 95 percent of the time (within 40 seconds, 99 percent of the time). None of the primary PSAPs provided information necessary to quantify current performance at this time.

The second part of call processing time, dispatch time, begins when the call is received at the dispatch center (CCRFCC) and ends when response units are notified of the incident. PFD's goal prescribes that this phase should occur within 70 seconds, 90 percent of the time.

The following figure illustrates performance by CCRFCC from the time it receives the call until it notifies response units. Overall performance was 2 minutes, 15 seconds, 90 percent of the time.

**Figure 68: CCRFCC Dispatch Time Performance,
Calls in the City of Pinole & Both Contract Areas**

Incident Type	Processing Time
EMS	0:02:25
Fire	0:01:57
Other	0:01:47
All Types	0:02:15

Turnout Time

Turnout time is a response phase controllable by the fire department. This phase begins at the notification of an emergency in progress by the dispatch center and ends when personnel and apparatus begin to move towards the incident location. Personnel must don appropriate equipment, assemble on the response vehicle, and begin travel to the incident. Good training and proper fire station design can minimize the time required for this step.

The NFPA performance goal for turnout time is within 90 seconds, 90 percent of the time. The following figure lists turnout time for all incidents as well as specific incident types.

**Figure 69: PFD Turnout Time Performance,
Calls in the City of Pinole & Both Contract Areas**

Incident Type	Turnout Time
EMS	0:00:53
Fire	0:02:15
Other	0:01:36
All Types	0:01:28

Turnout time for all incidents is within 1 minute, 28 seconds, 90 percent of the time, meeting their performance goal. The turnout time for fire incidents is above the performance goal.

Distribution and Initial Arriving Unit Travel Time

Travel time is potentially the longest of the response phases. The distance between the fire station and the location of the emergency influences response time the most. The quality and connectivity of streets, traffic, driver training, geography, and environmental conditions are also factors. This phase begins with the initial apparatus movement towards the incident location and ends when response personnel and apparatus arrive at the emergency's location. Within the NFPA goal, 4 minutes is allowed for the first response unit to arrive at an incident.

PFD and automatic aid units are selected for the response to an incident based on a calculation by the dispatch computer system to determine the unit that will have the shortest travel time. This method ensures the shortest possible travel times.

The following figure lists travel time for all priority incidents, as well as specific incident types, for all units responding to the City of Pinole and the two contract areas.

Figure 70: Travel Time Performance, First Arriving Unit, Incidents in the City of Pinole & Both Contract Areas

Incident Type	90% Percentile Travel Time
EMS	0:07:45
Fire	0:08:01
Other	0:07:55
All Types	0:07:45

Overall, travel time for all incidents within the city for all responding units is within 7 minutes, 45 seconds, 90 percent of the time. This does not meet the performance objectives. It is unknown what causes the lengthy travel time, whether it is congested traffic, traffic signal timing, or steep terrain issues.

Travel Time Performance by Region

Travel time performance by region is variable and influenced by a number of factors, including individual station area workload and the number of times a station must cover another station's area. Additional factors include the size of the station area and the street system serving it. More highly connected, grid-patterned street systems contribute to faster response times than do areas with meandering streets with numerous dead-ends.

The following figure evaluates travel time performance by sub-area using Inverse Distance Weighting analysis (IDW). This process uses travel time for known points (actual incidents) to predict travel time for the area surrounding the actual incident. Better performance is generally noted near fire stations, with progressively longer response times for those incidents more distant from the stations.

Figure 71: Actual Travel Time Performance by Region, Calls in the City of Pinole & Both Contract Areas

The four-minute travel time objective is generally met near the fire station, with progressively longer travel times at further distances. The pockets of 10 to 12-minute travel times near the station do correspond to hilly locations with many turns to reach the interior of a neighborhood.

First Arriving Unit Response Time

Response time is defined as that period between the notification of response personnel by the dispatch center that an emergency is in progress until the arrival of the first fire department response unit at the emergency. When turnout time and travel time are combined, the NFPA performance goal for response time is within 5 minutes, 90 percent of the time.

The following figure illustrates the response time for all priority incidents as well as specific incident types during 2018.

Figure 72: Response Time Performance, First Arriving Unit, Calls in the City of Pinole & Both Contract Areas

Incident Type	Time
EMS	00:08:11
Fire	00:09:32
Other	00:08:37
All Types	00:08:17

Overall, response time for all priority incidents was within 8 minutes, 17 seconds, 90 percent of the time.

The following figure represents the number of calls in 2018, where the travel time was greater than 4 minutes. There are notable spikes at the commute hours, 7 to 9 a.m. and again from 5 to 8 p.m.

Figure 73: PFD Number of Calls Over a Four-Minute Travel Time by the Incident Hour, Calls in the City of Pinole & Both Contract Areas

First Arriving Unit Received to Arrival Time

From the customer's standpoint, response time begins when the emergency occurs. Their first contact with emergency services is when they call for help, usually by dialing 911. Received to arrival time combines answer/transfer, call processing, turnout, and travel time. As described in the "Call Processing" discussion in this section, data for call answer and transfer time is not available. The time the call was "received" will either be the actual answer time for calls created by PSAPs other than CCRFCC or the time CCRFCC received the call transferred by another agency. When the PFD performance goals are combined, received to arrival time should be within 6 minutes, 90 percent of the time.

The next figure shows received to arrival performance during 2018 at the 90th percentile for priority incidents within the PFD service area. Overall, received time to arrival time is within 9 minutes, 55 seconds, 90 percent of the time.

**Figure 74: Received to Arrival Time, First Arriving Unit
Calls in the City of Pinole & Both Contract Areas**

Incident Type	Time
EMS	00:10:00
Fire	00:10:30
Other	00:09:33
All Types	00:09:55

Second Unit Arrival Time

The PFD fire engine is staffed with three personnel. Safety regulations require that at least four firefighters be on scene before firefighters can enter a burning building. The only exception is if it is known that a person is inside the building and needs to be rescued. Current staffing levels at PFD require the arrival of a second response unit before non-rescue interior firefighting activities can be initiated.

Incident data for building fires during the study period were analyzed to determine the time the second response unit arrived on the scene. The data indicated that the second unit arrived on the scene of a structure fire within 6 minutes, 45 seconds, 90 percent of the time.

The dispatch data uses a priority coding system for incidents, as shown in the following figure.

Figure 75: CCRFCC Priority Codes

Priority	Description
1	P1 Emergency
2	P2 Emergency
3	P3 Urgent
4	P4 Routine
5	P5 Non-Emergency
6	P6 Non-Emergency
7	P7 Triage status that should be updated to another priority during call taking.
8	P8 No Response
9	P9 Test

Priority 1–4 are Code 3, "lights/sirens." All other priorities are Code 2, no lights/sirens.

The following figure shows the 2018 incidents within the City of Pinole and the two contract areas where adjacent fire agencies were dispatched. There were 3,860 dispatch requests for aid from adjacent fire agencies. This number reflects the dispatch of multiple units not the total number of calls.

Figure 76: Dispatched Aid for PFD, Calls in the City of Pinole & Both Contract Areas

Of those 3,860 requests, 940 incidents did not have a timestamp for “Arrived on Scene”—perhaps these units were canceled en route. The adjacent fire agency units that responded to the remaining 2,920 incidents are shown in the following figure.

Figure 77: Adjacent Fire Agency Assistance, PFD available

Unit	# of Requests	Unit	# of Requests	Unit Name	# of Requests
E169	124	E163	2	E1676	1
Q176	82	E168	2	E369	1
E175	52	E178	2	E372	1
E176	20	E375	2	E376	1
E170	12	E378	2	E379	1
R369	8	1122	1	HM21	1
SQ70	7	BC4	1	HM4	1
BC71	5	E107	1	T114	1
BC64	2	E142	1	USCG	1

In 2018, 27 different fire agency units responded to PFD, while PFD was available. CCFPD Station 69's engine was the most frequent responding engine at 124 requests.

On occasion, the engine from Station 73 was not available to respond to an incident as it had not been cleared from a previous incident. Available engines from the adjacent agencies were dispatched to the City of Pinole and the two contract areas in their stead. The following figure shows the frequency of adjacent agencies' assistance.

Figure 78: Adjacent Fire Agency Engine Assistance, PFD not available

Again, the engine from CCFPD Station 69 was the most frequent responder when E73 was not available, followed by the engine from Rodeo-Hercules Station 75.

The adjacent agencies' engines were dispatched to a variety of incident types, as the next figure shows.

Figure 79: Incident Types; PFD not available

Incident Type	Number of Incidents
5150 PD Request	2
EMS—Alpha (Fall)	1
EMS—Alpha *Code 2	4
EMS—B Ltd	2
EMS—Bravo	12
EMS—Charlie	31
EMS—Delta	39
EMS—Echo	1
EMS—Richmond	2
EMS—Alpha Code 2 With Engine	2
EMS—Medical Emergency	1
Fire—Veh Large	3
Fire Alarm—Commercial	6
Fire Alarm—Residential	7
Fire Exterior	2
On View	4
Single Engine C2	2
Single Engine C3	5
Veh Accident Motorcycle	4

The most frequent type of incident of the adjacent fire agencies' response was a variety of EMS incidents.

The following information relates to codes utilized for EMS calls shown in Figure 79.

**Figure 80: List of Common Emergency Medical Dispatch (EMD) Codes
Used by Most Dispatch Agencies in the United States**

Code	Type	BLS/ALS	Emergency Status
Alpha	Non-Life-Threatening	Basic Life Support	Non-Emergency
Bravo	Possibly Life-Threatening	Basic Life Support	Emergency
Charlie	Life-Threatening	Advanced Life Support	Emergency
Delta	Serious Life Threat	Advanced Life Support	Emergency
Echo	Life Status Questionable	Closest Available (Multiple Resources Sent)	Emergency
Omega "Ω"	Public Assist Only	Basic Life Support	Non-Emergency

FUTURE SYSTEM DEMAND PROJECTIONS

The City provided a population forecast. Future population growth for Pinole is forecast to average 0.79 percent per year through 2050. Using this estimate, the city's population could reach 22,228 by 2050. This projection is based on historical growth. Future growth projections have not been available from other sources. It is unlikely that actual projections will differ much unless city zoning density increases occur.

Incident Workload Projection

The most significant predictor of future incident workload is population and historical call volume; 100 percent of requests for emergency medical service is people driven. The National Fire Protection Association reports that approximately 70 percent of all fires are the result of people either doing something they should not have (i.e., misuse of an ignition source) or not doing something they should have (i.e., failure to maintain equipment). It is reasonable to use forecast population growth to predict future fire department response workload.

The current department services utilization rate is 110 incidents per 1,000 population; the PFD has a higher than the regional median number of calls per 1,000 population but slightly lower than the urban high range.

The utilization of fire department services is expected to grow modestly over time at a rate of about 3 percent per year based on the nine years of historical incident data. This, plus expected population growth, will increase the PFD's workload, as shown in the following figure. Response workload could reach approximately 4,300 responses per year by 2038, driven primarily by requests for emergency medical care. Figure 81 utilizes three data sets to provide response forecasts. PFD data is based on the fire department's fire records management system. "Calls in the City" used call history within the city limits, and "Calls in the Service Area," used data from within the city limits and the contract areas.

Figure 81: Response Forecast, 2018–2038

Community Risk Factors

This section analyzes risks that are present within the study area that potentially threaten people and property. These risks are identified to assist the study area agency in planning where to locate response resources in the types and numbers necessary to effectively respond to likely emergencies. While not all hazards of individual occupancies can be considered—that is beyond the scope of the study—there are risks that seem to be relevant to the area. ESCI recommends that the department be aware of and rate the hazard and risks in terms of frequency and severity within the jurisdiction.

The City of Pinole fire service area has many risks, including the shoreline, a significant wildland interface, underground pipelines, a freeway, and a railroad. The arrangement of the service area is constrained by topography such that few areas have grid coverage from the Pinole Fire Station and neighboring automatic aid from other fire departments. Due to this configuration, the response is funneled through gateways at the foot of each valley. Significant challenges and risks exist in the City of Pinole.

The following figure represents a method of identifying and analyzing risks within Pinole. This figure should be reviewed annually by department leadership with the goal of improvement through the continuous re-evaluation of the risks facing the city.

Figure 82: Risk Identification and Analysis Process¹

Step	Action
Hazard Identification	Identify hazards.
	What is the probability this hazard will occur?
	Is this hazard a significant threat to your jurisdiction?
	Approximately how often does this hazard occur in your jurisdiction?
Vulnerability Assessment	For each hazard identified in the hazard identification process, consider each of the five factors. Factor 1: Danger/Destruction/Personal harm Factor 2: Economic Impacts Factor 3: Environmental Impacts Factor 4: Social Impacts Factor 5: Political Considerations
	Score the vulnerability of this hazard.
	Reconsider the priority of each hazard based on vulnerability.
Risk Rating Score	Risk Rating = Probability ² X Vulnerability ²

¹ Adapted from the Community Risk Reduction Model, United States Fire Administration, National Fire Academy

² Probability and Vulnerability are rated as 3 = High, 2 = Moderate, 1 = Low

The fire service assesses the relative risk of properties based on several factors: the service area population and population density, the demographics of the population, local land use and development, and the geography and natural risks present within the community. These factors affect the number and type of resources (both personnel and apparatus) necessary to mitigate an emergency. Properties with high fire and life risk often require greater numbers of personnel and apparatus. Therefore, staffing and deployment decisions should be made with consideration to the level of risk within the geographic sub-areas of a community.

Overall Geospatial Characteristics

The following community risk assessment has been developed based on intended land uses as described in the zoning designations of the study area. The following figure translates zoning to categories of relative fire and life risk.

Figure 83: Translation of Zoning to Relative Risk Categories

Relative Risk Category	Zoning
Low Risk	Areas zoned and used for agricultural purposes, open space, and very-low-density residential use.
Moderate Risk	Areas zoned for medium-density single-family properties, small commercial and office uses, low-intensity retail sales, and equivalently sized business activities.
High Risk	Areas zoned for Higher-intensity business districts, mixed-use areas, high-density residential, industrial, warehousing, and large mercantile centers.

The following shows the relative percentages of zoning in the City of Pinole.

Figure 84: Pinole Zoning Percentages

The following figure illustrates the distribution of the current zoning classifications in the City of Pinole. By acreage, nearly half of the City of Pinole is residential, and 1/3 is zoned commercial. The current zoning data was undergoing review as some of the parcels were without a zoning code, i.e., the white areas within the city. Some of these are likely "Commercial" due to their proximity to existing commercial zoning.

Figure 85: Pinole & Contract Area's Current Zoning

Geographic & Weather-Related Risks

The number and frequency of federal disaster declarations affecting Pinole paint a picture of the risks that natural hazards pose to the region. The next figure is a summary of federal disaster declarations that have occurred in Contra Costa County:¹⁶

- Between 1969 and 2017, Contra Costa County has received 14 presidential disaster declarations and two emergency declarations.
- These events are important to consider in establishing recurrence intervals for hazards of concern.

Figure 86: Summary of Federal Disaster Declarations in Pinole by Type, 1965–2017

Type of Event	Declaration Date	FEMA Disaster #
Severe Winter Storms, Flooding, Mudslides	4/1/2017	DR-4308
Severe Winter Storms, Flooding, and Mudslides	3/16/2017	DR-4305
Severe Storms, Flooding, and Mudslides	2/14/2017	DR-4301
Severe Storms, Flooding, Mudslides, and Landslides	2/3/2006	DR-1628
Severe Winter Storms and Flooding	2/9/1998	DR-1203
Severe Storms, Flooding, Mud and Landslides	1/4/1997	DR-1155
Severe Winter Storms, Flooding Landslides, Mud Flow	3/12/1995	DR-1046
Severe Winter Storms, Flooding, Landslides, Mud Flows	1/10/1995	DR-1044
Severe Winter Storm, Mud and Land Slides, and Flooding	2/3/1993	DR-979
Loma Prieta Earthquake	10/18/1989	DR-845
Severe Storms and Flooding	2/21/1983	DR-758
Coastal Storms, Floods, Slides, and Tornadoes	2/9/1983	DR-677
Severe Storms, Flood, Mudslides, and High Tide	1/7/1982	DR-651
Torrential Rain, High Tide, and Winds	2/1/1980	EM-3078
Drought	1/20/1977	EM-3023
Severe Storms and Flooding	1/26/1969	DR-253

EM = Emergency Declaration; DR = Disaster Declaration

From a planning perspective, there are several weather-related risks of concern to the study area, as noted in the previous figure. Severe storms can include lightning strikes and significant wind events.

¹⁶ Retrieved from <http://www.co.contra-costa.ca.us/DocumentCenter/View/48893/Contra-Costa-County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=>.

Weather Risks

The climate for Pinole is moderate. Pinole receives 27 inches of rain, on average, per year, the U.S. average is 38 inches of rain per year. The average annual temperatures range from a high of 80°F in July to a low of 40°F in January—with the average temperature being 71°F. Pinole receives 255 sunny days on average, this is 50 more days than the national average.¹⁷

Flood Risk

There are various risks associated with flooding. It is essential, therefore, that the community in the area of flood zones and areas prone should be informed of the risks, before the flood and as part of the planning process. Further, this should be a part of the public education process to ensure that residents are aware of the risks associated with flooding and the actions they should take to ensure readiness.

During a flooding event, the fire department will be called upon to assist in evacuations and rescues. These evacuations may include facilities with large numbers of people requiring EMS resources. Rescue and emergency evacuations may involve moving water requiring the specialty-trained technical rescue team to intervene.

After a flood as the residents begin recovery, EMS-related incidents will increase as injuries and medical conditions occur. Public education can help the community prepare for the recovery process.

The Contra Costa Hazards Mitigation Plan addresses two principal sources of floods. These two sources are summarized and defined in the next figure.

Figure 87: Sources of Flooding in Contra Costa County¹⁸

Source of Flood	Description
Riverine (river and stream)	Riverine floods described in terms of their extent (including the horizontal area affected and the vertical depth of floodwater) and the related probability of occurrence (expressed as the percentage chance that a flood of a specific extent will occur in any given year).
Flash Flooding	Flash floods occur suddenly after a brief but intense downpour. They move rapidly, end suddenly, and can occur in areas not generally associated with flooding (such as subdivisions not adjacent to a water body and areas serviced by underground drainage systems). Although the duration of these events is usually brief, the damage they cause can be severe. Flash floods cannot be predicted accurately and happen whenever there are heavy storms.

Garrity Creek Watershed

This 1,790-acre area in western Contra Costa County includes the watershed of Garrity Creek (3.67 miles). This watershed includes sections of the City of Pinole.

Pinole Creek Watershed

Pinole Creek is a perennial creek that runs through the center of the city.

The next figure illustrates the Special Flood Hazard Areas (SFHA) as designated by FEMA. There are areas with the risk of flooding throughout the city. For the most part, the areas that are flood-prone have a one-percent increase in annual flooding. There are small portions of the study area that include a 0.2 percent annual chance of flooding. Station 73 and 74 are located very close to Pinole Creek drainage and potential flood areas, as seen in the following figures.

Figure 88: Watersheds in the Study Area

Figure 89: Flood Zones in the Study Area

Flood hazard areas identified on the Flood Insurance Rate Map are identified as an SFHA. SFHA are defined as the area that will be inundated by the flood event having a 1-percent chance of being equaled or exceeded in any given year. The 1-percent annual chance of flood is also referred to as the base flood or 100-year flood. Moderate flood hazard areas are the areas between the limits of the base flood and the 0.2-percent-annual-chance (or 500-year) flood. The Coastal High Hazard area is that part of the coastal floodplain where the wave heights during the base flood will be three feet or more.

There are 145 parcels that intersect various FEMA flood zones. Ten of these parcels are zoned "agricultural/open space," and 25 additional parcels are zoned "commercial," including one corner of a school parcel. The remaining 110 parcels are zoned "residential," including 109 single family parcels and one multifamily parcel with 12 units. Using the 2010 census data, the Pinole average household size is 2.7 persons; this gives an estimated total population of flood risk of 327 persons. The following figure shows the population within the various flood zones.

Figure 90: Flood Hazard Areas

Population Within the 10%, 1%, and 0.2% Annual Chance Flood Hazard Areas					
10% Annual Chance Flood Hazard Area		1% Annual Chance Flood Hazard Area		0.2% Annual Chance Flood Hazard Area	
Population Exposed	% of Total Population	Population Exposed	% of Total Population	Population Exposed	% of Total Population
0	0	0	0	327	1.7%

The commercial and agricultural/open space parcels were located in the 10 percent and 1 percent SFHAs.

Tornadoes

Tornadoes can have winds of over 300 mph, which—at the higher ranges—will cause a significant threat to life and damage to property. The intensity of tornadoes is measured on the Enhanced Fujita Tornado Damage Scale. This scale has an intensity range for tornadoes from EF-0 to EF-5, including wind estimates. The next figure is a summary of the damage associated at the various levels. Pinole has not experienced a tornado within written history.

Figure 91: Tornado Intensity, Enhanced Fujita Scale

Designation	Wind Speed, mph	Typical Damage
EF-0	65–85	Minor or no damage. Peels surface off some roofs; some damage to gutters or siding; branches broken off trees; shallow-rooted trees pushed over. Confirmed tornadoes with no reported damage are always rated EF-0.
EF-1	86–110	Moderate damage. Roofs severely stripped; mobile homes overturned or badly damaged; loss of exterior doors; windows and other glass broken.
EF-2	111–135	Considerable damage. Roofs torn off well-constructed houses; foundations of frame homes shifted; mobile homes completely destroyed; large trees snapped or uprooted; light-object missiles generated; cars lifted off ground.
EF-3	136–165	Severe damage. Entire stories of well-constructed houses destroyed; severe damage to large buildings such as shopping malls; trains overturned; trees debarked; heavy cars lifted off the ground and thrown; structures with weak foundations are badly damaged.
EF-4	166–200	Devastating damage. Well-constructed and whole frame houses completely leveled; cars and other large objects thrown, and small missiles generated.
EF-5	> 200	Extreme damage. Strong-framed, well-built houses leveled off foundations are swept away; steel-reinforced concrete structures are critically damaged; tall buildings collapse or have severe structural deformations; some cars, trucks, and train cars can be thrown approximately 1 mile (1.6 km).

While ranges of winds are listed on the scale, the wind estimate is not exact—nor have they been verified in science or engineering. Different wind speeds may cause similar-looking damage from place to place—even from building to building.

While preventing tornadoes is not possible, the preparation for the potential of a tornado should be considered as a high priority. Tornadoes can occur with little or no warning and can result in devastating damage; departments must consider that as part of their planning for disaster readiness, the likelihood of a tornado occurring is minimal in Pinole.

Tsunamis

A tsunami is a series of high-energy waves radiating outward from an area where a generating event occurs. Earthquakes may produce displacements of the seafloor that can set the overlying column of water in motion, initiating a tsunami, depending on the magnitude of the earthquake and the type of faulting.

The San Pablo Bay area is a likely site of tsunami impacts in Contra Costa County that would rise with floodwaters from a San Francisco Bay tsunami caused by a local earthquake. According to the Contra Costa Hazard Mitigation Plan, Pinole only has a small threat of tsunamis immediately along its coastline vicinity.¹⁹

Additional Weather-Related Hazards

Severe weather hazards also pose a threat to Pinole. Aside from the weather-related hazards described in the preceding section, several other weather-related events have been analyzed as part of the hazard mitigation plan. The next figure—while applicable to the whole County—is a summary of these events, including the definitions, severities, and impacts.

¹⁹ <https://www.contracosta.ca.gov/DocumentCenter/View/48893/Contra-Costa-County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=>.

Figure 92: Other Weather-Related Hazards in Contra Costa County²⁰

	High Winds	Heavy Rain and Thunderstorms
Definition	The National Weather Service defines high winds as, "sustained wind speeds of 40 mph or greater lasting for one hour or longer, or winds of 58 mph or greater for any duration."	Heavy rainfall is any amount of rain produced in a relatively short time period that exceeds the capacity of natural systems' or stormwater infrastructures' ability to effectively and safely convey the flow of stormwater.
Severity	The entire county is directly or indirectly susceptible to the effects of high-speed winds. Trees are susceptible to blowing over and causing damage to surrounding property. All communities can suffer extended power outages.	The entire county is directly or indirectly susceptible to the effects of heavy rains or thunderstorms. All communities can suffer the impacts of heavy rains or thunderstorms.
Impacts	Widespread power outages. Mass of downed debris on the transportation network impedes the response of emergency personnel and utility crews. Electrical blackouts force the closure of government offices, businesses, and schools. Power outages can disrupt transportation, generating traffic snarls resulting in thousands of motorists seeking few available alternate routes on local arterials and collectors, complicated by blocked roads.	Heavy rain can have significant impacts, including rising rivers, flash flooding, mudslides, and landslides. Stormwater runoff from heavy rains can also impair water quality by washing pollutants into water bodies. When power outages coincide with heavy stormwater flows, public works crews may struggle to provide auxiliary power to sewer lift stations to prevent backups or flooding in suburban and urbanized areas. Thunderstorms carry the same risks as heavy rain events, and depending on the type of storm, they can also include tornadoes, lightning, and heavy winds, increasing risk of injury and property damage.

²⁰ Retrieved from https://www.trpc.org/DocumentCenter/View/4172/HazMit_Ch4-2_Storm?bidId=.

Earthquakes

The Contra Costa Hazard Mitigation Plan rates the hazard profile of earthquakes as a high probability. Earthquakes can cause widespread damage and disrupt many services across the area.

Figure 93: Earthquake Fault Lines in and Around Pinole

The Pinole Fault and the Moraga Fault, both undifferentiated quaternary faults, pass through the study area. The historic Hayward Fault, with a slip rate of 5 mm/year, moves to the southwest of the study area.

The effects of earthquakes are described in the following figure.

Figure 94: Effects of Earthquakes

Effect	Description
Ground Motion	When a fault ruptures, seismic waves radiate, causing the ground to vibrate. This wave movement causes the ground to shake during an earthquake.
Ground Failures	Earthquakes can cause surface faulting, landslides, subsidence, and uplifting. Surface faulting is the differential movement of two sides of a fracture.
Liquefaction	Liquefaction is the phenomenon that occurs when ground shaking causes loose soils to lose strength and act as a viscous fluid. Liquefaction causes two types of ground failure: lateral spread and loss of bearing strength.
Tsunamis	Tsunamis are large ocean waves generated by sudden changes in the seafloor elevation, which displace a significant volume of water.

Wildfire Risk

Like many areas of California, there is a wildfire risk in the Pinole area. The level of risk associated with wildfires in any given area of a community is dependent upon several factors, including climate, vegetation, and topography. Another factor is the number of homes that are built within the Wildland Urban Interface. Pinole has 30 buildings within the Very High Fire Hazard Severity Zone (FHSZ).

According to the Contra Costa Hazards Mitigation Plan, the summary assessment on wildfire reads:

The geography, weather patterns, and vegetation in the East Bay area provide ideal conditions for recurring wildfires. Especially vulnerable are the East Bay Hills in Lamorinda, which includes Lafayette, Moraga, and Orinda. Parts of Walnut Creek, including the area surrounding Rossmoor, are vulnerable to wildfires, as are Clayton, the Danville/San Ramon area, and the San Pablo-El Cerrito, El Sobrante area. Because the natural vegetation and dry-farmed grain areas of the county are extremely flammable during late summer and fall, wildfire is a serious hazard in undeveloped areas and on large lot home sites with extensive areas of un-irrigated vegetation.²¹

The next figure illustrates a summary of the historical wildfire occurrences and impacts. The Castro and the Carson Fires of 2011 were the most significant incidents, with numerous small incidents in the succeeding years.

²¹ Retrieved from https://www.trpc.org/DocumentCenter/View/4172/HazMit_Ch4-2_Storm?bidId=County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=.

The next figure shows the historical wildfires listed in the previous figure in and near Pinole. There have been many small wildfires (< 10 acres) in the more remote portions of the county.

Figure 96: Historical Wildfires in and Near Pinole through 2018

The next figure shows the wildfire threat in and near Pinole.

Figure 97: Degree of Wildfire Threat

The fire threat is a combination of two factors: 1) fire frequency, or the likelihood of a given area burning, and 2) potential fire behavior (hazard). These two factors are combined to create four threat classes ranging from moderate to extreme (California Department of Forestry and Fire Protection's Fire and Resource Assessment Program [FRAP]).

The next figure shows the estimated land area, population, and dwellings that are in the Wildland Urban Interface areas.

Figure 98: Study Area Current Estimates as Related to the Urban Interface, 2015

Fire Department/District	Population		Residential Dwellings	
	Total	Percent in the Hazard Area	Total	Value in the Hazard Area
Pinole Fire Department	94	.5% ²³	30	\$16,007,875

Of concern is the Galbreath Road neighborhood to the southwest of Station 74. This area is characterized by a single road in, as well as being surrounded by dense vegetation. This is a large concern for the ingress of fire equipment during an emergency (such as a wildfire event) and egress of residents who may be evacuating the Galbreath Road area. Future development should evaluate hazards to the development area and ensure adequate traffic routes are designed and implemented.

Figure 99: Galbreath Road Neighborhood

²³ Retrieved from: <http://www.co.contra-costa.ca.us/DocumentCenter/View/48893/Contra-Costa-County-Draft-Local-Hazard-Mitigation-Plan-Volume-1-January-31-2018?bidId=>.

Transportation Risks

Highways

There are several transportation corridors and various modes of transportation that fall within the study area for which the department is responsible. Beginning with major roadways, Interstate 80 goes through the middle of Pinole. Additionally, there are several major local roads within the City, including San Pablo, Appian Way, and Pinole Valley Road. Regardless of the size of the roadway or the speed limit, any roadway has the potential for motor vehicle crashes, vehicle fires, medical emergencies, brush fires, or hazardous material spills/leaks. Each of these is not only a risk to the community, but the responders are also at risk of being struck by vehicles while operating near moving traffic.

Last year, the town of Paradise faced a devastating fire. Evacuations from the town on narrow two-lane roads became problematic to those leaving the fire area. In 2019, Streetlight Data, Inc. listed Pinole as three times the national average in difficulty in evacuating the city in case of emergency due to limited evacuation routes and narrow streets.²⁴ Due to the general geography of Pinole, this road arrangement is nearly unavoidable. The Pinole Police Department has a plan to use all lanes to travel in one direction to evacuate residents from the fire area in an expedient manner.

²⁴ It should be noted that Streetlight Data only studied cities of under 40k in population. The study also made the assumption that people would choose familiar and preferred routes even though other exists exist.

Figure 100: Major Transportation Infrastructure in the Study Area

Airports

The City of Pinole does not have an airport. Two international airports are located nearby, the Oakland International Airport (27 miles) and the San Francisco International Airport (34 miles). There is a heliport in San Pablo.

Railroads

Figure 100 shows the rail line through Pinole. Amtrak provides regular service through the city with over 16 rail stations within a 30-mile radius. In addition, Union Pacific's Martinez Subdivision and BNSF Stockton Subdivision transport freight through the area. Although a comparatively safe mode of transport, railway operations do come with hazards, including accidents involving pedestrians, other vehicles, derailments, and accidental hazardous material releases. The next figure discusses some of these incidents.

Figure 101: Hazard Descriptions Faced by the Pinole Fire Department

Type of Incident	Description/Hazard
Train Collisions	Collisions can be between two or more trains or between trains and infrastructure.
Derailments	Derailments occur when one or more cars of a train leave the tracks; generally, it involves just one train.
Grade Crossings Crashes	There are various scenarios in which accidents occur at railroad crossings.
Railroad Staff Injuries	Railroad staff may get injured while working on or near the tracks. In some cases, accessibility will be a problem.
Dangerous Goods Release	As the railroads carry hazardous goods, there is always the potential for product release.

The effects of these incidents can require large numbers of fire and EMS resources. In review of the previous figure, several of these incidents could require the response of a Haz-Mat team, Technical Rescue, and EMS. Many times, the complexity of the incidents will require multiple operational periods. Risk analysis and planning for these types of incidents must consider the need for higher than usual personnel, equipment, and Automatic or Mutual Aid resources. When incidents occur at a grade crossing, fire and EMS personnel will have to operate near the tracks. Training in proper precautions is essential.

Buildings

Many buildings in the city are used for purposes that create more significant risks than others during an emergency. High occupancy buildings, facilities providing care to vulnerable populations, and others may require greater numbers of emergency response and resources during an emergency.

Numerous buildings lie within the study area in which large numbers of people gather for entertainment, worship, and other similar events. A variety of small businesses and entertainment venues also exist.

Colleges and Schools

The next figure shows the locations of the educational facilities within the study area. These facilities present additional risk, primarily for mass casualty incidents. Fire, criminal mischief, and potentially terrorism could cause a major medical emergency requiring significant emergency service resources.

Figure 102: Colleges and Schools in the Study Area

Medical and Congregate Care Facilities

Medical and congregate-care facilities, particularly hospitals and nursing homes. Although these facilities have regular fire safety inspections and are generally built of fire-resistive construction with built-in fire suppression, emergencies still can occur that require the quick movement of patients away from the hazard. Incidents at these facilities will require high resource levels.

Pinole does not have a hospital, but has 11 assisted living facilities, as the next figure depicts.

Figure 103: Assisted Living Facilities

Other Critical Infrastructure

One concern to fire departments is the water and fire hydrant system. Providing enough storage, distribution, and access to this valuable firefighting resource is very important. The next figure illustrates the hydrant system in the study area. As expected, in the more populated urbanized areas, fire hydrants coverage is very good. Some rural areas of the city depend on water delivered by tenders, but generally good hydrant coverage exists throughout the service area. From a risk assessment standpoint, planning consideration must be given to situations when the water system could fail.

Figure 104: Fire Hydrant Distribution in the Study Area

The next figure shows the commercial building and hydrant locations in Pinole. Represented on the map is the Needed Fire Flow (NFF) for each of the commercial buildings. Fire flow is the amount of water that would need to be supplied and pumped from an apparatus to control a building fire. Pinole's fire engine can pump 1,500 gallons per minute. Many buildings in Pinole could require a much higher fire flow to control an established fire.

Figure 105: Fire Hydrant Distribution, Commercial Building with Needed Fire Flow (NFF)

Emergency communication centers and the associated transmitting and receiving equipment are essential facilities for emergency response. The Contra Costa Regional Fire/EMS Communications Center (CCR FCC) provides call receipt and dispatch service to the Pinole Fire Department and many of the neighboring jurisdictions. This center answers 911 calls, dispatches fire and other emergency responders, and provides important support to the on-scene incident management function. This center is the secondary Public Safety Answering Point (PSAP). All 911 calls made from landlines in the city limits are automatically routed to the City of Pinole Police Department, which is the Public Safety Answering Point (PSAP). Calls from landlines in the unincorporated areas within the City's fire service area are automatically routed to the Contra Costa County Sheriff. Once one of these PSAP's dispatchers determines a call requires fire department response, the call is relayed to CCR FCC.

There are other communication facilities and equipment that are equally important to the community and government operations within the study area. These are the telephone company central offices and the transmission lines of local telephone service providers. Internet service providers, along with wireless cellular communication providers, provide essential communication capabilities for the community as well as emergency personnel through their facilities and equipment. Failures in any of these systems can influence emergency services.

Energy

The loss of electrical power is also a risk to the community. Community services, from communications to traffic signals to normal operation of supermarkets, require the use of energy. Whether it is electricity generation and transmission systems, fuel distribution and storage tanks, or natural gas pipelines and regulator stations, the community is dependent upon energy sources. The loss of energy is a planning consideration for response and readiness.

Structural Risks

Certain buildings, contents, functions, and size present a greater firefighting challenge and require special equipment, operations, and training.

The Insurance Services Office calls for a ladder truck within 2.5 miles of developed areas containing buildings three or more stories in height. Accessing the upper floors and roofs of buildings this tall, typically requires ladder truck capability as ground ladders may not provide access. The next figure documents current commercial facilities and the number of stories each building possesses.

Figure 106: Commercial Buildings, One to Four Stories in Height

Large buildings such as warehouses, malls, and large “box” stores require greater volumes of water for firefighting and require more firefighters to advance hose lines long distances into the building. The following figure demonstrates building locations and their relative total floor space in relationship to Pinole’s Station 73.

Figure 107: Commercial Buildings, Total Floor Area

Terrorism

Pinole is, as is anywhere, a potential target for terrorism. Most of the previously categorized risks in the community are targets for such activity. These include schools, commercial buildings, public infrastructure, and public assembly areas that are located within the study area. In addition, the outdoor public gathering events during the year can also be targets. All fire-rescue departments need to be vigilant in their training and preparedness in the event one or more coordinated acts of terror occur in the region, Pinole is no different. Despite the small likelihood of a terrorist attack, training to ensure coordination and unified command with law enforcement partners is critical.

Demographics

Current Population Information

The next figure is a summary of the service area and population, according to the United States Census Bureau.

Figure 108: Study Area Size and Population Estimates

Fire Department/District	2017 Population Estimate	Area in Sq. Miles	Population Density
Pinole City	19,364	5.32	3,455/sq. mi.

An NFPA report has identified the groups that face a higher risk of being injured or killed in a fire as:²⁵

- Children under 5 years of age;
- Older adults over 65 years of age;
- People with disabilities;
- Those with a language barrier; and
- People in low-income communities.

The following figures were created to provide an overview of the demographics related to these identified groups. Select demographics are provided in the following figure to the extent that the data was available.

Figure 109: Select Population Demographics

	Persons under 5 years	Persons under 18 years	Persons 65 years and over	Persons with Disabilities Under the Age of 65	Language other than English Spoken at Home
Pinole ²⁶	3.7%	17.1%	18.8%	9.1%	36.3%

Based on the preceding figure, 18.8 percent of the population is over 65 years of age, and an additional 3.7 percent of the population is under five years of age. This places a total of approximately 22.5 percent of the populations within the age groups that are at the highest risk in residential fire incidents and account for some of the highest use of emergency medical services.²⁷ Senior citizens can have difficulty escaping from fire due to physical limitations. Seniors also tend to use emergency medical services more frequently than younger persons. As the population ages, this will create an increase in service demand for emergency medical services. In addition, just over 36 percent of the population may have language barriers that make communication with first responders during an emergency difficult.²⁸

²⁵ National Fire Protection Association, 2007; Urban Fire Safety Project, Emmitsburg, MD; retrieved from <http://www.nfpa.org/public-education/by-topic/people-at-risk/urban-fire-safety/reports-and-presentations>.

²⁶ Information retrieved from the United States Census Bureau.

²⁷ This is very close to the national average of 21.7 percent.

²⁸ The national average is 21.8 percent.

As noted, the very young also represent a vulnerable population, both regarding their ability to escape a structure fire as well as their susceptibility to serious medical ailments such as asthma, traumatic events, choking, or injury from vehicular accidents.

The demographics displayed in Figure 110 are factors that indicate that a population is more likely to use fire department services than other populations. Individuals in poverty or with no health insurance are more likely to use local EMS resources compared to individuals with health insurance and a personal physician. A high percentage of owner-occupied homes may indicate a more stable community and residents willing to invest in their community and community services; Pinole with an owner-occupied housing rate of 70 percent is approximately 7 percent higher than the national average.

Figure 110: Other Demographic Comparisons

Subject	Pinole
Persons without health insurance, under age 65 years	4.7%
Owner Occupied Housing Rate, 2012–2016	70.2%
Median household income (in 2017 dollars), 2012–2017	\$84,255
Residents at the poverty level	5.4%

Population Density

Most communities contain areas with different population densities and property risks allowing the community's policymakers to specify different response performance objectives by geographic area. The classifications that are identified by the National Fire Protection Association (NFPA) in Standard 1720 and the percentage of the city in the classification is provided in the following figure.²⁹

Figure 111: Population Classifications

Classification	Criteria
Urban	> 1,000 people/square mile
Suburban	500–1,000 people/square mile
Rural	< 500 people/square mile
Remote Area	Travel Distance ≥ 8 miles

²⁹ NFPA 1720: *Standard for the Organization and Deployment of Fire Suppression Operations, Emergency Medical Operations, and Special Operations to the Public by Volunteer Fire Departments*, 2014 Edition.

The next figure illustrates the population density.

Figure 112: Study Area Population Density

Population Growth Projections

The population in Pinole has grown slowly over the last decades. The population in 1980 was 14,253—in 2019, the population has been estimated to have grown to 19,364.³⁰ This is an overall increase of .077 percent per year. Pinole, in 2010 (during the last national census) had a population was 18,390. The 2019 estimated total is 19,364—an increase of just over 5 percent.

With population growth, there come increases in service demand. More people mean not only more incidents generated, but it also means a need for expanded geographical coverage. Resource additions will need to be planned to provide service delivery and performance at acceptable levels if higher density growth occurs within the service area.

Expansion and growth will affect not only the delivery of fire-rescue services but also other fire department functions, such as code enforcement and community risk reduction. The department must maintain awareness and be involved in monitoring the relationship between population and demand.

Section II:

PUBLIC WORKSHOP & STAKEHOLDER INPUT

PUBLIC INPUT

During the development of the community expectations portion of the Regional Fire Service Delivery Study Scope of Work, the City made it very clear they desired a number of opportunities for public input. The final scope of work included a Community Fire Study Workshop, several days of stakeholder interviews, and no less than two presentations to the City Council that would be conducted with opportunities for public input. This section of the study reflects the results of the Community Fire Study Workshop and the stakeholder interviews.

On May 29, 2019, at 6 p.m., ESCI facilitated the Community Fire Study Workshop, which was attended by approximately 45 people. The format for the workshop was an interactive presentation utilizing Swift Polling on-line platform. This program allowed for a series of questions and input opportunities that could be instantly responded to by the audience with the results displayed in real-time. Responses were collected via text message, internet polling website, or paper polling form as displayed in applicable figures that follow as "SMS," "Web," or "Paper Vote." All polls and inputs were captured and are as follows.

For ESCI to gauge the community's awareness of, access to, and experience with the services provided by the Pinole Fire Department, four questions were presented:

- What services, emergency, and other, are provided by the Pinole Fire Department?
- How many firefighters are on duty daily in Pinole to provide services?
- Have you received any services, emergency, or other, from the Pinole Fire Department?
- If you received services, how satisfied were you with the service?

Responses to the question regarding services provided by the department are summarized in Figure 113. The participants understood the department's primary mission and the services that are or should be available to fulfill that mission.

Figure 113: Services Provided by the Pinole Fire Department

Figure 114 indicates that the participants were aware of the department's on-duty force. In addition to daily staffing, the department enjoys effective automatic and mutual aid agreements with surrounding jurisdictions. However, increasing service demands across the spectrum of partnering agencies often leaves Pinole resources stretched thinly.

Figure 114: Number of Firefighters on Duty Daily in Pinole

In the following two figures (Figure 115 and Figure 116), several participants reported having received services from the department, emergency, or other. Of those residents who received services, the majority indicated that they were satisfied with the outcome of those services. This is a very good sign given the minimal resources the department is able to provide at this point in time and is demonstrative of the department's commitment to its service mission.

Figure 115: Have You Received Any Services from PFD?

Figure 116: How Satisfied Were You with the Service?

The next set of four questions were designed for ESCI to gain a sense of the community's awareness of the adequacy of the fire protection system in Pinole to meet service demands:

- Is the existing system adequate?
- If not, what is lacking?
- Is the current staffing of the PFD adequate or not?
- How long should it take for resources to arrive from the time that you call?

As displayed in Figure 117, a majority of respondents believe that the existing service delivery system in Pinole is inadequate. Responses to what is lacking regarding the system are summarized in Figure 118

Figure 117: Response to, "Is the Existing System Adequate?"

Figure 118: Response to, "What is the Current System Lacking?"

Insufficient personnel and resources were expressed as being the biggest challenges in the current system. Although responses under the category “Other” did not fall under the other four categories, they are important to note here: response time objectives not being met and a lack of preparedness for infrastructure development were noteworthy concerns of some participants.

Responses to current Department staffing in Figure 119 are synonymous with the responses to whether or not the overall existing system is adequate. The respondents believe that their fire department is not adequately staffed at present. This further correlates to the responses in Figure 120 regarding response time expectations. The respondents had a realistic view of how long it should take for resources to arrive when they call, given current staffing of the PFD and automatic/mutual aid agreements.

Figure 119: Response to, “Is Current PFD Staffing Adequate?”

Figure 120: Response to, “How Long Should It Take a Fire Engine to Arrive?”

The final six questions presented were designed to determine the community's awareness and understanding of prospective partnering options, the desirability of those options, and positive or negative impacts that may arise with each option:

- How important is it that the City of Pinole has its own fire department?
- Would there be advantages in contracting with Contra Costa County FPD for fire-based services?
- Would there be advantages in the Rodeo-Hercules FPD annexing the city area to provide fire-based services?
- What advantages would there be in partnering with either agency for services?
- What disadvantages would there be in partnering with either agency for services?
- Would you support a parcel tax measure if the revenue it generated improved services and financial stability either as a sole agency or in a partnering option?

Figure 121: Response to, "How Important is it to the City of Pinole To Have Its Own Fire Department?"

Figure 122: Response to, "Are There Advantages with Contracting With CCCFD?"

Figure 123: Response to, "Are There Advantages in Rodeo-Hercules Annexing the Pinole Area into the RH Fire Protection District?"

Figure 124: Response to, “What Advantages Would There Be in Partnering with Either Agency for Services?”

Figure 125: Response to, “What Disadvantages Would There be in Partnering with Either Agency for Services?”

The participants recognized that there are advantages to partnering with one of the surrounding agencies because of the increased staffing and resource depth it would bring. However, several residents expressed that it is important for Pinole to have its own fire department irrespective of whether a partnering option is pursued. Several residents clearly articulated that it is very important that Station 74 be re-opened and staffed full-time. Also expressed was a need for more information regarding partnering options so that the community can make the best-informed decision for service delivery going forward. Increased costs and loss of local control are primary concerns with agency partnering.

Figure 126: Response to, “Would You Support a Parcel Tax Measure if the Revenue it Generated Improved Services and Financial Stability Either as a Sole Agency or in a Partnering Option?”

Support for a parcel tax measure exists among the participants, as indicated in Figure 126. However, consideration of a senior citizen exemption and some idea of a dollar amount per resident are important factors for residents in their deciding whether to support a tax measure.

The second phase of soliciting opinions and expectations about the Pinole Fire Department and the services it delivers were gathered by direct interviews of stakeholders. Eighteen stakeholders were scheduled for interviews that were completed over a two-day period. Of the 18 interviewees, these stakeholders represented the City Council, City Administration, Community Members, Business Community, PFD Labor, Administrative Staff Members, Chief Officers, and surrounding Fire Chiefs.

It is important to note that the information solicited and provided during this process was provided in the form of “individual inputs,” some of which are perceptions as reported by stakeholders. All information was accepted at face value without an in-depth investigation of its origination or reliability. The project team reviewed the information for consistency and frequency of comment to identify specific patterns and/or trends. The stakeholder responses are summarized next.

Elected Officials, Business Community, & Citizens

Are you aware of why we are here and the purpose of this project?

- The majority of those interviewed were aware of why ESCI’s representatives were present.
- Several of those interviewed stated that issues such as the closure of Station 74 and the on-going discussion of merging/consolidating/contracting, etc., with a neighboring fire department or district have been going on for several years.
- Others interviewed indicated that the purpose is to find out where the needs are and where to go from there.
- For those individuals who were not aware of the “why” and “purpose” an update was provided.

In your opinion, what are the advantages/positives/strengths of the existing emergency service delivery system?

- The City Fire Department is providing a service and doing it well.
- Benefits were different between the bargaining groups; now, they are the same which has created harmony amongst the employees.
- The fire department has been serving the City for a long time; and people like the idea of having their own full-service fire department; one station staffed with three firefighters.
- Quick and efficient response by the fire department; impressed with the fire department.
- Responding firefighters are competent, and we have local control.
- Motivated, committed, responsive, well trained, and organized.

What are the disadvantages/negatives/weaknesses of the existing system?

- Understaffed due to disabilities, budgeting for equipment, and excessive repairs.
- The relationship between the fire department and the City could be improved.
- Closure of Station 74, due to the City having zero reserve(s) when the recession occurred in December of 2007. Financial recovery for the City has been slow resulting in not having enough funding to reopen Station 74.
- Adversarial situation due to personnel now paying for a portion of the employer's contribution to the Public Employees Retirement System.
- Strained relationship between elected officials and the fire department.
- Assuming there are services that are not currently provided.
- Pinole Fire Department is understaffed, lacks resources, equipment, and money.
- There are potential disadvantages when reflecting on the wildland fires in California last year and the close proximity of homes, schools, etc., to hills and undeveloped land within the City.
- Strong leadership, need to increase training, develop succession planning, implement performance evaluations.

Does the existing system provide the residents and community with acceptable protection?

- No, due to traffic congestion during commute hours.
- There is a perception that there is a negative impact on surrounding agencies due to Pinole Fire Department having only one fire station.
- Three firefighters is not very many; need to bring in other firefighters from neighboring agencies.
- Yes, the existing system provides acceptable protection.
- No, if the Engine has a mechanical issue; response time is negatively affected and is not an adequate response due to having to depend on our neighboring fire agencies.
- Not sure and want to have resources to respond appropriately to any requests for fire services.

How important do you think it is for the City to have its own fire department?

- The fire department is providing services now.
- Recognizes that there are efficiencies with everyone under the same roof.
- Very important.
- There appears to be a struggle now due to the need for additional resources.
- It is not that important; Stations 73 and 74 are in Pinole; who controls it does not really matter.
- If having our own fire department enables the fire department enhanced ability to respond to emergencies, then it is very important.

Do you believe there would be advantages to the City and level of service if the City were to contract with Contra Costa County FPD or have Rodeo-Hercules annex the area for the provision of fire-based services?

- Yes. Preference is partnering with Rodeo-Hercules Fire Protection District rather than Contra Costa County Fire Protection District.
- Yes, with the assumption that there are services that are not currently provided.
- There definitely would be an advantage.
- Yes, there would be additional training and resources as well as access to services Pinole does not have but the other agencies do.
- Would want this to go to the voters.
- It could be detrimental if the department could not provide—at a minimum—the current level of service.

Do you believe the community would support a parcel tax if the additional funding would improve operations and enhance the financial stability of the department either as a standalone or to fund one of the options mentioned?

- It depends on the dynamics; fixed income recipients are less likely to support an increase in taxes.
- There are competing priorities due to existing conditions of our roadways; should they be addressed at the same time?
- If they understood what improvements were and what the costs are to them; then yes.
- Folks who have wanted the improvements for a while will support it.
- Yes, however, the funds must be allocated specifically for fire service(s).
- The interviewee believes the community will support a parcel tax.
- Possibly; cannot say yes or no. Some communities will support it and other will not.

In the event the City were to contract with Contra Costa County FPD or have Rodeo-Hercules annex the area for the provision of fire-based services, what is the one issue that—if not addressed properly—would be a deal-breaker.

- Financial/cost.
- Identify how services that are provided now will improve and identify the cost.
- Must be able to prove that response times will improve.
- If there is presence in the City.
- Amount of safety personnel provided to the area.
- Taking the time, obtaining appropriate information, making sure that all the agencies coming together are on the same page.

Who do you think would be opposed to the change?

- No—not an organized group.
- There are citizens out there that take pride in having their own fire department.
- Those who do not understand the advantages.
- None; hold on to Pinole's identity.
- People who cannot afford it.
- Those who live in Pinole and only are familiar with Station 73.
- Possibly those who believe they will be stimulating the economy; not supporting the fire department.
- Those who opposed the construction of Station 74.
- Those who oppose spending funds from the City's General Fund.
- Employees affected by combining agencies into one.

Is there anything you would like to add that we have not discussed?

- Hoping for a viable solution that is within the City's financial means.
- What does it take to provide services? A cross section of input is what is anticipated as a result of the current "report."
- Possibly the "study" will put this issue to bed so they can move forward.
- The Pinole Fire Department has always been "spot on."
- 10 years ago, it was appropriate to close Station 74; it should go to a ballot question.
- Residents in this town want more fire coverage; this report is offering the benchmark. What happens when the benchmark is met?
- It is important to come up with a viable solution that the City can afford. If community supports staffing #74—let's do it with a parcel tax. We have options.

Chief Officers, Labor Leaders, & Firefighters Representatives***What are some areas in which you think the department could make improvements?***

- Infrastructure
- Improve labor relations with the City Council
- Administrative support
- Succession Planning
- Leadership stability; in the past 9 years, Pinole Fire Department has had 13 Fire Chiefs
- Battalion Chief training
- Consistent training for all safety personnel
- Open Station 74
- Policies are lacking in various yet needed areas
- Lack of a formal hiring process; at this point in time, there has been no consistency.

What do you see as the top critical issues faced by the City fire department today?

- Lack of supervision on A and C shifts
- Staffing
- Policies; there are none
- Adequate Administration—a good service model
- Morale
- Communication

What opportunities, in your view, are available to improve the service and capabilities?

- Collaboration with others
- On-line training
- Policy Development
- Contra Costa Fire Protection District
- Opportunities prevail with a reorganization

What challenges do you see to the change?

- The will of the Fire Chiefs and Elected Officials
- Going to the Union first before going to the Fire Chief
- Finances
- Public perception(s)
- Collectively reviewing the existing Budget in detail
- Local control

What drawbacks do you see to the City contracting with Contra Costa County FPD or have Rodeo-Hercules annex the area for the provision of fire-based services?

- Price of contracting with Contra Costa Fire Protection District
- Cultural differences between the three entities
- Concerned that Rodeo-Hercules Fire financial status and would not add any depth to existing services currently provided
- Health insurance and retirement benefits differ between agencies

What are the critical issues that you believe will need to be addressed prior to moving forward?

- Feasibility
- Viability
- Identify improvements
- How functioning as one will benefit the safety of personnel
- Retirement (PERS vs County Retirement)
- The type of method that will bring us together, i.e., consolidation/annexation/merger/administrative 5-year agreement

Who or what groups do you believe would oppose the change?

- Some City Council members
- Public opposition

Is there anything that you would like to add that we have not discussed?

- Battalion 7 service model should have a temporary fix; there are multiple safety issues.
- Bringing these three agencies together.
- Trying to train together.
- Salary differences
- Open to hearing the options; Pinole Fire has a stressed response number, no training, etc.

Surrounding Area Fire Chiefs***What are some areas in which you think the department (Pinole) could make improvements?***

- Pinole Fire is a “taker” due to having one fire station and the need to depend on neighboring agencies.
- Open and staff Station 74.
- Increase staffing levels.
- If Pinole cannot stand alone, opportunities exist operationally when working as the same agency.
- The Battalion 7 agreement is being redesigned; however, it is not as good as being one agency.

What opportunities, in your view, are available to improve the service and capabilities within the region?

- Increase the staffing levels and validate why the levels should be increased; i.e., one or two more firefighters per shift.
- Opportunities exist operationally when working as the same agency.

What in your opinion are the top critical issues you believe Pinole Fire is facing over the next 5 years?

- Aging fleet.
- A station in the wrong location based on the population density at the waterfront.
- The constant struggle with funding.
- Expansion of services.
- Having the capability to sustain what they have developed into the future; Pinole Fire has not been able to re-gain staffing levels prior to the Recession.

What are the critical issues that you believe will need to be addressed in the Battalion 7 area in the next 5 years?

- Personnel safety
- Capacity
- Common communications
- Ensuring that each cooperating partner lives up to what they have agreed to

How would you propose to address the coverage challenges in the area around the closed Station 74?

- It is important to review existing numbers, i.e., requests for services/assistance from surrounding agencies, etc.—if the numbers aren't working today how will they work in the future?
- There exists a concern that if Rodeo-Hercules annexes the Pinole Fire Department's response area, how will Rodeo-Hercules Fire be able to maintain an acceptable level of service and staff Station(s) 73 and 74?

In your opinion does the area in and around Pinole need a staffed truck company to compliment the required effective response force?

- If there is an effective training plan, the will of the Firefighters to train, etc., then staff the truck.
- Most likely would not staff it as the Truck Company response responsibilities are contained within the Battalion 7 Agreement.
- Currently, Rodeo-Hercules' Truck Company is the only Truck Company in the area and; is currently first-out for Rodeo-Hercules Fire.

What other information would you like to add?

- This is the third request for a proposal from the City of Pinole.
- Pinole needs to do something; the current situation is not sustainable.
- The City of Pinole has placed "Fire" in the background.

Section III:

OPTIONS FOR SHARED SERVICES

SHARED SERVICES OPTIONS

The following discussion identifies and explains multiple approaches that may be accessed in the State of California for sharing services or partnering in the delivery of services with neighboring agencies.

It is ESCI's understanding based on data review, on-site interviews, and stakeholder input, that since 1971, discussions, studies and proposals, to annex, merge, and/or contract for services between one or more neighboring agencies, have taken place. To date, none of these options have had the administrative, operational, political, or community support necessary to pursue any of the options. While other fire service delivery models are reviewed in this report, an overview of available delivery systems is included to ensure a basic understanding of available partnering strategies.

To adequately discuss the partnering continuum, the terminology and statutory provisions that are available to decision-makers must be understood. The following partner strategies, while not necessarily described by statute, differentiate between various approaches to partnering:

Status Quo

This option continues the current status of PFD without change. PFD continues to provide services as they are today. There is no change to governance, staffing, or deployment of resources beyond the level of that already in place. The current collaborative practices, through the existing cooperative service arrangements and agreements, would remain in effect.

Advanced Auto Aid Systems

When two or more agencies participate in a full boundary drop approach to dispatching the closest resource first regardless of jurisdiction. This process can be greatly enhanced with the utilization of automatic vehicle location technology.

This approach is already in place between PFD, RHFPD, and CCFPD and is memorialized via the "Battalion 7 Agreement."

Functional Consolidation

When two or more agencies enter a collaborative relationship, typically through a contract for service, no permanent organizational commitment is made, and all decision-making power remains with each organization. Interagency collaboration can take many forms and may include shared administrative and support functions, combined operational practices, the participation of fire agencies in activities such as local fire management bodies (such as fire defense boards), mutual aid agreements, and interagency disaster planning exercises. It can also provide for complete service delivery as an integrated/consolidated fire agency from one local agency to another.

One form of functional consolidation is through Contract for Service or Intergovernmental Agreement (IGA), described in greater detail as follows.

Contract for Service—Intergovernmental Agreement (IGA)³¹

In the State of California, authorization for an intergovernmental agreement (contract for service) for the provision of fire services between agencies as provided for by California Statute and Government Code (CGC) Section 55613-55614, and the California Public Contracting Code (CPCC) Section 20811 are commonly referred to as a "Contract for Service."

The California Government Code and Public Contracting Code is written with the intent of being liberally construed relating to contracting for public safety services by cities and fire districts, and states, in part, that:

CPCC 20811. When a district board determines that it is in the public interest, a district may contract with any other public agency for fire protection services, rescue services, emergency medical services, hazardous material emergency response services, ambulance services, and any other emergency services for the protection of lives and property.

This permissive statute allows for a local agency, which includes cities and districts to enter into a written agreement with any other unit or units of a local agency for the performance of any or all fire services and activities that a party to the agreement, its officers or agencies, have authority to perform. The agreement may provide for the performance of a function or activity:

- (1) By a consolidated and fully integrated department;
- (2) By jointly providing for administrative officers and services;
- (3) By means of facilities or equipment jointly constructed, owned, leased, or operated;
- (4) By services and/or functions provided by one of the parties for any other party;

Collaborative approaches under the CGC can include shared or contracted programmatic services, often referred to as *functional unification* or *functional consolidation*. Approaches may include shared administrative service, training programs, fire prevention outreach, or numerous other functional collaborative strategies. This approach can also include a fully integrated/consolidated fire district with services contracted to another local agency.

California law, regulations, and policy directives declare intergovernmental cooperation as a matter of statewide concern and grants special districts broad power to contract with other governmental entities for any function or activity the agencies have authority to perform.

An example of an IGA is the May 29th Fire Services Contract proposal from Contra Costa Fire Protection District to the City of Pinole (Appendix A).

Operational Consolidation

Operational consolidation occurs when two or more separate departments join operationally or administratively to form one organization. The entities remain largely separate; however, they deliver service as if they were one agency.

³¹ California Government Code and California Public Contracting Code, Sections 55513–55614, 55631, 55632, 20811.

Joint Powers Authority

(CGC Section 6500, et seq.)

Joint powers are exercised when the public officials of two or more agencies agree to create another legal entity or establish a joint approach to work on a common problem, fund a project, or act as a representative body for a specific activity.

Before 2016, LAFCOs did not have authority over contracts between government agencies such as Joint Powers Agreements/Agencies (JPA). However, changes in the law require cities and districts to apply to LAFCO for approval of a JPA in certain circumstances.

Many of the changes in the laws governing LAFCO are in response to confusion among citizens regarding who and how their local government services are provided. Also, constituents are requesting increased transparency in government. LAFCOs are expected to provide resources to sort out government service providers, as well as assist in the coordination and long-range planning of those services. LAFCO's role has expanded from oversight of boundary changes to conducting studies that analyze the efficient and economical provision of local government services.

Legal Unification

The concept of legal unification means combining two or more existing organizations into a single, unified, agency. Doing so includes all aspects of the organization's policies, administration, governance, financing, functions, and operations. Legal integration of fire services in California can be achieved in a number of ways, the most common forms for fire districts are district formation, consolidation, reorganization, annexation, or formation of a Joint Powers Agency. District formation, consolidation, reorganization, and annexation are changes of organization which require approval by LAFCO. In some cases, the formation or expansion of a JPA also requires LAFCO approval.

Section IV: OPTIONS FOR DELIVERY OF FIRE-BASED SERVICES

OPTIONS

Per the Regional Fire Service Delivery Study Scope of Work, ESCI was to research possible options for providing fire protection to the community. The alternatives available to accomplish providing these services were limited due to the lack of availability of agencies with capacity and capability in general proximity to Pinole.

Option A: Rodeo-Hercules Fire Protection District

During preliminary discussions with the City of Pinole and the Chief of the Rodeo-Hercules Fire Protection District (RHFPD), ESCI was led to believe that the District was interested in offering a proposal to provide fire protection services under contract to territory within the City of Pinole or annex the area within the City limits into the District so it would receive services comparable to other territories within the District.

Several weeks into developing the baseline analysis of options, the RHFPD Fire Chief transmitted a note via email that RHFPD would not be interested in submitting proposals until the study is completed. Prior to receiving the communication from RHFPD, ESCI had initiated a preliminary analysis of the District's organizational structure and financial condition based on information available via the internet.

RHFPD is similar in operational make up to PFD with the exception being RHFPD operates two staffed stations versus PFD's one. RHFPD, like PFD, has minimal administrative staff to carry out critical administrative tasks. In the event RHFPD were to submit any proposal to provide service, the proposal should include a provision for opening PFD Station 74 as well as staffing key administrative functions.

Should RHFPD express an interest in annexing the area within the Pinole City Limits, the following will need to be considered:

- Expand the boundaries of the Rodeo-Hercules FPD to include territory within the City of Pinole by submitting an annexation proposal to LAFCO.
- Transfer (or lease) City-owned fire service facilities and equipment (i.e., stations, rolling stock, hoses, ladders, etc.) to the Rodeo-Hercules FPD.
- Have the RHFPD hire City of Pinole employees who provide fire protection and wish to become employees of the RHFPD and devise a process to determine relative employee seniority.
- Determine how to fund the additional service responsibilities incurred by the RHFPD such as reallocate a percentage of the City's property tax allocation to RHFPD effective the year the annexation becomes effective. This percentage amount would be negotiated and approved by the City, the District, and the Board of Supervisors and consider extending an existing Special Tax already imposed by Rodeo-Hercules FPD within its current boundaries to the parcels being annexed. It is assumed this would be a condition of LAFCO's approval of the annexation.

- As a result of these changes, (1) the territory within the City would be within the boundaries and service area of the RHFPD, (2) the City would receive a smaller portion of the 1 percent property tax levied within its boundaries but would have fewer municipal expenses since it would no longer provide fire protection services, and (3) property owners within the City would begin paying the special tax which is already being paid by property owners within the Rodeo-Hercules FPD.
- Any proposal from RHFPD should include a plan to staff Pinole Station 74 and provide the administrative functions currently missing within PFD.

Option B: Contra Costa County Fire Protection District

The City of Pinole requested a proposal from Contra Costa County Fire Protection District (CCFPD) to provide services within the Pinole City Limits.

The proposal received from CCFPD is analyzed below. It must be noted that as stated in the document from CCFPD, this is a proposal, not an offer to provide service, and all terms of the proposal would require negotiation.

CCFPD provides fire and emergency medical services to nearly a million people across its 304-square-mile District area, and through mutual aid, in and around the 19 cities and unincorporated communities of Contra Costa County, California. With few exceptions, county emergency ambulance transport services are provided by CCFPD through its unique sub-contractor Alliance model. In 2018, the District responded to nearly 75,000 fire and EMS emergencies and dispatched some 95,000 ambulances, providing expert medical care on more than 74,000 ambulance transports. The District, with 26 fire stations and more than 400 employees, appears to be well funded, well equipped, and is capable of expanding services to include the City of Pinole.

The terms of the proposal include staffing each station with a crew of three personnel on a 24-hour per day, seven days per week basis, and one Battalion Chief-level position on a 56-hour per shift basis with an annual 5 percent escalation for all labor costs. The proposal includes providing components of administration currently understaffed by PFD, such as training, EMS program oversight, duty chief coverage, IT support, and others. The proposal does not include Fire Prevention/Fire Investigation Services or code enforcement that is not cost neutral. The proposal also does not include annual charges for dispatch services. Should Pinole elect to purchase or retain its own equipment, the District would provide maintenance services on those vehicles at an hourly rate of \$100 per hour. The proposal does not include a cost for mobile or hand-held radio equipment. Should Pinole elect to allow the CCFPD to purchase fire trucks for use in the City, the proposal contains a provision for the City to contribute funds to the District's apparatus replacement fund, based on a 10-year replacement cycle for the apparatus.

The City of Pinole may negotiate a contract with CCFPD that would not include acquiring fire apparatus through the service contract; however, it would still be necessary for the City to acquire apparatus to provide the services contemplated under the contract. Operating costs proposed under the contract are indicated in the following figure. Capital costs included in the proposal from CCFPD are separately indicated below the operating costs. The City is in the process of acquiring a new Type I engine. The engine, while capable of comparably performing all the required tasks, does not meet the current specifications of CCFPD.

Figure 127: Contra Costa Fire Protection District Proposal for Fire Protection Services

Contra Costa Fire Protection District Proposal	Projected				
	Year 1	Year 2	Year 3	Year 4	Year 5
Staffing Costs, Including Benefits, Escalates at 5% per Year					
Station 73	3,274,629	3,438,360	3,610,278	3,790,792	3,980,332
Station 74	3,274,629	3,438,360	3,610,278	3,790,792	3,980,332
Shift Battalion Chief	467,880	491,274	515,838	541,630	568,711

Capital Replacement Reserve	310,000	310,000	310,000	310,000	310,000
Type I Engine Loose Equipment—73	45,000	-	-	-	-
Type I Engine Loose Equipment—74	45,000	-	-	-	-
Type III Engine Loose Equipment—73	25,000	-	-	-	-
Type III Engine Loose Equipment—74	25,000	-	-	-	-
Battalion Chief Loose Equipment	25,000	-	-	-	-
Equipment Replacement Reserve	22,500	22,500	22,500	22,500	22,500
Totals	\$8,499,322	\$8,720,264	\$9,125,504	\$9,551,006	\$9,997,783

The following figure shows the impact on the City of Pinole's projected budgets through the fifth year. This proposal uses the total operating costs from the CCFPD proposal from Figure 127 as the starting point. These costs would include a minimum of three crew members per shift staffing at both stations, the cost of a Battalion Chief's position, and administrative costs of 10 percent of the total salary and benefits costs. The proposal has an automatic five percent annual escalator included for anticipated cost increases. All current costs associated with the fire department are removed, and the contract fire prevention officer costs added back to determine the impact on the City's General Fund Budget for the five years. These calculations freeze the City's General Fund and Measure S contributions at current levels. To re-open Station 74, an apparatus will be required and, to ensure funds are available to purchase replacement apparatus, an apparatus replacement fund is indicated as being created. While the City would no longer pay for current, normal costs for pensions, the City's unfunded actuarial liabilities would not be extinguished, and payments would be required to pay off that liability. The costs associated with accepting the Contra Costa FPD proposal assume that the City of Pinole will, rather than purchase apparatus through the proposal, purchase its own apparatus and create a fleet replacement fund to provide cash to replace the vehicles at the end its useful life. Accordingly, some amount should be considered for annual maintenance costs related to the apparatus. Similar to the projected amounts contained in prior figures, the information contained in the following figures utilizes revised amounts provided represents amounts available on December 15, 2019.

The parcel tax calculations include allocating the costs of this Option first, between the three types of parcels, with 10 percent of the single-family parcels being excluded as occupied by at least one person aged 65 or older, and second, allocating the costs using the total number of parcels, again reduced by 10 percent of the single-family units for the senior's discount. The 10 percent figure is based on information from the 2010 U.S. Census.

**Figure 128: Impact on Future City of Pinole Operating Budgets of
Accepting the Contra Costa FPD Proposal**

Costs	Year				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Contra Costa Proposed Operating Costs (Figure 127)	7,718,852	8,104,794	8,510,034	8,935,536	9,382,313

Costs Allocated	556,184	616,003	679,820	744,765	809,632
Multi-Family Tracts	105	105	105	105	105
Parcel Tax Per Tract	807.47	894.31	986.96	1,081.25	1,175.42
Costs Allocated	84,784	93,903	103,631	113,531	123,419
Single Family Tracts	5,950	5,950	5,950	5,950	5,950
10% Tracts Eligible for Senior Exemptions	(595)	(595)	(595)	(595)	(595)
Net Single-Family Tracts	5,355	5,355	5,355	5,355	5,355
Parcel Tax Per Tract	645.97	715.45	789.57	865.00	940.34
Costs Allocated	3,459,192	3,831,238	4,228,152	4,632,077	5,035,514
Total Costs Allocated	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565
Total Tracts	6,629	6,629	6,629	6,629	6,629
10% Tracts Eligible for Senior Exemptions	(595)	(595)	(595)	(595)	(595)
Net Total Tracts	6,034	6,034	6,034	6,034	6,034
Parcel Tax Per Tract	679.51	752.59	830.56	909.91	989.16
Total Costs Allocated	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565
Escalation		10.76%	10.36%	9.55%	8.71%

The decrease in the annual escalation results from the decrease in the growth rate of the funding for the UAL pension costs.

Option C: Expansion of the Pinole Fire Department System

A third alternative to be considered is the restoration of the service model using the currently closed Station 74 and staffing of key administrative positions. This alternative maintains minimum staffing of three personnel for each of the three shifts at this station and enhances service to the area around Station 74 to include initial attack for fire incidents and the provision of advanced life support (Paramedics). It is contemplated that the officers and engineers for Station 74 will be promoted from the current employees at Station 73 and all new hires will be at the firefighter level and placed under the PEPRAs pension system. Salaries for each of the three positions are projected using Step B from the City of Pinole Salary Ranking schedule dated May 31, 2019. Since May 31, 2019, employees have received a 3 percent cost of living adjustment. Overtime costs are projected to be approximately \$100,000 per year higher than those projected at Station 73 or approximately \$400,000 per year, or \$133,333 per shift. Pension and benefit costs are projected by interpolating costs from the FY 19/20 Budget. Medicare costs are calculated at 1.045 percent of gross salaries. Education and certification pay are calculated at \$50 per month per position. Salary costs are escalated at the previously established 3 percent annually. Benefits other than pension costs increase at a 5 percent annual rate. Pension costs are estimated to remain at 13.1 percent per the CalPERS August 2018 PEPRAs Safety Fire Plan Annual Valuation report as of June 30, 2017, for the new employees.

There will be other miscellaneous but minimal station operating expenses resulting from the occupancy of the station on a full-time basis. There will be additional supplies, including the annual employee clothing allowances and start-up costs for turnout gear for new employees.

Additionally, capital expenditures may include the acquisition of a new Type I engine to be used by the expanded crews at Station 74.

The following figure indicates the costs associated with adding Station 74 back into the deployment model.

Figure 129: Projected Costs to Re-Open Station 74, Years 1–5

Station 74 Staffing Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

Total Costs	\$2,000,327	\$2,006,914	\$2,048,245	\$2,091,089	\$2,135,491

Based on ESCI's review of critical administrative functions, PFD will need additional full-time staffing to manage programs and other administrative tasks. ESCI is recommending the creation of three 40-hour per week positions to assist in managing the organization. The first position would be an Administrative Battalion Chief, responsible for the EMS program, training program oversight, policies and procedures, and provide an additional chief officer for supervision. The second position would be a Training Captain responsible for the training program with oversight from the Administrative Battalion Chief. A third recommended position would be a Fire Prevention Officer responsible for all fire prevention duties, including those carried out by the current contract inspector. The following figure provides an estimated cost for each position and in total.

Figure 130: Projected Costs of Additional Administrative Positions, FY 19/20–FY 23/24

Projected Administrative Position Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

Total Administrative Personnel Costs	\$435,295	\$450,074	\$465,382	\$481,240	\$497,669

The following figure combines the current projections, projected costs associated with re-opening Station 74, and the costs to increase administrative positions for the fire department. This alternative includes setting a fixed amount to be funded from the City's General Fund Budget that is limited to the funding amount in the adopted FY 19/20 budget. The Measure S initiatives from both 2014 and 2006 are frozen in a similar manner. The funds to provide for these costs are proposed to be derived from the implementation of a parcel tax.

Current fire department operating costs, as identified in Figure 27 and the following figure, includes payments under the legacy CalPERS pension system, which is anticipated to increase dramatically over the next several years. Pension costs on salaries included in the proposed Station 74 and Administrative positions are calculated under the less expensive PEPR system.

This option provides for the re-opening of Station 74, with employee costs of three full-time positions per shift; the creation of an Administrative Battalion Chief, a Training Captain position, and a Fire Prevention Officer included in the projections. Included in this option are the addition of the cost of the lease of a Type I engine and the establishment of an apparatus replacement fund to provide for the replacement of fire apparatus in the future. This option is the most flexible alternative as it provides medical response capability with increased fire response capacity.

Figure 131: Projected Fire Department Costs Including Station 74 and Administrative Staffing, FY 20/21–FY 24/25

Projected Fire Department Operating Costs	Projected

Costs Allocated	3,049,026	3,626,986	4,289,383	5,009,091	5,828,136
Escalation		18.96%	18.26%	16.78%	16.35%

Option D: Staffing of Station 74 Service Area Utilizing Two-Person Unit

A fourth alternative to consider is the implementation of a service model using the currently closed Station 74 and utilizing a quick response/attack unit staffed with two qualified personnel. This option enhances service to the area around Station 74 to include limited initial attack for fire incidents and improved provision of advanced life support (Paramedics). Salaries for the two positions are projected using Step B from the City of Pinole Salary Ranking schedule dated May 31, 2019. Pension costs are calculated at the PEPR rate of 13.1 percent, and benefit costs are projected by interpolating costs from the FY 19/20 Budget. Medicare costs are calculated at 1.045 percent of gross salaries. Education and certification pay are calculated at \$50 per month per position. Salary costs are escalated at the previously established 3 percent annually. Benefits other than pension costs increase at a 5 percent annual rate. Pension costs are estimated to remain at 13.1 percent per the CalPERS August 2018 PEPR Safety Fire Plan Annual Valuation report as of June 30, 2017, for the new employees.

This alternative, while not recommended, restores the minimum staffing of two personnel for each of the three shifts at this station. This option will provide an apparatus with medical response capability and minimal fire response capacity. The effect on fire operations would be to allow safer operations for firefighters and the ability to conduct interior operations on structure fires without awaiting the arrival of mutual or automatic aid companies.

Figure 132: Estimated Cost of Reopening and Staffing a Quick Response Pumper at Station 74

Station 74 Staffing Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

Option E: Staffing Station 74 with a Two-Person Unit and Add a Training Captain³²

The following figure includes costs associated with adding a two-person quick response unit noted in Figure 132 and the addition of a recommended Training Captain's position to assist in the continuing training of the Department's firefighters and the administrative tasks of the Department. The addition of the Training Captain position will remove these day-to-day responsibilities from the Fire Chief, allowing him to focus on the more strategic needs of the agency.

Figure 133: Estimated Cost of Reopening and Staffing a Quick Response Pumper at Station 74 and a Training Captain

Station 74 Staffing Costs and Training Captain	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

³² Option is an addition to this Addendum.

Capital Costs to Implement the Expansion of Services

To accomplish the reopening of Station 74 as a firefighting unit with medical first response capabilities and to fill the administrative and prevention positions recommended above, it will be necessary to invest in capital resources. The following figure estimates the amounts necessary to acquire the vehicles identified in the preceding recommendations.

Figure 134: Costs of Capital Resources to Reopen Station 74 and Add Administrative and Prevention Staff

Description	Vehicle Cost	Equipment Cost	Total Cost
Quick attack	\$150,000	\$50,000	\$200,000
Or Type I Engine	\$850,000	\$50,000	\$900,000
Battalion Chief SUV	\$45,000	\$30,000	\$75,000
Training Captain Pickup	\$35,000	\$20,000	\$55,000
Fire Prevention Officer	\$35,000	\$5,000	\$40,000

In comparing the costs between a Type I engine with a crew of three and a Type VI quick attack pumper with a crew of two, several issues need to be considered in the decision. The first issue is the community's expectation regarding the effectiveness of the smaller crew of the Type VI arriving on a medical response and being able to efficiently provide continuous Advanced Life Support (ALS) intervention pending the arrival of an ambulance unit. The second consideration is the effectiveness of the smaller crew and minimum capabilities of a Type VI engine arriving at a structure fire and being expected to safely perform the tasks of the larger crew of the Type I engine. Placing a Type I engine in Station 74 would improve response times to the area served by the station and would increase firefighter safety as well as effectiveness throughout the system. Personnel costs would increase approximately \$400,000 per year to add the third firefighter position per shift at Station 74.

Potential Revenue Source to Provide Funding for Restoration of Services from Station 74

Costs required to improve the performance of the Pinole Fire Department by restoring fire and EMS response services from Station 74 are significant and include operations as well as capital costs. As the City of Pinole continues to experience fiscal issues associated with, among other demands, increased pension funding requirements, an additional source of revenue is necessary to provide funding for the increased costs associated with Station 74.

The State of California allows for community-approved special assessments to provide funding for specific government programs such as fire protection. One such alternative would be that of a parcel tax. As indicated in the projections of Figure 133, the proposed parcel tax has, for your consideration, been calculated with and without an exemption for senior citizens and with being allocated by property type versus a total parcel count.

ESCI evaluated various service fee lists provided by the City of Pinole to determine if any were a suitable model for an allocation schedule that fairly distributes the costs among the types of parcels. ESCI determined that none of the provided fee allocation schedules were appropriate and elected to develop a model based on differences in assumed risk between the three categories; commercial, multi-family residential, and single-family residential. The methodology assumes that single-family residential would be the base risk upon which the other categories would be viewed and would assign it a 1.0 risk factor. Multi-family residential would be assigned a risk factor of 1.25 or 25 percent higher risk than that of a single-family residence; the thought is that the impact to multiple residents is greater due to the proximity of a neighboring residence (two layers of sheetrock versus a required separation between single-family homes). Commercial parcels are assigned a risk factor of 1.5 or 50 percent higher than single-family residential units due to, typically, larger floor space, more flammable contents and the risk extending beyond the typical life hazards found in residential structures to the potential economic impact of the loss of an employer and sales tax generator in the city. This methodology creates a higher parcel assessment for multi-family residential and commercial parcels than single-family residential parcels. The same methodology was utilized to evaluate the various alternatives to provide fire protection services. An additional per parcel calculation is included that spreads the increased costs over the total number of parcels. The above calculations include discounts for senior citizens.

Option F: Develop and Implement a Reserve Firefighter Program³³

Reserve and volunteer firefighter programs are not new in California, and there are several examples of these types of programs.

The first volunteer fire departments consisted of neighbors banding together at the sound of a bell or other alarm signal when a fire occurred. These volunteers would respond from home, with little to no training and little to no protective equipment, and assist in saving as much property as possible. As society and equipment progressed, motorized fire apparatus were developed, and personal protective equipment evolved. The volunteer fire service progressed and emergency notification sirens were added, signaling members to respond to the fire station to obtain the apparatus and respond. This system provided some level of emergency response to fire incidents and due to legacy construction materials and furniture coverings, was moderately successful in saving lives and property. As municipalities formed, career-based service delivery began to replace these volunteer fire companies; however, smaller communities and rural areas typically could not afford to move in that direction. Volunteer participation has dwindled due to increasing time commitments and required training and certification, volunteer systems began to employ part-time firefighters to respond during day-time hours, maintain volunteer systems during evening and weekend hours.

³³ Option is an addition to this Addendum.

As construction techniques and building materials “improved” to allow for greater open spans in residential construction and the legacy cotton and wood furnishings were replaced with synthetic materials and laminates, all created from hydrocarbons, fire dynamics changed dramatically. These new materials burn much faster and give off toxic gases as byproducts. In legacy construction, flashover or the rapid full involvement of a room and contents could take up to 25 minutes to occur, minimizing fire growth and providing for extra time to evacuate a building. In the current environment, flashover is occurring in less than five minutes, reducing the chance of survivability and significantly increasing property damage in an incident.

The City administration, fire department, and the bargaining group would have to determine how volunteers or reserves would serve the organization as an augmentation of the current system, a staffing addition to re-open Station 74, staff a second apparatus during incidents requiring the first-out apparatus, or something in-between.

Volunteer or reserve members—to create or maintain an effective response system—should be expected to work a predetermined number of hours on a weekly or monthly basis, working an assigned shift to develop familiarity with crew members and their methods of operation. To safely and effectively perform the duties of a firefighter requires a commitment to physical fitness and continuous training. It takes a time commitment as well as a commitment to serve.

There will be a cost involved in creating a volunteer or reserve firefighter program. California volunteer or reserve firefighters are required to be certified to the same standards as career firefighters in the State. Volunteer firefighters are also required, under State statutes, to be covered under a workers’ compensation insurance program and are required to be furnished with the personal protective equipment necessary to perform their duties.

To provide an alternative to additional full-time firefighters and achieve operational goals and objectives, it would require 18 volunteer/reserve firefighters; nine assigned to daytime 12-hour shifts and nine to nighttime 12-hour shifts. Three each of the daytime and three each of the nighttime volunteers would be assigned to one of the current platoons. This would allow one full-time firefighter/paramedic to be assigned to Station 74 with one volunteer/reserve firefighter/EMT for each of the 12-hour shifts. The remaining two volunteer/reserve firefighters would remain at Station 73 to become the firefighters assigned to the engine, increasing the crew on the first out engine to four personnel.

Figure 135: Projected Cost of Implementing a Volunteer/Reserve Firefighter Program

Volunteer/Reserve Firefighter Program Components	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

Total Non-recurring Costs	54,000	–	–	–	–
Total Costs	102,100	48,460	48,827	49,202	49,584

Option G: Contract with Contra Costa Fire Protection District to Station a Single Role Advanced Life Support Ambulance within Pinole³⁴

Per the direction of the City Council, the City of Pinole requested and received a proposal from Contra Costa County Fire Protection District (CCFPD) to station a single role Advanced Life Support ambulance within the Pinole city limits (Appendix B). The proposal received from CCFPD is analyzed below. Note that, as stated in the document from CCFPD, this is a proposal, not an offer to provide service, and all terms of the proposal would require negotiation.

The terms of the proposal include staffing Station 74 with an ambulance contracted through CCFPD. The proposal provides an ambulance on a 24/7 basis, staffed with one paramedic and one EMT. The supervision, training, and administrative costs are included in the \$1,445,400 annual payment. There is no stated escalation clause, but the pricing is subject to change based on "increased costs of providing ambulance services, increased equipment and apparatus costs, or other unanticipated cost issues not contemplated." For this projection, ESCI has estimated a five percent annual escalation in the operating costs of the ambulance unit. The proposal requires the acquisition of an ambulance unit and related equipment, totaling \$170,000 first-year cost.

10% Tracts Eligible for Senior Exemptions	(595)	(595)	(595)	(595)	(595)
Net Total Tracts	6,034	6,034	6,034	6,034	6,034
Parcel Tax Per Tract	441.51	473.34	578.47	692.60	822.08
Total Costs Allocated	2,664,099	3,137,742	3,834,692	4,591,233	5,449,538
Escalation		7.21%	22.21%	19.73%	18.69%

In comparing the costs between a Type I engine with a crew of three, a Type VI quick attack pumper with a crew of two, and a contract ambulance, several issues need to be considered in the decision. The first issue is the expectation of the community as to the effectiveness of the smaller crew of the Type VI arriving on a medical incident and providing continuous advanced life support intervention until the arrival of an ambulance. The second consideration is the smaller crew on a Type VI engine arriving at a structure fire and being expected to safely perform the tasks of the larger crew of the Type I engine. Placing a Type I engine in Station 74 would improve response times to the area served by the station and would increase firefighter safety as well as effectiveness throughout the system. Personnel costs would increase approximately \$400,000 per year to add the third firefighter position per shift at Station 74. The contract ambulance would improve medical response times but would have no positive impact of any type on fire response. **Costs to utilize the contract ambulance from Contra Costa Fire Protection District are approximately \$800,000 per year above the costs of staffing a two-person quick attack pumper that would be equipped with medical response equipment.**

The following figure compares the “gross” costs of all the options. As anticipated, the proposals from the CCFPD are the most expensive and would require the most contribution of additional Pinole tax dollars to implement.

Figure 137: Comparison of Gross Costs of All Options

	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25
Option A: Rodeo-Hercules FPD	No proposal				
Option B: Contra Costa FPD (Figure 128)	\$8,599,383	\$9,040,367	\$9,510,826	\$9,989,597	\$10,467,788
Option C: Expansion of PFD (Figure 131)	\$7,548,248	\$8,126,208	\$8,788,605	\$9,508,313	\$10,327,358
Option D: Two Person Type VI (Figure 132)	\$6,320,333	\$6,869,441	\$7,501,954	\$8,190,694	\$8,977,659
Option E: Type VI & Training Capt. (Figure 133)	\$6,448,660	\$7,002,186	\$7,639,279	\$8,332,765	\$9,124,650
Option F: Volunteer/Reserves (Figure 135)	\$102,100	\$48,460	\$48,827	\$49,202	\$49,584
Option G: Contra Costa Ambulance (Figure 136)	\$7,163,321	\$7,636,964	\$8,333,914	\$9,090,455	\$9,948,760
Status Quo: Operations Continue at The Current Level (Figure 27)	\$4,188,930	\$5,488,293	\$5,272,626	\$5,829,219	\$6,434,978

Section V:

CONCLUSIONS & RECOMMENDATIONS

KEY FINDINGS

This section of the report contains findings as well as recommendations that have been noted and or developed during the course of this study. The following lists ESCI's key findings:

- Due to the lack of sufficient command and administrative staff, the department struggles to maintain compliance with performance goals, industry standards, and workload.
- Data collection and records management analysis was challenging due to inconsistencies.
- The department needs additional staffing to fulfill all fire prevention related functions satisfactorily.
- PFD does not have a designated individual committed to the training function for the department. The responsibility for conducting all needs assessments relative to training, as well as program design, coordination, and records keeping.
- The department does not have adequate training props, although funding has been included in the FY 19/20 budget to purchase some.
- The minimum staffing level for PFD does not provide for the two-in/two-out structure firefighting per OSHA mandates.³⁵
- PFD is fully dependent on automatic and mutual aid for any call requiring more than one unit.
- In the event of concurrent incidents requiring more than the one staffed Pinole Engine, service to the residents of Pinole for the additional incidents must be provided by other agencies.
- In 2018, none of the reported fire incidents achieved the stated performance objective of 21 firefighters on-scene, nor did the travel time for all apparatus on-scene approach 8 minutes.
- Projected General Fund revenues are not sufficient to provide for Fire Department General Fund expenditures on an annual basis and will require a continued drawdown of General Fund reserve balances.
- Station 73's crew quarters need remodeling and updating, which may include ADA accommodation.
- PFD apparatus specifications have not been standardized with the Battalion 7 apparatus.
- Absent automatic and mutual aid from surrounding agencies, standalone PFD is not capable of handling an incident, such as a trash fire, car fire, or medical incident requiring more than one apparatus, much less a more complex incident.
- At 110 calls per 1,000 population, PFD has a higher median number of calls per 1,000 population than the region but slightly lower than the urban high range.
- Much of the developed residential area in the eastern part of the city is beyond 1.5 miles of Station 73.
- Due to Station 74 being closed, a portion of the developed residential area in the southeast part of the city is beyond the 4-minute travel time footprint.

³⁵ Section (g)(4) of OSHA's Respiratory Protection Standard, 29 CFR 1910.134.

- Funding does not appear to be available to cash purchase the required Type I apparatus for Station 74, should that station be reopened.
- The contact proposal from Contra Costa Fire Protection District would result in increased services and depth of support; however, the proposed contract costs exceed the costs of providing those services if the City were to remain a standalone department, open Station 74, and add staff as recommended in Option C.

Short-Term Recommendations

Recommendation A: Adopt Response Performance Goals that are Achievable

A community's desired level of service is a uniquely individual decision. No two communities are exactly alike. Performance goals must be tailored to match community expectations, community conditions, and the ability to pay for the resources necessary to attain the desired level of service.

Levels of service and resource allocation decisions are the responsibility of the community's elected officials, in this case, the Pinole City Council. The policymaking body must carefully balance the needs and expectations of its citizenry when deciding how to allocate money to all the services it provides.

ESCI recommends the following as PFD fire and life safety response performance goals. Formal adoption of goals allows PFD management to report progress on the achievement of these goals, conditions that are impeding progress, and resources needed to improve service regularly.

Call-Processing Performance Goal

The first phase of overall response time is call processing time. This phase begins when the call is received at the PSAP center and ends when response resources are notified of an emergency. There are two components: answer time and dispatch time.

Recommended Call-Processing Goal:

- 911 calls will be answered at the primary PSAP within 15 seconds, 95 percent of the time.
- Response resources shall be notified of a priority incident within 64 seconds from receipt of the call at the dispatch center, 90 percent of the time.

Turnout Time Performance Goal

Turnout time is one area over which the fire department has total control and is not affected by outside influences. Turnout time, or the time between when the call is received by the response units (dispatched) and when the unit is en route to the incident location (responding), affects overall response times. Reducing this time component reduces total response time.

NFPA 1710 recommends turnout time performance of 80 seconds or less for fire and special operations responses, and 60 seconds or less for all other priority responses.

Recommended Turnout Goal:

- Response personnel shall initiate the response of a unit capable of mitigating an incident to a priority fire and special operations incident 80 seconds from notification, 90 percent of the time.
- Response personnel shall initiate a response to all other priority incidents within 60 seconds from notification, 90 percent of the time.

Response Time for the First-Due Unit Goal

The time required to deliver the first response unit capable of intervening in the emergency includes both turnout time and travel time but not call processing time. Based on current performance and implementation of operational improvements, the following are recommended.

Recommended First-Due Response Time Goal:

- The first response unit capable of initiating effective incident intervention shall arrive at a priority fire or special operations incident within 5 minutes, 20 seconds from notification of response personnel, 90 percent of the time.
- The first response unit capable of initiating effective incident intervention shall arrive at all other priority incidents within 5 minutes from notification of response personnel, 90 percent of the time.

Effective Response Force Performance Goal

A fire department's resource *concentration* is the spacing of multiple resources close enough together so that an initial "Effective Response Force" (ERF) for a given risk can be assembled on the scene of an emergency within the specific time frame identified in the community's performance goals for that risk type. An initial effective response force is defined as that which will be most likely to stop the escalation of the emergency.

The minimum ERF for a low-rise structure fire is identified as the arrival of at least four fire engines, one ladder truck, and one Battalion Chief (17 personnel total). This initial ERF does not necessarily represent the entire alarm assignment, as additional units may be assigned based on long-term incident needs and risks. Additional engines, ladders, or other specialty companies are assigned to higher risk responses to accomplish additional critical tasks that are necessary beyond the initial attack and containment.

Recommended Effective Response Force Goal:

- The full effective response force shall arrive at a moderate risk structure fire within 9 minutes, 20 seconds of notification of response personnel, 90 percent of the time.

Estimated Cost: None

Recommendation B: The City should consider moving forward with the necessary steps to improve service via reopening Station 74, and staffing and administrative support, as funding becomes available.

Based on ESCI's review of all options and associated costs to implement, the recommendation is for the City to consider moving forward with Option C: Expansion of Pinole Fire Department System as discussed and portrayed in Figure 129, Figure 130, and Figure 131 and summarized in the following.

To create a safer environment for the firefighters and citizens and provide an appropriate administrative workforce, the restoration of the service model using the currently closed Station 74 and staffing of key administrative positions is essential.

Moving forward with this option will restore all-risk services to the area around the currently closed Station 74, increase the safety of the firefighters by allowing for compliance with the OSHA two-in/two-out rule for structure fires, provide for enhanced Advanced Life Support (Paramedic) response to requests for emergency medical services, make available a second unit in the city for concurrent incidents, and provide staffing of key administrative positions.

Consider a lease-purchase of the new apparatus for Station 74, which will minimize the fluctuations in the amounts of the parcel tax assessments.

Recommendation B-1: As a temporary measure until sufficient funding is developed to implement Recommendation B, to improve cost-effective response performance to both medical as well as fire and other emergency incidents, the City should consider acquiring and staffing a two-person, advanced life support equipped, quick response apparatus (Type VI) appropriately. Included in this recommendation is the hiring of an Administrative Captain to manage, among other administrative tasks, a continuing education program for fire and medical personnel.

This recommendation would allow for the re-opening of Station 74 and provide for a more rapid response to current and anticipated increases in medical incidents. The unit would have minimal first-due firefighting capability but could implement exterior attacks on expanding fire incidents. Firefighters from this unit could not perform interior structural firefighting operations until the arrival of the next fire apparatus. This recommendation could provide a temporary solution to providing cost-effective service to the underserved portion of Pinole until additional funding became available. This proposal would assist the Fire Chief in the completion of administrative tasks related to training and other tasks.

Recommendation C: Consider initiating the process of securing additional funding.

ESCI recommends that the City consider moving forward with the process of pursuing an additional funding source such as a parcel tax as shown in Figure 131 and restated below:

Figure 138: Projected Fire Department Costs Including Station 74 and Administrative Staffing, FY 20/21–FY 24/25

Projected Fire Department Operating Costs	Projected				
	FY 20/21	FY 21/22	FY 22/23	FY 23/24	FY 24/25

Total Allocation	57,645	68,572	81,095	94,702	110,187
Single-Family Parcels	5,950	5,950	5,950	5,950	5,950
Per Parcel	439.20	522.45	617.87	721.54	839.52
Total Allocation	2,613,231	3,108,584	3,676,305	4,293,146	4,995,125
Total Costs Allocated	3,049,026	3,626,986	4,289,383	5,009,091	5,828,136
All Tracts w/o Regard to Classification	6,629	6,629	6,629	6,629	6,629
Parcel Tax Per Tract	459.95	547.14	647.06	755.63	879.19
Percentage Increase in Parcel Tax, Annual		18.96%	18.26%	16.78%	16.35%

ESCI, in conjunction with the recommendation to adopt a parcel tax, recommends that the City consider the use of a lease/purchase facility to acquire the Type I engine required in Recommendation A.

Regardless of the option chosen, additional funding must be developed to fill the gap between existing financing of the current fire service deployment model and the proposed expanded deployment model. Available options for California jurisdictions include special sales tax assessments and parcel tax assessments. ESCI recommends that consideration be given that the selected alternative be restricted to funding only costs associated with funding the expanded deployment model.

Recommendation D: Standardize apparatus specifications.

Consideration should be given to the standardization of apparatus specifications throughout Battalion 7. Standardization of specifications will enhance operational efficiency and could result in cost savings via group purchasing.

Recommendation E: Review all current fire department alarm assignments.

Consideration should be given to reviewing the department's alarm assignments and determine the number of resources required for an effective response force based on risk.

Recommendation F: Improve the collection and analysis of incident data.

Much can be revealed by collecting and evaluating incident data accurately and regularly. Challenges to quick response can be identified and solutions proposed. Trends can be discovered, allowing the fire department to prepare for changes and or increases in response workload. Frequent incident types can be identified, and steps can be taken to reduce their occurrences, such as public safety education or building engineering.

Mid- to Long-Term Recommendations**Recommendation G: Initiate recruitment of additional staff.**

As soon as funding is available, ESCI recommends that the City recruit the positions identified in Option C: "Expansion of Pinole Fire Department System." This would include:

- 3 Captains
- 3 Fire Apparatus Operators
- 3 Firefighters
- 1 Administrative Battalion Chief
- 1 Training Captain
- 1 Fire Prevention Officer

Recommendation H: Remodel Station 73

Fire Station 73's crew quarters require remodeling to accommodate the relocation of the shared shift Battalion Chief and additional administrative staff.

Recommendation G: Capital Equipment and Facilities Fund

Establish a capital equipment and facilities replacement fund. A portion of the proposed parcel tax could be used to fund this recommendation.

IMPLEMENTATION PLAN

This section cannot be completed until the City Council determines which, if any, of the options they wish to pursue.

Section VI: APPENDICES

APPENDIX A: PROPOSAL FROM CONTRA COSTA COUNTY FPD

CONTRA COSTA COUNTY FIRE PROTECTION DISTRICT

May 29, 2019

Michelle Fitzer, City Manager
City of Pinole
2131 Pear Street
Pinole, CA 94564

Dear City Manager Fitzer,

Please see the attached proposal to provide fire, emergency medical, rescue, administration, and fire prevention services to the City of Pinole. This proposal is a best effort at identifying the Fire District's costs for such services prior to any meaningful discussions with your consultant or representative from the city. As such the figures are estimates and subject to change based on further discussions or additional information that would be relevant to our ability to provide certain services to the city.

I look forward to meeting with ESCI this week for a more detailed discussion.

Please let me know if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Lewis T. Broschard III".

Lewis T. Broschard III
Fire Chief

CC: File

4005 Port Chicago Highway, Suite 250 • Concord, CA 94520-1180
Telephone: (925) 941-3300 • Fax: (925) 941-3309 • www.cccfpd.org

CONTRA COSTA COUNTY FIRE PROTECTION DISTRICT

Fire Services Contract Proposal for the City of Pinole (5-30-19)

Fire/EMS/Rescue Services

The District will provide staffing of three (3) full-time positions at Fire Station 73 and Fire Station 74. At least one position at each station on each shift will be a paramedic. All other positions will be an EMT. Each station will be staffed by one (1) Fire Captain, one (1) Engineer, and one (1) Firefighter or Firefighter-Paramedic. The District reserves the right to use qualified acting positions when necessary.

ANNUAL COSTS

Fire Station 73 (crew of three)	\$3,274,629
Fire Station 74 (crew of three)	\$3,274,629
One (1) 56-hour Battalion Chief	\$ 467,880
Subtotal	\$7,017,138
Administrative Overhead (10%)	\$ 701,713
Total	\$7,718,851*

These rates include all components of administration, annual/ongoing training, EMS certifications, medical direction, administration, duty chief coverage, access to specialized/technical services and resources, ePCR program administration, personal protective equipment replacement for all personnel, IT support, and PIO coverage.

These rates do not include CCRFCC annual charges for dispatch and communications center support.

*These rates shall be increased at 5% per year to account for labor cost increases and other benefit cost escalation factors.

Fire Prevention/Fire Investigation Services

Traditional code enforcement and new construction plan review and inspections are generally cost neutral. Additional data and information is needed from the City in order to provide a specific cost estimate and quote for these services. Weed abatement and exterior hazard control services, specifically, would not be cost neutral and detailed discussion is needed to understand the needs of the city for this program. Additional data and discussion is needed to understand the needs of the city for fire investigation services and what, if any, additional costs would be to provide these services.

Apparatus Maintenance

Apparatus maintenance for all non-District owned apparatus will be provided at the hourly shop rate plus parts/equipment. The current shop rate is \$100/hour.

Apparatus

The information provided below assumes the following: (1) all prices are based on 2018 costs, (2) annual price inflation of 3%, (3) apparatus is purchased new at time of contract commencement, (4) all

4005 Port Chicago Highway, Suite 250 • Concord, CA 94520-1180
Telephone: (925) 941-3300 • Fax: (925) 941-3309 • www.cccfpd.org

fire engines are replaced at 10 year intervals consistent with CCCFPD standards, (5) CCCFPD provides spare engines as needed.

Pierce Velocity Type I Engine x2 (CCCFPD Spec)	\$800,000 (including tax)
Type III Engine x2 (Cal Fire Spec)	\$355,000 (including tax)
Battalion Chief Vehicle	\$725 (monthly lease)
Annual replacement allocation	\$310,000

Equipment for Fire Apparatus

Generally, equipment is purchased new with each fire apparatus purchase and replaced throughout its lifetime as needed. The information below represents estimates for total cost of outfitting each apparatus with our standardized inventory.

Type I Engine Loose Equipment (x2)	\$45,000
Type III Engine Loose Equipment (x2)	\$25,000
Battalion Chief Vehicle Upfitting (x1)	\$25,000
Annual replacement allocation	\$22,500

Mobile and Portable Radios

Additional data is needed to understand current radio inventory and future replacement needs. Current costs of EBRCS compliant portable radios is approximately \$8,000 each and mobile radios can be as much as \$10,000 each. Expected service life is approximately 10 years. Replacement costs for these items is not currently included in our proposal.

TOTAL ANNUAL COSTS

Fire Station Staffing	\$ 6,549,258
Battalion Chief	\$ 467,880
Administrative Overhead	\$ 701,713
Apparatus Replacement Allocation	\$ 310,000
Equipment Replacement Allocation	\$ 22,500
Fire Prevention/Investigation Services	\$ TBD
Radio/Communication Equipment	\$ TBD
Total	\$ 8,051,351

This proposal is not binding or final. The District reserves the right to modify or amend this proposal based on additional information received, revised cost estimates, or any other materially significant information that has not been accounted for or was otherwise omitted in creating this initial proposal.

APPENDIX B: AMBULANCE PROPOSAL FROM CCCFPD

CONTRA COSTA COUNTY FIRE PROTECTION DISTRICT

12/3/2019

Cost Proposal for Exclusive Pinole Ambulance

AMBULANCE OPERATING COSTS

\$1,445,400 annually (\$120,450 monthly)

Ambulance to be staffed 24/7 and shall include one (1) paramedic and one (1) EMT per twelve-hour shift. Supervision, training, and administrative overhead costs are included in the rate above.

Fuel, recurring maintenance, ambulance replacement, and spare equipment capacity are included in this cost.

AMBULANCE APPARATUS AND EQUIPMENT

As the ambulance will be dedicated to City and not considered shared resource within the CON Fire-EMS system, City shall provide initial funding for one (1) ambulance and all associated capital equipment (mobile radio, portable radios, gurney, monitor/AED, etc.) that comply/match the existing CON Fire-EMS apparatus and equipment.

Ambulance costs and equipment cost estimates are below:

Ambulance	\$125,000
Gurney	\$11,000
Monitor/AED	\$16,000
Mobile Radio	\$10,000
Portable Radio	\$8,000

THESE COSTS ARE ESTIMATES ONLY

This proposal is preliminary and shall not be considered binding. It is subject to change based on increased costs of providing ambulance services, increased equipment and apparatus costs, or other unanticipated cost issues not contemplated as of the date of this proposal.

This proposal should not be considered as a means to increase firefighting or rescue capacity within the Battalion 7 response area.

City of Pinole Fire Department

Regional Fire Service Delivery Study Addendum

March 2, 2021

- April 17,2019 contract to conduct a Regional Fire Service Study on behalf of the City of Pinole Signed.
- October 8, 2019 Results of the original Scope of Work presented to the Pinole City Council.
- November 6th 2019 addendum to the original contract signed to add additional analysis as requested by the City Council.
- Final Document with addendum items submitted March 2020.

Study Options Per The Original RFP

The City of Pinole has a specific interest in studying the following options:

1. Stay as we currently operate (independent department) with one fire station and one engine company.
2. Open the currently closed station (74) to provided additional services within the area (remain independent) for a total of two engine companies.
3. Based on data review, determine if a medical response unit is needed in lieu of an engine company.

4. Identify what Pinole Fire Department would need to function at an optimal service delivery model (all aspects, including responding to calls for service, Fire Prevention, Community Programs, etc).
5. Determine the feasibility of consolidation or a contract for services with Rodeo/ Hercules Fire Protection District.
6. Determine the feasibility of contract for service with Contra Costa County Fire Protection District.
7. Look into other alternative staffing models.

Study Options Added Per The City Council

[Return to Agenda](#)

Following ESCI's Presentation of the completed Regional Fire Service Delivery Study on October 8 2019, the City Council requested additional analysis/update in the following areas:

1. Updated financial calculations using budget to actuals
2. Development of additional parcel tax options
3. Development of a reserve firefighter program
4. Placing a single role advanced life support ambulance in the City in Lieu of an additional all risk fire department response unit.

▪

ESCI Offers the Following Options with updates for Consideration

Updated City of Pinole Five Year Projections (Report Figure 24)

[Return to Agenda](#)

City of Pinole financial staff provided ESCI with updated budget figures that have been used to provide the following projections.

Rodeo-Hercules Fire Protection District has recently entered into a study for the purpose of annexing into the Contra Costa County Fire Protection District.

As a result, this is no longer an option

Option B: Contra Costa County Fire Protection District

[Return to Agenda](#)

The City of Pinole requested a proposal from Contra Costa County Fire Protection District (CCCFPD) to provide services within the Pinole City Limits. The terms of the proposal include staffing each station with a crew of three personnel on a 24-hour per day, seven days per week basis, and one Battalion Chief-level position on a 56-hour per shift basis with a 10 percent administrative fee and a 5 percent annual escalation for all labor costs. It also includes administrative positions currently lacking in PFD.

The county proposal assumes the current general fund contribution to the PFD will remain constant at \$3,395,335 and the Measure S funding will remain constant at \$1,103,888 throughout the five-year projection period. Additional funds will be required to fulfill the financial requirement of the proposed contract. The revised Option B corrects the single-family parcel calculation by 10% of the 5,950 estimated to be owned by Seniors.

This Option is shown as Figure 128 in the Report.

Option B: Contra Costa County Fire Protection District (Cont.)

Parcel tax per tract	679.51	752.59	830.56	909.91	989.16
Total costs allocated	4,100,160	4,541,144	5,011,603	5,490,374	5,968,565
Escalation		10.76%	10.36%	9.55%	8.71%

Based on the information provided, the county proposal provides a level and depth of service that cannot be matched by any of options studied.

A third alternative to be considered is the restoration of the service model using the currently closed Station 74 and staffing of key administrative positions. This alternative maintains a minimum staffing of three personnel for each of the three shifts at this station. This combines Figure 130 and Figure 131 from the report. The costs of this proposed expansion requires additional funding which may be generated by a parcel tax, but similarly freezes current funding levels and Measure S allocations. The revised Option C corrects the tract count and includes a 10% reduction in single-family units to consider the number of tracts owned by senior citizens.

Option C: Expansion of Pinole Fire Department (Cont.)

[Return to Agenda](#)

Based on ESCI's review of critical administrative functions, PFD will need additional full-time staffing to manage programs and other administrative tasks. ESCI is recommending the creation of three 40-hour per week positions to assist in managing the organization, each position and in total.

A reserve program to augment the career firefighters providing service to the community would, based on the ESCI projections, require 18 personnel. There would be costs associated with a reserve program including Workmen's' Compensation Insurance, Training and Certification costs, Stipends and Turnout Gear.

The following schedule is shown in Report Figure 135.

Option E: Develop a Reserve Firefighter Program

Per the direction of the City Council, the City of Pinole requested and received a proposal from Contra Costa County Fire Protection District (CCFPD) to station a single role Advanced Life Support ambulance within the Pinole city limits (Appendix B). An escalation factor of 5% per year is applied to the operating costs. The proposal received from CCFPD is analyzed below. Note that, as stated in the document from CCFPD, this is a proposal, not an offer to provide service, and all terms of the proposal would require negotiation.

Status Quo for the Pinole Fire Department

The following schedule presents projected costs to maintain the existing service levels for the Pinole Fire Department. In this scenario, Measure S Initiative revenues continue to increase to minimize the burden to the General Fund. A parcel tax is calculated on the revised number of parcels and considering a 10% reduction in single-family parcels for senior ownership.

Recommendation B-1: Recommendation B1 is a temporary option, to improve effective response performance to both medical as well as fire and other emergency incidents, the City should consider acquiring and staffing a two-person, advanced life support equipped, quick response apparatus (Type VI) appropriately. Included in this recommendation is the hiring of an Administrative Captain to manage, among other administrative tasks, a continuing education program for fire and medical personnel.

1. EXECUTIVE SUMMARY

This Second Round Municipal Service Review (MSR) update of emergency medical services (EMS) and fire services in Contra Costa County provides: (1) selected data updates for the 11 EMS/fire service providers (three cities: El Cerrito, Richmond and Pinole) and eight special districts (Contra Costa County FPD, County Service Area (CSA) EM-1, East Contra Costa FPD, Kensington FPD, Moraga-Orinda FPD, Crockett-Carquinez FPD, Rodeo-Hercules FPD and San Ramon Valley FPD), (2) review of automatic and mutual aid agreements, and (3) focus on East Contra Costa Fire Protection District (ECCFPD) and Rodeo Hercules Fire Protection District (RHFPD), and the relationship of those focus agencies with Contra Costa County Fire Protection District (ConFire). The MSR update also provides a basis for consideration of agency Sphere of Influence (SOI) updates to be made by the Contra Costa Local Agency Formation Commission (LAFCO). **Figure 1**, below, depicts fire protection districts in Contra Costa County.

The 2009 MSR identified a number of significant issues affecting the provision of fire and EMS services. Although progress and action by public agencies has begun to address these issues, continued cost growth and constrained resources have worsened many of these problems, particularly for ECCFPD and RHFPD, which face significant financial and service deficiencies. The current status of MSR issues is summarized below.

Financing

For the most part, Contra Costa County fire service providers have the financial ability to deliver appropriate service levels, with the exception of ECCFPD and RHFPD.

Since the 2009 MSR and the recession, financial conditions at ConFire have stabilized and begun to improve, and other agencies continue to have the financial ability to provide adequate service levels, with the exception of the ECCFPD and RHFPD. Of all Contra Costa fire agencies, these two agencies receive the smallest share of the 1% property tax rate. Except in the event of a district dissolution or other boundary reorganization involving a transfer of service responsibilities, shifting of property taxes to a fire service agency from another existing taxing entity will face significant hurdles.

Figure 1
Fire Protection Districts in Contra Costa County

The lack of requirements for special taxes from new development increases the burden on fire agencies to obtain a two-thirds special tax voter approval once an area is populated. In addition to the difficulty of obtaining 2/3's voter approval of special taxes, fire districts also face limited sources of revenue, including inability to charge for most services, low property tax shares as many agencies evolved from volunteer agencies, high insurance costs due to the risky nature of the profession, and significant pension liabilities from past underfunding.

Notwithstanding the continuing financial problems of the ECCFPD and RHFPD as summarized below, certain actions since the 2009 MSR have begun to address financial issues. For example, the new partnerships among the County, ConFire and AMR for ambulance services. Also, pension reform allows for a new, reduced tier of pension benefits for new hires. CalPERS and the Contra Costa County Employees' Retirement Association (CCCERA) have taken steps to reduce unfunded liabilities by accelerating amortization periods for funding liabilities. However, in some cases these actions result in higher annual payments for agencies, worsening financial conditions for all agencies, including ECCFPD and RHFPD.¹ Significant pension and Other Post-Employment Benefits (OPEB) liabilities, and related costs,

¹ In addition to its recent reduction in anticipated investment returns, CCCERA is considering additional changes that will further affect pension costs; these changes may become known by CCCERA's August 10, 2016 meeting, although additional time may be required to fully assess the impacts on fire agencies.

burden all fire service agencies, and are particularly acute for agencies with insufficient resources, including RHFPD and ECCFPD as discussed below.

ECCFPD serves most of the far eastern portion of Contra Costa County, beyond Pittsburg and Antioch, with a service area of 249 square miles, the second largest service area in the County. The District continues to suffer from inadequate financial resources, and was forced to close five fire stations since 2009. ECCFPD is heavily dependent on property tax, which is significantly lower than most other fire districts in the County; has been unsuccessful in passing special taxes due to lack of voter support; and carries significant pension and OPEB liabilities. A recently formed Task Force comprised of County, Brentwood and Oakley representatives has provided ECCFPD interim financing to re-open one station, and is investigating longer-term solutions in partnership with affected agencies. ECCFPD continues to look for financial enhancements and governance options, through a Standards of Cover (SOC) Study, pursuit of independence through a directly elected board, and an ongoing quest for new funding sources.

RHFPD serves the City of Hercules and unincorporated Rodeo, a portion of which is a Disadvantaged Unincorporated Community (DUC). RHFPD relies on property tax for a majority of its revenue, and receives the lowest allocation of property tax of all fire districts in the County. Other fiscal constraints include reduced property tax in the City of Hercules due to extensive redevelopment (RHFPD lost 29 percent to redevelopment in Fiscal Year 2015-16); limited property tax from the Phillips refinery property;² significant pension and OPEB liabilities; and a recent court decision that terminated the District's 2014 benefit assessment at the end of FY 2016-17. At issue in the lawsuit was the constitutionality of a special assessment levied upon parcels to fund general fire department services. In an effort to maintain current service levels, RHFPD will continue to pursue new revenue sources including tax measures, grant and bond opportunities; additional Measure H funding (a Countywide assessment to improve EMS); and possible Proposition 172 funds through the County. Without additional revenues, the RHFPD faces the potential closure of one of its two stations following the elimination of its benefit assessment at the end of FY 2016-17, and expiration of its Federal SAFER³ grant.

² When Phillips was annexed to RHFPD in 1996, the tax sharing agreement only allocated a share of future incremental tax growth to the District at a rate lower than nearby areas; the District did not receive any of the base taxes paid by the refinery prior to annexation, therefore the District does not receive its typical share of full value, just the growth since 1996.

³ "SAFER" is an acronym for "Staffing for Adequate Fire Emergency Response."

Growth and Service Demand

Continued population growth, job creation, and changes in health care services affect the volume and location of service calls, creating needs for new facilities and staff resources in order to sustain services.

The recession, which began in December 2007 and extended for at least 18 months, created a pause in real estate development. However, with recovery in real estate markets, development planning and construction has resumed. The ability to restore services to pre-recession levels and fund increased services required by new development are especially challenging financially for the RHFPD and ECCFPD, which are the primary focus of this MSR. New development creates increased service responsibilities and costs to all fire service agencies, but does not provide sufficient revenues for adequate levels of increased service, particularly to RHFPD and ECCFPD. ConFire, as well as other agencies, was forced to make difficult choices – overall, the number of its fire apparatus was reduced by as much as 30%, although ConFire has begun to reestablish services with improved funding availability.

This update to the 2009 MSR proposes options for addressing the fiscal sustainability of the two focus districts.

Service Levels

Many Contra Costa fire agencies are unable to meet “Best Practices” for response times and staffing.

The 2009 MSR indicated that fire agencies were unable to meet national and state guidelines for fire response times 90% of the time. This finding has not changed, and in fact, response times have worsened for the RHFPD and the ECCFPD due to financial problems, station closures, and staff reductions.

Typical fire service provider services are based on two fundamentally different activities: fire suppression and emergency medical response. Each of these activities requires distinct training and equipment in order to be performed adequately. Depending on the nature of the incident, emergency medical response can often be provided adequately by two fully trained personnel equipped with specialized support equipment.⁴ Fire suppression service requires a much more complex and coordinated personnel- and equipment-intensive response. While additional or improved ambulance service can augment or supplant medical emergency services provided by fire service agencies, that is not the case for fire

⁴ A first responding fire company can generally be successful providing EMT or basic life support, with a paramedic staffed ambulance following, as is the case in Richmond and ECCFPD.

suppression activities. Those activities remain dependent on adequate personnel and equipment responding within reasonable timeframes to be effective.

This point is particularly applicable to the ECCFPD and the RHFPD due to their current and possible future lack of personnel and equipment resources. As outlined below, the impact of RHFPD returning to a one-station configuration will have significant impacts on its services, particularly fire suppression activities. Any working fire in the RHFPD will require cooperative service from adjacent districts to perform fundamental fire suppression activities to achieve minimum levels of effectiveness. Travel times from adjacent jurisdictions will compound the difficulties in conducting effective fire suppression activities, given the lack of in-district personnel and equipment. Inadequate service levels will result in increased fire damage, potential failure of fire rescue activities, and injuries to fire personnel.

The current three-station configuration of ECCFPD clearly demonstrates the impacts of inadequate staffing and personnel to provide adequate fire suppression services. Longer response times for fire service and reduced emergency medical response are all outcomes of the reductions in personnel that have occurred in recent years.

Adequate fire suppression response is an essential function of the County's fire service providers, and important to support the capability to respond to multi-casualty and disaster events. As outlined in subsequent sections and discussed in **Appendix A**, the National Fire Protection Association and other agencies have developed standards for performance, staffing and service adequacy. While those standards are not absolute, significant deviations from those standards have definite and significant impacts on the communities served.

Multi-jurisdictional efforts have been approved to provide interim funding to re-open an ECCFPD station in July 2016, while a plan is developed and implemented to provide for sustainable longer-term funding. If the re-opened station cannot be maintained and additional stations opened in the long-term, service levels will continue to be inadequate and threaten the safety of life and property.

RHFPD is working on improving revenues in order to avoid closing one of its two stations. Closure of its second station will have a significant adverse impact on services within the RHFPD as well as the West County service area.

Response times for ambulances dispatched by ConFire are anticipated to improve as a result of the new contract between ConFire and American Medical Response (AMR). This system may also help to reduce the number of medical calls that require fire engine response. ConFire could realize increased federal or state revenues from the arrangement, which could be reinvested in improved and reduced-cost ambulance services to the community.

Disadvantaged Communities

A “Disadvantaged Community” is defined as “a territory that constitutes all or a portion of a ‘disadvantaged community’ including 12 or more registered voters”⁵ ... with an annual median household income that is less than 80% of the statewide annual median household income.⁶ After preparation of the 2009 MSR, State legislation was enacted requiring that an MSR consider disadvantaged communities in its findings.⁷

Contra Costa County has documented disadvantaged communities, and identified the applicable fire service provider for each, as detailed in **Appendix B**.

Disadvantaged communities within the two focus MSR agencies are described below. There are several disadvantaged communities in other areas of the County as well, as noted in the Appendix.

ECCFPD

Several disadvantaged communities fall entirely within the current SOI of the ECCFPD. Areas include Bethel Island, and an area to the east of Brentwood that includes the community of Knightsen.⁸ Those two areas experience among the worst response times in the ECCFPD of 13:37 minutes and 18:18 minutes respectively (90% of responses fall within those times), which fall significantly below overall District times, and well-below national standards for “Best Practices.”

RHFPD

One community in Rodeo has been identified as a disadvantaged community. The area is within one mile of RHFPD Station 75, and therefore response times for the first-arriving engine company should meet or exceed Best Practice norms. However, if Station 75 closes as a result of revenue shortfalls, the next closest station would be Station 76, over two miles away. Times required for arrival of additional engine companies in the event of a structure fire would increase as well.

⁶ Cal. Water Code § 79505.5. Qualifying MHI is 80% or less of Statewide MHI. California MHI is \$61,400 and qualifying MHI is \$49,120.

⁷ Cal. Gov. Code § 56430, as amended by SB 244.

⁸ “Disadvantaged Communities (DAC) Determination”, American Community Survey 5-year Estimates (2009 - 2013), County of Contra Costa.

Infrastructure Needs

Nearly half of the fire stations in the County are over 40 years old and a significant number are in poor condition, needing repair or replacement.

In some cases, for example the ECCFPD, many of the stations in need of repair or replacement currently are not staffed; however, with increased operating revenues and re-opened stations, planning for capital repair and replacement will become essential. Standards of Cover (SOC) studies, in East County and in West County, are necessary to identify priorities for station locations, staffing, equipment and other infrastructure decisions. ECCFPD commissioned an SOC, to be prepared by Citygate Associates, that will be completed in July 2016.

Accountability

In the 2009 MSR, agencies demonstrated accountability based on standard measures, which generally remains true. The ECCFPD, however, suffers from a number of accountability issues.

Most of the agencies reviewed follow Best Practices in terms of contested elections, constituent outreach efforts, transparency, and disclosure practices. The ECCFPD Board members are not directly elected, and are appointed by the County Board of Supervisors (BOS) and the cities of Brentwood and Oakley. ECCFPD's limited financial resources constrain the District's ability to prepare and update financial plans and audits and reports for public review, and limit the agencies' ability to maintain and update their websites with comprehensive information in a timely manner. Efforts are underway to stabilize ECCFPD's funding and to create a more representative elected Board.

While agencies adhere to generally accepted accounting practices for public entities, recent changes in standards issued by the Government Accounting Standards Board (GASB) allow for the reporting of "net liabilities" for pension and OPEB plans.⁹ While the "net" reporting helps to simplify the reporting process, it also reduces the availability of important information available to the public regarding total pension and OPEB assets and liabilities, and actual vs. total required payments. Agencies should include both the total and the net liabilities to provide maximum transparency and public information.¹⁰

⁹ Statement No. 68, Accounting and Financial Reporting for Pension—an Amendment of GASB Statement No. 27 (issued 6/12), Government Accounting Standards Board.

¹⁰ Additional OPEB clarity can also be provided by compliance with recent GASB draft guidelines proposing that governments report OPEB liabilities on the face of the financial statement; GASB also recommends reporting of actual annual payments made for the prior two years, and the net OPEB obligation at the end of each year.

Current Task Force planning efforts to stabilize ECCFPD funding include requirements by the County to initiate action to change the existing Board of Directors from an appointed Board to an elected Board.

Governance Options

ConFire

The 2009 MSR presented a wide-ranging set of potential governance changes for the East and West County cities and districts; some were boundary cleanups, others were governance/reorganizations, and many involved ConFire's active participation.

Due to ConFire's continuing recovery from recent adverse financial conditions, its ability to undertake additional service areas or service responsibilities depends on receiving additional revenues sufficient to offset its additional costs. This means that any significant governance changes related to the RHFPD or the ECCFPD, the primary focus of this MSR, are likely to require that those agencies adopt special taxes or other new revenues that will enable a "revenue neutral" service arrangement with ConFire so that ConFire's existing services are not diminished.

ECCFPD

The 2009 MSR proposed a number of potential governance options; however, no agency action has occurred since 2009 related to changes in governance. As summarized below and described in **Chapter 4**, significant changes in governance are not likely in the near-term; however, one viable option is the creation of an independent district (Option "d," below), currently an objective of the Task Force pursuing sustainable solutions for ECCFPD.

a. Detachment from ECCFPD of either the City of Brentwood or the City of Oakley, or both – If either or both cities detach, the remaining unincorporated area would essentially be a remnant district and would be financially unsustainable. In the event of detachment, the detaching city would be responsible for providing fire service within city boundaries either directly by forming a fire department or indirectly through a contract.

A detailed analysis of the impact of detachments has not been prepared; however, because Brentwood accounts for over 50 percent of the property taxes of the ECCFPD, the loss of revenues from detachment of Brentwood would not be offset by cost savings from detaching one fire station, or one-third of the total stations. In addition, it is unlikely there would be a reduction in overhead, thus the average cost per remaining ECCFPD station would increase. Because Oakley represents about 20% of assessed value, its detachment would present less of an impact on the remaining ECCFPD; however, the latter scenario is unlikely since Oakley's gain

in tax revenue would be insufficient to fund its station, and likely additional mitigation payments to ECCFPD would worsen Oakley's funding problem.

It is likely that LAFCO would allocate existing liabilities between the detaching entity and the remaining district; thus the detaching entities would not only assume the burden of annual operations, but would also be responsible for a share of current and long-term ECCFPD liabilities. LAFCO would determine this allocation, as well as any required mitigation payments, at the time of detachment.

b. Consolidation of ECCFPD with ConFire – This change of governance would require the cooperation of the ConFire governing board, which is the Contra Costa County BOS; however, the consolidation could effectively degrade the service levels to the ConFire service area, which would likely be unacceptable to the BOS. Without significant additional new taxes from ECCFPD residents, a financial drain on ConFire is likely due to outstanding pension and OPEB liabilities, and due to differentials in pay and benefits that would need to be reconciled.

c. ECCFPD contract for service with CAL FIRE – Financial savings are unlikely to result from this option given that the California Department of Forestry and Fire Protection (CAL FIRE) costs are similar to ECCFPD's.¹¹ ECCFPD would also need to resolve costs associated with its unfunded pension and OPEB liabilities. Some efficiencies in administration are likely, considering CAL FIRE's administrative operations. Actual costs and benefits would require a detailed analysis of contract services and charges.

d. Establish ECCFPD as an independent district – This option is consistent with the original ECCFPD formation goals, and recognizes the current de facto organization that functions independently of the County.¹² However, this option alone does not alter the District's ability to increase revenues. This option, in conjunction with other revenue-related actions, is discussed below under "ECCFPD MSR Recommendations."

RHFPD

The 2009 MSR considered a number of governance options; however, no agency action has occurred since 2009 related to changes in governance. Following is a review and update of potential options.

a. Annexation of area served by Crockett-Carquinez FPD – While there would be benefits to a unified command structure and some shared internal support services, the cost reductions (net of revenues) to the RHFPD would not be significant enough to overcome RHFPD's financial shortfalls. Increased financial

¹¹ MRG/BA interview with Chief Henderson, ECCFPD, November 24, 2015.

¹² LAFCO law defines an independent district as having a board elected by voters within its boundaries.

and operational efficiencies, in conjunction with other actions, could improve the long-term financial sustainability of RHFPD; however, there has been no activity in this area and neither of the agencies has expressed interest in pursuing it.

b. Consolidation among West County fire providers – Historically, major impediments to implementing this recommendation have included political, financial, operational, employee compensation and training differences, as well as an expressed lack of interest. Although the City of Pinole allowed its contract with the RHFPD for Fire Chief services to expire in 2013, and has been recruiting for a replacement Chief, they recently placed the recruitment on hold. The ConFire District Chief has approached both the City of Pinole and the RHFPD (who will have a Chief vacancy on May 1, 2016) and proposed a “shared Chief” opportunity for the RHFPD, the City of Pinole and ConFire. The “shared Chief” position would be a ConFire employee who would provide fire and EMS leadership to the three agencies. The agencies would share the costs of the position equally and receive ongoing service from the Chief in the position. This is a practical, easily implementable and cost-effective method of providing Chief-level leadership for these three agencies. Although significant long-term issues, including pay and benefit differentials, varying pension costs and unfunded OPEB obligations exist between RHFPD, ConFire and the City of Pinole, the “shared Chief” position will, if implemented, make a significant step in integrating the agencies in a functional manner.

Although a “grand solution” that includes a consolidation or annexation is highly unlikely to occur in the near-term, increased “functional” consolidation, which does not require governance changes, will provide a more efficient application of resources available in the West County area. Functional consolidation does not offset the inherent deficiencies of service that are created in RHFPD as a result of unfunded service demands and closed fire stations, but in conjunction with other actions, could improve the long-term financial sustainability of RHFPD.

MSR Recommendations

ConFire

Opportunities may exist whereby ConFire, by virtue of economies of scale, can provide a variety of services to smaller agencies in a cost-effective manner, as described below. ConFire’s assistance can help to reduce costs and improve the operating and administrative effectiveness of RHFPD and ECCFPD in particular, as one element of achieving long-term sustainability of those agencies.

1. Services to RHFPD – In the West County area there are opportunities for ConFire to assist RHFPD with organizational management, chief services, training, and facilities and equipment resourcing.

2. City of Pinole – Opportunities should be explored for potential utilization of a vacant station, organizational management, chief services, training, and facilities and equipment resourcing.

3. Battalion 7 service area – ConFire’s presence in the unincorporated areas of San Pablo provides opportunities for fire response coordination in the area.

4. ECCFPD – In East County, the significant impacts of automatic aid on ConFire when responding to requests for service from ECCFPD have taxed the resources available to the ConFire service area. As ECCFPD develops fiscal and operational resources, ConFire will be able to play a more complete role. ConFire already provides a number of technical and support activities for ECCFPD at the present time.

ECCFPD

Current ECCFPD service levels are inadequate, and risk loss of life and property, and injury to firefighters if the District does not increase resources to reopen and staff fire stations. The ECCFPD, in collaboration with a Task Force of participating agencies, are working to address these issues. This MSR recommends the following as minimum steps to restore adequate service levels.

1. Educate the community on the need for professional fire and emergency medical services – Informed community participation is essential to the creation of a service plan, and to the review and development of funding sources as part of a long-term service and cost plan (see #4, below), improving the likelihood of support for a tax measure.

2. Establish an independent ECCFPD governing board – While an independent board does not guarantee increased revenues, the community will have a greater opportunity and ability to engage in District governance and support needed financial measures if the Board is elected locally and accountable to the community.

3. Develop a long-range service and cost plan that ensures adequate service levels – The ECCFPD has engaged a consulting firm to conduct a Standards of Cover (SOC) Study that will establish the basis for projecting service costs associated with the District’s service area over the long term. The costs for capital and operational needs identified in the SOC Study can provide a basis for constructing a financially viable long-range service plan for the ECCFPD, as well as provide support to the District in its efforts to justify and efficiently utilize increased revenues.

4. Develop a funding plan for services that integrates the three governmental agencies’ powers to generate development-related revenues for ECCFPD and, to the extent possible, justifies the use of

additional tax revenues – The funding plan, involving the County and the Cities of Brentwood and Oakley, will be based on the outcome of the SOC Study. Community education and involvement, described above, are essential to ensure community support for needed revenues, including tax measures. The ECCFPD does not have the ability to impose development impact fees, but can create a special tax with two-thirds voter approval. In any case, active engagement and support of the County and the Cities is essential to implementation of any new tax.

RHFPD

The RHFPD budget will lose over \$2 million of annual grant and assessment revenues over the next one to two years, which will require closing of one of its two stations, resulting in significant reductions in service levels, increased response times, and additional risk of loss of property and life, as well as risks to firefighters. The following steps represent the minimum actions needed to address this situation.

1. Pursue new RHFPD funding sources – The RHFPD should pursue voter approval of a special tax measure, which would require a two-thirds voter approval. The tax revenues, in addition to potential cost savings from operational efficiencies, could significantly improve the RHFPD’s ability to sustain adequate levels of service.

As part of the planning efforts for a tax measure, RHFPD should participate in a SOC Study for the West County area to identify operational improvements and other measures to ensure efficient and cost-effective use of existing and new financial resources.

2. Create a Battalion 7/West County Fire and Emergency Services Task Force – Establish a Battalion 7/West County Fire and Emergency Services Task Force with representatives from all of the involved jurisdictions. The Task Force would be requested to meet regularly to develop, review and implement a regional SOC Study, apply for grants, refine operational practices and develop cooperative agreements to improve services through collaborative efforts described further in the MSR Determinations in **Chapter 7**.

3. Undertake a West County SOC Study – The study would objectively review the current level of fire and rescue services in the studied communities. The SOC analysis will identify the service area’s strengths, deficiencies and areas of overlap. The results of the SOC Study could be used to improve the coordinated services in West County and form the basis for implementation of further service efficiencies, as well as to document service standards and improvements that support the RHFPD request for special tax revenue from voters.

SOI Recommendations

ConFire

ConFire should further investigate the feasibility of annexing several unserved areas in the County that currently are not within the bounds of a fire service agency, including refineries (e.g., Tesoro). These annexations will be contingent on ConFire receiving adequate revenues, through a combination of property tax and service agreements, to offset increased costs.

ECCFPD

This MSR recommends that the current ECCFPD SOI be designated as “provisional,” requiring that the ECCFPD report back to LAFCO on at least an annual basis to inform LAFCO as to the ECCFPD’s progress in implementing the recommendations of this MSR, and in meeting the objectives of independent governance, adequacy of services, and long-term financial sustainability.

As described above in “ECCFPD MSR Recommendations,” this MSR recommends that the ECCFPD address its financial and service deficiencies by becoming an independent district with a directly elected board and a revenue stream adequate to support an acceptable level of fire and emergency medical services. The success of this strategy depends on increased support from the cities in the District, as well as public support for special tax increases. Reductions in its current service boundary, as discussed in the “Governance Options” section, above, would adversely affect the District’s financial position and ability to achieve independent status.

Current facility and service deficiencies indicate an inability of the District to provide adequate services, as stated in the determinations; affirmation of the current SOI would be inconsistent with these determinations.

RHFPD

This MSR recommends that the current RHFPD SOI be designated as “provisional,” requiring that the RHFPD report back to LAFCO on at least an annual basis to inform LAFCO as to the RHFPD’s progress in implementing the recommendations of this MSR, and in meeting the objectives of adequacy of services and long-term financial sustainability.

As indicated in the “RHFPD Governance Options” discussion, significant annexations or consolidations among West County agencies are unlikely due to the perpetuation of current financial shortfalls, as well as a lack of interest among agencies. However, full consolidation is not required for the involved agencies to implement cooperative staff sharing, contracts for service, expanded automatic aid

and coordinated response agreements to improve the services provided to the communities they serve.

While the RHFPD currently is providing adequate services, increased demands as well as the impending loss of over \$2 million in grant and assessment revenues will force the closure of one of its two stations, significantly lengthening response times, reducing the ability to respond to multiple simultaneous incidents, and reducing the District's ability to provide needed aid to nearby agencies.

Affirmation of the current RHFPD SOI would be inconsistent with the near-term risk of significant service inadequacies if only one station is staffed.

Alternatively, LAFCO could consider a "zero SOI" designation, signaling that the District's services will ultimately be provided by another agency. However, there are no current prospects for service by another agency given RHFPD's service deficiencies, financial obligations and impending reductions in funding. Through a successful combination of actions as recommended in this MSR, including support for new taxes and increased collaboration among West County agencies, the District will be in a much better position of financial sustainability, and potential service area changes will be more viable at that point in time.

2. LAFCO AND MUNICIPAL SERVICE REVIEWS

The Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 (“CKH Act” - Gov. Code § 56000, et seq.) requires that every five years, as necessary, LAFCO review and update the SOI of each local agency. An SOI is a planning boundary outside of an agency’s legal boundary (such as the city limit line or district boundary) that designates the agency’s probable future boundary and service area. Factors considered in an SOI review focus on the current and future land uses, the current and future need and capacity for service, and any relevant communities of interest.

As part of the SOI update, LAFCO must prepare a corresponding MSR. An MSR is a comprehensive study designed to better inform LAFCO, local agencies, and the community about the provision of municipal services. Service reviews attempt to capture and analyze information about the governance structures and efficiencies of service providers, and to identify opportunities for greater coordination and cooperation among providers. The service review is a prerequisite to an SOI determination and may also lead LAFCO to take other actions under its authority.¹³

In 2009, Contra Costa LAFCO completed a comprehensive, Countywide MSR covering EMS and fire services in Contra Costa County.¹⁴ The current “2nd Round MSR” is focused on: (1) data updates for the 11 fire service providers (three cities and eight special districts), (2) review of automatic and mutual aid agreements, and (3) focus on ECCFPD and RHFPD, and the interface of those agencies with ConFire.

The authors of the current MSR established a base of data covering all municipal fire service/EMS providers in Contra Costa County, drawing upon responses and follow-up to a LAFCO Request for Information distributed in the Fall of 2015. Additional research was conducted for the two MSR focus agencies to obtain more detailed data. Interviews and meetings were held with the focus agencies, as well as ConFire and other fire/EMS agencies in the County, and officials of affected cities served by the focus agencies (including the Cities of Brentwood, Oakley, Hercules and Pinole). EMS and fire service providers also had the opportunity to review and comment on working drafts of the current MSR.

¹³ “What is LAFCo?,” CALAFCO website, <http://www.calafco.org/about.htm>.

¹⁴ See “Fire and Emergency Service Providers,” http://www.contracostalafco.org/municipal_service_reviews.htm.

SERVICE AREAS AND SPHERES OF INFLUENCE

The 2009 MSR proposed a number of governance and SOI changes to fire services and EMS in the County. A Fire Committee, formed following the presentation of the MSR to Contra Costa County LAFCO in April 2009, met five times in 2009 to review governance and SOI options, and other sub-regional and regional issues.¹⁵ The Fire Committee provided a number of policy and SOI recommendations, including a recommendation that a West County Ad Hoc Committee be formed to develop a work plan to address issues identified in the MSR. A number of SOI changes, which were largely “clean up” to reflect actual areas of service delivery, were subsequently adopted by LAFCO (see **Appendix C**).

The Fire Committee’s recommendations and LAFCO’s SOI actions specifically excluded from ConFire’s SOI the western boundary areas (i.e., City of San Pablo, and unincorporated areas including Bayview, East Richmond Heights, El Sobrante, Montalvin Manor, North Richmond, and Tara Hills) in anticipation of a future West County consolidation. LAFCO deferred SOI updates for the Crockett-Carquinez Fire Protection District (CCFPD), Kensington Fire Protection District (KFPD), and RHFPD pending the formation of a West County Ad Hoc Committee to address issues raised in the 2009 MSR; no committee was formed. No consolidation study or other efforts occurred subsequent to the 2009 MSR due to lack of interest on the part of the service providers.

DISADVANTAGED COMMUNITIES

Since the preparation of the 2009 MSR, State law has added a requirement that MSRs consider disadvantaged communities. The requirement resulted from Senate Bill 244 (Wolk, 2011) (SB 244), a law addressing disadvantaged communities. A “disadvantaged community” is defined as a community with an annual median household income that is less than 80% of the statewide annual median household income (Water Code Section 79505.5). A disadvantaged community is also defined as “a territory that constitutes all or a portion of a “disadvantaged community” including 12 or more registered voters or some other standard as determined by the commission.¹⁶

California Government Code Section 56430, as amended by SB 244, now requires LAFCOs to include in the MSR a description of the “location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere

¹⁵ “Supplemental Report – Fire & Emergency Medical Services Sphere of Influence Updates,” letter from Lou Ann Texeira, Executive Officer to the LAFCO Commission, October 14, 2009 (agenda item).

¹⁶ Senate Bill 244: Land Use, General Plans, and Disadvantaged Communities, Technical Advisory, State of California Office of Planning and Research (OPR).

[Return to Agenda](#)

of influence.”¹⁷ The MSR must also contain specific written determinations on infrastructure needs or deficiencies related to public facilities and services, including but not limited to sewer, water, and fire protection services in any disadvantaged unincorporated communities within or contiguous to the sphere of influence of a city or special district that provides those services.

The County of Contra Costa has catalogued and mapped disadvantaged communities. Disadvantaged communities within the MSR areas of focus, namely the ECCFPD and the RHFPD, are discussed in the respective chapters for each of those agencies. **Appendix B** includes a list of disadvantaged communities in the County, and the fire service agency responsible for each one.

¹⁷ Cal. Gov. Code, § 56430(a)(2).

3. OVERVIEW OF EMERGENCY MEDICAL SERVICES (EMS)

Designated by the County BOS, Contra Costa Health Services (CCHS) serves as the local emergency medical services agency (the “EMS Agency,” or “LEMSA”). The County awards exclusive ambulance operating contracts through a competitive process for all Emergency Response Zones (ERZs). **Figure 2a**, below, shows 2014 zones that were the basis for the response time data contained in this report.

Figure 2a
Contra Costa County Ambulance Zones – 2014

Figure 2b shows consolidated zones as currently configured. The ERZ served by the Moraga Orinda Fire District (MOFD), a non-competitive ERZ, is not subject to the EMS Agency bidding process. The ERZs were re-configured to reflect population growth and current EMS ambulance utilization; the revised ERZs and applicable response time requirements provide expanded urban response to growing areas previously deemed rural. The ERZs and related response time requirements were also designed to provide cost savings to EMS ambulance providers to preserve an emergency ambulance service model that could sustain itself on insurance reimbursement alone.¹⁸

Figure 2b
Contra Costa County Ambulance Zones – Current

¹⁸ Patricia Frost, Director of EMS, Contra Costa County Health Services Dept., email correspondence 2016-05-13 and 2016-06-24.

Return to Agenda

Emergency ambulance service delivery contracts require compliance with standards for response time, staffing, training and equipment. These competitively awarded ambulance contracts are performance based; that is, the ambulance service provider must put in whatever resources are necessary to comply with response time and contract requirements, including appropriate resources for training, clinical care, equipment, and vehicles.¹⁹ The EMS Agency (CCHS) is the BOS's designated contract manager for ambulance services and reviews ConFire and all EMS System emergency performance and ambulance service performance. Performance monitoring for independent fire districts providing EMS ambulance services is a responsibility shared by those fire districts and the EMS Agency.

As described in the 2009 MSR,²⁰ all areas in the County continue to be served by ambulances staffed with two full-time personnel, including at least one paramedic qualified to deliver Advanced Life Support (ALS) services.²¹ The ambulances provide transport, as needed, to local emergency hospitals. Effective January 2016, a new contract went into effect between ConFire and AMR which provides that ConFire can directly dispatch individual AMR ambulances.

Fire departments in nearly all areas of the County, with three exceptions, staff their engines with at least one firefighter licensed as a paramedic who can provide ALS services directly upon arrival of the first fire unit, in advance of arrival of an ambulance, if needed.

Three fire departments provide Basic Life Support (BLS) services only;²² these departments include the City of Richmond, ECCFPD, and Crockett-Carquinez FPD. In Richmond, the County has set higher ambulance response standards to assure ALS response to immediately follow the initial BLS aid provided by the Richmond Fire Department, because the Richmond Fire Department does not provide ALS. However, the Richmond Fire Department is on a path to become Advanced EMT within the next 24 months. ECCFPD is also adding advanced skills to its EMT level staff to provide enhanced services.²³

¹⁹ Correspondence with Pat Frost, Director of EMS, Contra Costa Health Services, April 15, 2016.

²⁰ "Municipal Service Review: Fire and Emergency Medical Service Providers," Accepted by LAFCO August 12, 2009.

²¹ ALS services are provided at the EMT-Paramedic level of care and involve the provision of advanced airway control, select pharmacologic interventions, and select invasive procedures, as well as cardiac monitoring and defibrillation (source: "EMS Modernization Report," Fitch & Associates, June 2014).

²² BLS services are defined as the level of care that can be provided by an Emergency Medical Technician Basic (EMT-B). BLS services are limited to a basic level of patient intervention to include oxygen administration, splinting, bandaging, CPR, airway control, etc. Few (if any) pharmacological agents are allowed. Automated External Defibrillation (AED) may be provided at the EMT-B level; cardiac monitoring and advanced cardiac interventions are not.

²³ Correspondence with Pat Frost, Director of EMS, Contra Costa Health Services, April 15, 2016.

Return to Agenda

Two of the first responders—San Ramon Valley FPD (SRVFPD) and MOFD – staff their own ambulance companies directly with licensed paramedics, and all others rely on Alliance ambulances (CCFPD ambulance services provided by AMR).

In 2014, the County commissioned a study by Fitch & Associates²⁴ to understand the current EMS System functions and performance levels and to identify trends to guide recommendations for optimizing future EMS System operations.

Measures recommended in the Fitch Report to reduce EMS System costs included the following:

- consolidating the ERZs into three zones to create cost savings and efficiencies, by merging response zones A and B and response zones D and E;²⁵
- establishing consistent response times and staffing requirements for the entire County;²⁶
- lengthening response times requirements by 60 seconds;²⁷
- eliminating Quick Response Vehicle (QRV) units;²⁸
- allowing first response to be provided at the BLS level, which has been shown to be effective when followed by a paramedic ambulance;²⁹ and
- dispatching first responders only on calls where they are likely to be beneficial to the patients.³⁰

²⁴ “EMS Modernization Report,” Fitch & Associates, June 2014.

²⁵ Merging of response zones to D and E occurred effective January 2016 (P. Frost, April 15, 2016). Under the new agreement the County may elect to merge response zones A and B during the term of the contract if desired.

²⁶ A 1:1 ratio, or 1 EMT and 1 paramedic staffing, was made countywide with the new Alliance agreement (P. Frost, Director of EMS, April 15, 2016).

²⁷ This was elected NOT to be done at this time, but can be phased in over time if sustainability of ambulance services is at risk. The evidence and use of EMS in the County demonstrates this would be safe when paired with fire first medical response. It is also very important to note that ambulance response times were modified based on population growth; in East County the urban ambulance requirements added more ambulances (P. Frost, Director of EMS, April 15, 2016).

²⁸ Quick response vehicles were eliminated and replaced with ambulance services along with expanded urban response zones, especially in East County (P. Frost, Director of EMS, April 15, 2016).

²⁹ Correspondence with Patricia Frost, Director of EMS, Contra Costa Health Services, April 15, 2016.

³⁰ Alliance model allows for that efficiency to occur. Co-location of fire and ambulance dispatch began in January 2016 to facilitate ambulance dispatch (P. Frost, Director of EMS, April 15, 2016).

EMS DISPATCH

As described in a 2012 report by the County’s Emergency Medical Services Agency (EMSA) to LAFCO:

When a medically-related 9-1-1 call occurs in Contra Costa County, the call is routed to one of three designated fire/medical dispatch centers located at Contra Costa County Fire, San Ramon Valley Fire, and Richmond Police. There, specially-trained dispatchers systematically assess the medical needs based on information the caller provides, assigns a dispatch priority to the call, dispatches the appropriate EMS resources and may provide emergency first aid directions to the caller. A typical emergency call receives a fire engine first response and an ambulance, both dispatched immediately with lights and siren (Code 3). In some cases, where the dispatcher determines the call is less urgent and less complex, an ambulance alone may be dispatched without lights and siren.³¹

The new contract between ConFire and its private ambulance provider AMR under the Alliance ambulance model provides that ConFire can directly dispatch individual AMR ambulances, depending on the incident’s need and location. Previously, the County contracted with AMR, which dispatched the ambulance. Under the new system, ConFire anticipates improved response times, and reduced needs, and in some cases, expects to dispatch an engine company, since ConFire dispatch will have better information about ambulance locations and the ability to respond in a timely manner when making initial response decisions. This model also gives the opportunity for ConFire to deploy ambulance-only for low acuity calls. Currently the vast majority of 9-1-1 calls are Code 3 when many times they can be Code 2 ambulance only.³² This improved fire/EMS dispatch arrangement only applies in areas where ConFire provides fire and ambulance dispatch; it does not apply in Richmond, where the City of Richmond dispatches fire and then ConFire dispatches the ambulance.³³

LEMSA contract data on the effects of the new ConFire/AMR contract will be finalized for the first six months of the contract by August, so the impact on response times is not yet known. Because the new dispatch arrangement has only been in effect for less than one year, full realization of potential benefits may

³¹ “The Relationship of Fire First Response to Emergency Medical Services,” Report to the Local Agency Formation Commission, Contra Costa Health Services, Emergency Medical Services Agency, August 8, 2012.

³² Correspondence with Patricia Frost, Director of EMS, Contra Costa Health Services, April 15, 2016.

³³ Patricia Frost, Director of EMS, Contra Costa County Health Services Dept., email correspondence 2016-05-13 and 2016-06-24.

require more time. Regardless of changes in response times, the EMS Agency anticipates that the new ConFire/AMR arrangement will result in a level of service at least equal to the level of service prior to the changes as a result of expanded urban response, and co-location of ConFire/AMR dispatch.

Although AMR does not provide ambulance service within MOFD territory (MOFD provides its own ambulance service), the new ConFire/AMR arrangement offers the potential to improve mutual aid response to medical emergencies, between areas of ConFire and MOFD. A new ambulance mutual aid agreement between ConFire, MOFD and San Ramon Fire was a requirement of the County's RFP for ambulance service, to help assure improved coordination of ambulance services.

Release of emergency ambulance mutual aid is controlled through "resource requesting" using the Medical Health Operating Area Coordinator for out of County requests.

EMS STAFFING

At least one paramedic-trained crewmember staffs all emergency ambulances and most fire first responder units. All responders, whether paramedic or EMT I, are trained and equipped to perform most immediately needed lifesaving first aid measures such as controlling bleeding, opening and maintaining an airway, providing cardio-pulmonary resuscitation (CPR), and performing cardiac defibrillation. Only advanced EMT and paramedics can administer drugs and perform certain other Advanced Life Support procedures.³⁴ The Advanced EMT (AEMT) position has been identified by Contra Costa EMS as an option for fire first responder agencies who wish to provide a level of advanced life support (can give medications and do some paramedic functions but not all) as a more efficient staffing model.³⁵ Richmond Fire is exploring this option. About 5-10% of an urban EMS system's calls actually require interventions at an ALS level.³⁶

EMS RESPONSE TIMES AND STANDARDS

Response times can have a critical impact on mortality rates. For example, the following graphic illustrates survival rates to a cardiac event.

Table 1a, below, displays ambulance response time standards applicable to each zone in 2014, the percentage of responses that should meet the standard, and the actual compliance with the standard. The urban standards exceed national standards of 12 minutes for urban areas. As noted previously, the standards that emergency ambulances are required to achieve are higher in the City of Richmond because the City does not provide paramedics on its first response fire engine.

Table 1a
Ambulance Response Time Standards (Priority 1) – 2014

ERZ Provider	Geographic Area	Urban	Rural	Response %	2014 Actual Compliance %
ERZ A (AMR)	City of Richmond	10:00	20:00	95%	96%
ERZ B (AMR)	West County (non-Richmond)	11:45	20:00	90%	96%
ERZ C (AMR)	Central County	11:45	20:00	90%	94%
ERZ D (AMR)	Antioch, Bay Point, Pittsburg area	11:45	20:00	90%	93%
ERZ E (AMR)	East Contra Costa County	11:45	16:45 ² Suburban 20:00 Rural	90%	92%
ERZ Moraga Orinda	Moraga Orinda ³	11:59	20:00	90%	92%
ERZ San Ramon	San Ramon Valley ³	10:00	20:00	95%	97%

Source: 2014 Contra Costa EMS System Performance Report

1) Current ambulance response performance requirements for the contracted ambulance provider

2) Includes Bethel Island and Discovery Bay

3) A fire protection district provides emergency ambulance service in this zone, rather than CSA-EM1.

The new ambulance contract with ConFire/AMR, effective January 2016, required new standards applicable to the current ambulance zones shown in **Figure 2b**. The standards and response zones reflect adjusted urban response zones based on population growth and community utilization of emergency ambulance services for

the communities served.³⁷ **Table 1b** shows the ambulance response times as required by the County in the new contract.

Table 1b
Ambulance Response Time Standards – 2016

Priority Level	ERZ	Compliance	High Call Density Urban/Suburban	Low Call Density Rural
Priority 1	A	90%	≤ 10:00	N/A
Priority 1	B, C, D	90%	≤ 11:45	≤ 20:00
Priority 1	D (Bethel Island)	90%	≤ 16:45	N/A
Priority 2	A, B, C, D	90%	≤ 15:00	≤ 30:00
Priority 2	D (Bethel Island)	90%	≤ 20:00	N/A
Priority 3	A, B, C, D	90%	≤ 30:00	≤ 45:00
Priority 4	A, B, C, D	90%	+/- 15 minutes (scheduled) or ≤ 60:00 minutes	N/A

Table 2, below, shows average response times for ambulance service providers, as reported in the Contra Costa EMS Performance Report for 2014. The times shown represent averages. The Report did not indicate the 90th percentile and 95th percentile response times, which are the basis for the standards shown in the prior table; however, in all cases, the actual compliance met or exceeded the required standard. The County is in the process of evaluating response times under the new contract, but the results are not available at the time this report was prepared.

Table 2
Ambulance Response Performance by Zone and Service Provider

ERZ Provider	Geographic Area	Avg. Code 3 Response Time
ERZ A (AMR)	City of Richmond	4:58
ERZ B (AMR)	West County (non-Richmond)	4:46
ERZ C (AMR)	Central County	5:23
ERZ D (AMR)	Antioch, Bay Point, Pittsburg area	5:06
ERZ E (AMR)	East Contra Costa County	6:24
ERZ Moraga Orinda	Moraga Orinda Fire Protection District ³	5:33
ERZ San Ramon	San Ramon Valley Fire Protection District ³	4:20

MEASURE H EMS FUNDING

Measure H, adopted by Countywide vote in 1988, established an annual parcel charge to provide for "...improvements in emergency medical and trauma care system including expanded countywide paramedic coverage; improved medical communications and medical dispatcher training; and medical equipment and supplies and training for firefighter first responders, including training and equipment for fire services electing to undertake a specialized program of advanced cardiac care (defibrillation)."

CSA EM-1 was formed with two zones, Zone A, which is all of San Ramon Valley Fire and Zone B, which is the remainder of the County. The basic assessment rate for Zone B is \$10.00 per single-family residence, and \$3.94 per single-family residence in Zone A. The lower rate in Zone A reflects that level of EMS enhancement funding approved by the San Ramon voters and governing boards in 1988. The primary purpose of Measure H was to provide funding for "paramedic ambulance services" countywide. The majority of Measure H funding between 1988 and 2004 funded paramedic ambulance services provided by the private contractor AMR.

In 2004, the Measure H funding that subsidized the private ambulance service provider was shifted to support fire first responder paramedic services as part of the new County ambulance contract. Until 2013, Measure H provided an annual subsidy of \$30,000 per paramedic-staffed fire engine for all Zone B fire agencies. In May 2013, the County Board of Supervisors approved a population-based formula that provides funding to all Zone B fire first responder agencies regardless of engine staffing.³⁸ The new formula was a response to engine reductions that many agencies suffered during the downturn, and helped to preserve funding levels.

As reported by the Contra Costa EMS, "In 2014, Measure H assessments generated approximately \$4.7 million. Currently, fire districts receive 60% of that revenue for first-responder EMS programs. The remaining funds support EMS system programs (17%), which include Trauma, Stroke, STEMI,³⁹ EMS for Children, Quality, Disaster Preparedness, Patient Safety programs; and multi-casualty and medical mutual aid dispatch from the Contra Costa Sheriff's Office (5%), with the remainder allocated for other services."⁴⁰

³⁸ "Guidelines for Fire First Medical Response Population Based Allocation County Service Area EM1 (Measure H) Funds," July 5, 2013.

³⁹ "STEMI" is an acronym for ST-elevation myocardial infarction, the most severe type of heart attack.

⁴⁰ 2014 Contra Costa EMS System Performance Report.

COUNTY AMBULANCE CONTRACT

The County of Contra Costa recently entered into an exclusive agreement for ambulance services with ConFire, pursuant to a Request for Proposals process. The agreement is a “performance-based agreement (Agreement) for the provision of (1) a ground emergency medical transportation system at a “paramedic Advanced Life Support” (ALS) level of service; and (2) non-emergency inter-facility paramedic ALS ambulance transports originating in Contra Costa County”⁴¹

ConFire and its private subcontractor AMR provide ambulance service to County areas not served by the MOFD and the SRVFPD, which provide their own ambulance service. The five-year agreement assigns responsibility for billing and insurance reimbursements to ConFire, while AMR provides ambulance and paramedics for a fixed unit hour fee. The partnership includes a combined dispatch center that is “forecast to reduce response times by 30 seconds and lessen the need to dispatch firefighters to non-emergency medical calls.” Additionally, with the County now running its ambulance program, it could qualify for a State program that offers partial reimbursements for the medical transport of certain Medi-Cal recipients”.⁴² These Federal matching funds are also available only to public entities.⁴³

Under the new system, ConFire dispatches the ambulance, rather than the prior system that required 9-1-1 calls to be transferred to ConFire, followed by ConFire notification of AMR. It is expected that this system will enable ConFire to avoid dispatching firefighters to incidents where they are not required, thus freeing up the firefighters and equipment for fires and other emergencies.

⁴¹ “Request for Proposals, Exclusive Operator for Emergency Ambulance Service, Contra Costa County, California,” February 27, 2015.

⁴² <http://www.fireengineering.com/articles/2015/11/contracostaapprovesambulancecontract.html>, November 26, 2015. Note: this funding is limited to regular MediCal. Managed MediCal is not eligible to qualify for federal funds at this time (P. Frost, April 15, 2016).

⁴³ Private ambulance companies are not eligible for the government Ground Emergency Medical Transportation (GEMT) reimbursement program – a federal match, up to costs incurred, for providing approved services.

4. OVERVIEW OF FIRE SERVICES

FIRE SERVICE PROVIDERS

As shown in **Table 3**, below, the total number of special district and city fire stations serving Contra Costa County has remained relatively constant since the 2009 MSR, excluding ECCFPD and ConFire. **Appendix D** provides information about individual stations, and changes since 2009.

By the time the 2009 MSR was finalized in April 2009, station closures had begun. Recent growth in revenues and property taxes has provided for the re-opening of some stations; however, certain districts continue to face financial difficulties, including the ECCFPD and the RHFPD. ECCFPD plans to re-open one station for one year as a result of an inter-agency Task Force funding plan. RHFPD anticipates possible closure of one of its two stations when current grant funding terminates near the end of FY 2015-16 and SAFER (Staffing for Adequate Fire and Emergency Response) Grant funds have been depleted.

In addition to special districts and city fire departments, there are a number of other service providers that contribute to related emergency services in the County, and cooperate with the special districts and cities.⁴⁴ These agencies include:

CAL FIRE, which has primary responsibility for wildland fires in State Responsibility Areas (SRAs). CAL FIRE's role and responsibility, and relationship to local agencies, is further described in this chapter below, under the heading "Wildland Fire Response."

East Bay Regional Park District (EBRPD), which provides fire suppression, prevention, BLS for medical emergencies, rescue, and initial hazardous materials response to the regional parks within Contra Costa and Alameda Counties, and serves as the first-in responder to designated non-park SRA lands by contract with CAL FIRE. ConFire remains the "Authority Having Jurisdiction" (AHJ), and is responsible, along with other local agencies, for responding to the majority of fire, EMS, and rescue services to EBRPD lands, particularly given EBRPD's limited equipment and response capacity.⁴⁵

Federal Fire Department, Military Ocean Terminal Concord (MOTCO), which provides fire protection to the MOTCO facility with two engine companies operating

⁴⁴ The 2009 MSR provides additional information about these emergency service providers.

⁴⁵ Correspondence with Lewis Broschard III, Deputy Fire Chief, ConFire, April 18, 2016.

[Return to Agenda](#)

out of two fire stations. The MOTCO facility consists of an approximately 7,600-acre area, formerly known as the “Naval Weapon Station Concord Tidal Area.”

Private Fire Brigades – Within Contra Costa County, there are four fuel refineries (Chevron, ConocoPhillips, Shell, and Tesoro), one large chemical plant complex (Dow Chemical), and one large sugar processing plant (C&H Sugar). C&H Sugar and Tesoro lie outside any fire district boundary in unincorporated areas of the County. One refinery, Chevron, has a full-time, paid fire department. The others operate fire brigades, with a manager functioning as the Fire Chief in addition to other duties. **Appendix E** provides additional information about refinery brigades and services.

Presently, local government fire service agencies are expected to respond to both routine and major emergencies at all these facilities to provide personnel, equipment, ALS first-responder medical care, ALS ambulance transport, and fire investigation. These responses are provided either through automatic-aid, mutual-aid, or as the AHJ.

Mutual Aid from the refineries is infrequent and only Chevron could provide services other than petro-chemical emergency response off-site. These facilities have the operational and overhead capacity to handle small incidents without mutual aid from local government agencies. Medium and large incidents require support and management from local agencies. Large incidents, particularly those involving off-site releases, require the use of an incident management team (IMT), the activation of emergency operations center(s) (EOCs), and public information functions. These are not presently well defined or exercised.⁴⁶

The U.S. Coast Guard (USCG), which serves as a first responder for incidents involving injuries, loss of life or damage to vessels on the waterways and off of the coast of Contra Costa County.

The Parks Reserve Forces Training Area (Camp Parks), which is also a provider of fire services at the U.S. Army facility located within the service area of SRVFPD and near the City of Dublin.

The Contra Costa County Sheriff Marine Unit, which serves as law enforcement for abandoned vessels and crimes committed on Contra Costa waterways, but which is also the primary first responder for incidents involving injuries and boating accidents in the waterways.

The Contra Costa County Health Services Department, which provides specialized hazardous materials response.

⁴⁶ Source: Fire Chief Stephen Healy, MOFD, Contra Costa County Operational Area Mutual Aid Coordinator; Lewis Broschard III, Deputy Chief, ConFire. See attached Appendix for additional information about initial attack responsibilities.

Table 3
Summary of Service Provider Stations, 2009 MSR vs. 2015

AREA	Staffed Stations		Total
Agency	2009	2015	Stations
WEST COUNTY			
City of Richmond	7	7	7
City of El Cerrito	2	2	2
City of Pinole	2	1	2
Kensington FPD	1	1	1
Rodeo-Hercules FPD	2	2	2
Crockett-Carquinez FPD (2)	<u>1</u>	<u>1</u>	<u>3</u>
Subtotal	15	14	17
CENTRAL COUNTY			
San Ramon Valley FPD (1)	9	9	11
Moraga-Orinda FD	<u>5</u>	<u>5</u>	<u>5</u>
Subtotal	14	14	16
EAST COUNTY			
East Contra Costa FPD	8	3	8
OTHER			
Contra Costa County FPD (ConFire) (1)	28	24	29
TOTAL (3)	65	55	70

(1) Includes stations staffed with reserves (ConFire Stations 19, and SRVFPD Stations 37, 40) .

ConFire Station #18 is being sold (as of 4/18/16), and is excluded.

(2) CCFPD 2015 total includes 1 staffed, 1 unstaffed, and one utilized by AMR (#79) pre-2016.

(3) The Sunshine Station, staffed by CAL FIRE, serves the Morgan Territory from May-Nov.

FIRE AGENCY SERVICE AREAS AND SPHERES OF INFLUENCE

The 2009 MSR recommended changes to SOIs; LAFCO adopted SOI updates for CSA EM-1, ConFire, ECCFPD, MOFD, and SRVFPD, as summarized in **Appendix C**. The changes sought to align boundaries with land use development and service responsibilities of the primary service provider; the changes were not associated with major organizational changes (consolidations, etc.). LAFCO deferred SOI updates for the West County agencies (i.e., CCFPD, KFPD, and RHFPD) in anticipation of the West County agencies forming an Ad Hoc Committee to pursue issues raised in the 2009 MSR. Also, LAFCO updated the SOIs for the Cities of El Cerrito, Pinole and Richmond in conjunction with the 2009 West County Sub-regional MSR covering city services.

FIRE AGENCY SERVICE AGREEMENTS

Local fire agencies have entered into a number of agreements, both formal and informal, to augment existing services and help to jointly handle hazards that may be beyond the capability of any single agency. These agreements, in some cases, also provide for the sharing of various functions such as training, dispatch, and administrative services. These agreements are discussed in greater detail in **Chapter 8**.

WILDLAND FIRE RESPONSE

The 10 fire station closures since the 2009 MSR had a significant impact on responses to all call types within the entire fire service emergency response network in Contra Costa County.

All wildland resources are cross-staffed by fire personnel who also staff structural firefighting apparatus, including engines and trucks. The closure of fire stations and lack of funding to reopen those stations increases the workload on the remaining companies, creating a very busy response network. Because the resources are cross-staffed, when a fire engine is on an EMS call it is unavailable as a wildland engine resource.

A high call volume caused by station closures affects the entire system. Increased resources are necessary to respond to wildland fires, as well as all other call types, because of the inter-related staffing.

In addition to a reduced number of stations, environmental factors have had a detrimental effect on wildland fire response. The increase in temperatures, longer wildland fire seasons, and the drought have all increased the number and complexity of wildland incidents. These increases, in turn, negatively affect responses to all other call types.

CAL FIRE's response varies based on the time of the year, level of response and the drawdown of CAL FIRE resources. During the regular fire season, CAL FIRE has one engine in the County; during peak seasons it has two. CAL FIRE dispatches at three different levels: "low" dispatches two engines, "medium" dispatches six engines, and "high" dispatches eight engines. CAL FIRE uses many factors to determine these levels. It should be noted that CAL FIRE could take as long as one hour for its resources to arrive in the County for a State Responsibility Area (SRA) fire. During this time, local agencies handle all mitigation operations.⁴⁷

⁴⁷ Chief Lance Maples, President of the Contra Costa County Executive Fire Chiefs Association, (7/20/16).

FINANCING

As shown in **Table 4**, below, the primary revenue source for the fire districts is property taxes, which depend on the district's share of taxes generated by assessed value within district boundaries. A low share of property taxes, combined with relatively low assessed values, contributes to the significant financial problems of the ECCFPD and RHFPD, which receive on average 6% to 7% of each property tax dollar paid within their districts, compared to other districts that receive two to three times that tax share. Except in rare cases of district dissolutions or certain reorganizations, shifting property taxes from one entity to a fire service agency is highly unlikely to occur, either at the State or the local level.

Table 4
Financing of Fire and EMS Expenditures (FY 2014-15)

AREA	Expenditures		Revenues				
Agency	Fire & EMS	per Resident	Property Taxes (1)	% of 1% Tax	Assessments & Spec. Taxes	Other Sources	TOTAL
WEST COUNTY							
City of Richmond	\$29,388,000	\$274	\$6,346,000	28%		\$23,042,000	\$29,388,000
City of El Cerrito	5,742,000	\$239	1,268,000	18%		4,474,000	5,742,000
City of Pinole (2)	3,469,000	\$184	530,000	12%	\$1,006,600	1,932,400	3,469,000
Kensington FPD	3,009,000	\$593	3,264,000	30%	\$200,000		3,464,000
Rodeo-Hercules FPD	6,637,000	\$201	2,743,000	6%	\$2,277,000	1,617,000	6,637,000
Crockett-Carquinez FPD	<u>436,000</u>	<u>\$132</u>	444,000	12%			444,000
Subtotal	\$48,681,000	\$254					
CENTRAL COUNTY							
San Ramon Valley FPD	\$55,703,000	\$370	\$56,838,000	14%		\$4,479,270	\$61,317,270
Moraga-Orinda FD	<u>18,842,000</u>	<u>\$449</u>	16,150,000	17%		2,692,000	18,842,000
Subtotal	\$74,545,000	\$387					
EAST COUNTY							
East Contra Costa FPD	\$10,791,000	\$94	\$10,363,000	7%		\$428,000	\$10,791,000
OTHER							
ConFire	\$89,200,000	\$149	\$96,600,000	12%			\$96,600,000

(1) City property taxes allocated to fire/EMS estimated based on property taxes as % of GF revenues.

(2) City of Pinole Fund 105 FY14-15 Revised Measure "S-2006" for fire expenditures.

(3) El Cerrito excludes approx. \$2.4 million of reimbursement for KFPD contract.

In limited circumstances, new developments have been required to fund public safety operations through creation of a special tax by a city or the County, with concurrence of the developer. If the County or a city does not take advantage of the opportunity to require and create a special tax for fire services before residents move into a community, the tax will require two-thirds voter approval, which has proven difficult in areas already burdened by special taxes for infrastructure and by lack of voter support.

Return to Agenda

Redevelopment helped to support new development that will generate growth in property taxes in the future, particularly with an improving real estate market, but at the near-term cost of diverting a share of districts' property taxes otherwise needed to respond with increased fire protection services. Although redevelopment financing has been eliminated in California, property taxes will continue to be diverted to pay off remaining redevelopment obligations, affecting both RHFPD in Hercules, and ConFire in San Pablo and Pittsburg. According to the County Auditor, approximately 10 percent of fire district revenues were diverted to redevelopment in Fiscal Year 2015-16. RHFPD lost nearly 30 percent, and ECCFPD about 5 percent.⁴⁸

Federal grants, such as SAFER grants, helped many agencies maintain service levels, however, these grants expire after a fixed period. Assessments are another source of funding, although the recent assessment increase adopted by the RHFPD was prematurely eliminated by settlement of a lawsuit against the District.

Cities have a range of revenue sources available to fund fire service, although they are typically responsible for funding a broad range of public services. Fire districts have funding limitations relating to the ability to charge fees for service and imposing special taxes and assessments. As with districts, a low share of property taxes and low assessed values generally translate into lower fire service expenditures per resident.

The average expenditure per resident for fire and EMS services provided by fire agencies was approximately \$200 per resident in 2014, which is slightly below typical expenditures listed in the 2009 MSR of \$209 per resident.⁴⁹ This result reflects the significant impact of the recession, station closures, and service reductions, combined with increased populations. Factors influencing expenditures, in addition to property taxes, include the availability of other revenues, geography and service demands, and policy decisions by residents and local leaders related to service and expenditure priorities.

Assessed Value and Property Taxes

According to the County Assessor, assessed values and property taxes have recovered and now exceed pre-recession levels. The increase in the Countywide local tax base for FY 2015-16 represents a 7.53% increase in assessed value. Cities with the largest increases in assessed value from the prior year include Brentwood at 12.29% and El Cerrito at 9.96%. Moraga, Hercules, and Pittsburg

⁴⁸ Correspondence from Bob Campbell to LAFCO, May 20, 2016.

⁴⁹ 2009 MSR, p. 4.

had the lowest assessed value increases. Moraga and Hercules each had a 5.87% assessed value increase and Pittsburg had an assessed value increase of 5.48%.⁵⁰

Over the three-year period between FY 2009-10 and FY 2011-12, Countywide property taxes declined by 11.08%. Over the last three years, FY 2012-13 to FY 2014-15, the increase was 13.4%. This means that property taxes over the past six years only grew by a net of 2.32% over the entire period. This fact is a significant reason for the slow economic recovery in Contra Costa County, according to the County's FY 2015-16 budget.

OPERATING EXPENDITURES

Recent State legislation has enabled local agencies to limit benefits received by new hires, helping to constrain cost growth. Although inflation has generally been low (around 2% annually), health costs continue to grow; some agencies conservatively forecast 10% annual growth in health related costs.

Salaries and Wages

Salaries and wages represent 75% to 90% of operating budgets for Contra Costa fire agencies; the share of the total budget varies depending on costs of outside services and contracts, and revenues available for non-labor costs such as equipment repair and replacement, facility improvements, and debt service.

Pension Costs and Other Post-Employment Benefits (OPEB)

In general, long-term liabilities for employee benefits are likely to decline as a result of State legislation and reduced benefits for new hires. The California Public Employees' Pension Reform Act of 2013 (PEPRA), that covers all State and local public retirement systems, mandated retirement formulas for new safety hires. The formulas range from 1.836% at 55 to 2.5% at 55;⁵¹ the new hires must be offered the option that is lower than, but closest to, the formula provided to members in the same safety retirement plan on December 12, 2012.⁵² These new rates are generally lower than prior rates. PEPRA also defined "pensionable compensation" for new members to eliminate prior abuses stemming from "salary spiking."

⁵⁰ Contra Costa County Office of Assessor, letter to the Board of Supervisors, July 1, 2015.

⁵¹ In other words, "2.5% at 55" means a retiring employee can retire at 55, accruing an annual pension of 2.5% of pensionable salary for each year of service, up to a maximum percentage of pensionable salary (e.g., 90%).

⁵² "Brief FAQs Regarding the Proposed California Public Employees' Pension Reform Act of 2013," by Janae H. Novotny, Esq., Burke, Williams & Sorensen, LLP.

Return to Agenda

In the near term, however, actions by CalPERS and CCCERA to reduce unfunded liabilities have resulted in increased annual payments to some agencies; this occurs as a result of shortened amortization periods for unfunded liabilities, which increases annual payments. For example, CCCERA reduced its assumed interest earnings on assets to 7.25%, which is slightly lower than CalPERS' assumptions of 7.5%; and CCCERA also reduced its amortization periods required for payment of unfunded liabilities; CCCERA's amortization periods are also generally faster than those of CalPERS, which effectively increases annual required payments.⁵³

In April, 2016, CCCERA further reduced its assumed interest earnings rate, which will increase agency payments; ConFire estimates an annual impact of \$4.5 million to \$5 million.⁵⁴ In addition to its recent reduction in anticipated investment returns, CCCERA is considering additional changes that will further affect pension costs; these changes may become known by CCCERA's August 10, 2016 meeting.

Recent actions by CCCERA "de-pooled" certain liabilities, which effectively placed burdens for future obligations of an agency entirely on that agency, rather than spreading the burden among multiple, potentially larger agencies. The effect, for example, in the case of the RHFPD, was to increase the district's unfunded liabilities and annual costs. Spread among a reduced staff, the burden relative to payroll increased.

While unfunded liabilities have generally been declining, economic conditions and investment returns have a significant effect on changes in those liabilities. For example, if CalPERS and CCCERA investments do not achieve or exceed the returns assumed in the calculation of pension liabilities, the unfunded portion will grow and require increased payments (the annual changes are amortized over several years to smooth annual variations).

Payments by agencies against unfunded liabilities, e.g., through the use of Pension Obligation Bonds, can help reduce interest charges accrued by those liabilities. However, the agency is still obligated to provide additional resources if future investment earnings decline and assets are insufficient to fund obligations. This scenario constrains the ability to fully pre-pay future obligations, for example, in order for an agency to consolidate with another organization without the baggage of excessive unfunded liabilities.

⁵³ MRG/BA interview with Wrally Dutkiewicz, Compliance Officer, CCCERA, February 26, 2016.

⁵⁴ Lewis Broschard, Deputy Chief, ConFire, testimony at LAFCO Hearing May 11, 2016.

GROWTH AND POPULATION PROJECTIONS

As shown in **Table 5**, below, the Association of Bay Area Governments (ABAG) projects that Countywide population growth from 2015 through 2020 will average 0.7% annually. This is approximately the same rate of growth as the County realized from 2010 through 2015. East and West County growth is above the Countywide average, and Central County exhibits slightly below-average rates.

Table 5
Projected City and County Population Growth 2015-2020

Jurisdiction	2015	2020	Annual Growth

Source: ABAG Projections 2013

As noted by ConFire, many areas in the County will continue to see growth of residential communities, which will require additional funding mechanisms and development agreements for capital, equipment, and staffing of new fire stations needed to cover these areas.

Certain communities, such as the City of Walnut Creek, have experienced significant infill growth with the development of multiple mid-rise residential and mixed-use occupancies. Despite the economic recession, single-family dwelling development continues to occur and is increasing in the Cities of Pittsburg and Antioch. The transfer of the former Concord Naval Weapons Station land to the City of Concord will result in significant residential and commercial development in that area. The communities of Pittsburg and Antioch will continue to see above-average growth of residential communities.⁵⁵

SERVICE DEMAND

Table 6, below, compares total fire and EMS incidents to the population in each jurisdiction. Overall, the incidents per population of 1,000 equal 83/1,000 residents, which are slightly higher than indicated by the 79/1,000 residents in the 2009 MSR; however, the difference likely is not statistically significant. The incidents/1,000 residents is shown for general comparison purposes only; standards and national norms are not readily available, as the ratios can vary significantly based on numerous factors, such as daytime vs. nighttime populations, and incidents should be further stratified to provide more direct comparisons.⁵⁶

(1) KFPD calls include 302 calls outside Kensington; 306 calls/5,100 population is equals about 60 calls per 1,000 population.

INFRASTRUCTURE NEEDS OR DEFICIENCIES

As previously shown in **Table 3**, the number of open stations declined by nearly 15% since the 2009 MSR, a net reduction of about 10 stations. Meanwhile, the population of Contra Costa County increased by about 3.5% over the same period.⁵⁷

The closure of five ECCFPD stations accounts for the majority of the station reductions. ECCFPD currently has plans to re-open its Knightsen station for the period July 2016 through June 2017, contingent on a funding plan developed in conjunction with Contra Costa County and the Cities of Brentwood and Oakley.

ConFire currently has six closed stations (two of those stations are unstaffed, but serve as reserve stations with 10 on-call firefighters). The District has plans to begin re-opening certain stations depending on improved revenues and future needs.

RHFPD is at risk of closing one of its two stations when its SAFER current grant funding expires in the Spring of 2016, and 2014 assessment revenue is significantly reduced the following year, due to insufficient revenues to fund two stations.

Pinole continues with a one-station configuration—a 50% decrease from prior levels, which adversely affects response times.

The structural condition of stations has declined since the 2009 MSR; the total number of stations Countywide rated by the agencies as in “poor” condition increased from six stations in 2009 to 17 stations, according to the 2015 survey of agencies, as summarized in **Table 7**.

⁵⁷ “ABAG Projections 2013” estimated growth of 36,675 from 2010 through 2015, from a total population of 1,049,025 (2010) to 1,085,700.

(2) In 2015, 3 of 10 ConFire stations in "poor" condition were not open.

SERVICE ADEQUACY

The ultimate goal of any emergency service delivery system is to provide sufficient resources (personnel, apparatus and equipment) to the scene of a reported emergency in time to take effective action to minimize and mitigate the impacts of the emergency situation. All fire agencies should strive to meet generally recognized response performance measures based upon their current capabilities and resources. Each agency should have established benchmark response goals

Return to Agenda

that can be analyzed annually to measure how well the organization is performing in relation to the response time goals.⁵⁸

The components of benchmark response goals have been established and or recognized by the National Fire Protection Association (NFPA), the Center for Public Safety Excellence/Commission on Fire Accreditation, and the Insurance Service Office (ISO). The American Heart Association (AHA) has shown that bystander CPR and Automated External Defibrillators (AEDs) are the most critical factors to cardiac arrest survival, not fire EMS response times.

This MSR describes response times as one common benchmark against which to measure fire agency performance. It is important to note that the typical response times measure the arrival time of the first engine to the scene of the incident. Other critical measures consider the time required for additional engines and firefighters to arrive, depending on the type of incident.

Response Times

For effective outcomes on serious medical emergencies and to keep serious but still-emerging fires controllable, industry Best Practices recommend the establishment of response time goals to measure adequacy of a response. NFPA Standard 1710, applicable to fire companies staffed by career firefighters, recommends 80 seconds (1 minute and 20 seconds) for “turnout time,” or the time between receiving a dispatch call and leaving the station, for fire and special operations responses. The subsequent travel time standard requires no more than a 240-second travel time (4 minutes) to 90% of the incidents.⁵⁹ The combined time, from dispatch to arrival of the first responding engine company, equals 5 minutes and 20 seconds (not including time from receipt of 9-1-1 call to dispatch).

The Crockett-Carquinez FPD and the East Bay Regional Parks Fire Department are covered under NFPA Standard 1720 due to the manner in which those fire departments are organized.

Medical response standards, as described further in **Chapter 3**, depend on the nature of the medical emergency. The response time goal for BLS and defibrillation first response to potential cardiac arrest patients, as recommended by the County’s Fitch Study, should be less than 10 minutes, 90 percent of the time. The system response time goal for ALS response and transport should be established between 12 and 13 minutes, 90 percent of the time.⁶⁰

⁵⁸ **Appendix A** discusses response times and adequacy in greater detail.

⁵⁹ NFPA 1710.

⁶⁰ EMS Modernization Project Report, Fitch & Associates, June 2014 (p. 56).

As shown in **Table 8**, below, none of the fire service providers reported response times that achieve NFPA Standard 1710 standards of 5 minutes and 20 seconds 90% of the time. Crockett-Carquinez FPD does meet the NFPA Standard 1720, responding within 14 minutes to 80 percent of calls.⁶¹ Knightsen and Bethel Island, within the ECCFPD, are also “rural” and subject to the longer response time per NFPA 1720.

Table 8
Response Times (Code 3) and ISO Ratings (2014)

(1) RHFPD response information from correspondence 2/24/16.

(2) SRVFPD 4/14/16

(3) ECCFPD response time shown is for 2015.

⁶¹ CCFPD has a population of less than 500 people/square mile, which meets the “rural” definition and the longer response standard.

Return to Agenda

By comparison to the 2009 MSR, response times have generally been maintained or improved; one exception is the ECCFPD that significantly reduced its number of stations, and thereby increased travel times from the remaining, more distant stations. The likely closure of an RHFPD station will have a significant effect on response times in that area.

ISO Ratings

Table 8 also shows Insurance Services Office (ISO) ratings for each service provider. The ISO's Public Protection Classification (PPC) system is intended to reflect a community's local fire protection capacity for property insurance rating purposes and provides a basis for the ISO rating. Although many insurance companies no longer utilize PPC ratings in determining insurance costs, it is a factor in many cases, and provides an indicator of levels of fire protection and fire risk.

ISO classifies communities from 1 (the best) to 10 (the worst) based on how well the community scores on the ISO Fire Suppression Rating Schedule, which grades such features as water distribution, fire department equipment, manpower and fire alarm facilities.⁶² Any building more than five road miles from a fire station is rated 10, unless the area has an "automatic aid agreement" with another fire agency. Buildings within five miles of a station, but further than 1,000 feet from a hydrant, may receive a 9 (or a new, lower rating under a revised "split" rating system). Insurance rates typically may be higher for ISO ratings of 9 or 10;⁶³ however, insurance companies may use a number of other factors to determine rates. The areas with an ISO rating of 9 or 10 are generally the more remote and isolated areas of the County, which are difficult to access and serve.

ECCFPD, ConFire and MOFD report areas within their districts with ISO ratings of 9 or 10.

The new "split" rating system, which shows a "2/2X" for RHFPD, recognizes that there are areas within the District that are within 5 road miles of a fire station, but not within 1,000 feet of a hydrant (or "creditable water supply"); previously, the District would have been rated a "2/9" because of the lack of water supply in certain areas, but the new system recognizes benefits to being within 5 miles of a station. Similarly, SRVFPD received a "2/2Y", which previously would have been a "2/8B."

⁶² "Public Protection Classification (PPC) Frequently Asked Questions," <http://www.tdi.texas.gov/fire/fmppcfaq.html#>.

⁶³ "Understanding Fire Protection Class," Jack Bradley, Sept. 23, 2013, <http://www.jackbradley.com/news/2013/09/understanding-fire-protection-class>.

Table 9, below, provides an indication of area and population served by stations. Most notable is the ECCFPD, which serves 249 square miles with only three stations; each station must cover a much larger area than typical for other agencies, which in turn significantly increases response times. A high number of residents per station, as is the case for ECCFPD, also indicates a greater likelihood of high call volume and potentially fewer resources available to respond to those calls. Currently there are times that ECCFPD had zero resources available due to simultaneous multi-incidents or working fires with all resources committed.⁶⁴

Table 9
Station Service Measures – Population and Area per Station

AREA Agency	Residents per Station	Area (sq.mi.) per Station

⁶⁴ Correspondence from Chief Henderson, April 14, 2016.

5. CONTRA COSTA COUNTY FIRE PROTECTION DISTRICT

ConFire provides fire prevention, suppression and emergency medical response on its engines at the Advanced Life Support paramedic level to nine cities and much of the unincorporated territory in the Central and Western portions of the County. While ConFire is not a primary focus of this MSR, the District plays a key role in the provision of fire and EMS services in the County, and can offer services that could further improve fire services of other, smaller agencies.

Since 2009, the District has addressed a number of fiscal and operational issues due to the significant reduction in revenue resulting from the economic downturn that began in December 2007. As noted in the 2009 MSR, the District's reduced service levels, unmet capital needs and lack of reserves resulted in extended response times and inadequate service coverage. The District presented a Service Reduction and Fire Station Closure Plan to the BOS in November 2012 after severely depleting its reserves and offering a parcel tax measure (Measure Q) to the voters that would have raised roughly \$17 million;⁶⁵ the measure received insufficient support of only 53.01% "yes" votes rather than the required 66.6%.⁶⁶ The BOS approved the closure of four fire stations.

In 2013, ConFire commissioned a Fitch & Associates study of options to address its deteriorating financial condition.⁶⁷ The options were short-term solutions intended to help sustain ConFire for a period of three to four years, depending on the outcome of revenue estimates, cost increases, capital replacement, and natural disasters.

The District restructured its operations, and developed a "roadmap to sustainability" for the District that has utilized recent revenue growth to expand services and operational capacity. The District has made progress on retiring its Pension Obligation Bond debt and projects an annual budget surplus in FY 2017-18. The District's retirement expenses for the CCCERA increased by 84% between FY 2013-14 and FY 2015-16—significantly reducing its operational flexibility. Current projections for retirement expenses show a leveling of costs and stabilization of this portion of the District's operating expenses. The District is currently updating its fleet through lease-purchase agreements and is restoring a capital and equipment reserve fund.

⁶⁵ "Measure Q a battle between Contra Costa fire services, pension reforms," Lisa Vorderbrueggen, *Contra Costa Times*, October 12, 2012, http://www.contracostatimes.com/portlet/article/html/fragments/print_article.jsp?articleId=21761455&siteId=571.

⁶⁷ "Evaluation and Options Appraisal, Contra Costa County Fire Protection District," prepared by Fitch & Associates, February 18, 2014.

Return to Agenda

In 2015, the District and AMR jointly responded to a Contra Costa Emergency Medical Services request for proposals to provide integrated emergency medical services response, as the sole bidder. The County approved this venture, and effective January 2016 the District and AMR implemented the expanded joint service program.⁶⁸ Through the elimination of separate dispatch and other duplicated services, the agencies will share responsibilities for emergency services resulting in improved service to users. ConFire will also be eligible to seek Federal grants and State reimbursements for services only available to public agencies. The revenues from these expanded services are projected to generate several million dollars of net revenue per year for the District.⁶⁹ In the first quarter of 2016 "...the ambulance program exceeded its revenue goal and expenses were lower than projected".⁷⁰

Although ConFire has made significant financial progress and reduced expenditures, the total revenue available does not allow for expanded services without commensurate revenues to offset the additional services. Its current ability to provide aid to other districts, including ECCFPD, is constrained by limited resources; as a result, ConFire modified its aid agreement with ECCFPD, reducing its services to ECCFPD.

Challenges Faced by ConFire

ConFire faces a number of challenges similar to other fire service agencies. The District relies heavily on property taxes – which provide over 80% of the District's total income. As exhibited in the December 2007 downturn, property taxes are largely determined by economic cycles, and it is uncertain when the current recovery will end. The District's total costs for retirement and post-retirement costs, including medical insurance for retirees, pose another major challenge. CCCERA determines the terms of ConFire's retirement cost obligations, and future OPEB costs also create uncertainty regarding future revenue and expenditure projections.

The BOS has discussed a potential sales tax measure to provide additional funding for County Law Enforcement and ConFire services, but currently no formal action has been taken.

Establishing an equipment replacement reserve adequate to address the future needs of ConFire is another challenge facing the District. ConFire currently spends

⁶⁸ Fire Chief's Report to Board of Directors, August 18, 2015.

⁶⁹ Excess ambulance revenue was recommended by Citygate to be applied to reduce ambulance fees to reduce the cost to the public and enhance EMS services Countywide to the community as specified in the new ambulance contract (P. Frost, April 15, 2016).

⁷⁰ MOFD Directors Give Unexpected Kudos to ConFire Chief, www.lamorindaweekly.com, April 20, 2016.

\$1.5 million from its operating budget for lease-purchase costs for a number of new pieces of equipment. Establishing a self-sustaining equipment reserve fund will require allocation of additional funds from the District’s ongoing operating budget. The District recently updated its 2009 Capital Facilities Plan, which was approved by the District’s Board in March of 2016.⁷¹

CONFIRE GOVERNANCE OPTIONS

The 2009 MSR presented a wide-ranging set of potential governance changes for the East and West County cities and districts, some of which were boundary cleanups, others were governance/reorganizations, and many involved ConFire’s active participation.

Due to ConFire’s continuing recovery from recent adverse financial conditions, ConFire’s ability to undertake additional service areas or service responsibilities depends on receiving additional revenues sufficient to offset its additional costs. This means that any significant governance changes related to RHFPD or ECCFPD, the primary focus of this MSR, are likely to require that those agencies adopt special taxes or other new revenue sources that will enable a “revenue neutral” service arrangement with ConFire so that ConFire’s existing services are not diminished.

CONFIRE RECOMMENDATIONS

Opportunities may exist whereby ConFire, by virtue of economies of scale, can provide a variety of services to smaller agencies in a cost-effective manner, as described below.

- 1. Services to RHFPD** – In the West County area there are opportunities for ConFire to assist RHFPD with organizational management, chief services, training, and facilities and equipment resourcing.
- 2. City of Pinole** – Opportunities should be explored for potential utilization of a vacant station, organizational management, chief services, training, and facilities and equipment resourcing.
- 3. Battalion 7 service area** – ConFire’s presence in the unincorporated areas of San Pablo provides opportunities for fire response coordination in the area.
- 4. ECCFPD** – In East County, the significant impacts of automatic aid on ConFire when responding to requests for service from ECCFPD have taxed the resources available to the ConFire service area. As ECCFPD develops fiscal and operational

⁷¹ Correspondence with Lewis Broschard III, Deputy Fire Chief, ConFire, April 18, 2016.

resources, ConFire will be able to play a more complete role. ConFire already provides a number of technical and support activities for ECCFPD at the present time.

CONFIRE SOI UPDATE

There are several unserved areas in the County that ConFire many wish to consider annexing, including refineries (e.g., Tesoro). As noted above, these annexations will be contingent on ConFire receiving adequate revenues, through a combination of property taxes and service agreements, to offset increased costs. **Figure 3**, below, illustrates potential areas for ConFire to consider for annexation. In some cases, ConFire may already be responding to incidents in these areas; therefore, annexation and a property tax exchange to ConFire would recognize and help fund these responsibilities.

For example, ConFire has indicated that the Tesoro Golden Eagle Refinery should be considered for annexation into ConFire given the need for fire code and fire-related building code enforcement of hazardous materials and processes, primary EMS and structural fire response, and provision of oversight and fire protection consistent with the other refineries within the County. Tesoro is the only refinery that is not covered by a fire authority. Since September 1, 2014, ConFire has responded into the refinery 10 times for EMS or fire related incidents, and has handled 29 Community Warning System (CWS) notifications from the facility. Appropriate allocation of the property tax distribution from the facility to ConFire would be required by ConFire.⁷²

Although in 2009, LAFCO expanded ConFire's SOI to include the Roddy Ranch area, and removed the area from ECCFPD's SOI, no related annexation has been proposed; thus, the area is still in ECCFPD's service boundary. LAFCO should encourage the two districts to work together to pursue this boundary correction. Similarly, there exists a small area of overlap just outside the boundaries of the City of Clayton.

⁷² ConFire Response to LAFCO's Request for Information.

Figure 3
ConFire District Boundary and Sphere of Influence

6. *EAST CONTRA COSTA FIRE PROTECTION DISTRICT*

The ECCFPD provides fire protection and BLS emergency medical response to the Cities of Oakley and Brentwood, a portion of the City of Antioch and the unincorporated communities of Bethel Island, Byron, Discovery Bay, and Knightsen. ECCFPD was formed on November 1, 2002 as a dependent district through the consolidation of three smaller, mostly volunteer fire districts, the Bethel Island, East Diablo and Oakley Fire Protection Districts.

Since 2009, the District has proposed several special tax measures that have been rejected by District voters. As a result, the District has closed the majority of its stations, and currently operates with only three open facilities. ECCFPD has relied on ConFire for mutual aid and assistance, which has been reduced pursuant to a revised automatic aid agreement. Continuing residential and commercial development in the ECCFPD service area has further exacerbated the gap between resources and service demands.

Response times have increased as a result of fewer stations and greater distances to respond to incidents. With only three engine companies, the District depends on aid from other agencies in the event of a structure fire, which requires a response from five companies. When all three engines are responding to an incident, no units remain available in the event of a simultaneous emergency, seriously jeopardizing life and property.

A multi-jurisdictional Task Force has been formed to provide interim funding to re-open a station, and to pursue longer-term options to improve the service capabilities of the District.

Challenges Faced by the District

ECCFPD faces a number of significant and some severe challenges that will require extraordinary efforts to address, these include:

1. Low property tax shares in the majority of the District's tax rate areas.

Due to the volunteer and extraordinarily small service populations of the predecessor dependent districts prior to the formation of ECCFPD, low property tax rates were allocated to fire service. The average tax rate for the District is 7% compared to 12% for ConFire and 14% for SRVFPD. The low property tax rates were "locked in" when Proposition 13 was approved. The small low tax-rate districts were consolidated into the ECCFPD and fail to generate an adequate tax base to support their full-time operations. Reallocation of property taxes from other existing agencies to ECCFPD, notwithstanding dissolution of an agency, is a highly unlikely solution to this problem.

2. The fiscal impact of CCCERA's reallocation of costs has produced impacts on the cost of funding employee retirement. Until 1999,⁷³ the County "pooled" participants, significantly reducing liabilities to smaller entities because of the size of the pool. CCCERA de-pooled the agencies and districts and established rates for each entity that would fully fund its retirement costs. The impacts of the "depooling" on the District were significant. Because ECCFPD has significantly reduced its workforce over the past 10 years, it is bearing the full costs of funding current retirees and current retirees' retirement on a significantly reduced workforce and budget. This has driven the per-employee contribution by the agency to 126% of salary, which is significantly higher than ConFire's contribution of 74% of salary.⁷⁴

3. The impacts of benefit assessment and community facilities districts on residential properties. A variety of "Mello-Roos" Community Facilities Districts and other special districts have routinely been applied to residential development in non-urban development areas for the past 20 years. The essential infrastructure costs of roadways, drainage facilities, landscape and facilities maintenance as well as city and County services are often applied to individual residential units to create funding for improvement bonds to install the needed facilities and maintain them.

As a result, homeowners are often required to pay additional fees on their property tax bills that significantly increase their ongoing homeownership costs. Assuming the basic 1% property tax applies to a \$350,000 home, the property tax will be about \$3,500. In most of the established subdivisions in Oakley, Brentwood and Discovery Bay, additional sets of fees for infrastructure, landscaping and lighting and other facilities are applied which, in some cases, double the applicable property taxes. Fees for school bonds and other voter-approved measures can further increase the total tax burden. This can lead to voter fatigue and resistance to additional ongoing charges. In 2012 and 2015, ECCFPD attempted to pass a special tax and a benefit assessment, respectively. The voters rejected both efforts.

4. The lack of a unified community-based understanding of the value of fully operational fire and emergency services in serving the community. As a formerly rural area (Brentwood's population in 1990 was less than 7,500), ECCFPD and emergency services were largely provided by volunteer-based dependent districts until 2002. This history has led to a view that persists today

⁷³ Starting with the December 31, 2009 Actuarial Valuation, the Board took action to depool CCCERA's assets, liabilities and normal cost by employer when determining employer contribution rates (CCCERA Actuarial valuation and Review as of December 31, 2014; p. 16).

⁷⁴ CCCERA Actuarial Valuation and Review as of December 31, 2014; rates are for FY 16-17, and include normal and unfunded liability.

that a volunteer force with select professionals can provide adequate service in an urbanized environment.

Today, the ECCFPD consists of more densely populated areas in Brentwood, Oakley and Discovery Bay, and the lightly populated unincorporated County areas stretching from Bethel Island to Byron to Knightsen. This creates a 249 square-mile service area with a population of 119,000 which is much more difficult to serve than neighboring Antioch with a population of 108,000 in 29 square miles. Unless the community accepts the need for fully staffed stations and equipment and a reasonable staffing level, service levels will continue to be substandard.

ECCFPD LOCAL ACCOUNTABILITY AND GOVERNANCE

Local Representation

ECCFPD was formed in 2002 in conjunction with the consolidation of three rural fire districts. LAFCO called for resolution of the issues of local governance, inadequate service and insufficient funding by December of 2004 as a part of the consolidation approval. LAFCO did not believe that it had the authority or the ability to impose conditions requiring that the consolidated district become an independent district with a board elected by residents of the District. LAFCO also did not feel that it could impose a requirement that a revenue measure be adopted as a condition of the consolidation.⁷⁵

Initially, the BOS governed the ECCFPD. Transition towards local governance did not occur until late 2009, at which time the District Board was restructured to include representatives from the cities of Brentwood and Oakley and the unincorporated County.⁷⁶ The appointed Fire Board took over the District in February of 2010,⁷⁷ with a new nine-member Board consisting of four City Council Members from the City of Brentwood, three City Council Members from the City of Oakley, and two representatives appointed by the County from the unincorporated area.

At its December 15, 2015 board meeting, the Brentwood City Council decided that with the recent approvals of the recommendations from the multi-jurisdictional task force and Brentwood's commitment to providing significant General Fund

Service Agreements

The ECCFPD has relied on ConFire for auto aid and assistance, which was recently reduced pursuant to a revised automatic aid agreement. According to the agreement, ConFire will no longer respond automatically to non-critical medical emergencies unless ECCFPD resources are unavailable.⁷⁹

⁷⁸ City of Brentwood, discussion and possible consideration of the recommendation of the Fire Ad-Hoc Subcommittee to select two members of the City Council to serve as the City of Brentwood’s appointments to the East Contra Costa Fire Protection District Board, December 15, 2015 (Agenda Item E. 1).

⁷⁹ “Automatic Aid Agreement for Exchange of Fire, Rescue, and Emergency Medical Services between the Contra Costa County Fire Protection District and the East Contra Costa Fire Protection District,” June 1, 2015 agreement revised 8-24-15.

ECCFPD SERVICE AREA AND SPHERE OF INFLUENCE

Figure 4, below, from the 2009 MSR, shows the ECCFPD boundaries, which correspond to its SOI; the only change adopted by LAFCO following the 2009 MSR was to remove the Roddy Ranch area from the ECCFPD SOI and add it to ConFire's SOI (see **Appendix C**). In 2013, the East Bay Regional Park District purchased Roddy Ranch's 1,885 acres of East Contra Costa ranching land, of which 646 acres had been planned within Antioch's SOI to be developed with low-density residential units around a golf course. There are areas north and east of ECCFPD (Jersey Island, Bradford Island, Webb Tract, Franks Tract, Quimby Island) that have no fire service provider. ECCFPD is sometimes called upon to respond to fires in these areas.

Figure 4
ECCFPD District Boundary and Sphere of Influence

ECCFPD DISADVANTAGED COMMUNITIES

As described in **Chapter 2**, a disadvantaged community is a community with 12 or more registered voters and an annual median household income that is less than

Return to Agenda

80% of the statewide annual median income. Median household income in 2014 was \$61,489;⁸⁰ 80% of that amount equals \$49,190.

The County of Contra Costa identified several disadvantaged communities that fall entirely within the current SOI of the ECCFPD. These areas include Bethel Island, and an area to the east of Brentwood that includes the community of Knightsen.⁸¹ Those two areas experience among the worst response times in the ECCFPD of 13:37 and 18:18, respectively (90% of responses fall within those times), which fall significantly below overall District times, and well below national standards for “Best Practices” of 5 minutes and 20 seconds, as described in the “Service Adequacy” section of **Chapter 4**.

The Task Force, currently working towards a plan for expanding fire services in ECCFPD, is reopening the ECCFPD’s station in Knightsen for one year, as plans for increased funding have materialized. To the extent that funding could be more fully restored to ECCFPD, it is possible that its station on Bethel Island could be reopened as well; however, significant capital funding will be required because the Bethel Island fire station was condemned and uninhabitable due to mold, lead and asbestos.⁸² These stations, in addition to other increases in District stations and staff, would significantly improve response times to these disadvantaged communities.

ECCFPD FINANCING

The District is in the process of preparing an annual financial report.⁸³ This report will document assets and liabilities in accordance with generally accepted accounting principles.

As shown in **Table 11**, below, the ECCFPD budget projects FY 2015-16 property taxes to finally recover to FY 2008 levels shown in the 2009 MSR. Expenditures are comparable to (or slightly below) FY 2008 levels; station closures since 2009 have offset the anticipated cost increases described in the 2009 MSR. The 2009 MSR pointed to a 14% expenditure increase for the FY 2009 budget compared to FY 2008, in order to bring compensation in line with neighboring jurisdictions, and to fund pension and health benefit cost increases, and costs attributable to aging facilities.

(ECCFPD Response to LAFCO Request for Information, Item 6a).

(2) ECCFPD Fiscal Year 2015-16 Operating Budget Changes (ECCFPD
Response to LAFCO Request for Information).
Three station model, 34 operational and 2 admin personnel.

ECCFPD FUNDING SOURCES

The ECCFPD is heavily dependent on property taxes to fund its operations, although it utilizes a range of other sources and continues to seek additional revenues such as special taxes.

Property Taxes – Property tax revenues represents about 96% of total revenues. The losses experienced during the recession created a significant hardship on the District, particularly as the District faced significant cost increases. The economic recovery and growth in real estate values boosted property tax revenues over 13% in FY 2014-15 compared to the prior budget year. The FY 2015-16 projected

Return to Agenda

budget includes a 12.5% increase in property tax revenues; this increase offsets the loss of the SAFER grant that ended in November 2014.

The ECCFPD may benefit from an additional property tax allocation, depending on the outcome of a LAFCO application initiated in November 2015 by the County. The action proposes to detach six overlapping areas from the Byron-Bethany Irrigation District, which are served by the Discovery Bay Community Services District. The detachment, if approved, would generate funds that could be reallocated to one or more of the affected taxing agencies. The potentially available funds total approximately \$685,000 annually. The BOS's action directed the County Administrator to develop a resolution of application for detachment to initiate the detachment process. The County Administrator was also directed to explore allocation of the property tax revenues from the overlap areas to the ECCFPD. Contra Costa LAFCO is currently processing the application for detachment.⁸⁴

Operating Grants – The ECCFPD received a SAFER grant that provided over \$3.7 million of funding in FY 2013-14, but ended less than midway through FY 2014-15.

Measure H – As described in Chapter 3, Overview of EMS Services, Measure H established an annual parcel charge for increased ambulance availability. A new, population-based formula now provides funding to all agencies regardless of engine staffing.⁸⁵ This formula enables the ECCFPD to maintain its funding from this source despite significant reductions in stations and staffing.

Community Facilities District (CFD) – The County collects special taxes from a CFD it formed in 2004, acting as the Board of the ECCFPD, for the Cypress Lakes development in Oakley.⁸⁶ The maximum special tax initially was established at a rate of \$200 per parcel (developed and undeveloped), adjusted annually by the Consumer Price Index (CPI). For FY 2015-16, the amount is \$258.14 per parcel and is projected to generate \$162,370.⁸⁷

Special Taxes and Benefit Assessments – The District placed a special tax measure ("Measure S") on the June 5, 2012 ballot to impose a \$197 annual parcel tax on properties in the District. The tax would have increased by 3% per year, to

⁸⁶ A Resolution of the Governing Board of the East Contra Costa Fire Protection District of Formation of East Contra Costa Fire Protection District Community Facilities District No. 2004-1 (Fire Services), and Authorizing the Levy of a Special Tax Within the CFD, Resolution No. 2004/123.

⁸⁷ ECCFPD CFD No. 2004-1 (Fire Services) FY 2015-16 Special Tax Levy, Goodwin Consulting Group, December 31, 2015.

Return to Agenda

a maximum of \$257 in 2022. Measure S required a two-thirds voter approval. It failed with a 43.6% vote in favor of the tax. The measure would have raised \$8.6 million in the base year.⁸⁸ As a result of the failure of the tax measure, the District laid off 15 of its 43 full-time firefighters and closed three stations; Bethel Island, Knightsen and downtown Brentwood lost stations.

A May 2015 Benefit Assessment District election would have imposed a \$95 per household charge and raised \$4.2 million annually. The measure required a majority vote but only received 47%.⁸⁹ Consequently, the District closed two stations, one in Brentwood and the other in Knightsen—leaving the District with three stations to serve a 249 square-mile area with 115,000 residents.

Fees and Charges – The ECCFPD receives a small portion of its revenues from various fees and charges. The District recently adopted First Responder Fees, described below.

First Responder Fee – The ECCFPD held a public hearing and adopted a First Responder Fee at its February 1, 2016 Board meeting. The fee will enable the District to recover the cost of providing emergency medical response services in case of injury or illness. Revenue from the fee will be used to help fund EMT differential pay, which is a 5% pay increase to firefighters that obtain EMT certification.⁹⁰ The initial fee is set at \$337.61 per call (resident and non-resident).

ECCFPD OPERATING EXPENDITURES

Continued growth in labor costs and related health care and pension benefit costs exceeded ECCFPD's ability to generate required revenues, resulting in station closures. Expenditure categories are described in the following sections.

Personnel Services

The FY 2015-16 ECCFPD budget allocated funding for 34 operational and two administrative staff equaling \$2.9 million, or about one-third of total salary and benefits costs.

At its December 28, 2015 meeting, the ECCFPD Board approved a labor contract with the International Association of Firefighters, Local 1230. The contract provided a 5% increase in salary rates, adjustments to steps and certain

⁸⁸ "East Contra Costa County parcel tax for Fire Services, Measure S (June 2012)," Ballotpedia, [https://ballotpedia.org/East Contra Costa County parcel tax for Fire Services, Measure S \(June 2012\)](https://ballotpedia.org/East_Contra_Costa_County_parcel_tax_for_Fire_Services,_Measure_S_(June_2012)).

classifications, and added a 5% pay differential to all employees who possess and maintain the criteria for enhanced Emergency Medical Technicians (EMTs). The salary adjustments were reflected in the proposed FY 2015-16 budget; the funding for the new enhanced EMT differential would come from the proposed First Responder Fee, which was adopted at the January 21, 2016 Board meeting.

Table 12, below, shows ECCFPD monthly salaries.

Table 12
ECCFPD Monthly Salaries (effective Jan. 1, 2016)

	Step 1	Step 2	Step 3	Step 4	Step 5
Firefighter	4,400	4,619	4,850	5,093	5,220
Fire Engineer	4,841	5,083	5,337	5,603	5,744
Fire Captain	5,325	5,591	5,870	6,164	6,328

Source: ECCFPD Board of Directors Agenda Item No. D-1, Dec 28, 2015

ECCFPD Step 5 firefighter salaries are approximately 30% less than top step firefighters at ConFire. This comparison does not account for other components of total pay that may include medic certification, longevity, and overtime.

ECCFPD Retirement Expenses

Retirement benefits are provided through CCCERA. Employees hired before January 1, 2013 receive benefits based on a formula commonly referred to as 3.0% at 50, based on the single highest year of salary, and a 3% COLA. New employees hired on or after January 1, 2013 receive 2.7% at 57.⁹¹

Over half of the benefits cost, or \$3.6 million, represents retirement expenses paid to CCCERA. These rates are significantly higher than other fire protection agencies, largely due to ECCFPD's retirement obligations burdened on significantly reduced staff levels. The FY 2015-16 budget is based on 19 fewer firefighters than shown in the 2009 MSR, but the District continues to pay for retirement expenses for past firefighters that staffed eight stations instead of the current three.

Retirement expenses represent about 124% of salaries, overall, although specific rates applied to individual firefighter salaries vary. For example, ECCFPD pays an amount equal to nearly 100% of salaries to fund CCCERA obligations for past firefighters. Additional payments for retirement benefits of current firefighters

⁹¹ CCCERA Actuarial Valuation and Review as of December 31, 2014.

Return to Agenda

range from 16.2% to 28.6% of salary, for new (“PEPRA”) and other “Legacy” firefighters, respectively.⁹²

ECCFPD Health Insurance Benefits and OPEB

The District’s FY 2015-16 budget allocates \$915,000 for employee group health insurance, and approximately \$260,000 for retiree health insurance. The budget pre-paid its OPEB obligations by about \$380,000 in FY 2015-16. The payments total \$1,555,000, which is about 55% of total permanent salaries of \$2.85 million.⁹³

No current OPEB financial report is available showing unfunded liabilities; however, the ECCFPD is in the process of finalizing its audits for the last five years, which will be presented to its Finance Committee. The OPEB actuarial will be conducted over the next several months. The last OPEB actuarial is a part of Contra Costa County’s 2012 study.⁹⁴

For FY 2011-12, ECCFPD’s Accrued Actuarial Liability was \$130 million; the value of net assets was not delineated in the County’s 2012 OPEB valuation. The “Normal Cost” at that time, given ECCFPD’s staffing levels, was \$3,066,000 annually, and the Annual Required Contribution was an additional \$3.8 million, or a total of \$7.4 million.⁹⁵

The FY 2014-15 budget funded 53% of the District’s OPEB liabilities. The Board-approved goal is to fund 85% of the District’s OPEB liability by FY 2018-19.⁹⁶ The Finance Committee on September 18, 2014 recommended that the District fund the OPEB liability at the 85% goal starting in FY 2015-16.

ECCFPD CAPITAL ASSETS, CAPITAL FUNDING SOURCES AND EXPENDITURES

The ECCFPD’s primary source of capital funding, in addition to allocations of general revenues, consists of development impact fees. A balance of approximately \$1.3 million is anticipated at the end of FY 2015-16. Development fee rates include:

- Unincorporated areas - \$480 per single family unit;⁹⁷

⁹² Retirement rates are from p. 5 of “ECCFPD Fiscal Year 2015-16 Operating Budget Changes.”

⁹³ ECCFPD 2015-16 Budget 3 Station Model, 34 Operational Personnel, 2 Admin. (p. 3).

⁹⁴ Correspondence with ECCFPD Chief Hugh Henderson, February 24, 2016.

⁹⁵ “OPEB, Contra Costa County, GASB 43 and 45 Valuation Report as of January 1, 2012 and Annual Required Contribution for the Fiscal Year Ending June 30, 2012,” Buck Consultants, March 5, 2012.

⁹⁶ ECCFPD Board of Directors Special Meeting, Monday September 22, 2014, Agenda Item No. PH.1.

⁹⁷ Chief Henderson, ECCFPD, correspondence with BA (March 22, 2016).

- Brentwood - \$819.25 per single family unit;⁹⁸ and
- Oakley - \$749 per single family unit.⁹⁹

The ECCFPD does not have a current Capital Improvement Program. An SOC Study, currently underway and anticipated to be complete by June 2016, will document service needs and related facilities and equipment throughout the District. Although operating stations are in good or excellent condition as noted previously in the “Infrastructure Needs or Deficiencies” section of this report, re-opening of shuttered stations may trigger a need for facility improvements and equipment.

ECCFPD RESERVES AND OTHER FUNDS

The ECCFPD’s projected FY 2015-16 operating budget indicates an ending fund balance of \$1.4 million.¹⁰⁰ According to the budget document, ECCFPD’s goal is an ending fund balance of 20% of operating expenditures, which would require a fund balance of about \$2.4 million.

In addition to the reserves for operations described above, the ECCFPD has established a number of special funds, as shown in **Table 13**, below. These funds enable the ECCFPD to segregate restricted revenues, and to allocate and accrue general and other revenues for particular purposes. For example, the projected developer fee balances, which are limited to capital expenditures, are projected to total \$1.3 million.

(2) Summer Lakes was originally Cypress Lakes.

ECCFPD MULTI-JURISDICTIONAL TASK FORCE

Following the loss of the ECCFPD May 2015 special tax election, a Task Force was formed to make short- and long-term recommendations to the Board to address the current situation.

The Task Force and its members are charged with identifying long-term as well as short-term, temporary mitigation measures that will reduce public safety risks to the extent possible, by:

1. Identifying an “unconstrained” model for levels of service for 250 square miles of fire and medical response;
2. Examining long-term solutions;

Return to Agenda

3. Considering, discussing, and understanding data related to fire and medical services (i.e. response times, staffing, station location, etc.);
4. Identifying temporary mitigation measures to reduce public safety risks;
5. Developing a funding plan to fund and implement such mitigation measures; and
6. Accomplishing task force recommendations by August 2015.¹⁰¹

The Task Force recommended, and the Board approved, a plan for temporary funding to allow the District to reopen a fourth fire station located in Knightsen to improve District service. The temporary funding runs for a 16-month period during which the District will explore another ballot measure for a 2016 vote, and will work on long-term solutions for adequate fire and medical response services in the District. The ECCFPD has initiated an SOC study to develop impartial data on the current and future fire and medical emergency service needs of the District. The ECCFPD Chief indicates the study will be completed by June 2016.

The approximately \$2.2 million in interim/one-time funds will be provided through a Memorandum of Understanding (MOU) between the District, the Cities of Brentwood and Oakley, and Contra Costa County. The BOS approved the expenditure of funds towards the interim plan with five conditions, requiring the District to:

1. Pursue achieving status as an “independent district”;
2. Pursue achieving an independently elected Board;
3. Seek a name change;
4. Create a citizens oversight committee to oversee the expenditure of the one-time funds, and
5. Reopen the Knightsen station.

The ECCFPD Board approved the interim plan at its meeting on November 2, 2015. The Cities of Oakley and Brentwood have also approved the Plan.

ECCFPD currently has plans to re-open its Knightsen station for the period July 2016 through June 2017, a result of the funding plan developed in conjunction with Contra Costa County and the Cities of Brentwood and Oakley.

¹⁰¹ Fire and Medical Services Task Force Report to Elected Officials, October 21, 2015.

ECCFPD GROWTH AND POPULATION PROJECTIONS

As shown in **Table 14**, below, the ECCFPD population is estimated to grow at about a 0.8% annual rate over the next 10 years. The City of Brentwood projects slightly higher rates than ABAG; the City's budget assumes about a 1.5% annual rate, which would marginally increase the numbers shown.

Major new growth in the District includes the Summer Lake development in Oakley. As development is completed in the 625-home Summer Lake South, the developer (Shea Homes) has approvals to proceed with Summer Lake North, which includes 824 homes in a 409-acre area on the east end of East Cypress Road.¹⁰²

Table 14
Projected Population Growth, ECCFPD 2015-2025

	2015	2020	2025
Brentwood	56,493	57,603	58,851
Oakley	38,789	39,746	40,776
Unincorporated (1)	<u>23,843</u>	<u>24,311</u>	<u>24,838</u>
TOTAL	119,125	121,660	124,466

(1) ABAG growth rate forecasts are applied to County GIS estimates of current population.

(2) Unincorporated equals ECCFPD population less city populations.

Growth assumed at ABAG growth rates for unincorporated areas Countywide.

¹⁰² Summer Lake North development activity may be affected by pending legal action by the City of Oakley and ECCFPD to assure timely construction of a new fire station required by the development.

ECCFPD SERVICE DEMAND

As shown in **Table 15**, below, over 80% of the ECCFPD Code 3 calls for service (life-threat responses requiring lights and sirens to expedite response) are for EMS. Total calls, including Code 2 calls (semi-life-threatening), increased from 6,550 in 2014 to 6,918 in 2015.

Table 15
Summary of ECCFPD Fire & EMS Calls and Response Times, by Subarea

Service Area	Subarea Population		Code 3 Calls (2015)		Calls/ 1,000 pop.
		%		%

ECCFPD INFRASTRUCTURE NEEDS OR DEFICIENCIES

The three stations currently staffed by ECCFPD are all rated in "excellent" condition. The stations were built in 2002, 2003 and 2012. Other stations, which are currently closed but may be re-opened pending funding, were built in the '60s and '70s, and are rated in "fair" to "poor" condition.¹⁰³

A new Fire Station #94, primarily serving the eastern area of the City of Oakley, was to be constructed in fiscal year 2015-16 and funded by developers; however, delays have prompted the City of Oakley and ECCFPD to pursue legal action to help

¹⁰³ Meeting with Chief Henderson, December 3, 2015.

[Return to Agenda](#)

assure timely construction. This station will replace the existing station, currently closed, located at 215 A Street in Knightsen.¹⁰⁴

A Standards of Cover (SOC) Study, currently underway and anticipated to be complete by June 2016, will document service needs and related facilities and equipment for the entire ECCFPD.

ECCFPD SERVICE ADEQUACY

Response Times

The ECCFPD currently does not have an adopted response time standard. As shown in **Table 16**, below, 90% of responses were within 12 minutes in 2015, which significantly exceeds national standards of 5 to 6 minutes. Knightsen and Bethel Island qualify as “rural” areas and therefore are subject to the longer response time standard of NFPA 1720, that recommends a response within 14 minutes to 80 percent of calls.

Table 16
ECCFPD Response Times, 2015

Service Area	Subarea Population %			Response 90th %
Brentwood				
West	52			9:18
East	54			9:54
Total, Brentwood		56,493	47%	
Discovery Bay	58, 59	14,315	12%	10:32-11:48
Byron	57	1,305	1%	17:10
Oakley	93	38,789	33%	9:30
Knightsen	94	1,644	1%	13:37
Bethel Island	95	2,158	2%	18:18
Marsh Crk / Morgan Ter. (1)	UN	<u>4,421</u>	<u>4%</u>	14:47-16:02
Total		119,125	100%	11:58

[Return to Agenda](#)

With its current three stations, ECCFPD relies on automatic aid from other agencies. In 2014, ECCFPD provided automatic aid to 227 incidents (almost entirely to ConFire) and received aid 588 times.

ConFire is the primary automatic aid responder, providing over 70% of aid responses to ECCFPD. In 2015, the automatic aid agreement between the two agencies was revised to limit aid for EMS incidents. For example, a ConFire engine company and ambulance will only be dispatched to an urgent medical call requiring rescue if no ECCFPD resources are available.¹⁰⁵

ISO Ratings

Communities within the ECCFPD and five miles from a fire station and within 1,000 feet from a fire hydrant qualify for an ISO rating of 4; all other areas are a 10.

ECCFPD MSR DETERMINATIONS

1. Growth and population projections for the area.

Growth in the ECCFPD is expected to increase as the region recovers from the recession. Projections indicate growth of 0.8 to 1.5% annually, or about 240 new residents annually. This growth will increase calls for service and potentially reduce resources required for responses to other areas when multiple calls occur. ECCFPD's response times currently fall below national standards, and are likely to worsen as service calls increase.

2. The location and characteristics of any disadvantaged communities within or contiguous to the SOI.

Several disadvantaged communities fall entirely within the current SOI of the ECCFPD. Areas include Bethel Island, and an area to the east of Brentwood that includes the community of Knightsen.¹⁰⁶ Those two areas experience among the worst response times in the ECCFPD of 13:37 and 18:18, respectively (90% of responses fall within those times), which fall significantly below overall District times, and well-below national standards for "Best Practices." As described in the "Service Adequacy" section of **Chapter 4**, national standards recommend response times of 5 minutes and 20 seconds 90% of the time.

¹⁰⁵ Automatic Aid Agreement between the ConFire and the ECCFPD, revised August 24, 2015.

¹⁰⁶ "Disadvantaged Communities (DAC) Determination, American Community Survey 5-year Estimates (2009 - 2013)," County of Contra Costa.

3. Capacity of public facilities, adequacy of public services and infrastructure needs or deficiencies.

The three stations currently staffed by ECCFPD are all rated in “excellent” condition. The three stations were built in 2002, 2003 and 2012. Other ECCFPD stations, which are currently closed and may be re-opened pending funding, were built in the ‘60s and ‘70s and are rated in “fair” to “poor” condition.¹⁰⁷

Three stations are inadequate to cover the ECCFPD’s 249 square-mile service area. Response times fall below national standards. Limited firefighting resources also increase the probability that adequate response, e.g., to a structure fire which requires a minimum of 15 firefighters, will not arrive in time to contain a fire and minimize damage to property and risk of injury to residents. The District experiences multiple occasions each month when its firefighters are occupied and unable to respond to another call. While automatic aid from ConFire is available, it extends response times and potentially adversely affects ConFire’s ability to respond to incidents within its own service area.

4. Financial ability of agencies to provide services.

ECCFPD closed five stations since 2009 due to inadequate financial resources, significantly increasing response times from its remaining three stations to its 249 square-mile service area. A Task Force comprised of jurisdictions served by ECCFPD is developing plans for interim financing to re-open one of the closed stations, and preparing financial and operational strategies for longer-term financial sustainability and to increase the number of staffed stations.

Improved financial conditions will help to address infrastructure needs and service deficiencies. Other issues noted in these determinations, including lack of adequate financial documentation and elected representation, could also be better addressed as improved financial resources allow.

5. Status of, and opportunities for, shared facilities/services.

Currently, the City of Brentwood provides administrative support services to ECCFPD. ConFire provides fire prevention, fire investigation, and communications services.¹⁰⁸ Contingent on obtaining additional revenues, expansion of administrative support services could provide a cost-effective means of addressing needed staff services related to preparation, oversight and public distribution of financial documents.

¹⁰⁷ Meeting with Chief Henderson, December 3, 2015.

¹⁰⁸ Correspondence with Lewis Broschard III, Deputy Fire Chief, ConFire, April 18, 2016.

6. Accountability for community service needs, including governmental structure and operational efficiencies.

The ECCFPD follows generally accepted practices and legal requirements for meeting noticing procedures. Website postings of minutes of Board meetings appear to be delayed by at least two months following a given meeting. The website includes a list of ECCFPD's Board of Directors, but no contact information. Operating budgets are posted to the website; however, explanation and descriptive information, which should be included with the budget, are found as a part of Board packets related to consideration of the budget.

No independent financial reports are posted on the website, nor were any recent reports available from the District, which is in the process of having reports prepared for the past five years. The most recent documentation of OPEB assets and liabilities is included in the valuation prepared for Contra Costa County in 2012. Pension assets and liabilities are included in Contra Costa County's most recent valuation, but were not posted to the ECCFPD website.

Upon formation of the ECCFPD, LAFCO did not address issues regarding creation of an independent district, but chose to defer that process to the newly created agency. At that time, LAFCO staff concluded that an independent district would not be feasible without a special tax, and that the law required creation of an independent district via a two-step voting process that was outside of LAFCO's conditioning power. While the District's Board of Directors is generally proportionate to the relative population distribution between the two cities and unincorporated areas, the current structure is not an independent district with its own elected board of directors representative of, and accountable to, its residents.

ECCFPD Governance Options

The 2009 MSR considered a number of governance options; however, no action has occurred since 2009 related to changes in governance. Following is a review and update of potential options.

a. Detachment from ECCFPD of either the City of Brentwood or the City of Oakley, or both – If both cities detach, the remaining unincorporated area would essentially be a remnant district and would be financially unsustainable in its current form.

A detailed analysis of the impact of detachments has not been prepared; however, because Brentwood accounts for over 50 percent of the property taxes of the ECCFPD, the loss of revenues from detachment of Brentwood would not be offset by cost savings from detaching one fire station, or one-third of the total stations. In addition, it is unlikely there would be a reduction in overhead, thus the average cost per remaining ECCFPD station would increase. Because Oakley represents

Return to Agenda

about 20% of assessed value, its detachment would present less of an impact on the remaining ECCFPD; however, the latter scenario is unlikely since Oakley's gain in tax revenue would be insufficient to fund its station, and likely additional mitigation payments to ECCFPD would worsen Oakley's funding problem.

It is likely that LAFCO would allocate existing liabilities between the detaching entity and the remaining District; thus the detaching entities would not only assume the burden of annual operations, but would also be responsible for a share of current and long-term ECCFPD liabilities. LAFCO would determine this allocation, as well as any required mitigation payments, at the time of detachment.

If either Brentwood or Oakley detach from the ECCFPD, the remaining City and unincorporated area could potentially remain a dependent district, and would receive significantly less revenue with which to operate.

If the City of Oakley and/or the City of Brentwood detach and provide their own fire service, either directly or through a contract with another agency, there would be a transfer of property tax from ECCFPD to the new service provider (i.e., City). It is likely that additional funding above and beyond the property tax allocation would be needed to support an adequate fire/emergency medical service.

If the City of Brentwood (population 57,000) were to establish its own fire service and was allocated its proportionate share (about half) of the District's annual revenue (roughly \$11 million), the City would receive approximately \$5.2 million per year for fire service. By comparison, the City of Dublin (population 54,000) currently contracts with the Alameda County Fire Department for service, and the annual cost for service is approximately \$11 million. If Brentwood funded its service at the \$11 million level, an additional \$6 million per year would be required to bring Brentwood to a comparable service level. Assuming the City of Brentwood has about 19,000 households, the \$6 million would require a contribution of \$315 per unit per year if the residential units were to fully support the costs.¹⁰⁹

As a note, the City of Brentwood officials have estimated the cost for the City to bring the fire activities in-house would be \$12 million.¹¹⁰ Also, there could be substantial costs associated with additional equipment and facilities that would be associated with an independent City-based service. Similar cost requirements for start-up and operating costs would apply to the City of Oakley. Effectively, both the City of Oakley and the City of Brentwood would have to raise substantial additional revenue directly from their businesses and residents if fire services were provided in-house.

¹⁰⁹ Assuming commercial properties would also be assessed, this amount would be lower.

¹¹⁰ *East County Today*, September 12, 2015.

Return to Agenda

If one or both cities detached from the ECCFPD, the remaining District areas would lose most of their funding, effectively leaving the District without adequate resources to provide service to the remaining unincorporated areas. It is virtually certain that the District could not contract with either ConFire or CAL FIRE, or create an independent district with the current taxing capacity to provide even minimum levels of service to the remaining service area.

b. Consolidation of ECCFPD with ConFire – This change of governance would require the cooperation of the ConFire governing board, which is the Contra Costa County BOS; however, consolidation would effectively degrade service levels to ConFire, which would likely be unacceptable to the BOS. The County does not currently subsidize ConFire activities and has no plans to do so¹¹¹. If ECCFPD requested consolidation, the expectation would be that ECCFPD would have adequate revenues to provide comparable salaries, benefits and service levels to those applied broadly across the ConFire service area. It may be possible, if the substantial funding issues were addressed, to create a service zone in the greater Eastern County region that would incorporate the additional resources available in the ConFire service areas in Antioch and Pittsburg.

Funding the consolidation with ConFire would require a substantial increase in the revenue generated by the ECCFPD, to meet ConFire’s and County Supervisors’ concerns, and a level of certainty that the increased level of funding is sustainable.

c. ECCFPD contract for service with CAL FIRE – Financial savings are unlikely to result from this option given that CAL FIRE firefighter costs are generally higher than ECCFPD’s costs. ECCFPD would still need to resolve costs associated with its unfunded pension and OPEB liabilities. Some efficiencies in administration are likely considering CAL FIRE’s more extensive administrative operations.

d. Establish ECCFPD as an independent district – This option is consistent with original ECCFPD formation goals, and recognizes the current de facto organization that functions independently of the County.¹¹² However, this option alone does not alter the District’s ability to increase revenues. This option, in conjunction with other revenue-related actions, is discussed below under “ECCFPD MSR Recommendations.”

7. Any other matter related to effective or efficient service delivery.

No additional matters have been identified at this time.

¹¹¹ ConFire does receive approximately \$1.5 million of annual funding for EMS from Countywide Measure H funds.

¹¹² LAFCO law defines an independent district as having a board elected by voters within its boundaries.

ECCFPD MSR RECOMMENDATIONS

The recommended strategy for the ECCFPD to address its financial and service deficiencies is for the ECCFPD to become an independent district with a directly elected board and a revenue stream adequate to support an acceptable level of fire and emergency medical services.

There are a number of opportunities the ECCFPD and its government partners — the cities of Oakley and Brentwood, and the County — should thoroughly explore and implement as part of a “*Go Forward Plan*.” Such a plan would allow the District to be self-funded, independent and able to manage its resources effectively.

This option, rather than consolidation or dissolution, is the best and most practical for several reasons:

- It allows the District to retain its lower salary costs;
- It does not materially affect other districts’ activities or dilute their service levels, e.g., ConFire;
- It fulfills ECCFPD’s original goals of becoming an independent district; and
- It establishes a locally elected governance structure accountable to residents within its boundaries.

The District’s current Fire Task Force is working toward these objectives. The following items/actions should be explored and implemented to the degree possible as part of the Task Force’s activities.

1. Educate the community on the need for professional fire and emergency medical services.

It is critical for the community to have unbiased, objective and thorough explanations of the current service levels, the critical need for professional firefighters, and the SOC required to adequately serve the growing population.

Informed community participation is essential to the creation of a service plan, and to the review and development of the funding sources, improving the likelihood of support for a tax measure.

2. Establish an independent ECCFPD governing board.

While an independent board does not guarantee increased revenues, the community will have a greater opportunity and ability to engage in District governance and support needed financial measures if the Board is elected locally and accountable to the community.

3. Develop a long-range service and cost plan that ensures adequate service levels.

The ECCFPD has engaged a consulting firm to conduct an SOC Study that will establish the basis for projecting service costs associated with the District's service area over the long term. The costs for capital and operational needs identified in the SOC Study can provide a basis for constructing a financially viable long-range service plan for the ECCFPD, as well as provide support to the District in its efforts to justify and efficiently utilize increased revenues. As indicated previously, the District anticipates the study will be complete by this June.

4. Develop a funding plan for services that integrates the three governmental agencies' powers to generate development-related revenues and, to the extent possible, justifies the use of additional tax revenues.

The funding plan, involving the County and the Cities of Brentwood and Oakley, will be based on the outcome of the SOC Study. Community education and involvement, described above, are essential to ensure community support for needed revenues, including tax measures. The ECCFPD does not have the ability to impose development impact fees, but can create a special tax with two-thirds voter approval. In any case, active engagement and support of the County and the Cities is essential to implementation of any new tax.

Revenue sources considered should include:

Development impact fees – All three agencies currently collect development impact fees for ECCFPD capital facilities on a coordinated basis. These fees are paid one time by new development, and can only be used to fund capital expenditures. These impact fees should be updated based on the District's SOC Study currently underway. There is no voter requirement for the imposition or increase of impact fees, however, a nexus study is required to justify the fees.

Special Taxes (Gov. Code §§ 53970-53979) - The City of Oakley collects special taxes to fund annual law enforcement operations pursuant to Government Code Section 53970. The law permits creation of special zones of service to tax the property owners for either law enforcement or fire and emergency medical services. The fee is based on the impact of the development on the existing services, and the enabling legislation permits special taxes for fire as well as police services. Oakley, Brentwood and the County could establish a uniform, coordinated fee to fund the operational impacts of development on the ECCFPD on an ongoing basis.. The special tax requires two-thirds approval by the electorate.

Community Facility Districts (CFDs) – Contra Costa County required that the Cypress Lakes development, which was subsequently annexed to the City of Oakley, pay annual special taxes for fire services. The City of Brentwood has

historically collected CFD revenues for public safety (police and fire) service impacts, including increased fire staffing, but in recent years the CFD proceeds have been used exclusively to fund law enforcement. CFD special taxes, or an equivalent annual payment (e.g., Gov. Code §§ 53970-53979) should be applied consistently by the County and cities to any and all new development within the District. The special tax requires voter or landowner approval, and is typically created during initial land development by a master developer.

ECCFPD SOI UPDATE

The existing SOI for ECCFPD is non-coterminous with its bounds.

The 2009 MSR indicated that the ECCFPD requested an expansion of its SOI to include areas being served beyond its SOI, including to the Delta islands of Jersey, Bradford and Webb. The only change adopted by LAFCO following the 2009 MSR was to remove the Roddy Ranch area from the ECCFPD SOI and add it to ConFire's SOI (see **Appendix C**).¹¹³ However, the ECCFPD's service boundary has not been changed to exclude that Roddy Ranch area, and the ECCFPD SOI remains non-coterminous with its service area boundaries.

Although in 2009, LAFCO expanded ConFire's SOI to include the Roddy Ranch area, and removed the area from ECCFPD's SOI, to date no related annexation has been proposed; thus, the area is still in ECCFPD's service boundary. LAFCO should encourage the two districts to work together to pursue this boundary issue.

A second area of overlap exists outside the boundary of the City of Clayton. This area was considered for removal from the ECCFPD service area during the 2009 MSR, but no change was made at that time.

ECCFPD Proposal

The ECCFPD currently does not anticipate changes to its SOI in the next five years.¹¹⁴

SOI Determinations

1. The present and planned land uses in the area, including agricultural and open-space lands.

The District's existing SOI encompasses residential, commercial, mixed-use, agricultural, recreational, open space, and watershed uses. The predominant uses

¹¹³ LAFCO removed the Roddy Ranch area from ECCFPD's SOI; however, no corresponding detachment of the Roddy Ranch area has been submitted to LAFCO; thus this area is still in ECCFPD's service boundary.

¹¹⁴ ECCFPD Response to LAFCO's Request for Information.

Return to Agenda

are agricultural and open space, which are located throughout the District. Residential areas are concentrated in the Cities of Oakley and Brentwood, and in the communities of Discovery Bay and Bethel Island. Continued growth, primarily within the cities, is anticipated. ABAG projects more than 5,000 new residents will move into the ECCFPD's service area over the next 10 years.

2. The present and probable need for public facilities and services in the area.

New development in the ECCFPD service area will exacerbate an existing shortfall of needed fire stations and staffing. In recent years, ECCFPD reduced its number of stations from eight to the present three stations, which are inadequate to serve ECCFPD's 249 square-mile service area.

3. The present capacity of public facilities and adequacy of public services that the agency provides or is authorized to provide.

Limited firefighting resources also increase the probability that adequate response, e.g., to a structure fire, which requires a minimum of 14 firefighters, will not arrive in time to contain a fire and minimize damage to property and risk of injury to residents. The District experiences multiple occasions each month when its firefighters are occupied and unable to respond to another call. While automatic aid from ConFire is available, it extends response times and potentially adversely affects ConFire's ability to respond to incidents within its own service area.

4. The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.

There has been no change to the communities of interest identified in the 2009 MSR. Those communities within the District's SOI include the incorporated cities of Oakley and Brentwood, and unincorporated areas including Bethel Island, Byron, Discovery Bay, Knightsen, the southern portion of the City of Antioch, and a portion of the City of Clayton SOI. Adjacent communities of interest include Jersey Island, Bradford Island and Webb Tract.

5. The present and probable need for the public facilities and services of any disadvantaged communities within the existing SOI.

Several disadvantaged communities fall entirely within the current SOI of the ECCFPD. Areas include Bethel Island, and an area to the east of Brentwood that includes the community of Knightsen.¹¹⁵ Those two areas experience among the worst response times in the ECCFPD of 13:37 and 18:18, respectively (90% of responses fall within those times), which fall significantly below overall District

¹¹⁵ "Disadvantaged Communities (DAC) Determination, American Community Survey 5-year Estimates (2009 - 2013)," County of Contra Costa.

times, and well-below national standards for “Best Practices.” As described in the “Service Adequacy” section of **Chapter 4**, national standards recommend response times of 5 minutes and 20 seconds 90% of the time.

6. The nature, location, and extent of any functions or classes of services provided (special districts only).

There has been no change to the services provided as described in the 2009 MSR, except the reduction in staffed stations as noted in Findings 2 and 3, above. ECCFPD provides fire and emergency medical services, including BLS. Ambulance transport and ALS is provided by AMR, a privately owned ambulance company. ECCFPD contracts with ConFire for dispatch, radio, information and fire prevention services.

ECCFPD SOI Options and Recommendations.

As described above in “ECCFPD MSR Recommendations,” this MSR recommends that the ECCFPD address its financial and service deficiencies by becoming an independent district with a directly elected board and a revenue stream adequate to support an acceptable level of fire and emergency medical services. Reductions in its current boundary, as discussed in the “Governance Options” section, above, would adversely affect the District’s financial position and ability to achieve independent status.

Current facility and service deficiencies indicate an inability of the District to provide adequate services, as stated in the determinations; affirmation of the current SOI would be inconsistent with these determinations.

However, the District currently is actively engaged with the County and the cities within the ECCFPD to reopen a fourth station, conduct an SOC Study, and seek new revenues to improve service. Therefore, it is recommended that the current ECCFPD SOI be designated as “provisional,” requiring that ECCFPD report back to LAFCO on at least an annual basis to inform LAFCO as to ECCFPD’s progress in implementing the recommendations of this MSR, and in meeting the objectives of independent governance, adequacy of services, and long-term financial sustainability.

Alternatively, LAFCO could consider a “zero SOI” designation, signaling that the District’s services will ultimately be provided by another agency. However, there are no current prospects for service by another agency given ECCFPD’s service deficiencies, financial obligations, and lack of funding; this designation would be contrary to the recommendations of this MSR that the ECCFPD pursue independent status and long-term financial sustainability.

[Return to Agenda](#)**SOI/Service Boundary**

LAFCO should encourage ECCFPD and ConFire to work together to pursue the Roddy Ranch boundary correction described above, and correction to the overlap on the periphery of the City of Clayton.

7. *RODEO-HERCULES FIRE PROTECTION DISTRICT*

The RHFPD provides fire protection and emergency medical services to the City of Hercules and the unincorporated community of Rodeo.

The 2009 LAFCO MSR stated that the RHFPD had the financial ability to provide adequate services and referred to its successful grant applications and well managed finances as major strengths. Due to external forces, including the impacts of the December 2007 downturn and other factors, the District closed one of its two stations in 2012. A number of additional setbacks, compounded by the District's very low share of property tax revenue, resulted in an extremely challenging financial future for the District.

Despite these challenges, the District has undertaken a number of initiatives to maintain services in the face of constrained revenues. The District obtained a Federal SAFER fire grant and initiated a voter approved benefit assessment district in 2014 to fund operational expenses. Counteracting these efforts, the District has experienced increased retirement costs, faces the future expiration of the Federal grant, and the extinguishment of its recently approved benefit assessment district, culminating in losses of over \$2 million of annual revenue. It appears likely that the District will return to a one-station service configuration during 2017, if not before. Even with the reduction in services, the District will need additional revenues to address its OPEB and unfunded pension obligations.

The one station configuration, if implemented, will significantly reduce the District's capacity to respond to emergencies—both fire and medical. It will reduce the available in-District services, and force the District to rely on outside resources to perform even basic firefighting services. Response times for emergency medical services will increase significantly, adding precious minutes to response times; first response by ambulance could help in those areas where fire resources are limited.

In February 2014, the RHFPD received a Federal grant of almost \$2.5 million spread over two years to allow the District to reopen its closed station, reestablish Engine 75 and rehire up to nine firefighters.

After working with the community for a number of years, on June 11, 2014, the District adopted a resolution for the purpose of levying a fire services assessment of up to \$82 per single-family parcel. The assessment, if successful, would have provided the District with approximately \$950,000 per year in additional revenue. The proposed assessment was approved by a majority of the voters, but not by the two-thirds vote required for a special tax. As the result of a legal challenge, it was agreed that this assessment would terminate and would no longer be levied after

Return to Agenda

FY 2016-17. The District used the grant and assessment district funds to implement the station reopening and add firefighter positions.

In October 2015, the District and the plaintiff reached a settlement that required the District to cease collection of the 2014 fee by July 2017. The District will be allowed to utilize the funds collected until the cessation in 2017. The District has indicated that it will be forced to reduce its workforce and close the reopened station as the Federal SAFER grant and Assessment District funding resources are depleted. The loss of the Assessment District revenue represents a \$950,000 annual loss to the District.

The District's operating costs have increased due to the CCCERA's reorganization of its actuarial practices that removed the District from its larger employee pool, and reduced amortization periods. The net effect of this action is discussed in detail below.

Challenges Faced by the RHFPD

Even though the RHFPD has made strides towards managing its expenditures, including long-term reductions in pension obligations as a result of reduced benefits to new hires, the District continues to face significant financial challenges.

1. Low property tax generation.

The District relies on property taxes for the majority of its revenue now that its grant revenues have been expended and its recent benefit assessment terminated. The District's low share of property taxes is compounded by at least two issues noted below.

The RHFPD service area includes the City of Hercules that has extensively utilized redevelopment for reuse of a large portion of its developable properties. The creation of these Redevelopment Areas has reduced the property tax revenues that would otherwise have accrued to the District. The termination of redevelopment programs has not improved the District's revenue stream from the affected properties due to the high bonded debt and other financial obligations undertaken by the Redevelopment Agency that continue to divert property tax revenue. In Fiscal Year 2015-16, RHFPD shifted 29 percent to redevelopment. This condition will persist for the life of the bonded indebtedness that could extend several decades.

A second property tax constraint involves the ConocoPhillips oil refinery property annexed to the District in 1996. The District receives a share of the property taxes generated from the facility, but the County retained the base revenue at the time of the annexation and has only agreed to share a portion of the revenue generated above the 1996 levels. The refinery has also successfully sought to reduce its property tax assessed value, which reduces the District's revenues generated from

the site. At this time, the RHFPD receives some minor operational assistance from the refinery, but the costs of RHFPD service exceed the revenues it receives from the refinery.¹¹⁶ There is little likelihood that the County will re-negotiate a tax sharing arrangement more favorable to the District.

2. Increased annual expenditures due to the CCCERA's changes in actuarial practices and cost allocations.

Until 2009,¹¹⁷ the County “pooled” participants in the agency that spread the liabilities of smaller entities to all members of a larger pool. In 2009, CCCERA de-pooled the agencies and districts and established rates for each entity that would fully fund their retirement costs within a reduced period of time. The “de-pooling” reduced amortization periods, and interest earning assumptions effectively increased RHFPD’s annual expenditures for retirement obligations.¹¹⁸

The District’s workforce has fluctuated over the past 10 years, which has had an impact on the District’s retirement and post-retirement costs. The full costs of current retirees must still be funded, but by a significantly reduced budget. This has driven the per-employee contribution by the agency to about 90% of salary, which is significantly higher than ConFire’s contribution of 74% of salary.¹¹⁹ This high contribution rate reduces revenues available for non-retirement expenditures.

3. The RHFPD faces increased costs as a result of less than full contributions to the retirement and OPEB accounts.

The RHFPD has not been making the required contributions needed to fully fund its required annual contributions to its CCCERA obligations.¹²⁰ While the District’s payments have been sufficient to avoid significant growth in its liabilities, its liabilities limit opportunities for changes in governance.

For example, if the District were to consolidate with a neighboring district such as ConFire or a PERS retirement agency such as Pinole, there would be a substantial cost of refinancing RHFPD’s unfunded liabilities with CCCERA. To address this issue, a pension obligation bond (POB) would need to be sold to satisfy these obligations, which would add to annual RHFPD (or consolidated agency) expenditures. At this point in time, it is not possible to speculate whether a POB would reduce the District’s retirement costs adequately to offset the costs of the

¹¹⁶ MRG/BA interview with Chief Hanley, December 9, 2015.

¹¹⁷ Starting with the December 31, 2009 Actuarial Valuation, the CCCERA Board took action to de-pool CCCERA’s assets, liabilities and normal cost by employer when determining employer contribution rates (CCCERA Actuarial valuation and Review as of December 31, 2014, p. 16).

¹¹⁸ MRG/BA interview with Wrally Dutkiewicz, Compliance Officer, CCCERA, February 26, 2016.

¹¹⁹ CCCERA Actuarial Valuation and Review as of December 31, 2014; rates are for FY 16-17, and include normal and unfunded liabilities.

¹²⁰ MRG/BA interview with Wrally Dutkiewicz, Compliance Officer, CCCERA, February 26, 2016.

debt service on the debt if a lower-cost retirement system was accessed (in the case of consolidation with a city). It is likely that normal retirement costs would be lower under the PERS system; for example, Pinole's and El Cerrito's normal costs range from 12% to 20% of salaries; however, as noted above, the cost of pre-funding existing CCCERA pension obligations is likely a prohibitive prerequisite to leaving a CCCERA plan or to satisfying outstanding liabilities prior to consolidating with another CCCERA agency.

RHFPD LOCAL ACCOUNTABILITY AND GOVERNANCE

Local Representation

Table 17, below, lists the current Board of Directors for the RHFPD. Chairperson Bartke resigned in March 2016, and the District is seeking a replacement.

Table 17

* Resigned, March 2016

Service Agreements

RHFPD and other local fire agencies have entered into a number of agreements to augment existing services and help to jointly handle hazards that may be beyond the capability of any single agency.¹²¹ The agreements also help to ensure coordinated responses to wildland/interface incidents and to incidents on agency borders.

The RHFPD provides fire and rescue services to ConFire and CAL FIRE along the Highway 4 Corridor, including unincorporated Martinez, through a series of automatic aid and mutual threat zone agreements.

¹²¹ RHFPD 2012 Strategic Plan.

Return to Agenda

The RHFPD is dispatched by the Contra Costa County Regional Fire Communications Center; the RHFPD also provides 24-hour battalion coverage along with ConFire and the City of Pinole.

ConFire, Pinole and the RHFPD train together. Station 76 in Hercules serves as the Training Center for Battalion 7.

From February 2011 through June 2013, the RHFPD fire chief served as chief for the City of Pinole, and the District shared certain administrative costs with the City of Pinole.

RHFPD SERVICE AREA AND SPHERE OF INFLUENCE

Figure 5, below, shows the RHFPD boundary, which is coterminous with its SOI. In 2009, LAFCO deferred the SOI update for RHFPD pending the formation of a West County Ad Hoc Committee to address issues raised in the 2009 MSR; however, no committee was formed. No consolidation study or other efforts occurred subsequent to the 2009 MSR due to lack of interest on the part of the service providers.

Figure 5
RHFPD District Coterminous Boundary and Sphere of Influence

RHFPD DISADVANTAGED COMMUNITIES

As described in **Chapter 2**, a disadvantaged community is a community with 12 or more registered voters and an annual median household income that is less than 80% of the statewide annual median income. Median household income in 2014 was \$61,489.¹²² 80% of that amount equals \$49,190.

One community in Rodeo has been identified as a disadvantaged community. The area is within one mile of RHFPD Station 75, and therefore response times for the first-arriving engine company should meet or exceed Best Practice norms. However, if Station 75 closes as a result of revenue shortfalls, the next closest station would be Station 76, over two miles away. Times required for arrival of additional engine companies in the event of a structure fire would increase.

RHFPD FINANCING

The RHFPD budget, shown in **Table 18**, below, suffered significant reductions compared to FY 2008-09, when the 2009 MSR was prepared. The General Fund budget declined from \$6.1 million and \$2.9 million in reserves, to \$5.3 million and \$1.3 million in reserves in FY 2014-15; reduced Phillips refinery assessments contributed to declining revenues.¹²³

A SAFER grant helped to bridge budget shortfalls of \$1.4 million in FY 2014-15, and reserves were augmented by special benefit assessments, enabling the District to fund a total of 23 employees and continue to operate two stations.

The FY 2015-16 budget benefitted from growth in property tax-related revenues, as real estate values continued their recessionary recovery. The SAFER grant funding was similar to the prior year, however, benefit assessments were lower than the prior year.

As a result of the settlement of a lawsuit brought against the District's voter approved benefit assessment, the District will lose \$950,000 annually in FY 2017-18, which begins July 1, 2017. In addition, the SAFER grant will no longer provide funding. These two sources would account for a loss of over \$2.6 million annually. A structural deficit is likely to remain even if the District closes one station. The District has been setting aside the proceeds of its 2014-approved benefit assessment; over two years, this assessment reserve totals \$1.8 million, as shown below in **Table 20**.

¹²² <http://www.census.gov/quickfacts/table/PST045215/06>.

and Capital #4 (\$65,000) and #5 (\$65,000) in FY15-16.

(5) Levy Code Fee.
Capital expenditures not included.

(6) Excludes revenue from 2014 Benefit Assessment, which were
set-aside in reserves.

RHFPD Funding Sources

Relative to other fire service agencies, the RHFPD funds a smaller portion of its budget from property taxes. This is the consequence of the District receiving a very small share of property taxes as a consequence of the Prop. 13 process in 1978, which effectively penalized low-tax districts by memorializing low rates in perpetuity, and the District's offsetting efforts to fund acceptable service levels through the use of non-property tax revenues such as grants and benefit assessments.

Property Tax – Property tax represents about 50% of the FY 2015-16 budget. The District's property tax rate averages about 6% of each property tax dollar paid by property owners, the lowest rate of all fire districts in Contra Costa County; to compensate, the District sought grants and assessments to fill its funding gap. The District's total assessed value has not quite fully recovered to pre-recession levels due to real estate defaults, reduced refinery assessed value, and former redevelopment agency obligations. RHFPD lost 29 percent to redevelopment in Fiscal Year 2015-16. The District anticipates a nearly 10% increase in property tax revenues from FY 2014-15 to FY 2015-16 as a result of real estate market recovery.

Fees and Charges – Charges for services account for a relatively small, 1% to 2% share of the budget. The District is in the process of reviewing its policies fees charged regarding EMS services, and is considering expanding its charges to bill insurance companies of residents who receive transport and other medical emergency services.

Special Taxes and Benefit Assessments – On June 11, 2014, the District adopted a resolution levying a fire services assessment, generating about \$940,000, to supplement an existing assessment yielding about \$1.3 million annually. The new assessment was challenged by a resident's lawsuit, and the District entered into a settlement allowing collection of the new assessment through FY 2016-17 (ending June 30, 2017), after which the new assessment will expire.¹²⁴ The District has been accruing the revenue in a fund separate from the General Fund.

Grants – The District received a SAFER grant that extended over two years. The grant provides about \$1.3 million of funding for the FY 2015-16 year (and \$1.2 million the prior year), then terminates in future years. The District also received \$65,000 in FY 2014-15 from Phillips Refinery for District operations; no operating revenue from Phillips is included in FY 2015-16.

¹²⁴ Settlement and Release Agreement, signed by RHFPD Chief Hanley November 2, 2015.

RHFPD OPERATING EXPENDITURES

The RHFPD has experienced continued growth in expenditures, including labor and pension-related costs. The District has taken a number of steps to control these costs, as noted in the following sections.

Personnel Services

The District's budget funds 12 firefighters, one Battalion Chief, and one Fire Chief. The budget also pays for a reserve firefighter program, and for one part-time administrative services staff person. **Table 19**, below, shows salaries as established by the most recent MOU extension.¹²⁵ The salaries do not show the required deduction for OPEB (3.75% for "Other Post-Employment Benefits"). In addition, according to the MOU extension, all employees are responsible for their entire employee retirement contribution.

Table 19
RHFPD Monthly Salaries

	Step 1	Step 2	Step 3	Step 4
Firefighter				
Firefighter I	3,500	4,000	4,500	5,000
Firefighter II	5,268	5,532	5,809	6,099
Firefighter III	6,692	7,027	7,379	7,748
Fire Engineer	7,375	7,743	8,130	8,537
Fire Captain	8,339	8,755	9,193	9,653

Source: Agreement between RHFPD and I.A.F.F. Local 1230, Nov. 6, 2013

RHFPD Firefighter III Step 4 salaries are approximately 5% higher than top step firefighter salaries for ConFire.¹²⁶ This comparison does not account for other components of total pay that may include medic certification, longevity, and overtime.

RHFPD Retirement Expenses

Retirement benefits are provided through CCCERA. Employees hired before January 1, 2013 receive benefits based on a formula commonly referred to as

¹²⁵ Agreement Between RHFPD and I.A.F.F. Local 1230, November 6, 2013.

¹²⁶ ConFire employees also pay 100% of the CCCERA basic employee benefit contributions.

Return to Agenda

3.0% at 50, based on the single highest year of salary, and a 3% COLA. New employees hired on or after January 1, 2013 receive 2.7% at 57.¹²⁷

RHFPD's average employer contribution for FY 2016-17 is 89.27% of estimated payroll (salaries), or a payment of \$1,977,156 annually. The estimated annual payment increased about \$200,000 over the prior year, an 11% increase.¹²⁸

CCCERA's overall average employer contribution for FY 2015-16 is 40.06% of payroll, down from 43.58% from the prior year as a result of improved investment returns.¹²⁹

The District asked CCCERA to lower its annual payments on unfunded retirement debt by extending the amortization schedule to 30 years; CCCERA met with the RHFPD and agreed to allow the District to make an annual payment sufficient to prevent additional interest accruals on unfunded balances, but not sufficient to amortize the unfunded balance.

RHFPD Health Insurance Benefits and OPEB

The District provides health insurance to current and retired employees. No dental, vision, or life insurance benefits are provided. The District contracted in 2008 with the California Employers' Retirement Benefit Trust (CERBT). In FY 2011-12, the District implemented a 3.75% employee contribution to the OPEB Trust Fund. Since then, the employee contributions have continued, and the District has been funding its annual benefit costs on a "pay as you go" basis each year.

The last OPEB valuation was prepared in January 2014. The report indicated that the District's Unfunded Accrued Actuarial Liability (UAAL) would total \$11.3 million in FY 2013-14, resulting in an Annual Required Contribution (ARC) of \$903,000 for FY 2014-15.¹³⁰ The report projected the UAAL to grow to \$12.1 million by FY 2015-16, assuming no pre-funding payments were made in the interim, increasing the ARC to over \$1 million. The District's FY 2015-16 budget shows no payments, in addition to a required 3.75% employee contribution towards the ARC, allowing the UAAL to grow.

The District's "pay as you go" health insurance costs totaled \$316,000 for retirees in the FY 2015-16 budget, and \$348,000 for active employees; the total, \$664,000, is about 38% of salaries.

¹²⁷ Side Letter of Agreement to Extend MOU Between RHFPD and I.A.F.F. Local 1230, November 14, 2012. Employee contributions are those established by AB 340 and AB 197.

¹²⁸ CCCERA Actuarial Valuation and Review as of December 31, 2014 (p. v).

¹²⁹ December 31, 2014 Actuarial Valuation, Adopted by the Board on July 8, 2015, CCCERA.

¹³⁰ RHFPD Retiree Healthcare Plan, June 30, 2013 Actuarial Valuation Final Results, Bartel Associates, LLC, December 13, 2013 (see Results, p. 18).

RHFPD CAPITAL ASSETS, CAPITAL FUNDING SOURCES AND EXPENDITURES

The RHFPD has a number of sources available for funding capital improvements; however, it is likely that most of the current fund balances shown in **Table 20**, below, will be needed as reserves for operations to buffer the impact of reduced assessment and grant revenues.

Grants and Contributions – The Phillips 66 Refinery in Rodeo provided capital funding to purchase and equip a new rescue pumper in FY 2013-14.¹³¹ The subsequent two years' budgets show contributions of \$50,000 and \$65,000 towards purchases totaling \$296,000.¹³²

Developer Fees – Developer fees are collected by the City of Hercules on behalf of the District. The fee for a single-family residence is \$1,029; fees are also collected from multi-family and commercial developments.¹³³ According to a 2009 RHFPD fee schedule, impact fees in Rodeo are \$1,012.¹³⁴ Projected impact fee fund balances will total \$117,000 by the end of FY 2015-16.

The RHFPD appeared before the County BOS Finance Committee on March 16, 2016 and requested Prop 172 funding; these are funds generated by a statewide sales tax that are distributed to counties for public safety purposes. As a matter of policy, Contra Costa County historically has allocated these funds to the Sheriff-Coroner and the District Attorney, and the County Administrator's response to the request was to recommend against the requested allocation.¹³⁵

RHFPD RESERVES AND OTHER FUNDS

As indicated in **Table 20**, the RHFPD projected FY 2015-16 budget shows a minimal ending General Fund balance of approximately \$50,000. However, the 2014 assessment fund is projected at \$1.9 million, or about 32% of expenditures. It is likely that a majority of this balance will be required to offset the SAFER grant funds that provided \$1.3 million of funding for operations in FY 2015-16, but which

¹³¹ RHFPD Basic Financial Statements for the Year Ended June 30, 2014, p. 12.

¹³² A condition of approval (COA 84) for a project at the Phillips 66 Refinery was originally designated for the purchase of a Hazardous Materials Response Unit. The COA was changed by the BOS at the request of Phillips 66, and the amount was increased - the refinery agreed to pay half the cost of a rescue pumper with a larger capacity pump, foam and rescue capability to better serve the District.

¹³³ Approved by Resolution 10-088, effective July 1, 2010; downloaded from City of Hercules website January 30, 2016.

¹³⁴ Correspondence from RHFPD to MRG/BA (March 29, 2016).

¹³⁵ Memorandum from Timothy Ewell, Senior Deputy County Administrator, to the Finance Committee, March 16, 2016. According to the Finance Committee record of action, the BOS Finance Committee did not allocate funds to the RHFPD, noted that there must be a plan for going forward, suggested the RHFPD seek city funding, and requested that the County Administrator meet with the RHFPD Chief to discuss options for city funding similar to the ECCFPD Task Force.

have been fully utilized. The remaining fund balance will be insufficient in FY 2016-17 to fully offset the absence of SAFER grant funds and the pending termination of 2014 benefit assessment revenues, an additional loss of over \$900,000 annually beginning July 1, 2017.

Table 20
RHFPD Fund Balances FY 2015-16

Funds	Starting Balance	Revenues or Transfers In	Expenditures and/or Transfers Out	Ending Balance

RHFPD GROWTH AND POPULATION PROJECTIONS

A number of significant new projects are anticipated to open in the City of Hercules over the next one to two years; however, because of the continued diversion of revenues to repay redevelopment obligations, the City's budget shows minimal

Return to Agenda

growth in property tax revenues. Projects expected to open within the next two years include:¹³⁶

Victoria Crescent – 43 residential units;

“Parcel C” – 144 residential units;

Sycamore Crossing – 130,000 sq. ft. of retail and a gas station; and

Market Hall – 90-room hotel, gas station, drug store, and drive-thru restaurant.

These projects will contribute to the residential growth shown in **Table 21**, below, as well as contribute to employment and visitor growth in the RHFPD.

Table 21
Projected Population Growth, RHFPD 2015-2025

	2015	2020	2025
Hercules (1)	26,500	28,900	31,300
Rodeo (2)	<u>6,500</u>	<u>6,628</u>	<u>6,771</u>
TOTAL (3)	33,000	35,528	38,071
Annual Avg. % Change		1.5%	1.4%

Source: ABAG Projections 2013

(1) ABAG forecast is shown for 2015; Cal. Dept. of Finance, E-1 Population Report, 2015 estimates a slightly lower 2015 population for Hercules.

(2) Rodeo 2015 assumed to equal District population estimate less Hercules population. Rodeo projections assume average rates for unincorporated areas Countywide.

(3) RHFPD 2015 estimate is from RHFPD response to LAFCO Request for Information.

According to the RHFPD, the Phillips refinery is planning new projects that would increase the RHFPD’s service responsibilities.¹³⁷

¹³⁶ Long Range Forecast, Staff Report to the Finance Commission meeting, November 23, 2015.

¹³⁷ RHFPD Response to LAFCO Request for Information.

RHFPD SERVICE DEMAND

Table 22, below, summarizes calls for service for the RHFPD. Call volume is below Countywide averages; however, if one of its two stations closes, the calls per station will effectively double.

Table 22
RHFPD Calls For Service, 2014

Station	2014			Total
	Fire (1)	EMS (2)	Other (3)	
Station 75	14	164	85	263
Station 76	114	1,081	701	1,896
Total	128	1,245	786	2,159
% of Total	6%	58%	36%	100%

Source: RHFPD Response to LAFCO Request for Information.

(1) Codes 100-151.

(2) EMS include vehicle accident with injuries.

(3) Includes "611: dispatched and cancelled en route".

RHFPD INFRASTRUCTURE NEEDS OR DEFICIENCIES

The 2009 MSR rated the two RHFPD stations as being in "good" condition. Fire Station 75 was originally designed in 1927 and has had one significant renovation in 1995. Fire Station 76 (owned by the City of Hercules) was dedicated in 1991.

Though functional, the two stations do not meet current "essential services" and "best practices and design" standards, according to the District.¹³⁸ The District's Business Plan includes a strategy to construct a new fire station to replace Station 75. The facility would consolidate all Fire District operations on one centralized campus and improve response times.¹³⁹

Attached to Fire Station 76 is a modular training classroom, fitness and storage area. The grounds of Station 76 are utilized to house a mobile training tower, a firefighting live burn trailer, and a fire prevention safety house. Most recently,

¹³⁸ RHFPD Strategic Plan 2012.

¹³⁹ RHFPD Business Plan 2012-16.

Return to Agenda

each Fire Station is being upgraded with solar panels and other energy efficient features to reduce power costs.

The District's Business Plan includes implementation of the elements and recommendations of the Fleet Management Study, including Best Practices for apparatus replacement, repair, troubleshooting and preventative maintenance.¹⁴⁰

RHFPD SERVICE ADEQUACY**Response Times**

The RHFPD currently does not have an adopted response time standard. According to the District, 90% of responses¹⁴¹ were within 9 minutes and 43 seconds in 2014, which significantly exceeds national standards of five to six minutes. This response time is nearly the longest of all Contra Costa fire service agencies, second only to ECCFPD.

While the total land area served by the two stations is not excessive, the geography of the District imposes additional travel times. Many of the areas served by the District require access via Interstate 80, which can impose additional delays during commute times, as well as less direct routes due to the multiple valleys that cross the District.

ISO Ratings

Prior to 2014, RHFPD's ISO was reported to be 3/9; in 2014, the classification was changed to 2/2X.¹⁴² The second factor of the split classification, a new system adopted by ISO in 2014, applies to properties within five road miles of a fire station, but beyond 1,000 feet from a creditable water supply.

RHFPD MSR DETERMINATIONS**1. Growth and population projections for the area.**

Growth in the RHFPD is expected to increase as the region recovers from the recession. Projections indicate growth of 1.4 to 1.5% annually over the next 10 years, or about 480 new residents annually. This growth will increase calls for service and potentially reduce resources required for responses to other areas when multiple calls occur. Response times, which currently fall below national standards, will worsen, particularly if one of the RHFPD's two stations is closed.

¹⁴⁰ RHFPD Business Plan 2012-16, Strategy 2013.4.

¹⁴¹ Response times measured from time of dispatch to "on scene."

¹⁴² RHFPD response to LAFCO Request for Information.

2. The location and characteristics of any disadvantaged communities within or contiguous to the SOI.

One community in Rodeo has been identified as a disadvantaged community. The area is within one mile of RHFPD Station 75, and therefore response times for the first-arriving engine company should meet or exceed Best Practice norms. However, if Station 75 closes as a result of revenue shortfalls, the next closest station would be Station 76, over two miles away. Times required for arrival of additional engine companies in the event of a structure fire would increase as well.

3. Capacity of public facilities, adequacy of public services and infrastructure needs or deficiencies.

Though functional, the two RHFPD stations do not meet current “essential services” and “best practices and design” standards, according to the District.¹⁴³ The District’s Business Plan includes a strategy to construct a new fire station to replace Station 75; however, current revenues, particularly given pending reductions in assessment and grant revenues, will not be sufficient to construct the new station.

RHFPD response times are among the longest in the County, second to those of ECCFPD. Closure of Station 75, which could occur due to financial constraints, will worsen response times. First responder times will increase, and the RHFPD will become increasingly reliant upon aid from other agencies, increasing the probability that adequate response, e.g., to a structure fire, which requires a minimum of 15 firefighters, will not arrive in time to contain a fire and minimize damage to property and risk of injury to residents.

4. Financial ability of agencies to provide services.

Within the next one to two years, RHFPD revenues will decline by over \$2.6 million, or 40% of its revenues, due to its SAFER Grant ending and the elimination of its recently adopted 2014 benefit assessment. These reductions will force the closure of Station 75, resulting in a significant adverse impact on service levels. The District can apply for another SAFER grant, however, the likelihood and timing of receiving another grant is unknown. A subsequent SAFER grant application cannot be submitted for the same activities and the same personnel who were hired under the current grant.

Growth within the District’s boundary is occurring in Hercules, particularly its former redevelopment area, as the economy improves. However, because of ongoing debts that survive the elimination of the redevelopment agency, property tax revenues that would otherwise accrue to the RHFPD from assessed value growth will be diverted to continue to pay off redevelopment debts.

¹⁴³ RHFPD Strategic Plan 2012.

5. Status of, and opportunities for, shared facilities/services.

The fire providers in the West County have established informal and effective cooperative agreements to address the fire and emergency medical services needs of their constituent communities. The RHFPD, City of Pinole and ConFire all participate in the Battalion 7 configuration sharing Battalion chiefs who manage and coordinate fire and medical emergency activities.

If all West Contra Costa fire agencies acknowledge and implement improved cooperation, all participating agencies will benefit financially, and their communities will benefit by receiving an improved level of fire and rescue services. For this approach to work, it is essential that all agencies recognize the value of: implementing meaningful shared service agreements; cooperative sharing of scarce resources; and elimination of unnecessary duplication of special services. Agencies should agree to: share training management and delivery; improve dispatch and emergency communication functions; and share senior management and leadership positions, as practical.

6. Accountability for community service needs, including governmental structure and operational efficiencies.

The RHFPD follows generally accepted practices and legal requirements for meeting noticing procedures. Meeting agenda and packets are posted on its website for 2016, including minutes from meetings two months prior. Archival access to meeting minutes from 2011 is available on another section of the website.

The Board requested preparation of summary financial information, a draft of which is included in the January 16, 2016 meeting packet. Financial reports, including a 2014 financial report, are posted on the website, along with prior years' budgets and budget presentation materials, and employee information.

The District prepared a Business Plan and a Strategic Plan in 2012 that provide clear direction and strategies; however, implementation has been stymied by the District's lack of financial resources.

RHFPD Governance Options

The 2009 MSR considered a number of governance options, however, no action has occurred since 2009 related to changes in governance. Following is a review and update of potential options.

a. Annexation of area served by Crockett-Carquinez FPD – While there would be benefit to a unified command structure and some shared internal support services, the cost reductions (net of revenues) to the RHFPD would not be significant enough to overcome RHFPD's financial shortfalls. Increased financial and operational efficiencies, in conjunction with other actions, could improve the long-term financial sustainability of RHFPD; however, this option does not appear

Return to Agenda

to be an area of interest to either district at this time. Crockett-Carquinez FPD, as an agency relying on volunteers, does not provide a significant increase in access to funding, and a revenue measure would bring limited revenues; the RHFPD and Crockett-Carquinez FPD have held multiple discussions regarding this issue; however, RHFPD does not have the staff to support fire prevention, training or fleet management for Crockett-Carquinez FPD.¹⁴⁴

b. Consolidation among West County fire providers – Historically, major impediments to implementing this recommendation have included political, financial, operational, employee compensation and training differences as well as an expressed lack of interest. The recent proposal by ConFire for a “shared Chief” position for the City of Pinole, RHFPD and ConFire is a significant indicator that the agencies are currently considering a cost-effective, inter-agency solution to the overhead costs for the three agencies. If implemented, this initial step, followed by the recommendations earlier in this report could decrease operational costs for the agencies significantly and materially improve service. Significant issues remain to be addressed, including pay and benefit differentials, pension costs and unfunded OPEB obligations between RHFPD, ConFire and the City of Pinole are a few of the issues that would need to be addressed before a complete West County consolidation were enacted.

As is the case with ECCFPD, a consolidation of the RHFPD with ConFire, or dissolution of the RHFPD and expansion of ConFire’s SOI to include the RHFPD territory, would require the cooperation of the ConFire governing board, which is the Contra Costa County BOS; however, the change potentially could degrade the service levels to the existing ConFire service area, and would not contribute a significant increase in revenues, which would likely be unacceptable to the BOS. The County does not currently subsidize the ConFire activities and does not currently have plans to do so. If the RHFPD requested consolidation, or dissolution occurred, it is likely that new special taxes in the RHFPD area would be needed to fully fund the current two RHFPD stations, as well as fully fund all RHFPD financial obligations, including pension and OPEB obligations.

Although a “grand solution” that includes a consolidation or annexation is unlikely to occur in the near-term, more extensive “functional” consolidation, which does not require governance or boundary changes, could provide a more efficient and expedient application of resources in the West County area. Functional consolidation does not offset the inherent deficiencies of service that exist in the RHFPD as a result of unfunded service demands and closed fire stations. In conjunction with other actions, functional consolidation could improve the long-term financial sustainability of the RHFPD.

¹⁴⁴ Correspondence from Chief Hanley to MRG, March 23, 2016.

7. Any other matter related to effective or efficient service delivery.

No additional matters have been identified at this time.

RHFPD MSR RECOMMENDATIONS

Addressing RHFPD's service and financial challenges, and assuring that its two station service configuration remains intact, requires at least two strategies: (1) RHFPD should secure a new funding source to replace its grant revenues and benefit assessments; and (2) new levels of cooperation among West Contra Costa fire agencies can help address individual agency deficiencies and improve services to the region, thereby contributing to RHFPD operational efficiencies, improved service levels, and financial sustainability.

1. Pursue New RHFPD Funding Sources.

The RHFPD should pursue a voter approval of a special tax measure, which would require a two-thirds voter approval. The tax revenues, in addition to potential cost savings from operational efficiencies, could significantly improve the RHFPD's ability to sustain adequate levels of service.

As part of the planning efforts for a tax measure, the RHFPD should participate in an SOC Study for the West County area to identify operational improvements and other measures to ensure efficient and cost-effective use of existing and new financial resources.

2. Create a Battalion 7/West County Fire and Emergency Services Task Force.

It is recommended that a Battalion 7/West County Fire and Emergency Services Task Force be established with representatives from all of the involved jurisdictions. The Task Force would be required to meet regularly to develop, review and implement a regional SOC Study, apply for grants, refine operational practices, and develop cooperative agreements to improve services through collaborative efforts described above in "No. 5. – Status of, and opportunities for, shared facilities/services."

3. Undertake a West County Standards of Cover Study

The study would objectively review the current level of fire and rescue services in the studied communities. The SOC analysis will identify the service area's strengths, deficiencies and areas of overlap. The results of the SOC study could be used to improve the coordinated services in West County and form the basis for implementation of further service efficiencies, as well as to document service standards and improvements that support the RHFPD request for special tax revenue from voters.

RHFPD SOI UPDATE

The existing SOI for the RHFPD extends into the San Francisco Bay; this area in the Bay was considered for detachment as part of the options noted in the 2009 MSR. The 2009 MSR also considered detachment of the refinery area.

LAFCO deferred SOI updates for the RHFPD pending the formation of a West County Ad Hoc Committee to address issues raised in the 2009 MSR; however, no committee was formed. No consolidation study or other efforts occurred subsequent to the 2009 MSR due to lack of interest on the part of the service providers.

Agency Proposal

The RHFPD does not anticipate changes to its SOI in the next five years.¹⁴⁵

No agencies expressed interest in consolidation with RHFPD, nor in serving as a successor agency to the responsibilities of the RHFPD in the event of its dissolution.

SOI Determinations

1. The present and planned land uses in the area, including agricultural and open-space lands.

Following preparation of the 2009 MSR, many of the planned land uses, including those planned as part of the redevelopment of the Hercules Town Center, the waterfront in Hercules and Rodeo, and other infill development, were stalled by the recession. Renewed development activity is occurring with the improved economy, despite the elimination of redevelopment agencies in California.

Other existing uses within RHFPD, noted in the 2009 MSR, are primarily residential, commercial, industrial, and open space. Residential areas are concentrated in the western portion of the District's land area, with higher densities generally located west of I-80. Commercial areas are located along highways and major roads, but also concentrated in the town centers. Industrial activity is located along the coastline and consists of a large industrial park and the headquarters of a biological research company in Hercules, and the ConocoPhillips San Francisco Oil Refinery in Rodeo. Open space is located in the eastern half of the District's land area.

2. The present and probable need for public facilities and services in the area.

Renewed growth and development within the RHFPD service area will increase the need for adequate RHFPD facilities and services. Closure of one of its two fire

¹⁴⁵ RHFPD Response to LAFCO Request for Information.

stations, which is imminent in the absence of new funding sources, will have a significant adverse impact on service levels.

3. The present capacity of public facilities and adequacy of public services that the agency provides or is authorized to provide.

With two staffed stations, the RHFPD is generally able to provide adequate services to its service area. However, increased growth and development in Hercules, including potential projects at the ConocoPhillips Refinery, will add to the service demands currently experienced by the District. As noted above, closure of one of its two stations due to inadequate financial resources will have a significant adverse impact on response times and ability to respond to multiple calls simultaneously. The need for aid from adjacent agencies will increase, and the ability to provide aid to other agencies will be diminished.

4. The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.

No significant change in communities of interest has occurred since the 2009 MSR; those communities of interest include the City of Hercules and the unincorporated Rodeo area, along with the surrounding Cities of Pinole and San Pablo, the unincorporated communities of Bayview, Tara Hills, El Sobrante, North Richmond, Crockett, and Port Costa.

5. The present and probable need for those public facilities and services of any disadvantaged communities within the existing SOI.

One community in Rodeo has been identified as a disadvantaged community. The area is within one mile of RHFPD Station 75, and therefore response times for the first-arriving engine company should meet or exceed Best Practice norms. However, if Station 75 closes as a result of revenue shortfalls, the next closest station would be Station 76, over two miles away. Times required for arrival of additional engine companies in the event of a structure fire would increase as well.

6. The nature, location, and extent of any functions or classes of services provided (special districts only).

RHFPD provides fire and emergency medical services including paramedic services. RHFPD contracts with ConFire for dispatch and radio services. AMR, a privately owned ambulance company, provides ambulance transport services.

RHFPD SOI Options and Recommendations

As indicated in the “RHFPD Governance Options” discussion, significant annexations or consolidations among West County agencies are unlikely due to perpetuation of current financial shortfalls, as well as a lack of interest among agencies.

[Return to Agenda](#)

While the RHFPD currently is providing adequate services, increased demands as well as the impending loss of over \$2 million in grant and assessment revenues will force the closure of one of its two stations, significantly lengthening response times, reducing the ability to respond to multiple simultaneous incidents, and reducing the District's ability to provide needed aid to nearby agencies. Affirmation of the current RHFPD SOI would be inconsistent with the near-term risk of significant service inadequacies if only one station is staffed.

However, the District is actively engaged in seeking new sources of revenue in order to staff its second station and retain adequate service levels. Therefore, it is recommended that the current RHFPD SOI be designated as "provisional," requiring that the RHFPD report back to LAFCO on at least an annual basis to inform LAFCO as to RHFPD's progress in implementing the recommendations of this MSR, and in meeting the objectives of adequacy of services and long-term financial sustainability.

Alternatively, LAFCO could consider a "zero SOI" designation, signaling that the District's services will ultimately be provided by another agency. However, there are no current prospects for service by another agency given RHFPD's service deficiencies, financial obligations and impending reductions in funding. Through a successful combination of actions as recommended in this MSR, including support for new taxes and increased collaboration among West County agencies, the District will be in a much better position of financial sustainability, and potential SOI changes will be more viable at that point in time.

8. REVIEW OF AID AGREEMENTS

MUTUAL AID PLAN

All fire agencies in the County have signed the California State Master Mutual Aid Agreement that is administered by the State Office of Emergency Services. All agencies have also signed the Contra Costa County Fire Chiefs' Mutual Aid Plan, which was last updated in 1997. The County Fire Chiefs are assigned the responsibility to establish and manage the County Mutual Aid Plan that governs day-to-day interagency cooperation when an emergency exceeds the operational capability of any fire agency, by the State Office of Emergency Services, under the State Master Mutual Aid Agreement.

To activate the Mutual Aid Plan, the incident commander will contact the communication center and request additional fire personnel and equipment. The Contra Costa Fire emergency communication center would then be notified of the request, and using the County Mutual Aid Plan, identify which agency has the resources to fulfill the specific request, and contact the agency in accordance with the County Mutual Aid Plan. The agency that is being requested to respond is not required to respond, but voluntarily determines if its resources can be sent to the emergency without compromising that agency's ability to protect the people and communities in its primary service area.

AUTOMATIC AID

Automatic aid agreements are different and distinctive in every case. Each agency enters the discussions with potential automatic aid partners with its interests and needs. Seldom are automatic aid agreements a one-for-one exchange of like services. In some cases an agency has a difficult service area in terms of response times, and its neighboring agency is in a better position to serve that area, and the agency may need additional fire engines or a truck company that its neighbor can provide. These agencies can both be satisfied with the agreement even if it does not appear to be a one-for-one exchange.

Table 23, below, indicates differences in automatic aid received compared to aid provided. In some instances, the disparity may stretch an agency's resources to the point where it must reduce available services in order to maintain its own service area standards, as exemplified by recent changes in the agreement between ConFire and ECCFPD. Similarly, there are concerns that closure of one of RHFPD's two stations will adversely affect aid responses within West County, as noted below.

Table 23
Summary of Incidents where Aid was
Provided vs. Aid Received, 2014

1) El Cerrito Fire Dept., 4/11/16. Includes Kensington (not separately reported).

2) SRVFPD, 12/8/16.

In response to an information request for the purpose of this MSR, the City of El Cerrito's fire department provided information for aid to and from Kensington.

Return to Agenda

Call data is reported monthly to the KFPD Board; however, the individual call data for calls to/from Kensington are not separately totaled for Kensington. The information indicated that the Kensington Engine 65 responded to 306 incidents in Kensington, and to 302 incidents outside of Kensington. A total of 139 units from the Cities of El Cerrito and Richmond responded to 57 incidents in Kensington.¹⁴⁶

In addition to the County Mutual Aid Agreement, which is a reactive process that occurs while an emergency is in progress, automatic aid agreements have been developed and agreed upon between specific fire agencies that are generally in close proximity to each other. Automatic aid agreements differ from Mutual Aid Agreements in that agencies agree in advance of an emergency occurring to provide assistance upon the report of an incident requiring an appropriate response by a Fire agency.

In Contra Costa County, every fire agency is party to at least one, and often, multiple automatic aid agreements, as illustrated in **Table 24**, below. In some instances, a neighboring agency's fire personnel and apparatus are located closer to the emergency than the agency having jurisdiction for the area in which the emergency is occurring. In other cases, the neighboring fire agency might send one or more resources to supplement the agency having jurisdiction as part of a multi-apparatus response, such as would occur for a report of a working structure fire, vegetation fires, or a multi-vehicle accident, or a hazardous material incident.

In October of 2006, the agencies that contract with the Contra Costa Regional Fire Communications Center (CCR FCC) entered into a "Boundary Drop" agreement. This agreement was approved by the County-wide Fire Operations Committee, a subordinate committee of the Contra Costa County Fire Chief's Association. The agreement was put into effect quickly to align with a CCR FCC CAD upgrade. Presently, there is no written agreement.

The review of the automatic aid agreements signed by the various Fire agencies in the County appear to be monitored and changed on a regular basis as needed.

REFINERY FIRE BRIGADES

In 1980, several refineries signed a cooperative mutual aid agreement, known as the Petro-Chemical Mutual Aid Organization (PMAO). This emergency response cooperative was formed with the purpose of providing materials and equipment during an emergency. Presently, all four refineries, Dow Chemical, the Valero refinery (in Benicia), ConFire, and West Sacramento Fire are participating members. PMAO meets monthly. Emergency services include specially trained personnel, high capacity fire pumps, and large quantities of firefighting foam.

¹⁴⁶ Correspondence from Chief Maples, City of El Cerrito Fire Department, April 19, 2016.

These resources are also available to municipal fire agencies for large petro-chemical incidents through mutual-aid requests. The PMAO agreement is not integrated into the County Mutual Aid Plan.¹⁴⁷

WEST COUNTY AGREEMENTS

Battalion 7

The Battalion 7 “shared resources agreement” is an operational agreement, which includes the following fire departments: City of Pinole, ConFire (San Pablo and other unincorporated pockets) and RHFPD. Each of the three partner agencies provides an operational Battalion Chief to cover one of the rotating three 24-hour shifts. Each 24-hour Battalion Chief is responsible for the operational activities of the on-duty personnel from all three separate fire agencies.

Although the other West County fire agencies, specifically Crockett-Carquinez FPD, El Cerrito, Kensington FPD and Richmond participate in mutual and automatic aid agreements, they each operate completely independently of each other, and of the Battalion 7 agencies, with the exception of some operational training and the actual emergency response as dictated by separate automatic aid agreements.

The agencies in West Contra Costa County, although they all actively participate in mutual and automatic aid agreements, do not have a single set of unified operational guidelines to govern interagency operations. However, all of the West County fire agencies are aware of each other's basic operating principles and they follow the County Operations agreements and policies including: two in/two out; fire ground communications; rapid intervention crew (RIC); personnel accountability; high-rise structure response; and freeway response.

The City of Pinole – Administered by the Pinole Fire Chief, the City provides fire and rescue services for the Tara Hills, Bayview, Montara Bay Park¹⁴⁸ and the Alhambra Valley corridor (formerly the Pinole Fire District). This is a cooperative agreement with ConFire.

Emergency Dispatch and Communications – Fire agencies are dispatched by two different emergency communications centers, one operated by the City of Richmond Police Department – used by the El Cerrito and Richmond Fire Department – and the other, operated by ConFire, which provides dispatch services for all of the other West County Fire agencies.

A single dedicated fire communication center, responsible for primary dispatch and incident coordination, also referred to as “single point ordering,” would provide a needed operational improvement in the West County operations area. The current impediment to creating a desired single point of ordering communications rests with the City of Richmond. If the Richmond Fire Department were to leave the current City public safety dispatch center, which is operated by the Richmond Police Department, the Fire Department would still be required by the City of Richmond to contribute funding towards 18% of the operating costs of the City’s

¹⁴⁸ Montara Bay Park is northeast of Point Pinole Regional Shoreline, southwest of Pinole.

dispatch center. The San Ramon Valley Fire Protection District's communication center acts as the back-up communication center to ConFire Communications.

Impact of Closure of RHFPD Station

Based on the RHFPD's prior experience, there will be delayed responses within RHFPD, the Battalion 7 response area, and in the Crockett-Carquinez FPD. In the event of a fire or other significant emergency incident, another West County Fire agency will be called upon to fill the vacancy in the response dispatch call out order. These vacancies result in faster drawdown of the available Fire resources in the Battalion 7 area of West County. Historically there has existed a "quid pro quo" reciprocal service arrangement where the participating agencies in Battalion 7 automatically provide two fire companies and a Battalion Chief to certain types of emergencies, like structure fires. The City of Pinole Fire Department no longer has that response capacity, since the closure of one of its fire stations in 2010. The RHFPD will face the same limitation when its Station 76 is closed.¹⁴⁹ and it returns to a one station configuration.

The Crockett-Carquinez FPD is anticipating an increase in emergency response requests by the RHFPD if one of the two RHFPD fire stations is closed. The increased service level requested by the RHFPD service area could significantly impact the response times to other emergency calls within the Crockett-Carquinez FPD.

One mitigation to the closure of the fire station in RHFPD would be for the Crockett-Carquinez FPD to cease its practice of sending a fire engine to cover the remaining RHFPD fire station when the station is uncovered during an RHFPD emergency response.¹⁵⁰ This was an adjustment to the West County automatic response plan that ConFire and Crockett-Carquinez FPD employed the previous time RHFPD closed one of its two fire stations. The reciprocity basis for the automatic aid services between the Districts would be nullified due to the RHFPD's inability to respond to a neighboring jurisdiction's need for coverage for a vacant station.

This potential lack of staffing at RHFPD's one station during a response will adversely affect response times to other parts of RHFPD, and eliminate the ability for an engine company to provide aid to other agencies from the vacant RHFPD station. In addition to response times increasing, when more than one fire engine is assigned to an emergency response, the strategy and tactics employed at the emergency scene will need to be altered to reflect the reduced number of fire personnel on scene to mitigate the emergency.

¹⁴⁹ Chief Hanley, RHFPD, correspondence with MRG, March 21, 2016.

¹⁵⁰ Chief Littleton, Crockett-Carquinez FPD correspondence with MRG, March 24, 2016.

The ability of the RHFPD to conduct the multiple firefighting evolutions,¹⁵¹ including water supply; fire attack, search and rescue, ventilation and other necessary tasks, will be severely compromised, largely due to the lack of on-site Fire personnel due to increased response times when services are provided from distant stations.

CENTRAL COUNTY AGREEMENTS

ConFire and SRVFPD have added portions of ConFire’s response area in Walnut Creek as the result of the closure of a ConFire station in 2013.¹⁵²

The Fire Chiefs from the ConFire and SRVFPD support the current automatic aid response plan for the Central Contra Costa area. Should the situation change, both Chiefs and agencies agree to meet and discuss the benefits and challenges related to the current automatic aid plan and to revise their agreement as needed to ensure that the emergency response needs of that area are met to the satisfaction of each of these separate Fire Departments.

Moraga Orinda Fire District (MOFD), in addition to its previous automatic aid agreements with ConFire, CAL FIRE and East Bay Regional Parks, has recently entered into an automatic aid agreement with the City of Berkeley to provide improved emergency response to portions of Tilden Park. Berkeley Fire responds as the closest resource into portions of Tilden park when their (ALS) Engine is available from their fire station on Shasta Road (Berkeley Station-7). MOFD reciprocates with an agreement to cover Berkeley Station-7 in the event of a 2nd-Alarm (or greater) fire in Berkeley if MOFD has sufficient resources available.

EAST COUNTY AGREEMENTS

The ECCFPD has relied on ConFire for mutual aid and assistance, which has been reduced pursuant to a revised automatic aid agreement. According to the agreement revised in 2015, ConFire will no longer respond automatically to non-critical medical emergencies unless ECCFPD resources are unavailable.¹⁵³

¹⁵¹ Evolutions are defined as: “Uniform sequence of practiced steps by squad carrying out common tasks such as selection and placement of ladders, stowing hoses, putting hoses and tools into service in particular patterns; intended to result in predictability during emergencies” (Glossary of Firefighting, https://en.wikipedia.org/wiki/Glossary_of_firefighting#E).

¹⁵² ConFire Station #4 was closed in January 2013 (Broschard, April 18, 2016).

¹⁵³ Automatic Aid Agreement for Exchange of Fire, Rescue, and Emergency Medical Services between the Contra Costa County Fire Protection District and the East Contra Costs Fire Protection District, June 1, 2015 Agreement, revised August 24, 2015.

[Return to Agenda](#)

Appendix A

FIRE SERVICE RESPONSE ADEQUACY

Fire Service Response Adequacy

In well-planned and properly funded fire agencies, fire stations are located strategically throughout the community in order to place fire apparatus within acceptable response distances to the areas that the fire resources are expected to serve. If a fire department does not have sufficient fire apparatus and personnel available to respond to a moderate structure fire in time to suppress the fire and keep it from reaching the flashover stage, the fire will spread throughout the structure and could threaten neighboring homes and other structures.

Response time is one of the most important measurements of the fire department performance.

Two commonly referred to criteria used to assess the adequacy of the fire department's response times are:

1. Fire: Fire response focuses on the time that elapses between the moment the fire originates to "flashover" in a structure fire. Flashover is defined as the point where a fire grows beyond the control capability of the first alarm fire department response.

The National Fire Protection Agency (NFPA), an international non-profit organization established to increase fire and electrical safety, administers over 300 applicable codes. NFPA developed NFPA 1710 as an industry standard for the deployment of fire suppression operations to ensure safe and effective fire service operations. That Standard stipulates that the first fire engine should arrive to 90% of emergency calls within a range of 6:15 and 6:45 minutes. It is recognized that the NFPA 1710 Standard is the optimal nationally and is clearly not regularly achieved in Contra Costa County fire agencies.

2. Emergency Medical Service (EMS): EMS focuses on the time from the onset of a life threatening medical emergency to the point of irreversible brain damage from which point successful resuscitation is greatly reduced – especially for patients that are pulseless and not breathing. Nationally, high performing EMS systems have a generally accepted response time goal of 8:59 minutes from onset to arrival at the scene. Other measures of response consider time from dispatch to arrival at the scene. The "Gold Standard" for cardiac arrest survival, validated by experience in Contra Costa County, is bystander CPR and AED, which relies on community CPR, law enforcement AED and Public Access Defibrillation to improve chances of survival.¹⁵⁴

¹⁵⁴ Correspondence with Pat Frost, Contra Costa Health Services, April 15, 2016.

Adequacy

Firefighting adequacy is determined by several factors, including the time elapsed between the origin of a fire and the initiation of firefighting activities. To illustrate this concept, the following materials describe the staffing and equipment resources required to successfully suppress and extinguish a fire. The situation describes the response times and equipment for a moderate-risk fire in a two-story 2,000 sq. ft. +/- home to contain the fire to the room or compartment/area of origin.

Well-trained and effective firefighting personnel perform their duties in a manner designed for maximum efficiency, effectiveness and safety. They train on a regular basis on performance of firefighting “evolutions.” Evolutions involve the performance of different activities that provide for firefighting activities to be completed in a minimum amount of time. The materials below contain references to a number of these activities.

The tasks and evolutions that are commonly required of firefighting personnel to effectively contain a fire to the room or area of origin may require between 11 and 14 personnel performing a variety of tasks in a coordinated manner. These include:

Within 6 minutes and 45 seconds of notification of an emergency to the dispatch center, the first due fire engine arrives and should be capable of advancing an attack hose line with a fire flow of at least 150 gallons per minute of water from the onboard 500-gallon water tank.

The balance of the required fire apparatus and fire personnel, referred to as the effective response force (ERF), should arrive at the scene within a total of 11 minutes from the incident notification to the dispatch center.

A list of common tasks and required evolutions at a moderate risk structure fire includes:

- Establish command;
- Conduct scene assessment;
- Communicate the plan of action to involved personnel;
- Request additional resources as needed;
- Prepare for rescue operations of occupants as needed;
- Establish an uninterrupted water supply to provide water;
- Establish a scene safety officer;
- Establish the two in two out and rapid intervention crews;
- Provide additional fire attack lines;

[Return to Agenda](#)

- Establish back up and exposure protection hose lines;
- Assign personnel to ventilate the fire, heat and smoke from the structure;
- Conduct primary and secondary search of the structure;
- Secure and control utilities; and
- Perform salvage operations of personal property and overhaul fire damaged areas to extinguish all fire within the structure.

The order of task assignment and deployment of fire personnel is determined by the incident commander, and is dictated by the dynamics related to that particular fire.

Task	Fire Personnel	Company
Command/Size Up	1	Battalion Chief
Fire Attack Lines	2	1st Engine
Pump Operator	1	1st Engine
Primary Search/Rescue	2	2nd Engine
Water Supply	1	2nd Engine
Two Out/Utilities and Safety	3	3rd Engine
Ventilation/Ladders	2	1st Truck company
Forcible Entry/Search/Rescue Support	2	1st truck company
Total Initial Fire Attack Personnel	14	5 fire apparatus

2009 EMS/FIRE MSR – STATUS OF SOI UPDATES

2009 EMS/Fire MSR – Status of SOI Updates

AGENCY	SOI UPDATE
County Service Area (CSA) EM-1	Retained existing coterminous SOI
Contra Costa County Fire Protection District (ConFire)	Expanded SOI to include area southeast of Clayton, Roddy Ranch area, eastern boundary areas in the cities of Antioch and Pittsburg already served by ConFire; removed from SOI Bogue Ranch area previously annexed to SRVFPD, and 101 acres in Orinda previously annexed to MOFD; and continued to exclude from SOI the western boundary areas (i.e., City of San Pablo, and unincorporated areas including Bayview, East Richmond Heights, El Sobrante, Montalvin Manor, North Richmond, Tara Hills) in anticipation of a future West County fire consolidation
Crockett-Carquinez Fire Protection District (CCFPD)	Deferred SOI update pending the formation of a West County Ad Hoc Committee to address issues raised in the 2009 MSR report
East Contra Costa Fire Protection District (ECCFPD)	Removed from SOI Roddy Ranch property
Kensington Fire Protection District (KFPD)	Deferred SOI update pending the formation of a West County Ad Hoc Committee to address issues raised in the 2009 MSR report and to complete MSR for Kensington CSD
Moraga Orinda Fire District (MOFD)	Expanded SOI to include 101 acres previously annexed to MOFD
Rodeo Hercules Fire Protection District (RHFPD)	Deferred SOI update pending the formation of a West County Ad Hoc Committee to address issues raised in the 2009 MSR report
San Ramon Valley Fire Protection District (SRVFPD)	Expanded SOI to include previously annexed areas (Tassajara Valley/Morgan Territory, Bogue Ranch)
City of El Cerrito	Retained existing SOI following West County Sub-regional MSR covering city services
City of Pinole	Retained existing SOI following West County Sub-regional MSR covering city services
City of Richmond	Removed from the SOI areas east of Bonita Road and at North Arlington

Appendix E

FIRE BRIGADES

FIRE BRIGADES

Private Fire Brigades – Within Contra Costa County, there are four fuel refineries (Chevron, ConocoPhillips, Shell, and Tesoro), one large chemical plant complex (Dow Chemical), and one large sugar processing plant (C&H Sugar).

One refinery, Chevron, has a full-time, paid fire department. The others operate fire brigades, with a manager functioning as the Fire Chief in addition to other duties. Initial attack response capabilities for these six facilities are summarized as follows:

- Chevron (Richmond) – Chevron operates its own, private fire department, which is comprised of 31 full-time personnel, including a full-time Fire Chief, six subordinate Chief Officers, Captains, Lieutenants, and Firefighters. Chevron Fire has an on-duty daily minimum staffing level of four (4) personnel, who are supplemented by 10-15 Operators.
- Chevron Fire employs an Emergency Response Preparedness Coordinator (ERPC), who is a direct report to the Fire Chief.
- Chevron Fire has an operating agreement with the City of Richmond Fire Department.
- ConocoPhillips (Hercules) – Conoco operates a private fire brigade, comprised of Operators who work at the refinery.
- ConocoPhillips has an operating agreement with the Rodeo-Hercules Fire District.
- Shell (Martinez) – Shell operates a private fire brigade, comprised of Operators who work at the refinery.
- Tesoro (Unincorporated Contra Costa County) – Tesoro operates a private fire brigade, comprised of Operators who work at the refinery.
- Dow Chemical (Pittsburgh) – Dow Chemical operates a private fire brigade, comprised of Operators who work at the site.
- C&H Sugar (Crockett) – C&H Sugar operates a private fire brigade, comprised of Operators who work at the site.

All refineries have members that attend biannual or annual refinery training at the Texas A & M Engineering Extension (TEEX) facility in Texas.

Chevron Fire is presently aligned with the California State Fire Training standards for Firefighter-I and II; Hazardous Materials Technician and Specialist; and TEEX. Chevron Fire offers training opportunities for local government firefighters through its training center and free TEEX courses in Texas.

Return to Agenda

C&H Sugar and Tesoro lie outside any fire district boundary in unincorporated areas of the County.

Presently, local government fire service agencies are expected to respond to both routine and major emergencies at all these facilities to provide personnel, equipment, ALS first-responder medical care, ALS ambulance transport, and fire investigation. These responses are provided either through automatic-aid, mutual-aid, or as the AHJ.

Mutual Aid from the refineries is infrequent and only Chevron could provide services other than petro-chemical emergency response off-site.

These facilities have the operational and overhead capacity to handle small incidents without mutual aid from local government agencies. Medium and large incidents require support and management from local agencies. Large incidents, particularly those involving off-site releases, require the use of an incident management team (IMT), the activation of emergency operations center(s) (EOCs), and public information functions. These are not presently well defined or exercised.

In 1980, several refineries signed a cooperative mutual aid agreement, known as the Petro-Chemical Mutual Aid Organization (PMAO). This emergency response cooperative was formed with the purpose of providing materials and equipment during an emergency. Presently, all four refineries, Dow Chemical, the Valero refinery (in Benicia), ConFire, and West Sacramento Fire are participating members. PMAO meets monthly. Emergency services include specially trained personnel, high capacity fire pumps, and large quantities of firefighting foam. These resources are also available to municipal fire agencies for large petro-chemical incidents through mutual-aid requests. PMAO mutual-aid response capabilities are organized into four (4) taskforces, which are categorized as follows:

1. Firefighting tactics
2. Foam and water supply tactics
3. Tank fire suppression (tanks <200-ft in diameter)
4. Tank fire suppression (tanks >200-ft in diameter)

The PMAO agreement is not integrated into the County Mutual Aid Plan.

Source: Fire Chief Stephen Healy, MOFD, Contra Costa County Operational Area mutual aid Coordinator; Lewis Broschard III, Deputy Chief, ConFire.

ATTACHMENT H

Likely Voter Survey

City of Pinole

November 2019

- ▶ Survey of likely November 2020 voters in Pinole, California
- ▶ Hybrid phone and email-to-web methodology
- ▶ Survey conducted November 4 – 12, 2019
- ▶ 426 interviews; overall margin of error ± 4.75 percentage points
- ▶ Surveys conducted by phone were done by trained, professional interviewers; landlines and mobile phones included
- ▶ Respondents were sent an email invitation with a link to take the survey online
- ▶ Offered in English and Spanish

Please note that due to rounding, some percentages may not add up to exactly 100%.

- ▶ Voters in Pinole are feeling optimistic about the direction of the City and rate City services very favorably.
- ▶ A potential \$698 parcel tax to fund enhanced fire services falls short of the two-thirds threshold needed for passage.
- ▶ An alternate option of \$498 to re-open Fire Station 74 and continue providing services independently also falls short of two-thirds.
- ▶ Additional information does not move the needle in terms of support for the measure, but modest opposition messaging does negatively impact support.

[Return to Agenda](#)

Issue Environment

Right Direction/Wrong Track

[Return to Agenda](#)

Voters are feeling optimistic about the direction of the City.

Q4. Do you feel that things in the City of Pinole are generally going in the right direction or do you feel things have gotten pretty seriously off on the wrong track?

896 of 936

Most Important Problem

[Return to Agenda](#)

There is not one single top of mind issue for voters, but transportation and public services spending rise to the top.

Pinole Favorable Ratings

[Return to Agenda](#)

Voters have a very favorable opinion of the Pinole Fire Department. The Pinole Police Department is also viewed favorably, albeit with less intensity. One-third of Pinole voters cannot rate the City Council, but it is generally viewed favorably by those with an opinion.

Q6-8. I'm going to read you a list of several people and organizations. Please tell me if you have a strongly favorable, somewhat favorable, somewhat unfavorable or strongly unfavorable opinion of each one. If you have never heard of one, please just say so.

898 of 936

Satisfaction with City Services

[Return to Agenda](#)

Voters are satisfied with the overall quality of life in Pinole, and the City's fire services receive a strong satisfaction rating.

Q9-13. Would you say you are very satisfied, somewhat satisfied, somewhat dissatisfied or very dissatisfied with each of the following in Pinole?

899 of 936

Agree/Disagree Statements

[Return to Agenda](#)

There is satisfaction with the current level of service provided by the PFD. While a majority agree it is crucial to have high quality fire services, even if it means raising taxes, a majority also indicate they will vote against any new tax measures.

Q27-30. Please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree with each of the following statements.

900 of 936

[Return to Agenda](#)

Support for a Potential Parcel Tax

Initial Vote – \$698 Parcel Tax

[Return to Agenda](#)

A majority of residents initially support a \$698 Parcel Tax, but the initial support falls well-short of the two-thirds threshold required for passage.

To re-open Fire Station 74 on Pinole Valley Road to improve 911 response times, increase disaster response capabilities, and enhance fire protection services by contracting with Contra Costa Fire Protection District, shall the City of Pinole adopt a measure to levy \$698 per single family parcel, other parcel types at specified rates, until ended by voters, raising \$4,500,000 annually, with exemptions for low-income seniors, with all money spent on fire protection services in Pinole?

If the election were held today, would you vote yes to approve or no to reject this measure?

Initial Vote – Alternative Option

[Return to Agenda](#)

Opinion is evenly split on the \$498 alternative parcel tax option.

Based on what you heard, would you vote yes to approve or no to reject this option?

*The City of Pinole could consider an alternate option to the measure you just heard. This option would result in the City reopening Fire Station 74 and continuing to provide fire protection services independently. This option would **NOT** include additional service capacity with Contra Costa Fire Protection District, and the annual levy would be \$498 per parcel per year, raising approximately \$3,000,000 annually.*

Measure Components Importance

[Return to Agenda](#)

Top measure components include the requirement that all funds be spent in Pinole on fire protection, and improving 911 response times. Retaining quality firefighters, and enhancing disaster response are also very important.

Q16-26. I'm going to read you a list of items that this measure could help pay for. After each one, please rate how important that item is to you, using a scale of 1 to 7, where 1 means not at all important, and 7 means extremely important.

904 of 936

Measure Components Importance (Cont.)

[Return to Agenda](#)

Less important to voters (but still important overall) are the expansion of the Contra Costa Fire Protection District partnership, and increasing the number of firefighters in Pinole. Re-opening Station 74 is rated as unimportant to 1-in-5 voters.

Q16-26. I'm going to read you a list of items that this measure could help pay for. After each one, please rate how important that item is to you, using a scale of 1 to 7, where 1 means not at all important, and 7 means extremely important.

905 of 936

Parcel Tax Support Statements

[Return to Agenda](#)

That the great majority of calls routed to the PFD are medical emergencies is the most convincing reason to support a measure that increases fire protection services in the City. Medical response improvements are a compelling theme.

Nearly eighty percent of 911 calls routed to the fire department are medical emergencies. Firefighters are the first to arrive, and have a paramedic with them. This measure will provide resources so emergency help comes quickly.

This measure will help local firefighters better prepare for fighting wildfires by enhancing fire prevention services including increasing inspections, controlling weeds, tall grass, and brush and providing additional training.

Inadequate funding forced the City to close a fire station. This measure would provide additional revenue to hire more firefighters, reopen an additional fire station, and to improve response throughout our community.

Right now we must depend on help from other fire agencies when there is more than one fire department emergency. This measure would increase the number of available firefighters and equipment so help comes more quickly.

This measure will allow the City to reopen Fire Station 74 on Pinole Valley Road. This means improved 9-1-1 fire and medical response times, more and better trained firefighters, and first responders on both sides of Highway 80.

Parcel Tax Support Statements

[Return to Agenda](#)

Voters are less convinced by information focused on population growth and hiring and training of firefighters.

This measure guarantees that the money raised by this measure will be spent on fire protection and emergency response services. Strict financial accountability provisions will ensure that money is spent properly and not used for any other purpose.

This measure offers the best protection for our community, by re-opening Fire Station 74 and entering the City into a partnership with the Contra Costa Fire Protection District, so our firefighters have access to the best training.

Fire and medical emergency call volume has increased in the past several years, and with the population in our region growing we need this measure now so we can protect fire services in Pinole from being overwhelmed in the future.

This measure will provide our local firefighters with additional training, resources, and flexibility so that they can better serve our community.

Vote After Support – \$698 Parcel Tax

[Return to Agenda](#)

After additional information, there is not a significant change in voters' approval of the measure.

Q40. Given what you've heard, I'd like to ask you about the measure again... If the election were held today, would you vote yes to approve or no to reject this measure?

Parcel Tax Opposition Statements

[Return to Agenda](#)

Potential opposition arguments are compelling to voters.

Q41-43. Next, I'd like to read you statements that people who oppose the proposed measure for Pinole might say. After each one, please tell me how convincing that statement is as a reason to vote against the measure.

Vote After Potential Opposition

[Return to Agenda](#)

Even modest opposition messaging erodes support for a potential measure.

Q44. Now given everything you've heard, if the election were held today would you vote yes to approve or no to reject the proposed \$698 per parcel tax in the City of Pinole to fund fire services?

910 of 936

Vote After Information – Alternative Option

[Return to Agenda](#)

After messaging, the alternative option that sees a lesser per-parcel levy on residents is not viewed more favorably by a significant margin.

Q45. Lastly, if the election were held today would you vote yes to approve or no to reject the alternate option... with an annual levy of \$498 per parcel per year in the City of Pinole to fund fire services?

911 of 936

- ▶ Voters are satisfied with current service levels and indicate a potential willingness to invest in fire services.
- ▶ A potential parcel tax to fund maintained or enhanced fire services in Pinole does may be challenging at this time at the tax amount tested.
- ▶ This research could provide opportunities to refine the ballot language, based on known interests of the community, in the event re-testing language next year is of interest to the City.
- ▶ Should the City place a measure on a future ballot, a privately funded campaign effort is recommended.

CITY COUNCIL REPORT

Administrative Fire Captain Duties and Responsibilities

- **Report Management System (RMS) Administration**
 - Our Fire RMS system is not operating optimally. Not all incidents generate reports in the software, and of those generated, some reports are retrievable, while others are not. This represents potential serious liability for the City. The solution is to have a program manager who can audit reports, and work with IT to address these systemic problems, thereby facilitating proper completion and archiving of emergency incident reports. The Administrative Captain would be this program manager.
- **Electronic Daily Staffing Software Administration**
 - Currently, PFD is using an antiquated method for managing daily staffing and accountability – pen and paper in a logbook – for payroll and other purposes. PFD is the only fire agency in the County who still does this. Electronic staffing software like Telestaff and CrewSense interface with payroll software and streamline this and other processes such as leave management and overtime assignment. The Administrative Captain would manage this program as well.
- **Policy/Procedure Implementation and Administration**
 - The Fire Department currently has no cogent, cohesive set of departmental policies and procedures.
 - We have contracted with Lexipol, a program designed to address the issue above. However, Lexipol assumes that there is a program manager dedicated to overseeing and administering this endeavor. The Administrative Captain would fill this role.
- **Emergency Medical Services (EMS) Administration**
 - Narcotics tracking and inventory
 - Management/administration of the County-mandated software for narcotics tracking.
 - PFD is the only agency in the County who does not have an electronic narcotics tracking system. Currently, we conduct a manual daily inventory on a paper log sheet, then email same to County EMS on a weekly basis. The County EMS Medical Director has mandated that PFD adopt a narcotics tracking software system comparable to other County fire and EMS agencies. The Administrative Captain would serve as this program manager.

- EMS Training Program Design
 - Quarterly classroom instruction
 - Continuing Education (CE)
 - Skills Verification
 - Liaison with contracted skills instructor.
 - Liaison with County EMS Agency (LEMSA)
 - Mandatory Standards Compliance (National, State, and LEMSA)
 - Certification/Accreditation
 - Records Keeping
- **Fire Training**
 - Fire Training Program Design
 - Develop, revise, and evaluate departmental company performance standards
 - Secure training sites
 - Schedule single company drills/Multi-company drills
 - Liaison for new recruits in training academies (Berkeley, Confire, or other)
 - Target Solutions training software administration and assignment of online classes
 - Mandatory standards compliance (NFPA, OSFM)
 - Certification/accreditation
 - Maintain awareness of new developments in the field of firefighter safety and incorporate new developments as appropriate into programs
 - Records keeping
- **Vehicle Maintenance**
 - Scheduling
 - Records keeping
- **Cost Recovery**
 - Management/administration of incident cost recovery program (primarily via motor vehicle accidents and associated auto insurance claims)
- **Departmental Projects**
 - Manage the department's Emergency Operations Plan (EOP) and Emergency Operations Center (EOC)
 - Act as liaison with California Office of Emergency Services and Contra Costa County Emergency Management
 - Other projects as needed
- **Other Essential Duties and Functions**
 - Receive and evaluate a variety of documents, reports, and statistical information for the department

- Prepare and maintain special reports, letters, proposals, and records on fire activities
- Review incident reports
- Prepare and present staff reports and other necessary correspondence
- Oversee and control the purchasing, maintenance, and inventory of all fire related equipment and property including communication equipment, vehicles and related equipment, computer equipment, and safety equipment. Identify additional funding requirements
- Coordinate purchasing of departmental supplies
- Provide administrative oversight and coordination support for all annual employee physicals
- Participate in the department's recruitment and promotional selection processes
- May respond to incidents at the request of the Incident Commander
- Represent the Fire Department to other departments, elected officials, and outside agencies; act as liaison to other agencies; serve on a variety of committees and task forces; attend and participate in professional group meetings
- Act as the departmental safety officer
- Ensure fire personnel are developed to prepare for succession planning within the agency
- Assist the Fire Chief in the development and implementation of a comprehensive strategic plan for the Fire Department
- Develop tactical objectives to reach departmental strategic goals
- Assist the Fire Chief in the annual development and administration of the departmental budget
- Monitor expenditures
- Ensure compliance with financial priorities as determined by the Fire Chief
- Recommend budget adjustments as needed
- Research grant opportunities
- Respond to and resolve citizen inquiries and complaints

CITY COUNCIL REPORT

How Having an Administrative Fire Captain Will Fortify the Fire Department

- **Better Performance**

- Manage the department's Emergency Operations Plan (EOP) and Emergency Operations Center (EOC).
- Act as liaison with California Office of Emergency Services and Contra Costa County Emergency Management.
- Develop, revise, and evaluate departmental company performance standards.
- Assess, analyze, and determine required skills and capabilities of all departmental personnel to meet requirements of job descriptions.
- Provide administrative oversight and coordination support for all annual employee physicals.
- Participate in the department's recruitment and promotional selection processes.
- Provide oversight to the department's apparatus and equipment maintenance program; ensure all Fire Department vehicles, apparatus, and equipment are maintained at a highly operational level.
- May respond to incidents at the request of the Incident Commander.
- Represent the Fire Department to other departments, elected officials, and outside agencies.
- Act as liaison to other agencies; serve on a variety of committees and task forces; attend and participate in professional group meetings.
- Coordinate assigned activities with those of other departments, outside agencies, and organizations.
- Ensure fire personnel are developed to prepare for succession planning within the agency.

- **Better Analytical Ability**

- Administer report management system (RMS), electronic daily staffing software, policy/procedure implementation, emergency medical services (EMS).
- Receive and evaluate a variety of documents, reports, and statistical information for the department.
- Assist the Fire Chief in the development and implementation of a comprehensive strategic plan for the Fire Department.
- Develop tactical objectives to reach departmental strategic goals.
- Prepare and maintain special reports, letters, proposals, and records on fire activities.

- Prepare and present staff reports and other necessary correspondence.
- **Better Trained**
 - Supervise all training functions.
 - Develop training budget and compose various departmental reports relative to training functions.
 - Develop, deliver, and monitor basic on-the-job and advanced training programs.
 - Evaluate in-service training classes and drills to include training exercises on public or private property.
 - Attend, and schedule personnel to attend, outside local and state training classes.
 - Prioritize, formulate, and publish an Annual Training Agenda.
 - Schedule and chair Annual Training Meeting to include establishing training goals and objectives.
 - Develop and maintain a Department Training Manual.
 - Supervise shift and crew during training.
 - Determine subject matter to be taught.
 - Provide for and schedule instructors, training aids, and materials.
- **Better Fiscal Accountability**
 - Oversee and control the purchasing, maintenance, and inventory of all fire related equipment and property including communication equipment, vehicles and related equipment, computer equipment, and safety equipment. Identify additional funding requirements.
 - Coordinate purchasing of departmental supplies.
 - Assist the Fire Chief in the annual development and administration of the departmental budget.
 - Monitor expenditures.
 - Manage incident cost recovery program.
 - Ensure compliance with financial priorities as determined by the Fire Chief.
 - Recommend budget adjustments as needed.
 - Research grant opportunities.
- **Decreased Liability**
 - Assist in directing disaster preparedness and other fire protection programs to minimize the loss of life and property within the community.
 - Act as the departmental safety officer.
 - Review incident reports.
 - Respond to and resolve citizen inquiries and complaints.
 - Establish and maintain training records on all personnel.

- Maintain awareness of new developments in the field of firefighter safety and incorporate new developments as appropriate into programs.
- Ensure that the Fire Department meets accreditation standards.

CITY COUNCIL REPORT

10A

DATE: MARCH 16, 2021

TO: MAYOR AND COUNCIL MEMBERS

FROM: ANDREW MURRAY, CITY MANAGER

SUBJECT: LETTER OF OPPOSITION TO SENATE BILL (SB) 9 REGARDING
INCREASED DENSITY IN SINGLE-FAMILY ZONES

RECOMMENDATION

Staff recommends that the City Council consider approving a letter of opposition, requested by the League of California Cities ("Cal Cities"), to California Senate Bill (SB) 9.

BACKGROUND

SB 9 (attached) was introduced in December 2020. It would require a local government to ministerially approve a housing development containing two residential units on one lot in single-family residential zones and to ministerially approve urban lot splits. Cal Cities has requested that its member cities, of which Pinole is one, submit letters to SB 9's author expressing an oppose unless amended position. City staff has prepared a draft letter of opposition, attached, based on a model provided by Cal Cities, that Council can consider approving. If approved, staff would facilitate the transmittal of the letter.

FISCAL IMPACT

There would be no direct fiscal impact to the City created by submitting a position letter on SB 9.

ATTACHMENTS

- A Text of SB 9
- B Draft Letter of Opposition to SB 9

SENATE BILL**No. 9**

Introduced by Senators Atkins, Caballero, Rubio, and Wiener
(Coauthors: Senators Gonzalez and McGuire)
(Coauthor: Assembly Member Robert Rivas)

December 7, 2020

An act to amend Section 66452.6 of, and to add Sections 65852.21 and 66411.7 to, the Government Code, relating to land use.

LEGISLATIVE COUNSEL'S DIGEST

SB 9, as introduced, Atkins. Housing development: approvals.

The Planning and Zoning Law provides for the creation of accessory dwelling units by local ordinance, or, if a local agency has not adopted an ordinance, by ministerial approval, in accordance with specified standards and conditions.

This bill, among other things, would require a proposed housing development containing 2 residential units within a single-family residential zone to be considered ministerially, without discretionary review or hearing, if the proposed housing development meets certain requirements, including, but not limited to, that the proposed housing development would not require demolition or alteration of housing that is subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of moderate, low, or very low income, that the proposed housing development does not allow for the demolition of more than 25% of the existing exterior structural walls, except as provided, and that the development is not located within a historic district, is not included on the State Historic Resources Inventory, or is not within a site that is legally designated or listed as a city or county landmark or historic property or district.

The bill would set forth what a local agency can and cannot require in approving the construction of 2 residential units, including, but not

limited to, authorizing a city or county to impose objective zoning standards, objective subdivision standards, and objective design standards, as defined, unless those standards would have the effect of physically precluding the construction of up to 2 units, prohibiting the imposition of setback requirements under certain circumstances, and setting maximum setback requirements under all other circumstances.

The Subdivision Map Act vests the authority to regulate and control the design and improvement of subdivisions in the legislative body of a local agency and sets forth procedures governing the local agency's processing, approval, conditional approval or disapproval, and filing of tentative, final, and parcel maps, and the modification of those maps. Under the Subdivision Map Act, an approved or conditionally approved tentative map expires 24 months after its approval or conditional approval or after any additional period of time as prescribed by local ordinance, not to exceed an additional 12 months, except as provided.

This bill, among other things, would require a city or county to ministerially approve a parcel map or tentative and final map for an urban lot split that meets certain requirements, including, but not limited to, that the urban lot split would not require the demolition or alteration of housing that is subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of moderate, low, or very low income, that the parcel is located within a residential zone, and that the parcel is not located within a historic district, is not included on the State Historic Resources Inventory, or is not within a site that is legally designated or listed as a city or county landmark or historic property or district.

The bill would set forth what a local agency can and cannot require in approving an urban lot split, including, but not limited to, authorizing a city or county to impose objective zoning standards, objective subdivision standards, and objective design standards, as defined, unless those standards would have the effect of physically precluding the construction of 2 units on either of the resulting parcels, prohibiting the imposition of setback requirements under certain circumstances, and setting maximum setback requirements under all other circumstances.

The bill would also extend the limit on the additional period that may be provided by ordinance, as described above, from 12 months to 24 months and would make other conforming or nonsubstantive changes.

The California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it

proposes to carry out or approve that may have a significant effect on the environment. CEQA does not apply to the approval of ministerial projects.

This bill, by establishing the ministerial review processes described above, would thereby exempt the approval of projects subject to those processes from CEQA.

The California Coastal Act of 1976 provides for the planning and regulation of development, under a coastal development permit process, within the coastal zone, as defined, that shall be based on various coastal resources planning and management policies set forth in the act.

This bill would exempt a local government from being required to hold public hearings for coastal development permit applications for housing developments and urban lot splits pursuant to the above provisions.

By increasing the duties of local agencies with respect to land use regulations, the bill would impose a state-mandated local program.

The bill would include findings that changes proposed by this bill address a matter of statewide concern rather than a municipal affair and, therefore, apply to all cities, including charter cities.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: yes.

The people of the State of California do enact as follows:

- 1 SECTION 1. Section 65852.21 is added to the Government
- 2 Code, to read:
- 3 65852.21. (a) A proposed housing development containing
- 4 two residential units within a single-family residential zone shall
- 5 be considered ministerially, without discretionary review or a
- 6 hearing, if the proposed housing development meets all of the
- 7 following requirements:
- 8 (1) The parcel subject to the proposed housing development is
- 9 located within a city the boundaries of which include some portion
- 10 of either an urbanized area or urban cluster, as designated by the
- 11 United States Census Bureau, or, for unincorporated areas, a legal

1 parcel wholly within the boundaries of an urbanized area or urban
2 cluster, as designated by the United States Census Bureau.

3 (2) The parcel satisfies the requirements specified in
4 subparagraphs (B) to (K), inclusive, of paragraph (6) of subdivision
5 (a) of Section 65913.4.

6 (3) Notwithstanding any provision of this section or any local
7 law, the proposed housing development would not require
8 demolition or alteration of any of the following types of housing:

9 (A) Housing that is subject to a recorded covenant, ordinance,
10 or law that restricts rents to levels affordable to persons and
11 families of moderate, low, or very low income.

12 (B) Housing that is subject to any form of rent or price control
13 through a public entity's valid exercise of its police power.

14 (C) Housing that has been occupied by a tenant in the last three
15 years.

16 (4) The parcel subject to the proposed housing development is
17 not a parcel on which an owner of residential real property has
18 exercised the owner's rights under Chapter 12.75 (commencing
19 with Section 7060) of Division 7 of Title 1 to withdraw
20 accommodations from rent or lease within 15 years before the date
21 that the development proponent submits an application.

22 (5) The proposed housing development does not allow the
23 demolition of more than 25 percent of the existing exterior
24 structural walls, unless the housing development meets at least
25 one of the following conditions:

26 (A) If a local ordinance so allows.

27 (B) The site has not been occupied by a tenant in the last three
28 years.

29 (6) The development is not located within a historic district or
30 property included on the State Historic Resources Inventory, as
31 defined in Section 5020.1 of the Public Resources Code, or within
32 a site that is designated or listed as a city or county landmark or
33 historic property or district pursuant to a city or county ordinance.

34 (b) (1) Notwithstanding any local law and except as provided
35 in paragraph (2), a city or county may impose objective zoning
36 standards, objective subdivision standards, and objective design
37 review standards that do not conflict with this section.

38 (2) (A) The city or county shall not impose objective zoning
39 standards, objective subdivision standards, and objective design

1 standards that would have the effect of physically precluding the
2 construction of up to two units.

3 (B) (i) Notwithstanding subparagraph (A), no setback shall be
4 required for an existing structure or a structure constructed in the
5 same location and to the same dimensions as an existing structure.

6 (ii) Notwithstanding subparagraph (A), in all other circumstances
7 not described in clause (i), a local government may require a
8 setback of up to four feet from the side and rear lot lines.

9 (c) In addition to any conditions established in accordance with
10 subdivision (b), a local agency may require any of the following
11 conditions when considering an application for two residential
12 units as provided for in this section:

13 (1) Off-street parking of up to one space per unit, except that a
14 local agency shall not impose parking requirements in either of
15 the following instances:

16 (A) The parcel is located within one-half mile walking distance
17 of either a high-quality transit corridor, as defined in subdivision
18 (b) of Section 21155 of the Public Resources Code, or a major
19 transit stop, as defined in Section 21064.3 of the Public Resources
20 Code.

21 (B) There is a car share vehicle located within one block of the
22 parcel.

23 (2) For residential units connected to an onsite wastewater
24 treatment system, a percolation test completed within the last five
25 years, or, if the percolation test has been recertified, within the last
26 10 years.

27 (d) A local agency shall require that a rental of any unit created
28 pursuant to this section be for a term longer than 30 days.

29 (e) Notwithstanding Section 65852.2, a local agency shall not
30 be required to permit an accessory dwelling unit on parcels that
31 use both the authority contained within this section and the
32 authority contained in Section 66411.7.

33 (f) Notwithstanding subparagraph (B) of paragraph (2) of
34 subdivision (b), an application shall not be rejected solely because
35 it proposes adjacent or connected structures provided that the
36 structures meet building code safety standards and are sufficient
37 to allow separate conveyance.

38 (g) Local agencies shall include units constructed pursuant to
39 this section in the annual housing element report as required by

1 subparagraph (I) of paragraph (2) of subdivision (a) of Section
2 65400.

3 (h) For purposes of this section, all of the following apply:

4 (1) A housing development contains two residential units if the
5 development proposes two new units or if it proposes to add one
6 new unit to an existing unit.

7 (2) The terms “objective zoning standards,” “objective
8 subdivision standards,” and “objective design review standards”
9 mean standards that involve no personal or subjective judgment
10 by a public official and are uniformly verifiable by reference to
11 an external and uniform benchmark or criterion available and
12 knowable by both the development applicant or proponent and the
13 public official prior to submittal. These standards may be embodied
14 in alternative objective land use specifications adopted by a city
15 or county, and may include, but are not limited to, housing overlay
16 zones, specific plans, inclusionary zoning ordinances, and density
17 bonus ordinances.

18 (i) A local agency may adopt an ordinance to implement the
19 provisions of this section. An ordinance adopted to implement this
20 section shall not be considered a project under Division 13
21 (commencing with Section 21000) of the Public Resources Code.

22 (j) Nothing in this section shall be construed to supersede or in
23 any way alter or lessen the effect or application of the California
24 Coastal Act of 1976 (Division 20 (commencing with Section
25 30000) of the Public Resources Code), except that the local
26 government shall not be required to hold public hearings for coastal
27 development permit applications for a housing development
28 pursuant to this section.

29 SEC. 2. Section 66411.7 is added to the Government Code, to
30 read:

31 66411.7. (a) Notwithstanding any other provision of this
32 division and any local law, a city or county shall ministerially
33 approve, as set forth in this section, a parcel map or tentative and
34 final map for an urban lot split that meets all the following
35 requirements:

36 (1) The parcel map or tentative and final map subdivides an
37 existing parcel to create two new parcels of equal size.

38 (2) (A) Except as provided in subparagraph (B), both newly
39 created parcels are no smaller than 1,200 square feet.

1 (B) A local agency may by ordinance adopt a smaller minimum
2 lot size subject to ministerial approval under this subdivision.

3 (3) The parcel being subdivided meets all the following
4 requirements:

5 (A) The parcel is located within a residential zone.

6 (B) The parcel subject to the proposed urban lot split is located
7 within a city the boundaries of which include some portion of
8 either an urbanized area or urban cluster, as designated by the
9 United States Census Bureau, or, for unincorporated areas, a legal
10 parcel wholly within the boundaries of an urbanized area or urban
11 cluster, as designated by the United States Census Bureau.

12 (C) The parcel satisfies the requirements specified in
13 subparagraphs (B) to (K), inclusive, of paragraph (6) of subdivision
14 (a) of Section 65913.4.

15 (D) The proposed urban lot split would not require demolition
16 or alteration of any of the following types of housing:

17 (i) Housing that is subject to a recorded covenant, ordinance,
18 or law that restricts rents to levels affordable to persons and
19 families of moderate, low, or very low income.

20 (ii) Housing that is subject to any form of rent or price control
21 through a public entity's valid exercise of its police power.

22 (iii) A parcel or parcels on which an owner of residential real
23 property has exercised the owner's rights under Chapter 12.75
24 (commencing with Section 7060) of Division 7 of Title 1 to
25 withdraw accommodations from rent or lease within 15 years
26 before the date that the development proponent submits an
27 application.

28 (iv) Housing that has been occupied by a tenant in the last three
29 years.

30 (E) The parcel is not located within a historic district or property
31 included on the State Historic Resources Inventory, as defined in
32 Section 5020.1 of the Public Resources Code, or within a site that
33 is designated or listed as a city or county landmark or historic
34 property or district pursuant to a city or county ordinance.

35 (F) The parcel has not been established through prior exercise
36 of an urban lot split as provided for in this section.

37 (G) Neither the owner of the parcel being subdivided nor any
38 person acting in concert with the owner has previously subdivided
39 an adjacent parcel using an urban lot split as provided for in this
40 section.

(b) An application for an urban lot split shall be approved in accordance with the following requirements:

(1) A local agency shall approve or deny an application for an urban lot split ministerially without discretionary review.

(2) A local agency shall approve an urban lot split only if it conforms to all applicable objective requirements of the Subdivision Map Act (Division 2 (commencing with Section 66410)), except as otherwise expressly provided in this section.

(3) Notwithstanding Section 66411.1, a local agency shall not impose regulations that require dedications of rights-of-way or the construction of offsite improvements for the parcels being created as a condition of issuing a parcel map or tentative and final map for an urban lot split.

(c) (1) Except as provided in paragraph (2), notwithstanding any local law, a city or county may impose objective zoning standards, objective subdivision standards, and objective design review standards applicable to a parcel created by an urban lot split that do not conflict with this section.

(2) A local agency shall not impose objective zoning standards, objective subdivision standards, and objective design review standards that would have the effect of physically precluding the construction of two units on either of the resulting parcels.

(3) (A) Notwithstanding paragraph (2), no setback shall be required for an existing structure or a structure constructed in the same location and to the same dimensions as an existing structure.

(B) Notwithstanding paragraph (2), in all other circumstances not described in subparagraph (A), a local government may require a setback of up to four feet from the side and rear lot lines.

(d) In addition to any conditions established in accordance with subdivision (c), a local agency may require any of the following conditions when considering an application for an urban lot split:

(1) Easements required for the provision of public services and facilities.

(2) A requirement that the parcels have access to, provide access to, or adjoin the public right-of-way.

(3) Off-street parking of up to one space per unit, except that a local agency shall not impose parking requirements in either of the following instances:

(A) The parcel is located within one-half mile walking distance of either a high-quality transit corridor as defined in subdivision

1 (b) of Section 21155 of the Public Resources Code, or a major
2 transit stop as defined in Section 21064.3 of the Public Resources
3 Code.

4 (B) There is a car share vehicle located within one block of the
5 parcel.

6 (e) A local agency shall require that the uses allowed on a lot
7 created by this section be limited to residential uses.

8 (f) A local agency shall require that a rental of any unit created
9 pursuant to this section be for a term longer than 30 days.

10 (g) A local agency shall not require, as a condition for ministerial
11 approval of a permit application for the creation of an urban lot
12 split, the correction of nonconforming zoning conditions.

13 (h) Notwithstanding Section 65852.2, a local agency shall not
14 be required to permit an accessory dwelling unit on parcels that
15 use both the authority contained within this section and the
16 authority contained in Section 65852.21.

17 (i) Notwithstanding paragraph (3) of subdivision (c), an
18 application shall not be rejected solely because it proposes adjacent
19 or connected structures provided that the structures meet building
20 code safety standards and are sufficient to allow separate
21 conveyance.

22 (j) Local agencies shall include the number of applications for
23 urban lot splits pursuant to this section in the annual housing
24 element report as required by subparagraph (I) of paragraph (2)
25 of subdivision (a) of Section 65400.

26 (k) For purposes of this section, the terms “objective zoning
27 standards,” “objective subdivision standards,” and “objective
28 design review standards” mean standards that involve no personal
29 or subjective judgment by a public official and are uniformly
30 verifiable by reference to an external and uniform benchmark or
31 criterion available and knowable by both the development applicant
32 or proponent and the public official prior to submittal. These
33 standards may be embodied in alternative objective land use
34 specifications adopted by a city or county, and may include, but
35 are not limited to, housing overlay zones, specific plans,
36 inclusionary zoning ordinances, and density bonus ordinances.

37 (l) A local agency may adopt an ordinance to implement the
38 provisions of this section. An ordinance adopted to implement this
39 section shall not be considered a project under Division 13
40 (commencing with Section 21000) of the Public Resources Code.

(m) Nothing in this section shall be construed to supersede or in any way alter or lessen the effect or application of the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code), except that the local government shall not be required to hold public hearings for coastal development permit applications for urban lot splits pursuant to this section.

SEC. 3. Section 66452.6 of the Government Code is amended to read:

66452.6. (a) (1) An approved or conditionally approved tentative map shall expire 24 months after its approval or conditional approval, or after any additional period of time as may be prescribed by local ordinance, not to exceed an additional 24 months. However, if the subdivider is required to expend two hundred thirty-six thousand seven hundred ninety dollars (\$236,790) or more to construct, improve, or finance the construction or improvement of public improvements outside the property boundaries of the tentative map, excluding improvements of public rights-of-way ~~which~~ *that* abut the boundary of the property to be subdivided and ~~which~~ *that* are reasonably related to the development of that property, each filing of a final map authorized by Section 66456.1 shall extend the expiration of the approved or conditionally approved tentative map by ~~36~~ 48 months from the date of its expiration, as provided in this section, or the date of the previously filed final map, whichever is later. The extensions shall not extend the tentative map more than 10 years from its approval or conditional approval. However, a tentative map on property subject to a development agreement authorized by Article 2.5 (commencing with Section 65864) of Chapter 4 of Division 1 may be extended for the period of time provided for in the agreement, but not beyond the duration of the agreement. The number of phased final maps that may be filed shall be determined by the advisory agency at the time of the approval or conditional approval of the tentative map.

(2) Commencing January 1, 2012, and each calendar year thereafter, the amount of two hundred thirty-six thousand seven hundred ninety dollars (\$236,790) shall be annually increased by operation of law according to the adjustment for inflation set forth in the statewide cost index for class B construction, as determined by the State Allocation Board at its January meeting. The effective

1 date of each annual adjustment shall be March 1. The adjusted
2 amount shall apply to tentative and vesting tentative maps whose
3 applications were received after the effective date of the
4 adjustment.

5 (3) "Public improvements," as used in this subdivision, include
6 traffic controls, streets, roads, highways, freeways, bridges,
7 overcrossings, street interchanges, flood control or storm drain
8 facilities, sewer facilities, water facilities, and lighting facilities.

9 (b) (1) The period of time specified in subdivision (a), including
10 any extension thereof granted pursuant to subdivision (e), shall
11 not include any period of time during which a development
12 moratorium, imposed after approval of the tentative map, is in
13 existence. However, the length of the moratorium shall not exceed
14 five years.

15 (2) The length of time specified in paragraph (1) shall be
16 extended for up to three years, but in no event beyond January 1,
17 1992, during the pendency of any lawsuit in which the subdivider
18 asserts, and the local agency ~~which~~ *that* approved or conditionally
19 approved the tentative map denies, the existence or application of
20 a development moratorium to the tentative map.

21 (3) Once a development moratorium is terminated, the map
22 shall be valid for the same period of time as was left to run on the
23 map at the time that the moratorium was imposed. However, if the
24 remaining time is less than 120 days, the map shall be valid for
25 120 days following the termination of the moratorium.

26 (c) The period of time specified in subdivision (a), including
27 any extension thereof granted pursuant to subdivision (e), shall
28 not include the period of time during which a lawsuit involving
29 the approval or conditional approval of the tentative map is or was
30 pending in a court of competent jurisdiction, if the stay of the time
31 period is approved by the local agency pursuant to this section.
32 After service of the initial petition or complaint in the lawsuit upon
33 the local agency, the subdivider may apply to the local agency for
34 a stay pursuant to the local agency's adopted procedures. Within
35 40 days after receiving the application, the local agency shall either
36 stay the time period for up to five years or deny the requested stay.
37 The local agency may, by ordinance, establish procedures for
38 reviewing the requests, including, but not limited to, notice and
39 hearing requirements, appeal procedures, and other administrative
40 requirements.

(d) The expiration of the approved or conditionally approved tentative map shall terminate all proceedings and no final map or parcel map of all or any portion of the real property included within the tentative map shall be filed with the legislative body without first processing a new tentative map. Once a timely filing is made, subsequent actions of the local agency, including, but not limited to, processing, approving, and recording, may lawfully occur after the date of expiration of the tentative map. Delivery to the county surveyor or city engineer shall be deemed a timely filing for purposes of this section.

(e) Upon application of the subdivider filed ~~prior to~~ *before* the expiration of the approved or conditionally approved tentative map, the time at which the map expires pursuant to subdivision (a) may be extended by the legislative body or by an advisory agency authorized to approve or conditionally approve tentative maps for a period or periods not exceeding a total of six years. The period of extension specified in this subdivision shall be in addition to the period of time provided by subdivision (a). ~~Prior to~~ *Before* the expiration of an approved or conditionally approved tentative map, upon an application by the subdivider to extend that map, the map shall automatically be extended for 60 days or until the application for the extension is approved, conditionally approved, or denied, whichever occurs first. If the advisory agency denies a subdivider's application for an extension, the subdivider may appeal to the legislative body within 15 days after the advisory agency has denied the extension.

(f) For purposes of this section, a development moratorium includes a water or sewer moratorium, or a water and sewer moratorium, as well as other actions of public agencies ~~which~~ *that* regulate land use, development, or the provision of services to the land, including the public agency with the authority to approve or conditionally approve the tentative map, which thereafter prevents, prohibits, or delays the approval of a final or parcel map. A development moratorium shall also be deemed to exist for purposes of this section for any period of time during which a condition imposed by the city or county could not be satisfied because of either of the following:

(1) The condition was one that, by its nature, necessitated action by the city or county, and the city or county either did not take the necessary action or by its own action or inaction was prevented or

1 delayed in taking the necessary action ~~prior to~~ *before* expiration
2 of the tentative map.

3 (2) The condition necessitates acquisition of real property or
4 any interest in real property from a public agency, other than the
5 city or county that approved or conditionally approved the tentative
6 map, and that other public agency fails or refuses to convey the
7 property interest necessary to satisfy the condition. However,
8 nothing in this subdivision shall be construed to require any public
9 agency to convey any interest in real property owned by it. A
10 development moratorium specified in this paragraph shall be
11 deemed to have been imposed either on the date of approval or
12 conditional approval of the tentative map, if evidence was included
13 in the public record that the public agency ~~which~~ *that* owns or
14 controls the real property or any interest therein may refuse to
15 convey that property or interest, or on the date that the public
16 agency ~~which~~ *that* owns or controls the real property or any interest
17 therein receives an offer by the subdivider to purchase that property
18 or interest for fair market value, whichever is later. A development
19 moratorium specified in this paragraph shall extend the tentative
20 map up to the maximum period as set forth in subdivision (b), but
21 not later than January 1, 1992, so long as the public agency ~~which~~
22 *that* owns or controls the real property or any interest therein fails
23 or refuses to convey the necessary property interest, regardless of
24 the reason for the failure or refusal, except that the development
25 moratorium shall be deemed to terminate 60 days after the public
26 agency has officially made, and communicated to the subdivider,
27 a written offer or commitment binding on the agency to convey
28 the necessary property interest for a fair market value, paid in a
29 reasonable time and manner.

30 SEC. 4. The Legislature finds and declares that ensuring access
31 to affordable housing is a matter of statewide concern and not a
32 municipal affair as that term is used in Section 5 of Article XI of
33 the California Constitution. Therefore, Sections 1 and 2 of this act
34 adding Sections 65852.21 and 66411.7 to the Government Code
35 and Section 3 of this act amending Section 66452.6 of the
36 Government Code apply to all cities, including charter cities.

37 SEC. 5. No reimbursement is required by this act pursuant to
38 Section 6 of Article XIII B of the California Constitution because
39 a local agency or school district has the authority to levy service
40 charges, fees, or assessments sufficient to pay for the program or

- 1 level of service mandated by this act, within the meaning of Section
- 2 17556 of the Government Code.

March 17, 2021

The Honorable Toni Atkins
President Pro Tempore, California State Senate
State Capitol Building, Room 205
Sacramento, CA 95814

**RE: SB 9 (Atkins) Increased Density in Single-Family Zones
Oppose Unless Amended (As Introduced 12/7/2020)**

Dear Senate President pro Tempore Atkins,

The City of Pinole writes to express an Oppose Unless Amended position on your SB 9, which would require a local government to ministerially approve a housing development containing two residential units in single-family residential zones. Additionally, this measure would require local governments to ministerially approve urban lot splits.

Housing affordability and homelessness are among the most critical issues facing California cities. Affordably priced homes are out of reach for many people and housing is not being built fast enough to meet the current or projected needs of people living in the state. Cities lay the groundwork for housing production by planning and zoning new projects in their communities based on extensive public input and engagement, state housing laws, and the needs of the building industry.

While your desire to pursue a housing production proposal is appreciated, unfortunately, SB 9 as currently drafted would not spur much needed housing construction in a manner that supports local flexibility, decision-making, and community input. State driven ministerial or by-right housing approval processes fail to recognize the extensive public engagement associated with developing and adopting zoning ordinances and housing elements that are certified by the California Department of Housing and Community Development (HCD).

The City of Pinole requests the following amendments in order to address our concerns and remove our opposition:

- Clarify that a property owner using SB 9 is limited to constructing two residential units, not two residential units and additional accessory dwelling units (ADUs) on the same parcel;
- Require a housing developer to acquire a building permit within one year of a lot split, so that speculators do not sell lots and never build homes;
- Allow local governments to require adequate access for police, fire, and other public safety vehicles and equipment;
- Prohibit developers from using SB 9 in very high fire hazard severity zones;
- Allow cities to determine a range of lot sizes suitable for SB 9 development projects;
- Ensure HCD provides Regional Housing Needs Allocation (RHNA) credit for production of SB 9 units;

- Allow local governments to take into account local conditions such as hillsides, lot dimensions, natural hazards, available infrastructure, etc. when approving or denying housing project applications;
- Allow local governments to continue to determine parking standards; and
- Ensure large-scale investors and builders do not exploit SB 9 provisions.

The City of Pinole is committed to being part of the solution to the housing shortfall across all income levels and will continue to work collaboratively with you to spur much needed housing construction. Thank you for considering the above amendments.

For these reasons, the City of Pinole opposes SB 9 (Atkins) unless it is amended to address our concerns.

Sincerely,

Norma Martinez-Rubin
Mayor
City of Pinole
